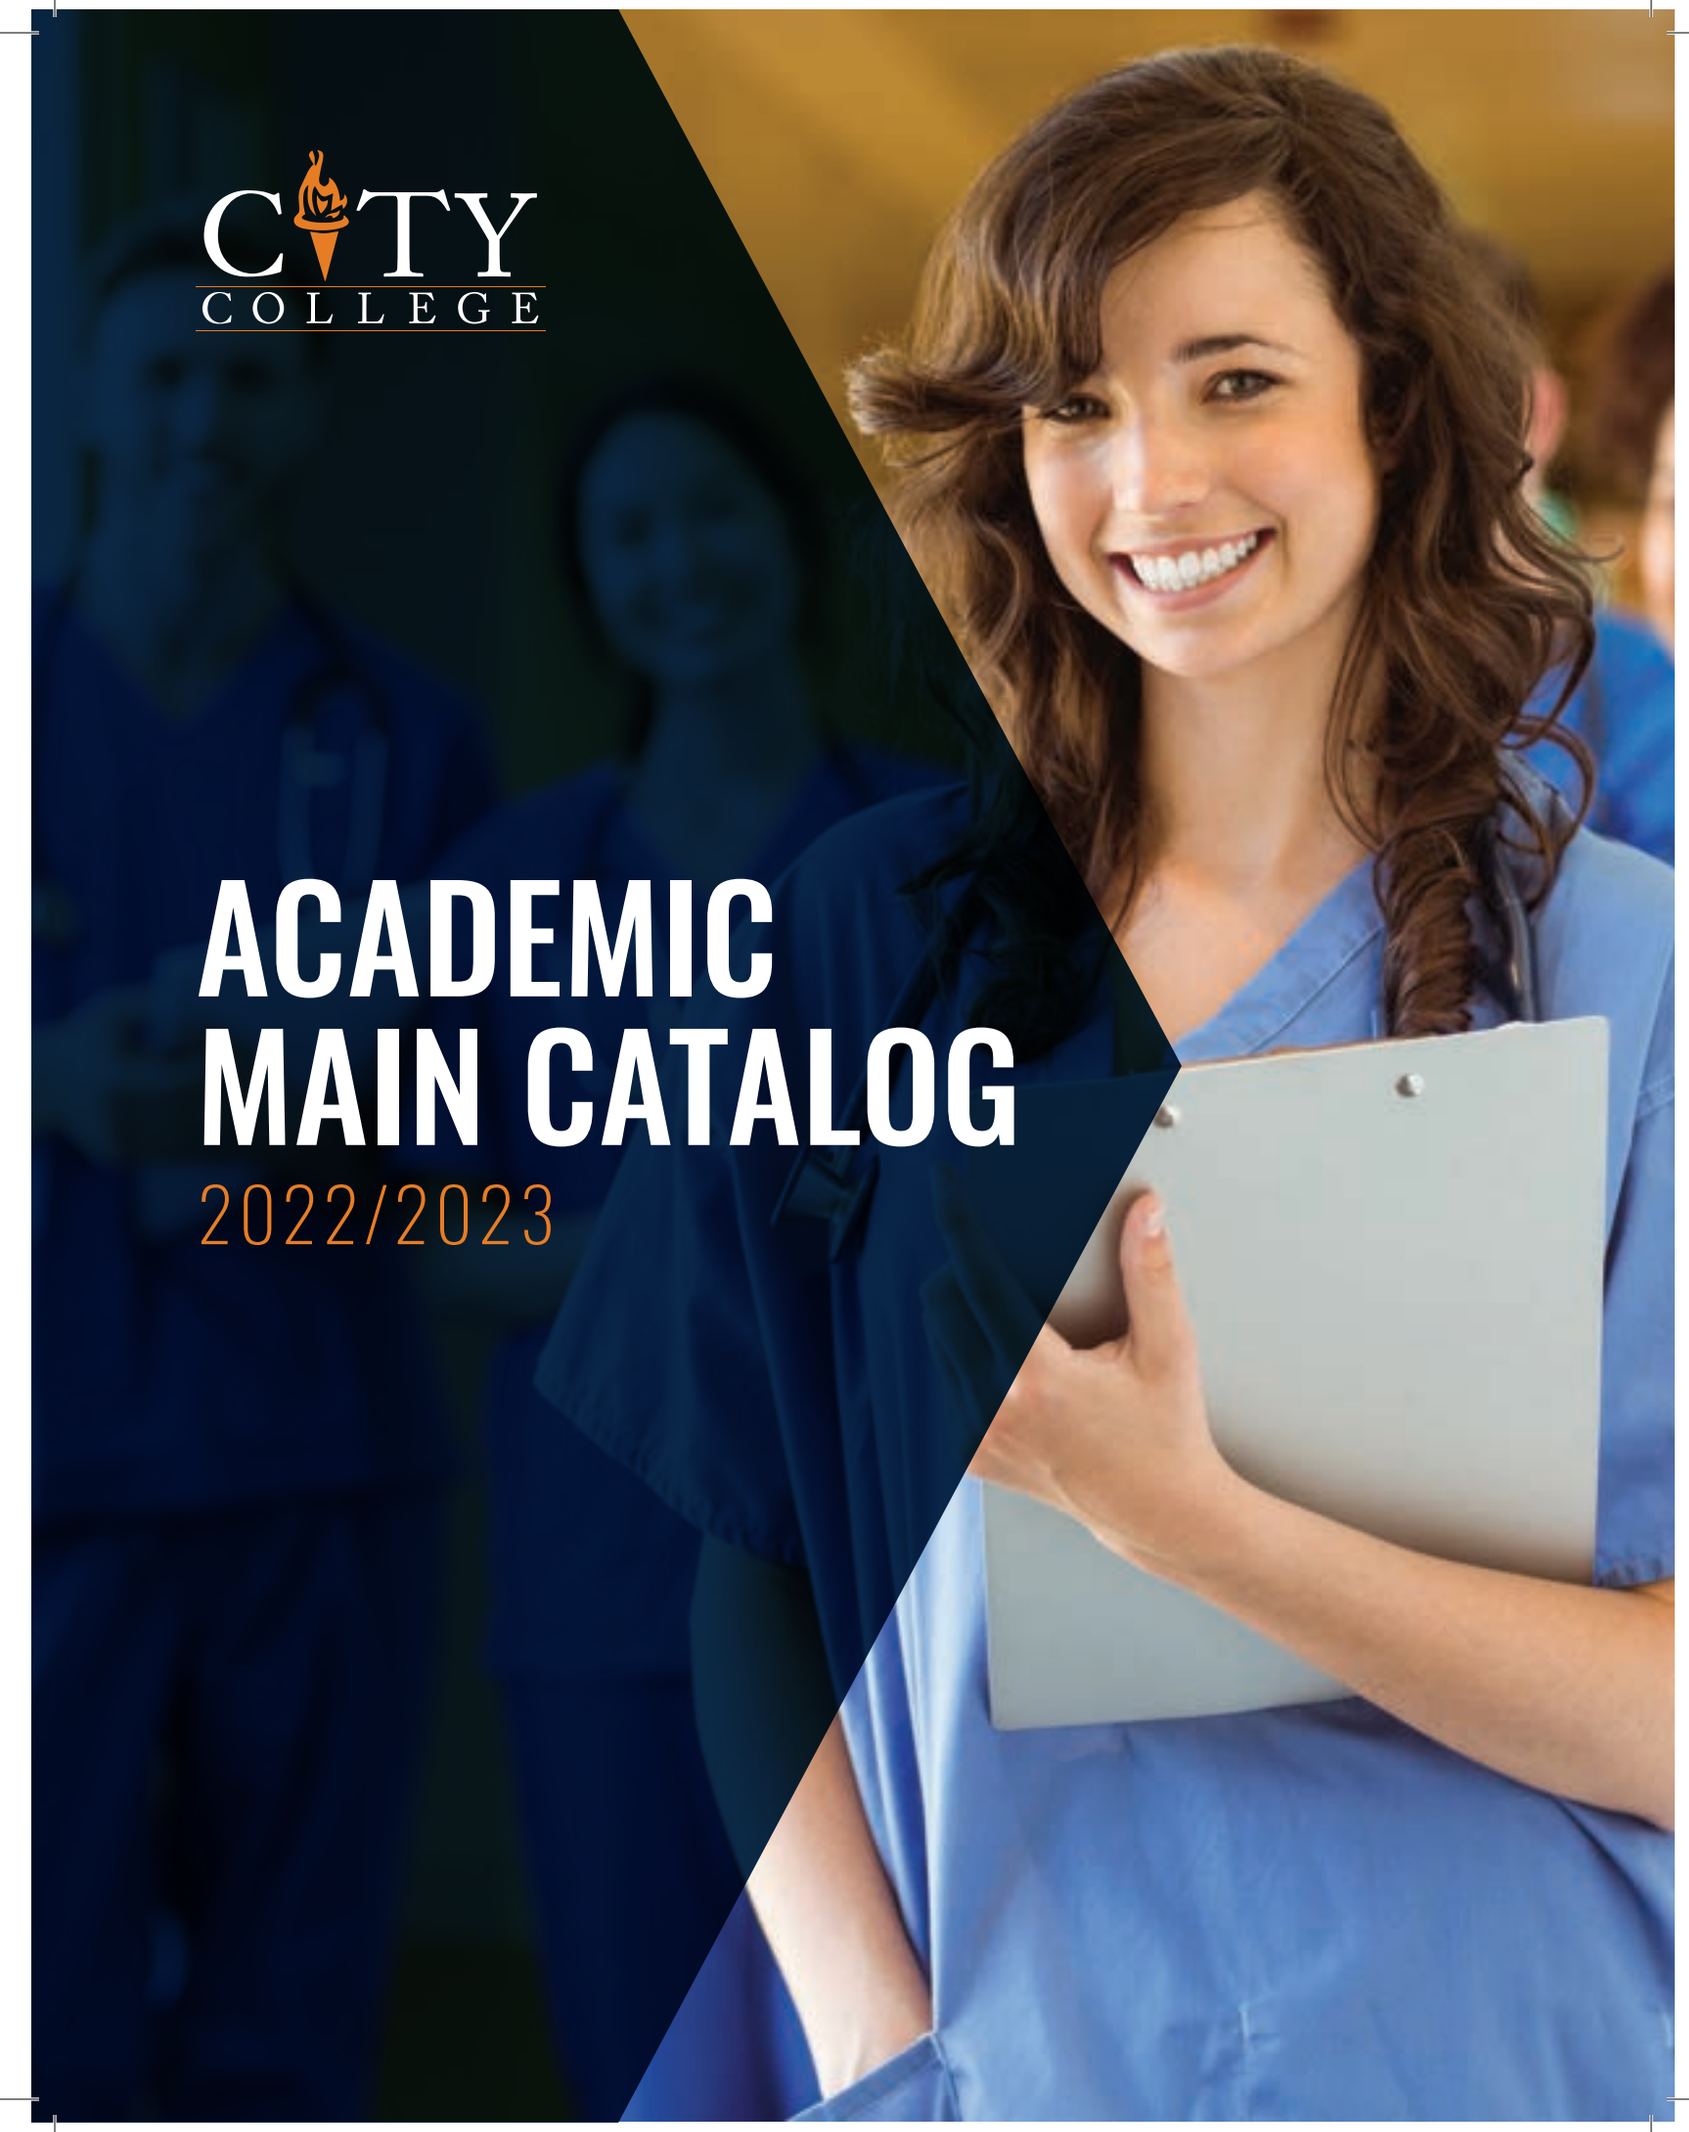
CITY COLLEGE

ACADEMIC MAIN CATALOG

2022/2023



This catalog is current as of the time of printing. The College reserves the right to make changes in course content, equipment, materials, organizational policy, tuition, and curriculum as circumstances dictate, after publication. The College expects its students to have knowledge of the information presented in this catalog and in other publications.

The College is in compliance with the following: Title IV (The Civil Rights Act), Title IX (Discrimination on the Basis of Sex), The Equal Credit Opportunity Act (Discrimination in Lending), and The Age Discrimination Act. City College, 2000 W. Commercial Blvd., Fort Lauderdale, FL; 7001 N.W. 4th Blvd., Gainesville, FL; 6565 Taft Street, Hollywood, FL, and 9300 S. Dadeland Blvd., Miami, FL, admits students of any race, color, national and ethnic origin to all rights, privileges, programs, and activities generally accorded or made available to students at the institution. It does not discriminate on the basis of race, color, or national and ethnic origin in administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other institutionally administered programs.

About City College

Statement of Control

City College is an institution of higher learning owned by Allied Health Programs FL, LLC.

Board of Directors

Role	Name
Chairman	Yedidyah Langsam, PhD, AEMT-P
Board Member	Jerry Rozenberg, PA-C, EMT-P
Board Member	Sarah Bokow, BA, LPCSD
Board Member	Joseph Bove, MD, FACEP
Board Member	Josef Schenker, MD
Board Member	R. Esther Curry BA
Board Member	Dennis Buchanan, JD, MBA, BSN

Accreditation

Accrediting Bureau of Health Education Schools (ABHES)

City College is Institutionally Accredited by the Accrediting Bureau of Health Education Schools (ABHES).

ABHES
7777 Leesburg Pike, Suite 314N,
Falls Church, VA 22043
Tel: (703) 917-9503
www.abhes.org

The City College Associate of Science in Surgical Technology programs are programmatically accredited by the Accrediting Bureau of Health Education Schools (ABHES).

ABHES
7777 Leesburg Pike, Suite 314N,
Falls Church, VA 22043

State License

City College is licensed by the Commission for Independent Education, 325 W. Gaines Street, Suite 1414, Tallahassee, FL 32399-0400. Information regarding the College may be obtained by contacting the Executive Director, Commission for Independent Education, Department of Education, Tallahassee, Florida, (888) 224-6684.

Approvals

The College is authorized by the U.S. Department of Homeland Security to accept and enroll non-immigrant students.

City College is approved by the Florida State Approving Agency (SAA) to train veterans and other eligible persons under the Veterans Administration Assistance Program.

State Authorization Reciprocity Agreement ("NC-SARA")

City College is authorized under State Authorization Reciprocity Agreement ("SARA"). Colleges and universities that are NC-SARA members may provide online education to residents of other NC-SARA member states.

Non-Discrimination Statement

City College admits students of any race, color, national and ethnic origin to all rights, privileges, programs, and activities generally accorded or made available to students at the institution. It does not discriminate on the basis of race, color, national and ethnic origin in administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other institutionally administered programs.

History

City College was originally established in 1984 as Draughon's College of Business, a branch of Draughon's Junior College of Business founded in 1896 in Paducah, Kentucky. In May 1988, City College, Inc. established a branch campus in Gainesville, Florida. The College received approval from the State Board of Independent Colleges and Universities (SBICU) to offer Associate of Science degrees at the Fort Lauderdale campus in Fall 1989, and at the Gainesville campus in Fall 1991.

In June 1997, City College expanded its educational facilities to include a branch in Miami, Florida. In July 1999 the College received approval from SBICU to offer Bachelor of Science degrees. Quality education continues to be the goal of City College. "Your Job Tomorrow Is Our Job Today!" City College is committed to providing our students with an Extraordinary Educational Experience.

In August 2011, City College established a branch campus in Hollywood, Florida. The first students started October 3, 2011. Initial programs offered at the campus were Emergency Medical Services, Allied Health, and Business. The campus continues to grow and in 2014 two new programs were added, Veterinary Technology and Cardiovascular Sonography.

In March 2021, City College locations were purchased by Allied Health Programs FL, LLC and two new programs were added to the Hollywood location, associate degrees in Diagnostic Medical Sonography and Radiologic Technology.

Philosophy

City College is dedicated to the training and education of men and women for a full life and a successful career in a number of fields. The College offers its students a quality education in an atmosphere of personalized attention. City College considers the student as an individual and strive to be aware at all times of the needs of each member of its student body.

The College seeks to give students an understanding of and respect for their own and others' ideas and thoughts. Graduates of City College are imbued with the belief that they should understand and practice their responsibilities to family, individuals, and community by becoming effective and contributing citizens.

Mission

The mission of City College is to educate and train students in their chosen major for employment in specific career fields. The College awards Diplomas, Associate of Science, Associate of Applied Science, and Bachelor of Science degrees based on the student's successful completion of required coursework.

Goals and Objectives

The following goals are integral to the mission of the College:

- To maintain employer satisfaction within the community by providing professionally trained and educated graduates for industry, business, health care and government.
- To encourage students to realize the importance of reaching personal and professional goals through self-motivation, individual growth, and the pursuit of excellence.
- To prepare students for employment in specific career fields.
- To facilitate entry of graduates into their chosen careers.
- To offer sound educational programs at the Associate's and bachelor's degree levels.
- To continually evaluate and appraise every facet of the College's programs to ensure relevance to the needs of the employment community, effective preparation of students for success in career and compatibility with the College's standards.

Campuses

Hollywood - Main Campus

The College is located at 6565 Taft St., Hollywood, FL and occupies approximately 16,500 square feet on the second and third floors of the building. Lecture classrooms and computer labs are available for all programs. Specialized labs are as follows:

Allied Health labs are equipped to simulate a professional environment. Students practice skills on practice arms, torsos, and other manikin equipment. Labs include an eye wash station, sharps container and biohazardous waste containers.

The Emergency Medical Services laboratory has an ambulance simulator, manikins, and equipment to allow for simulation of real-life scenarios.

Cardiovascular Sonography/Diagnostic Medical Sonography has an ultrasound laboratory with industry standard ultrasound machines.

Veterinary Technology labs reflect a veterinary facility. The students practice on both models and life animals. There is an x-ray machine, surgical room, and equipment to support basic surgical and non- surgical procedures.

Surgical Technology lab has a "sub-sterile" room where a bay sink is in place that emulates actual operating room equipment. Also in this room are instrumentation, supplies and other material that is used to simulate a real-world environment.

Gainesville - Non-Main Campus

The College is located primarily at 7001 NW. 4th Blvd., Gainesville, FL and occupies a building of approximately 21,500 square feet. In addition, the Veterinary Technology program lab (separate educational center) is located at 2400 SW. 13th St., Gainesville, FL. This facility is 10,000 square feet and houses lab equipment, cages, and lab classrooms. Lecture classrooms and computer labs are available for all programs. Specialized labs are as follows:

Allied Health labs are equipped to simulate a professional environment. Students practice skills on practice arms, torsos, and other manikin equipment. Labs include an eye wash station, sharps container and biohazardous waste containers.

The Emergency Medical Services laboratory has an ambulance simulator, manikins, and equipment to allow for simulation of real-life scenarios.

Veterinary Technology labs reflect a veterinary facility. The students practice on both models and life animals. There is an x-ray machine, surgical room, and equipment to support basic surgical and non- surgical procedures.

Miami - Non-Main Campus

The College is located at 9250 W Flagler Street, Suite 120, Miami, FL and occupies approximately 5,000 square feet. Lecture classrooms and computer labs are available for all programs. Specialized labs are as follows:

The Emergency Medical Services laboratory has manikins and equipment to allow for simulation of real-life scenarios.

Fort Lauderdale – Non-Main Campus

The College is located at 2000 W. Commercial Blvd., Fort Lauderdale, FL and occupies approximately 5,000 square feet of two-story atrium building. Lecture classrooms and computer labs are available for all programs. Specialized labs are as follows:

Broadcasting labs include a working TV studio, and radio station. Additional resource labs with industry equipment allow the students to learn to record, edit, direct, produce and create high quality audio and video programs.

Admissions Policies and Procedures

City College welcomes applications from qualified students who desire an education which will enrich their lives and equip them with the skills to begin productive careers and become industry professionals. A "rolling admissions" policy governs most of City College programs. Most degree programs commence quarterly.

Application Procedures

1. Complete an application which can be found online at www.citycollege.edu/Apply or call the Admissions Department for an appointment. The telephone numbers are:

Fort Lauderdale: (954) 492-5353
Gainesville: (352) 335-4000
Hollywood: (954) 744-1777
Miami: (305) 666-9242

2. Admissions Entrance Examination: To ensure a successful experience at City College, a placement test is mandatory for most programs for applicants with no previous successful postsecondary education or standardized test scores (see Admissions Testing Exemptions). The evaluation determines admission into the College and placement in courses. Diagnostic Medical Sonography, Radiologic Technology, Emergency Medical Services, Allied Health, Surgical Technology, and Veterinary Technology associate degree programs as well as the Paramedic diploma program require minimum placement scores for entry.

Entrance testing: Minimum Scores for Entry (two attempts allowed):

Program:	Entrance Exam	Score:	Waiver Eligible:	Attempts:
MA Diploma	N/A	N/A	Yes	
EMT Diploma	N/A	N/A	Yes	
Paramedic Diploma	SLE	17	Yes	2
AS Medial Assisting	SLE	14	Yes	2
AS Medical Office Administration	SLE	14	Yes	2
AS Diagnostic Medical Sonography	SLE	17	Yes	2
AS Emergency Medical Services	SLE	17	Yes	2
AS Radiologic Technology	SLE	17	Yes	2
AS Surgical Technology	SLE	17	Yes	2
AS Veterinary Technology	SLE	17	Yes	2
BS Healthcare Administration	N/A	N/A	Yes	N/A

Entrance Requirements

1. Proof of Graduation: To gain admission into City College, a prospective student must provide proof of graduation in the form of the following:
    a. An official high school or college transcript from an institution whose academic rigor, accreditation and academic standards are deemed appropriate by City College. Transfer students and high school graduates must request their official transcript of grades. Official transcripts must be received in a sealed envelope or officially via email/e-transcript. The transcript must adhere to the issuing institutions requirements for an official transcript (i.e. seal, signatures, etc.).

    b. Passing General Equivalency Diploma (GED) test scores. Applicants who have taken the GED exam in lieu of a standard high school diploma must submit evidence of a satisfactory performance on the exam to the Admissions Department.

In the event the student cannot provide 1a or 1b, the student may provide an official transcript from a post-secondary school whose accreditation is recognized by the US Department of Education or by a NACES approved international school – that demonstrates completion of an Associate, Bachelor, Masters, or higher degree.

Certificates of attendance and/or completion, Exceptional Student diplomas, or Special Student diplomas are not considered qualifying documents for admission. Students who have a non-US High School Diploma should refer to the section on “International High School and College Transcripts” for U.S. High School equivalency requirements. Please note: All transcripts must be submitted in English and evaluated by an acceptable agency on the “Evaluation Agency List.”

Homeschooling

City College considers applications from individuals who have completed a home school program. The prospective student must submit a homeschooled transcript listing all coursework completed. The transcript will evidence:

1. Final grades and units earned for each course completed.
2. A brief description of each course the student has taken with information regarding the teaching materials. This may include the title and author of all textbooks, reference materials, DVDs, and other teaching media or activities utilized.
3. The methods used for evaluation should accompany the homeschooled transcript.

If homeschooled applicants previously attended another school, or have completed courses through the Florida Virtual School or through dual enrollment at a local college or university, official transcripts are required, and those courses should also be reflected on the homeschooled transcript. In addition, homeschooled applicants must submit a completed and notarized Home School Affidavit that verifies compliance with state statutory requirements that govern home school education.

International Students

City College has been approved to issue I-20s from the U.S. Department of Homeland Security to eligible foreign student applicants. International students interested in entering City College must demonstrate that they have graduated from a secondary school, recognized by the Ministry of Education or equivalent entity, in their home country. All international students must be fluent in English before they enroll. Applicants will be asked to furnish proof of English language competency. Students must also demonstrate that they are able to meet all costs of their education without financial aid unless they are eligible non-citizens.

International High School and College Transcripts

Applicants to City College who completed high school and or college outside of the United States must have their transcripts evaluated by an Agency on the approved "Evaluation Agency List" : https://www.citycollege.edu/admissions/application-checklist/ Prospective students are responsible for the cost and fees associated with the translation and evaluation of their diplomas. The evaluation of the high school transcript must state that it is equivalent to a US High School Diploma.

College evaluations must include:

1. Evidence of an equivalent degree
2. A course-by- course description indicating the number of credits earned and grade received.

Admissions Testing Exemptions

Applicants to City College may be exempted from **Language and Reading** testing if they can provide evidence of achieving a letter grade of C or higher in a college-level, credit bearing English class, or by meeting one of the following:

SAT Written and Reading	500 and above
ACT English	19 and above
TOEFL by hand	500 and above
TOEFL by Computer	173 and above
iBT	61 and above
AP	3 and above
CLEP	50 and above
IB	4 and above

Applicants to City College may be exempted from **Math** testing if they can provide evidence of achieving a letter grade of C or higher in a college-level, credit bearing Math class, or by meeting the following:

SAT Written and Reading	500 and above
ACT English	19 and above
TOEFL by hand	500 and above
TOEFL by Computer	173 and above
iBT	61 and above
AP	3 and above
CLEP	50 and above

IB	4 and above
IELTS	Overall band score of 6.0

Programmatic Entry Requirements

All students entering the Program must meet their respective clinical clearance requirements, which are outlined on https://www.citycollege.edu/clinical-clearance.

Criminal Background Checks

In 2009, the Florida Legislature enacted a law which precludes a state board from allowing a person to sit for a licensure examination if the person was convicted (regardless of how the conviction was entered of a long list of criminal acts. For further information, you should consult Florida Statute Section 456.013(3)(a), 456.039(1), 456.072(2), 464.018, and the other laws and regulations for the health care profession in which you are enrolled.

State licensing boards have their own list of offenses which they believe should preclude a person from practicing a particular health profession, particularly if the criminal act relates directly to their chosen health care field. There are occasions when a particular health care board might allow licensure if the applicant has had their rights restored, or if the conviction was entered many years ago, but this process is different from one board to another.

Health facilities, including hospitals, doctor's offices, and health clinics, may have a list of additional offenses that prohibit City College from placing students in clinical rotations as part of their required educational program if the student has been arrested or convicted of any of these criminal offenses.

As a result, all City College students undergo a background screening upon entry into the Program.

The cost of this screening is borne by the student and may take several weeks for the results to be provided to the College. Students who are admitted into one or more of these programs have an ongoing obligation to notify the College within 30 days if they are arrested or convicted for a criminal offense while enrolled at the College. Each student who enrolls into one of the programs listed above should expect the following process.

If the student's criminal background report reveals arrests or convictions that might preclude the student from participating in externships or clinical rotations as part of their educational program while a student at the College, sitting for state licensure examinations, or being eligible for employment upon graduation, the student will be notified and advised to schedule a meeting with the College's education staff (Program Chair and/or the Campus Director). The College may request additional information or documents to clarify what is contained in the report. It is the student's responsibility to furnish the College with all necessary information as to arrests, convictions or other dispositions of criminal charges contained in their criminal background report. Failure by the student to provide the necessary information will prevent the student from enrolling in any subsequent term or quarter until such information is provided to the College.

Following the meeting and review of information furnished to the College by the student, if it is determined by the College that the student's criminal background report precludes participation in an externship or clinical rotation as part of their educational program, or from sitting for the state licensing examination, the College will dismiss the student from the program and will retain all charged tuition.

Advanced Placement/Transfer Credit

Advanced Placement

Students who have successfully completed specialized and/or advanced courses in high school, have gained certain skill competencies or have gathered significant life experiences may request advanced placement in a subject area under certain conditions.

Advanced Placement Through Credit by Examination

These conditions include:

1. The course is required in the program (including elective requirements). EMT Diploma and Paramedic Diploma core courses are not eligible for advanced placement through credit by exam.
2. The student can document established competency and/or has the approval of the Director of Academic Affairs.
3. The Advanced Placement Through Credit by Examination must be taken within the first six (6) months of enrollment. Exceptions to this rule may be approved by the Director of Academic Affairs but cannot be approved during the student's final quarter.
4. A grade of 86% or better is scored on the comprehensive examination.
5. The advanced placement fee has been paid. The fee for the examination is $150.00 for **EACH** comprehensive examination or advanced standing credit requested. This fee is charged regardless of the outcome of the examination.

Advanced Placement Through Credit for Prior Learning/Life Experience

City College offers applicants the opportunity to obtain college credit for previous employment experience. Credit is given to students who can demonstrate that the knowledge and skills they acquired from work, non- classroom study, etc. are equivalent to the learning outcomes expected for particular courses within the College.

Students who intend to obtain credit for prior learning and life experience must be in good academic standing and the course must:

- Be required for degree completion
- Not have an advanced standing/credit by examination option
- Not be an Externship course
- Not be an EMS core course
- Not be a general education course

Students must submit to the Director of Admission an experiential portfolio for each course they wish to receive credit for, along with an Advanced Standing for Professional Life/Work Experience Request Form. The portfolio will be given to the Director of Academic Affairs for review and approval in consultation with the Program Chair. The portfolio must be approved within the first six (6) months of enrollment and a student may only submit a portfolio once per course.

No more than 25% of core program courses may be transferred through prior learning/life experience. This 25% is part of the larger 50% of transfer credit allowed for an Associate of Science or 60% for the Bachelor of Science.

The fee for the experiential portfolio review is $100.00 per course. This fee is charged regardless of the outcome of the portfolio review.

Transfer Credits

City College evaluates credits for transfer from nationally or regionally accredited colleges, universities, technical and business schools.

Official transcripts from all colleges attended must be received no later than thirty (30) days after the start of the student's first term at City College to receive transfer credit.

City College will accept no more than 75% of transfer credits into an associate degree program and no more than 50% of the program core for bachelor's level programs.

Criteria for acceptance for transfer of credit are as follows:

1. The courses for transfer are similar in objectives and content with at least 80% equivalency to those offered by City College.
2. The credit was earned at an accredited institution as recognized by the Department of Education
3. Credits transferred from institutions operating on quarters of ten to twelve weeks are accepted as direct equivalent credits. Semester credits are multiplied by 1.5 to convert them into quarter credits. Fractional portions of credits are rounded on a course-to-course basis.
4. The courses for transfer can be applied toward graduation requirements and will be calculated as part of MTF within the SAP policy.
5. The letter grade (or equivalent) in the course for transfer is a "C" or better (provided the "C" grade is defined as 70% or better).
6. Credits in skill or technical courses/Major Core must have been awarded no more than five (5) years prior to the student's acceptance by City College.
7. Major core courses being considered for transfer in the Emergency Medical Services program must be from a programmatically accredited school.
8. Major core courses being considered for transfer in the Veterinary Technology program must be from an AVMA-CVTEA accredited program. If essential skills are completed in the course, the student must be able to provide evidence of successful completion of those skills.

Transfer Credit for Students with Advanced Placement (AP), CLEP or IB Courses

Students who have earned the score specified below on CLEP, AP or IB courses will be accepted for transfer credit for those courses with City College equivalents. The scores required for this are:

1. A score of 4 or higher on the College Board AP Examinations
2. A score of 50 or above on the College Level Examination Program (CLEP)
3. A score of 4 or higher on International Baccalaureate (IB) Courses

Credit will NOT be awarded based on another institutions award of AP, CLEP or IB credit. Student must request that their official AP, CLEP or IB transcript be sent to City College. Requests for AP, CLEP or IB credit must be made within the student's first term.

The decision of the Director of Academic Affairs is final on questions of transfer credits. No official evaluation of transfer of credit is made until the student has been accepted by the College, and an official transcript or official scores (AP and CLEP) from the institution awarding the credits is received by the Program Chair and approved by the Registrar.

Transfer Credit for Students with Associate Degrees

Associate of Arts

Students who have earned an Associate of Arts degree from a nationally or regionally accredited institution may transfer the general education on a course-by-course basis to fulfill the 24-credit hour general education requirement in all City College Associate degree programs. Equivalency will be evaluated based on a comparison of course prefix, title, course descriptions and syllabi. Students may be required to complete specific general education courses where required by degree program.

Associate of Science

Students who have earned an Associate of Science degree from a nationally or regionally accredited institution may have their credit transferred on a course-by-course basis provided that the courses are at least 80% equivalent in objectives and content to those offered by City College. Equivalency will be evaluated based on a comparison of course prefix, title, course descriptions and syllabi. Students may be required to complete specific general education courses where required by degree program.

Transfer of Active Florida Emergency Medical Technician License

City college will accept persons with an active Florida Emergency Medical Technician (EMT) license into the Paramedic Diploma. The prospective student must meet all entrance requirements.

Transfer of Active National or State Paramedic License

City College will accept persons with an active national or state paramedic license into the Associate of Science in Emergency Medical Services. These students will be given transfer credit for all core related courses.

Persons with an active Paramedic License must complete 25% or more of the Associate of Science in Emergency Medical Services to be granted an Associates of Science degree from City College.

Transfer of Medical Assistant Certification

City College will accept persons who have successfully completed an accredited Medical Assisting Program and have achieved national certification into the Associate of Science in Allied Health. These students will be given transfer credit for all core related courses. The prospective student must meet all entrance requirements.

Persons with an active Medical Assisting certification must complete 25% or more of the Associate of Science in Allied Health to be granted an Associates of Science degree from City College.

Transfer of Active Certified Surgical Technologist Certification

City College will accept persons with an active certified Surgical Technologist Certification into the Associate of Science in Surgical Technology. These students will be given transfer credit for all core related courses. The prospective student must meet all entrance requirements.

Persons with an active certified Surgical Technologist Certification must complete 25% or more of the Surgical Technology Program to be granted an Associates of Science degree in Surgical Technology from City College.

Transfer of Credit into Bachelor's Program

City College has a variety of methods for students to either begin or transfer into a bachelor's degree.

Transfer of Credits from a Previous Associates Degree or a combination of Prior Learning Credits

1. Students have earned a prior Associates Degree and can transfer at least 60 semester credits (inclusive of Credit for Life Experience credits) into a Bachelors program.
2. Previous City College students who earned an associate degree may matriculate into a Bachelors program. Previous City College students who have NOT earned an Associate's degree are NOT eligible to transfer from an AS to a BS program, without having earned a degree. Students who start in an AS program are expected to complete that AS program. Students who earned an Occupational Associates may be required to take a placement test to determine placement into Math and/or English courses.

Transfer of Active Technical and Professional Certifications to a Bachelors Health Care Administration Program

City College will accept persons with active Technical and Professional certifications from both unaccredited and accredited schools into the Bachelor of Science in Health Care Administration. Active Technical and Professional Certifications may count towards 52 credits of transfer credit.

- Applicant may also receive an additional 8 credits in Credit for Life Experience for SLS1201 and SLS2301 provided that the applicant can provide at least 12 months of active ongoing employment. Student will be required to complete the Credit for Life Experience request and pay the fee for this evaluation.
- All other previous college coursework regardless of if a degree was earned or not will be assessed for granting of additional credits.
- Applicants may register for this either online or on-campus.

Transferability of Credit

Transferability of City College credits to another college is at the discretion of the accepting institution. It is the student's responsibility to confirm whether credits will be accepted by another college of the student's choice.

Credits earned at any City College campus are mutually transferable in common programs at the same level.

City College Junior and Senior Standing Status

An academic year is defined as a period beginning with the first day of classes, ending on the last day of examinations and is a minimum of 30 weeks of instruction. Applicants to the Bachelor programs must have earned an Associate of Science degree and/or be in junior standing (earned a combination of life credit, credit by examination and/or transfer credit totaling a minimum of 72 quarter credits or its equivalent).

Junior standing is the equivalent of two (2) academic years (72 quarter credits or its equivalent) earned through a combination of life credit, credit by means of examination and transfer credit.

Senior Standing status is the equivalent of three (3) academic years which is 108 quarter credits or its equivalent, earned through a combination of life credit, credit by means of examination and transfer credit.

EMT Diploma 14-Session Progression Assessment

Upon completion of the fourteenth instructional session of the program, students will be assessed by the Program Chair to determine their eligibility to progress to the fifteenth instructional session of the program. The assessment will consist of the following components and benchmarks:

Area	Method/Benchmark
Administrative	
Medical Clearance	Administration (timeliness and cooperation)
Background Check	Administration (timeliness and cooperation)
Classroom	
Quiz/Exam	Gradebook (grade of $\geq$ 70%)
Class Participation	Gradebook (grade of $\geq$ 70%)
Attendance	Attendance Record (3 or fewer absences)
Homework/Assignments	Gradebook (grade of $\geq$ 70%)
Behavior and Professionalism (Affective)	Instructor Observation/ Counseling Records
Lab	
Class Participation	Gradebook (grade of $\geq$ 70%)
Attendance	Attendance Record (2 or fewer absences)
Behavior and Professionalism (Affective)	Instructor Observation/Counseling Records
Psychomotor	Instructor Observation/Counseling Records
Homework/Assignments	Gradebook (grade of $\geq$ 70%)

Students who do not receive a favorable recommendation from the Program Chair based on the results of the 14- session Progression Assessment will not be eligible to progress to the fifteenth session of the program.

Financial Aid Information

Procedures and Forms by Which Students Apply for Assistance

The following types of aid are available individually or in combination to those who qualify and must be applied for annually. Applications for federal programs are available on the internet at http://www.fafsa.ed.gov. Applicants should complete the free application for Federal Student Aid (FAFSA). Scholarship procedures are listed on the City College website, http://www.citycollege.edu/scholarships

Types of Aid Available

Loan Programs

(ALL LOANS MUST BE REPAID)

William D. Ford Federal Direct Loan Programs

- **Federal Direct Subsidized Stafford Loans**: also referred to as Direct Stafford Loans or Direct Loans. "Subsidized" means the federal government pays the interest on these loans while the student is enrolled at least half time during grace periods and deferments (postponements of repayment). The student must demonstrate financial need to receive this type of loan.
- **Federal Direct Unsubsidized Loans**: also referred to as Direct Stafford Loans or Direct Loans. The federal government does not pay the interest on these loans while the student is attending college, in a grace period, or in deferment. A student may qualify for an unsubsidized Loan regardless of financial need.
- **Federal Direct PLUS Loans**: for parents with good credit histories who want to borrow for their dependent students. The yearly limit on the Parents' Loans for Undergraduate Students (PLUS) is equal to the cost of attendance minus any other financial aid received. The interest will vary every July 1 but will never exceed 9%. Repayment begins within 60 days after the disbursement of funds. The chart below shows **estimated** monthly payments and total interest charges for 7.9 percent loans of varying amounts, with typical repayment periods. Rates may be different.
- **Federal Direct Consolidation Loans**: one or more federal education loans combined into a new Direct Loan. Only one monthly payment is made to the U.S. Department of Education. For additional information, booklets are available in the Financial Aid Office on Direct Loan Programs.

Sample Loan Repayment Plan

Total Loan Amount	Number of Payments	Monthly Payment	Total Repaid
$ 3,500.00	120	$ 50.00	$ 4,471.00
$ 5,000.00	120	$ 58.00	$ 6,905.00
$ 7,500.00	120	$ 83.00	$10,357.00
$10,500.00	120	$121.00	$14,500.00
$15,000.00	120	$173.00	$20,714.00

A **Dependent Undergraduate** student can borrow up to:

- $5,500, if the student is a first-year student enrolled in a program of study that is a full academic year. No more than $3,500 of this amount may be in subsidized loans.
- $6,500, if the student has earned a minimum of 36 credits and the remainder of the program of study is a full academic year. No more than $4,500 of this amount may be in subsidized loans.

An **Independent Undergraduate** student can borrow up to:

- $9,500, if the student is a first-year student enrolled in a program of study that is a full academic year. No more than $3,500 of this amount may be in subsidized loans.
- $10,500, if the student has completed a minimum of 36 credits and the remainder of the program of study is a full academic year. No more than $4,500 of this amount may be in subsidized loans.
- $12,500, if the student has completed their 2nd year of study and is enrolled in a degree seeking program that will award a bachelor's degree and the remainder of the program of study is a full academic year. No more than $5,500 of this amount may be in subsidized loans.
- For periods of undergraduate study that are less than an academic year, the amounts a student can borrow will be less than those above.
- Interest rates are determined by the Federal government each spring for new loans being made in the upcoming award year, which runs from July 1 to the following June 30. Each loan will have a fixed interest rate for the life of the loan. Interest rates for new Direct Loans made on or after July 1, 2021, and before July 1, 2022 are 3.73% for Direct Subsidized and Direct Unsubsidized, and 6.28% for Direct Plus.

The amounts listed above are the maximums a student may borrow. However, a student cannot borrow more than the cost of attendance minus any other financial aid received.

All applicants must complete entrance and exit counseling per Federal Regulation. Counseling can be completed at http://www.studentloans.gov

Scholarships and Grants

Florida Bright Future Scholarship Program

The Florida Bright Future Scholarship Program is a state of Florida scholarship program with three levels:

1. Florida Academic Scholars Award
2. Florida Medallion Scholars Award
3. Florida Gold Seal Vocational Scholars Award

For eligibility requirements, award amounts and deadlines, visit the Florida Department of Education website: http://www.floridastudentfinancialaid.org.

Alumni Scholarship

City College is offering its associate degree alumnus a scholarship when they matriculate to one of its bachelor's degree programs. The scholarship is available to all Alumni who enroll for the first time in a City College B.S. degree program. The scholarship is for $1500.00, which is disbursed as $500.00 per term for the first three consecutive terms.

Applicants must be a City College Associate of Science Degree alumnus who enroll for and are accepted into a City College Bachelor of Science Degree program. Students who previously enrolled or attended Bachelor of Science Degree programs at City College are not eligible.

Hollywood and Altamonte Springs campus graduates may use the scholarship towards a bachelor's program online, or at another City College campus offering bachelor's degrees.

Federal Pell Grant

The eligibility for this award is computed primarily through the FAFSA (Free Application for Federal Student Aid) on the basis of a student and/or parents' income and assets, household size, and number of family members in college. All students are encouraged to apply. The filing deadline for the award year is June 15 for new applications. The awarding period extends from July 1 to June 30th.

Florida Student Assistance Grant

The Florida Student Assistance Grant program (FSAG) is a financial aid program available to students who meet all eligibility criteria and demonstrate substantial financial "need." An FSAG award can range from $200.00 - $3,260.00 per academic year. Eligibility for an FSAG is determined by the institution. The application deadline is September 15.

1. To be eligible for FSAG, you must:
2. Meet Florida residency requirement.
3. Enroll as a full-time student (12 credit hours each term).
4. Be a degree-seeking undergraduate student.
5. Be a U.S. citizen or eligible non-citizen.
6. Cannot hold a bachelor's degree.
7. Be registered with the Selective Service, if required.
8. Not owe a refund in any state or federal grant or scholarship and not be in default on any state or federal student loan unless satisfactory arrangements have been made to repay.

Federal Supplemental Educational Opportunity Grant

The Federal Supplemental Educational Opportunity Grant (FSEOG) is a grant for undergraduate studentshaving the greatest financial need, as determined by the FAFSA. It is administered directly by the financial aid office and is offered on a first come first serve basis for eligible students, until the funds arespent.

C.M. Fike Memorial Scholarship

This scholarship is intended to assist City College students to pursue a degree in their chosen field. Applicants should apply for the scholarship prior to the start of the term. The College will award 4 scholarships each term per campus. The scholarship is an annual award paid quarterly on or about the third week in the term. Scholarship award amounts are based on the number of credits that a student is taking each term. The awards are as follows:

- $1,000.00 for students taking 9 or more credit hours per term.
- $750.00 for students taking 6 – 8 credit hours per term.

Applicants must:

- Complete the enrollment process and be accepted into a City College program
- Submit the scholarship application prior to the start of the term
- Start classes as stated on the enrollment agreement
- Maintain satisfactory academic progress
- Reapply each year for additional funding Scholarship applications can be found on our website.

Policies and Procedures Verification

The College has developed the following policies and procedures regarding the verification of information provided by applicants for Federal Aid under the Title IV Programs:

- Only those students who are selected for verification by the Department of Education will be required to submit supporting documentation.
- All students will be notified on a timely basis if they have been selected for verification and the supporting documentation that is required of them. The student will be notified via the Student Portal, email, or a phone call. The institution will use as its reference the most recent verification guide supplied by the Department of Education. At that time, the student will be informed of the time parameters and the consequences of not completing the verification and any other documentation needed. The institution will assist the student by making any corrections to any information that is inaccurate.
- If there is a change to the student's eligibility the student will be contacted, and a new estimated award letter will be presented to the student explaining the difference in their eligibility.
- A Federal Direct Stafford Loan application may be certified by the College prior to the completion of verification.
- No Federal or Campus-Based funds will be disbursed prior to the completion of verification.
- The student will have 60 days after his/her last day of attendance or the end of the academic year, whichever is earlier, to complete verification. However, in the interim, the student must have made arrangements with the College for payment of all tuition and fees due or risk termination at the option of the College. After 60 days, all financial aid that might have been due is forfeited.
- If the student supplies inaccurate information on any application and refuses to correct same after being counseled by the institution, the College must refer this case to the Department of Education for resolution. Unless required by the Department of Education, no financial aid will be disbursed to the student.

Refund Policy

Should a student voluntarily cancel or be dismissed for any reason, all refunds of tuition will be made according to the following refund schedule. Student may cancel the enrollment by telephone, in person, or in writing.

All refunds will be made within thirty (30) days of the date of determination. Official date of determination is the following:

a. The date the student notifies the College of his/her withdrawal or their last day of academic related activity, whichever is the later of the two
b. The date when the College becomes aware that the student ceased attendance from all courses for the term

For students who withdraw after classes begin, the following refund policy will apply:
First Quarter of the Program

If a student withdraws (and notifies the Registrar's office, in writing, of his/her intent to withdraw) during the first quarter of the program:

Week the Student Withdraws or is Dismissed	College Retains Percentage of Total Quarter's Tuition
First Week	0% of the total quarter's tuition
Second Week	20% of the total quarter's tuition
Third Week	100% of the total quarter's tuition

Second and Remaining Quarter's in the Program

If a student withdraws or is dismissed during the second and any remaining quarters in the program:

Week the Student Withdraws or is Dismissed	College Retains Percentage of Total Quarter's Tuition
First Week	10% of the total quarter's tuition
Second Week	20% of the total quarter's tuition
Third Week	100% of the total quarter's tuition

Tuition and fees shall also be refunded in full, for the current term, under the following circumstances:

- Course was canceled by the college
- Involuntary call to active military duty
- Documented death of the student
- Exceptional circumstances, with approval by the President of the College

There is no refund or adjustment in tuition charges for a reduction in credit hours after the first week of classes for a quarter as specified in this policy.

Percentage of completion is computed from the published quarter start date to last date of actual attendance, rather than credit earned. The last date of attendance is the last day a student had academically related activity, which may include projects, clinical experience, or examinations. Any amounts determined to be owed to the College because of these calculations, are due and payable in full on the effective date of the withdrawal. Any refund of less than $1.00 which would normally be refunded to Title IV Programs may be retained by City College.

Return of Title IV Funds

The 1998 Higher Education Amendments, section 484B prescribes the amount of Title IV funds a student has earned at the time when a student ceases attendance and the amount of federal aid that must be returned or disbursed. The amount earned is based on the amount of time the student has spent in attendance. It is based on a proportional calculation through 60 percent of the payment period. Under these provisions, the calculation of Title IV funds is not concerned with refunding institutional charges.

If a recipient of Title IV grant or loan funds withdraws from an institution after beginning attendance, the institution must determine the amount of Title IV funds earned by the student. If the amount of Title IV grant or loan funds the student was disbursed is greater than the amount the student earned, unearned funds must be returned. If the amount the student was disbursed is less than the amount the student earned; the student is eligible to receive a post-withdrawal disbursement in the amount of the earned aid that the student has not received but was otherwise eligible for.

The percentage of the period completed is the number of calendar days completed in the payment period divided by the total number of calendar days in the same period.

Responsibility of a Student to Return Unearned Title IV, HEA Program Funds - The student is responsible for all unearned Title IV, HEA program assistance that the institution is not required to return. A student's unearned grant funds are an overpayment and are subject to repayment. A student who owes an overpayment because of withdrawal will retain his or her eligibility for Title IV, HA program funds for 45 days from the earlier of the date the institution sends a notification to the student of the overpayment, or the date the institution was required to notify the student of the overpayment. If a student does not take the appropriate repayment action during this 45-day period, the student becomes ineligible on the 46th day and remains ineligible until the student enters into a repayment agreement with the U.S. Department of Education that re-establishes the student's eligibility.

Designated Office to Contact for Withdrawal - The student must contact the Registrar's office to withdraw. The student should also meet with the Director of Financial Aid to determine any financial liability created by withdrawal prior to the end of the term.

Refund Distribution Policy for Federal Title IV Programs

Any refund based on the appropriate calculation will be refunded to the following program in the order listed below:

1. Federal Direct Unsubsidized
2. Federal Direct Subsidized
3. Federal Direct PLUS Loan
4. Federal Pell Grant
5. FSEOG
6. Other SFA Programs
7. Other Federal, State, private, or institutional sources of aid
8. The student

23 General College Information

General College Information

Office/Class Hours

Administrative Offices

Monday – Thursday 8:00 AM – 6:00 PM Friday 8:00 AM – 3:00 PM
Sunday 9:00 AM – 5:00 PM

Classes may be held during the following hours:

Monday – Thursday 8:00 AM – 11:00 PM Friday 8:00 AM – 5:00 PM
Sunday 9:00 AM – 5:00 PM

The College reserves the right to establish and alter the scheduled hours of administrative office and class meetings. Changes to hours will be posted.

Change of Name or Address

Students are responsible to log into their student portal to update their student record with any changes made to personal information including a change in mailing or e-mail address.

Handbooks-Student and Program

City College, in addition to the Catalog, provides students in all programs with a City College Student Handbook. Students enrolled in allied health career focused programs will also receive a program specific handbook. These specialized handbooks provide additional programmatic rules and regulations for enrolled students.

Degrees and Diplomas

Every student who has successfully completed a program of study and fulfilled all obligations to the College will be awarded a degree and receive a diploma during annual graduation exercises. Replacement cost for a lost or misplaced diploma is $50.00. Graduates can request another copy of their diploma by completing the Request for Duplicate Diploma form.

Bulletin Boards

Bulletin boards are the property of the school. Students wishing to place notices on the bulletin boards must submit the notice to the Campus Director for approval. Upon approval, the notice will be posted on the bulletin board(s).

Professional Dress Code

Appropriate attire is essential to being a professional in today's work environment. Students are encouraged to dress in appropriate school attire. Some educational programs/departments have specific dress requirements which are detailed in student handbooks.

Honor Code

Classes and activities at City College are conducted under the assumption that, as responsible individuals, students will adhere to generally accepted social standards forbidding plagiarism, cheating, dishonesty, theft, and defacement of property. Individuals who violate these standards are subject to disciplinary action, which may include dismissal from the College (See Student Conduct Policy).

Facilities

Eating and drinking are prohibited in City College labs and classrooms. The College provides student areas for these activities. Smoking, including e-cigarettes, is strictly prohibited in all indoor areas of City College.

Smoking is permitted outside in designated areas.

Children on Campus

Minors are not allowed in class sessions or in the library. Unattended minors are not permitted in any area of the campus.

Parking

Sufficient parking for cars is available at all campuses. Students may be required to have a visible City College parking permit decal on their vehicle or risk having their vehicle towed at the owner's expense. Specific information regarding each campus is available from the Campus Director. Available parking is not guaranteed.

Use of School Equipment and Property

College equipment and property are not to be removed from the building.

A student wishing to use the equipment may do so during scheduled lab periods under supervision of a faculty member. (See Student Code of Conduct Policy).

City College Logos

All City College logos are the property of the college and may not be reproduced without approval from the Campus Director.

Loss of Personal Property

The College does not assume responsibility for the loss of books or other personal property. However, all faculty and students are instructed to place all articles found in the “Lost and Found” located in the Library so that they may be claimed by the owner.

Policy Changes

Students will be notified of any academic and/or administrative policy changes that happen after the publication of the annual catalog. This will be done through one or more of the following: posting addendums of the catalog on the college's website, notices on campus bulletin board, or indirect email notices to the students’ city college email address.

Indemnification

The student releases and holds harmless the institution, its employees, its agents, and representatives from and against all liabilities, damages, and other expenses which may be imposed upon, incurred by, or asserted against it or them by reason of bodily injury or property damage which may be suffered by the student from any cause, while enrolled as a student in the institution. When students are permitted to participate in individual or group tests, training, or demonstrations of ability, techniques, commodities, equipment, or procedures relating to course or intramural activities under the auspices of the College, the student and parties executing the student enrollment contract authorize participation by the student and releases the institution, and its officers, agents, and employees from any and all responsibility for injury and damage to person or property.

School Closing

In the event of labor disputes or acts of nature (i.e. fire, flood, hurricane, tornado, etc.), the College reserves the right to suspend training at the site affected for a period not to exceed 90 days, or to relocate to a suitable substitute site. In the event the school closes the term may be extended to provide sufficient time to complete course/hour requirements.

Alcohol/Drug Possession, Usage and Distribution Policy

In response to the requirements of the "Drug Free Schools and Communities Act Amendments of 1989" (Public Law 101-226) the following will be the policy of City College:

No employee or student at this College shall have in his or her possession, use or distribute any alcoholic beverage or controlled substance (illicit drugs) on College property or in any College activity. Any infraction of this policy will be grounds for immediate dismissal (See Student Conduct Policy).

You can obtain a copy of the complete policy by accessing the following website, http://www.citycollege.edu/student-consumer-information/

Medical Marijuana Policy

City College prohibits the possession and use of marijuana on all its campuses. Marijuana is not permitted on campus because it remains a drug prohibited by Federal law. Federal legislation prohibits any institution of higher education that receives federal funding from allowing the possession and use of marijuana on campus. In addition, many of the externship opportunities are at medical facilities and/or fire stations who may also view marijuana as a prohibited drug.

Drug tests are a program entry requirement in some programs and marijuana is included in the definition of a positive drug test. A positive drug test may preclude the potential student from matriculation in the college

Students who violate the college’s drug policy prohibiting the use or possession of illegal substances or paraphernalia, including medical marijuana can be subjected to disciplinary action as detailed in the catalog and/or program handbooks.

Drug Abuse Program

To provide our students with information on drug abuse, the College has materials published by the National Institute on Drug Abuse and other organizations. Brochures are available and can be requested from the Campus Director. In addition, each campus has information about local resources available to assist in treatment, prevention, and education of drug abuse.

The Fort Lauderdale and Hollywood campus' have information on The Starting Place located in Hollywood, FL (954) 925-2225. The Starting Place website states that "The purpose of The Starting Place is to provide education, rehabilitation and referral to those individuals and families whose lives have been adversely affected by behavior problems frequently as a result of substance abuse." The College also has information on the House of Hope and Stepping Stones, which is dedicated to recovery from alcohol and drug dependency.

The Gainesville campus has information available on Meridian Behavioral Healthcare at 1 (800) 330-5615. The purpose as stated on their website, is "We are committed to enhancing health and wellness for all those with whom we come in contact. Whether you are looking to improve your sense of well-being, gain a performance edge, or deal with a mental illness or substance use issue, we have staff and services to meet your needs. See more at: http://www.mbhci.org".

The Miami Campus has information available for counseling, rehabilitation and referral programs at the Fellowship House located at 5711 S. Dixie Highway, South Miami, FL 33143. The purpose of the facility, as stated on their website, is "Fellowship House is widely recognized as a model for psychosocial rehabilitation. It has exceeded mandatory compliance and has been recognized for its strengths and exemplary conformance to standards by the Rehabilitation Accreditation Commission. It is currently accredited in Behavioral Health for Psychosocial Rehabilitation programs in the areas of Case Management, Community-Based Rehabilitation, Community Housing, Outpatient Treatment, Day Treatment and Community Employment services."

Other pamphlets and information are available through the Campus Director on each campus.

Annual Crime Report/Clery Act

The City College Annual Security Report includes statistics for the previous three years concerning reported crimes that occurred on campus; in certain off-campus buildings or property owned or controlled by City College; and on public property within, or immediately adjacent to and accessible from, the campus. The report also includes institutional policies concerning campus security. You can obtain an electronic or paper copy of this report by contacting the admissions office or by accessing the following web site, https://www.citycollege.edu/student-consumer-information/

Grievance Procedures

City College defines a grievance as any situation arising from a college action which a student deems to cause them academic, financial, or emotional distress. A grievance procedure is available to any student who believes a College decision or action has adversely affected his/her status, rights or privileges as a student. The purpose is to provide a prompt and equitable process for resolving student grievances.

Any student who has an ACADEMIC GRIEVANCE must follow this procedure:

1. A student who has an issue with the decision of a faculty member on grades or attendance must first address the issue with the faculty member.
2. If the student is unable to resolve the issue with the faculty member, then the student should elevate the matter to the program chair.
3. If the matter is still not resolved to the student's satisfaction, the student may then take the grievance to the Director of Academic Affairs with a written statement. This statement may be submitted in person or via email. The student should ensure that they have all the documentation to substantiate their grievance. The faculty member should also have all their materials to substantiate their position on the student's grievance.

The written statement should include the following:

- Nature of the issue
- Date of the issue
- Person(s) involved
- Steps already taken
- Key area(s) of concern
- Desired outcome

The Grievance will be reviewed by appropriate members of the Academic team not limited to faculty, Program Chairs, the Director of Academic Affairs, and the Campus Director. The student in addition to the written statement will have the opportunity to present their case to the specific team reviewing their grievance if they so desire. The decision of the Director of Academic Affairs or in some circumstances, the President will be final.

Any student who has a NON-ACADEMIC GRIEVANCE must follow this procedure

1. For any issue with academics not related to grades or attendance, the matter should be addressed to the Director of Academic Affairs.
2. For an issue with Financial Aid, the matter should be addressed the Director of Financial Aid.
3. For all other issues, not covered under grades, academics or financial aid, the matter should be addressed to the Campus Director for that campus.

Note: if the grievance is regarding any form of sexual harassment, please see the process listed under Campus Safety and Security and Title IX Disclosures.

The student should prepare a written statement which should include the following:

- Nature of the issue
- Date of the issue
- Person(s) involved
- Steps already taken
- Key area(s) of concern
- Desired outcome

The Grievance will be reviewed by the campus Management team. The student in addition to the written statement will have the opportunity to present their case to the management team reviewing their grievance if they so desire. The decision of the Campus Director or in some circumstances, the President will be final.

Students who feel a grievance is not resolved by the college to their satisfaction may refer their grievance to: Executive Director, Commission for Independent Education, 325 W. Gaines Street, Suite 1414, Tallahassee, Florida, 32399-0400, (888) 224-6684 and/or ABHES, 7777 Leesburg Pike, Suite 314 N, Falls Church VA 22043; (703) 917-9503

Distance Education students, who have completed the internal institutional grievance process and the applicable state grievance process, may appeal non‐instructional complaints to the FL‐SARA PRDEC Council. For additional information on the complaint process, please visit the FL‐SARA Complaint Process http://www.fldoe.org/sara/complaint-process.stml

Student Services

Career Assistance and Development

The Career Development staff offers career assistance to graduates and current students. While City College does not guarantee employment, every effort is made to bring potential employers together with eligible graduates who have the skills employers seek. In addition, we continually seek to form new employer partnerships for jobs, externship opportunities and in field career placements.

The Career Assistance and Development Office staff provides the following services to graduates and current students:

- Arrange opportunities to meet and interview with prospective employers both on and off campus
- Assist with writing resumes
- Practice interview skills with mock interviews
- Develop job search skills and professional readiness

City College maintains graduate employment information in annual reports that contain comprehensive statistical data covering graduate employment activity.

Learning Center

City College has established a Learning Center to address the needs of students requiring academic assistance or remediation in their efforts to achieve and maintain satisfactory academic progress. The Learning Center is staffed with faculty members who are available to assist students with their academic needs. If a faculty member feels that a student needs additional assistance outside the scope of the Learning Center, they may recommend that the student seek additional tutorial services beyond those provided by the Learning Center. Students who wish to utilize the Learning Center must register at least one week prior to the requested date, by completing the Learning Center Request Form which requires the following information:

- Student name
- Program
- Course
- Subject
- Specific topics(s) with which they need assistance

Library

The mission of the City College Library Staff is to support and foster intellectual discovery, critical thinking, and lifelong learning. The City College libraries are the centers for information resources related to all program areas. Students and faculty have access to up-to-date information that will assist them in their chosen field of study, and in becoming life-long learners. The libraries provide both print materials and a full suite of online resources. In addition, the libraries provide students access to printing, photocopying and computers with Microsoft Office and Internet access.

Orientation

A student orientation program is conducted prior to each start date to acquaint new students with the College's facilities, policies, procedures, to meet the staff, and take care of administrative matters. The orientation also provides new students with the opportunity to meet in a less formal environment prior to the beginning of classes.

In addition to the College's general student orientation, students partake in a programmatic orientation, as well.

Housing

Housing is not provided by City College.

Services Available for Students with Disabilities

In compliance with the Americans with Disabilities Act (ADA), City College provides reasonable accommodations to students with professionally diagnosed and documented disabilities. The Campus Director for each campus serves as the ADA Coordinator for that campus and will confer with the Director of Academic Affairs regarding academic accommodations.

Policy Regarding Documentation of Disabilities

Students seeking accommodations from City College based on a diagnosis of a disability are required to submit documentation to verify eligibility. Documentation of a disability consists of the providing results of professional testing, evaluation and a written report that addresses specific academic needs of the student. The cost and responsibility for providing this professional evaluation shall be borne **by the student.**

Students with disabilities who are requesting accommodations should make timely and appropriate disclosures and requests, preferably at least six (6) weeks in advance of the class for which accommodation is requested.

The student must provide City College with medical or other diagnostic documentation that confirms their impairment and contains recommendations for specific accommodations. Requests that are not supported by proper documentation may not be approved.

The following guidelines are provided in the interest of assuring that the evaluation and report are appropriate for documenting eligibility. Documentation presented to the Campus Director and Director of Academic Affairs will remain confidential and will not be included in the student's academic file. The Director of Academic Affairs is available to consult with diagnosticians regarding these guidelines. The report should:

- Be prepared by a professional, within the last three years, (e.g. licensed psychiatrist, psychologist, or physician) qualified to diagnose the disability.
- Be comprehensive. Written reports should be consistent with the diagnostic criteria found in the American Psychological Association: Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition (DSM-IV) or the DSM-IV-TR (Text Revision). A battery of psychological tests and behavior rating scales, a thorough social and educational history and interviews with the student are essential.
- Be on professional letterhead, signed by the individual making the diagnosis, and include the following information:
    - How long the diagnostician has treated the student and the date of last contact.
    - Instruments, procedures, and data sources used to diagnose.
    - Current symptoms that satisfy the DSM-IV or DSM-IV-TR criteria and the approximate date of onset.
    - DSM-IV or DSM-IV-TR diagnosis.
    - Treatment being used (e.g. medication, counseling, etc.).
    - How this disorder impacts the student in the postsecondary environment.
    - Diagnostician's name, title, license number, address, and phone number. How long the diagnostician has treated the student and the date of last contact.
- Be current. In most cases, this means within the past three years, and the assessment was completed when the individual was an adult (age 18). Since assessment constitutes the basis for determining reasonable accommodations, it is in the student's best interest to provide recent and appropriate documentation to serve as the basis for decision-making about a student's need for accommodation in an academically competitive environment.
- Present clear and specific evidence, which identifies the individual's present level of functioning and how the student's education may be impacted.
- State the specific accommodations being requested.
- Provide sufficient data to support the academic adjustment(s) requested. The documentation should demonstrate the individual has a disability as defined in the Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act of 1973.

Students will be provided a written determination regarding a request for accommodation. Faculty will be notified in writing regarding any specific accommodation granted for a student on their class roster.

Academic Policies and Procedures

Course Numbering Guide

City College course numbers consist of a two or three letter alpha prefix followed by a three- or four-digit course number. The two or three letter alpha prefix identifies the academic discipline (see Course Descriptions). The level is specified by the first digit, as follows: 1 for freshman level; 2 for sophomore level; 3 for junior level; and 4 for senior level. The last two digits are reserved for departmental use in indicating sequence of courses. Laboratory courses are identified by an "L" after the three-digit course number. "C" indicates combined lab/lecture course.

City College participates in the Florida Statewide Course Numbering System (SCNS). SCNS courses have a standardized three-letter prefix followed by a four-digit course number.

Florida's Statewide Course Numbering System

(Section 1007.24, Florida Statutes)

Courses in this catalog are identified by prefixes and numbers that were assigned by Florida's Statewide Course Numbering System (SCNS). This numbering system is used by all public postsecondary institutions in Florida and by participating nonpublic institutions. The major purpose of this system is to facilitate the transfer of courses between participating institutions. Students and administrators can use the online SCNS to obtain course descriptions and specific information about course transfer between participating Florida institutions. This information is at the SCNS website at https://flscns.fldoe.org

Each participating institution controls the title, credit, and content of its own courses and recommends the first digit of the course number to indicate the level at which students normally take the course. Course prefixes and the last three digits of the course numbers are assigned by members of faculty discipline committees appointed for that purpose by the Florida Department of Education in Tallahassee. Individuals nominated to serve on these committees are selected to maintain a representative balance as to type of institution and discipline field or specialization.

The course prefix and each digit in the course number have a meaning in the SCNS. The listing of prefixes and associated courses is referred to as the "SCNS taxonomy." Descriptions of the content of courses are referred to as "statewide course profiles."

Example of Course Identifier

General Rule for Course Equivalencies

Within the SCNS framework equivalent courses at different institutions are identified by the same prefixes and same last three digits of the course number and are guaranteed to be transferable between participating institutions that offer the course, with a few exceptions, as listed below in Exceptions to the General Rule for Equivalency.

For example, a freshman composition skills course is offered by 84 different public and nonpublic postsecondary institutions. Each institution uses "ENC1101" to identify its freshman composition skills course. The level code is the first digit and represents the year in which students normally take the course at a specific institution. In the SCNS taxonomy, "ENC" means "English Composition," the century digit "1" represents "Freshman Composition," the decade digit "0" represents "Freshman Composition Skills," and the unit digit "1" represents "Freshman Composition Skills I."

In the sciences and certain other areas, a "C" or "L" after the course number is known as a lab indicator. The "C" represents a combined lecture and laboratory course that meets in the same place at the same time. The "L" represents a laboratory course or the laboratory part of a course that has the same prefix and course number but meets at a different time or place.

Transfer of any successfully completed course from one participating institution to another is guaranteed in cases where the course to be transferred is equivalent to one offered by the receiving institution. Equivalencies are established by the same prefix and last three digits and comparable faculty credentials at both institutions. For example, ENC 1101 is offered at a community college. The same course is offered at a state university as ENC 2101. A student who has successfully completed ENC 1101 at a Florida College System institution is guaranteed to receive transfer credit for ENC 2101 at the state university if the student transfers. The student cannot be required to take ENC 2101 again since ENC 1101 is equivalent to ENC 2101. Transfer credit must be awarded for successfully completed equivalent courses and used by the receiving institution to determine satisfaction of requirements by transfer students on the same basis as credit awarded to the native students. It is the prerogative of the receiving institution, however, to offer transfer credit for courses successfully completed that have not been designated as equivalent. **NOTE**: Credit generated at institutions on the quarter-term system may not transfer the equivalent number of credits to institutions on the semester-term system. For example, 4.0 quarter hours often transfers as 2.67 semester hours.

The Course Prefix

The course prefix is a three-letter designator for a major division of an academic discipline, subject matter area, or subcategory of knowledge. The prefix is not intended to identify the department in which a course is offered. Rather, the content of a course determines the assigned prefix to identify the course.

Prefix	Level Code (first digit)	Century Digit (second digit)	Decade Digit (third digit)	Unit Digit (fourth digit)	Lab Code
ENC	1	1	0	1	
English Composition	Lower (Freshmen)	Freshman Composition	Freshman Composition	Freshman Composition	No laboratory

Authority for Acceptance of Equivalent Courses

Section 1007.24(7), Florida Statutes, states:

Any student who transfers among postsecondary institutions that are fully accredited by a regional or national accrediting agency recognized by the United States Department of Education and that participate in the statewide course numbering system shall be awarded credit by the receiving institution for courses satisfactorily completed by the student at the previous institutions. Credit shall be awarded if the courses are judged by the appropriate statewide course numbering system faculty committees representing school districts, public postsecondary educational institutions, and participating nonpublic postsecondary educational institutions to be academically equivalent to courses offered at the receiving institution, including equivalency of faculty credentials, regardless of the public or nonpublic control of the previous institution.

The Department of Education shall ensure that credits to be accepted by a receiving institution are generated in courses for which the faculty possess credentials that are comparable to those required by the accrediting association of the receiving institution. The award of credit may be limited to courses that are entered in the statewide course numbering system.

Credits awarded pursuant to this subsection shall satisfy institutional requirements on the same basis as credits awarded to native students.

Exceptions to the General Rule for Equivalency

Since the initial implementation of the SCNS, specific disciplines or types of courses have been excepted from the guarantee of transfer for equivalent courses. These include courses that must be evaluated individually or courses in which the student must be evaluated for mastery of skill and technique. The following courses are exceptions to the general rule for course equivalencies and may not transfer. Transferability is at the discretion of the receiving institution.

1. Courses not offered by the receiving institution.
2. For courses at non-regionally accredited institutions, courses offered prior to the established transfer date of the course in question
3. Courses in the _900-999 series are not automatically transferable, and must be evaluated individually. These include such courses as Special Topics, Internships, Apprenticeships, Practica, Study Abroad, Theses, and Dissertations.
4. Applied academics for adult education courses.
5. Graduate courses.
6. Internships, apprenticeships, practica, clinical experiences, and study abroad courses with numbers other than those ranging from 900- 999.
7. Applied courses in the performing arts (Art, Dance, Interior Design, Music, and Theatre) and skills courses in Criminal Justice (academy certificate courses) are not guaranteed as transferable. These courses need evidence of achievement (e.g., portfolio, audition, interview, etc.).

Courses at Non-Regionally Accredited Institutions

The SCNS makes available on its home page (http://scns.fldoe.org) a report entitled “Courses at Non-Regionally Accredited Institutions” that contains a comprehensive listing of all nonpublic institution courses in the SCNS inventory, as well as each course’s transfer level and transfer effective date. This report is updated monthly.

Questions about the SCNS and appeals regarding course credit transfer decisions should be directed to the Director of Academic Affairs, City College, 2000 West Commercial Blvd. Fort Lauderdale FL 33309 6565 Taft Street Hollywood FL 33024 or to the Florida Department of Education, Office of Articulation, 1401 Turlington Building, Tallahassee, Florida 32399-0400. Reports and technical information may be requested by calling the SCNS office at (850) 245-0427 or at http://scns.fldoe.org.

Unit of Credit

City College awards credit on a quarter system. One quarter credit hour is equivalent to ten (10) class hours of instruction, twenty (20) hours of laboratory study, thirty (30) hours of externship, or a combination of the three with appropriate homework and study. An instructional hour is fifty (50) minutes.

Grading System

Final grades are issued at the end of each quarter based on the following criteria:

A (90-100)	equals 4.0 quality points
B (80-89)	equals 3.0 quality points
C (70-79)	equals 2.0 quality points
D (60-69)	equals 1.0 quality points

F (below 60)	equals 0.0 quality points
I (incomplete)	equals 0.0 quality points
W (withdrawal)	equals 0.0 quality points
S (satisfactory)	equals 0.0 quality points
T (transfer credit)	equals 0.0 quality points
P (pass)	equals 0.0 quality points
NP (no pass)	equals 0.0 quality points

The number of quality points awarded in a course is determined by multiplying the number of credit hours for that subject by the number of quality points earned in the course. The grade point average (GPA) is computed by dividing the total number of quality points by the total number of credit hours attempted. Grades of "W," "S," "P," "NP," “I,” and "T" are not used in the GPA calculation.

Individual progress records are permanently maintained by the College for each student. All grades awarded by faculty are included in the record and are available to the student. Grade reports are issued to the student each quarter.

A student may appeal a final grade within the first week of the following quarter.

Incomplete Grade

An "I" or incomplete grade is given when a student has not completed the work necessary for one of the above grades. Incomplete grades are granted at the discretion of the faculty member and must be approved by the Program Chair. In order to receive an incomplete grade the student must submit a written request to the course instructor. Upon approval, a Learning Contract will be put in place specifying the remaining assignments or other course deliverables and the final due date. The student has a maximum of two weeks from the end of the term to complete the work. Once work is completed students recorded grade and course average will be the minimum passing grade for the program. If it is not completed, the student may receive an "F" for the course. The final grade/credits attempted will be included in the maximum time frame for program completion.

All change of grades and incomplete grades must be completed prior to the start of the next quarter.

Transfer Courses

A "T" grade is given to students whose courses were taken at another institution and are being transferred in for required courses at City College. The grade of "T" has no effect on the student's overall grade point average or successful completion of courses. However, a "T" grade is added to hours attempted and earned within the specified maximum time frame.

Advanced Standing for Professional Life/Work Experience

A grade of "S" is given for the appropriate City College course, and the student is credited with having earned this curriculum requirement. The grade of "S" has no effect on the student's cumulative grade point average or successful completion of courses. However, the grade of "S" is added to hours attempted and earned within the specified maximum time frame (See Advanced Standing policy).

Course Prerequisites

Courses may have prerequisites. Prerequisites may be waived by the Director of Academic Affairs on an individual basis.

Course Cancellation

The College reserves the right to cancel any classes which do not have a minimum number of students enrolled. The College will notify the student by email, or telephone call (voice or text). If the College cancels any class which was part of a program of study for an existing student, the College will offer an appropriate substitution which will enhance the educational objective for the student involved. All course substitutions made in a student's program of study must be approved by the Director of Academic Affairs and documented in writing in the student's permanent file. Course equivalencies are maintained by the Registrar.

Auditing Classes

The ability to audit a course is available to students in specific circumstances. A student may be required to audit a course as a part of a learning contract to reinforce concepts and assist the student in mastering specific learning outcomes.

A student who is required to audit a course, regardless of reason, is responsible for meeting attendance requirements, completing assignments, participating in quizzes, exams and other academically related activities as specified in the syllabus, but will not receive a grade for the audited course. An Individualized Learning

Contract will be created by the Program Chair and signed by the student for any course that must be repeated via audit. The contract will include any auditing requirements and must be approved by the Director of Academic Affairs.

Auditing Courses as Part of Re-Admission

Based on student performance on a placement exam for readmission to a program, a readmitted student may be required to audit multiple courses within the program quarter of the program that they have been placed based on their exam. The student is responsible for ensuring they have access to the textbook and any resources for the course(s) audited.

Auditing Combined Courses

An active student who fails a portion of a "combined" course may be required to audit a previously completed portion of that course to provide additional support and remediation for the failed portion of the course. (For example, a student who fails the lab component of a combined course may be required to audit the didactic (lecture) portion of the course).

Auditing Courses in Cohorted Programs

For cohorted programs, an active student who fails a pre-requisite course may be required to repeat the failed course and audit additional courses from the same quarter of the course that is being repeated.
[Rationale: Concurrent courses may provide additional reinforcement of content that will support the student in mastering concepts.]

Converting an Audited Course to a Repeated Course

Students who achieve a higher grade in an audited course may exercise a one-time request to have an audited course be added to their official academic transcript as a repeated course and count towards their GPA. The original grade earned for the class will remain on the transcript, but the grade points will not be factored into the overall grade point average. This grade change request must be approved by the Director of Academic Affairs.

Institutional Residency Requirement

To earn a degree from City College, City College requires that a certain percentage of courses be completed at City College, which is referred to as 'residency.' Students must complete a minimum of 25% of the program in residency at City College. This does not include Advanced Credit for Life Experience or Advanced Standing by Examination as those credits are Included in the percentage granted for Transfer Credit.

Externships

Externship sites may have specific health related requirements that students must adhere to that exceed the programmatic medical requirements for admissions to City College. Please refer to the student handbook for the program for more detailed information on the requirements the student may experience that are beyond the programmatic medical requirements for admission to City College.

Graduation Requirements

The candidate for a degree must:

1. Successfully complete all specified requirements for the degree.
2. Earn a cumulative grade point average of at least 2.0, "C" average. (Emergency Medical Services/Paramedic/EMT students must earn a minimum grade of B in all Major Core courses and a C or better in all general education courses, effective Oct. 2, 2006.)
3. Achieve a specific level of performance in each skill area required for graduation.
4. Be free from all indebtedness to the college.

Students cannot walk in the graduation ceremony if they have not met the requirements for graduation in their program.

Graduation with Honors

Students who meet the requirements for graduation for an Associate's or Bachelor's Degree, and whose cumulative grade point average meets the following criteria, are conferred their degrees with the honors indicated. Cumulative Grade Point Average for Honors:

Summa Cum Laude	3.90-4.00
Magna Cum Laude	3.70-3.89
Cum Laude	3.50-3.69

Complete Status

A completer is a student who is no longer enrolled in the campus and who has either completed the time allowed or attempted the maximum allowable number of credits for the program of study but did not accomplish one of the following graduation requirements:

1. Achieve a GPA of at least 2.0.
2. Attain required competencies or skills.
3. Satisfy non-academic requirements.

Awards and Recognition

Understanding that exceptional academic achievement is earned and should be recognized, the College awards individual letters or certificates each quarter for the following:

- President's List - 3.90-4.00 term grade point average
- Director's List - 3.70-3.89 term grade point average
- Outstanding Academic Achievement - 3.50-3.69 term grade point average
- Perfect Attendance

Transcripts

An official transcript is provided to any student who requests one in writing and is free of indebtedness to the College. The first copy is free of charge. Additional copies will be issued for a fee. To officially request a transcript, please click HERE. Please refer to the schedule of fees for the cost.

Attendance Policy

Students are expected to attend all scheduled classes to achieve the learning goals for their program of study. In an online class, the student is expected complete an academically related activity at least twice a week to meet attendance requirements. Logging in without further participation or completion of an academically related activity does not meet attendance requirements. Excessive absenteeism may result in course failure or withdrawal from the institution.

Any student who does not attend classes for 14 consecutive calendar days will be unofficially withdrawn from City College. Students who are removed from enrollment prior to the last day of Week 6 will earn a W on their transcript. A "W" will have no impact on a student's CGPA but will be computed in a student's maximum time frame calculation. Students who are removed from enrollment after Week 6 will earn an F on their transcript. An "F" will have an impact on a both a student's CGPA and maximum time frame calculation. Removal from enrollment may place a student on probation or in academic dismissal status. A student who is removed from enrollment for the quarter for failure to attend classes for 14 consecutive days may be permitted to apply for re-entry in the subsequent quarter, provided that the student is in good academic standing. Students removed from enrollment who seek re-entry in a subsequent quarter will be required to follow all re-entry guidelines.

Leave of Absence

A Leave of Absence is a temporary interruption in a student's program of study due to an extenuating circumstance. Leave of Absence refers to the specific period during a program when a student is not in attendance and will return to complete the program. There are two types of Leave of Absences, a full leave, and a short leave.

- The time frame granted for a Full Leave of Absence is a minimum of fifteen (15) consecutive days up to a full term.
- The time frame granted for a Short Term is fourteen (14) consecutive days.

Requested Leave of Absence

Under extenuating circumstances, students are eligible to request a Leave of Absence (LOA). If approved, the student will receive a notice of the specific requirements and time frame granted for the leave. Any student who exceeds the timeframe granted for the leave will be considered to have unofficially withdrawn from the program as of their last day of attendance. In addition to reviewing the exceptional circumstances pertaining to the need for a LOA, the student must:

- be maintaining satisfactory academic progress
- be in good standing
- have their financial balance up to date

Students are eligible for only one LOA per academic year. Students returning from a Leave of Absence must contact the Office of the Registrar to begin the process of reenrollment. In addition to satisfying any requirements stipulated upon granting of the Leave of Absence (i.e., length of LOA, academic requirements, etc.) other factors, including but not limited to, course offerings and course size limits will affect the student's ability and time frame to re-enroll.

Process

The student must complete the Request for Leave of Absence Form and attach a written letter requesting a LOA and specify the reasons for that request. The letter must be signed and dated by the student. The Campus Director, in consultation with the Program Chair, will render a decision approving or disapproving the LOA, the length of time the LOA will be in effect, and the requirements the student will need to complete, to make up any material missed. Students must not assume the LOA has been granted. They will receive written confirmation of the decision and must sign a Leave of Absence Approval & Acknowledgement form. Failure to complete this form will invalidate the LOA.

Required Leave of Absence

Under extenuating circumstances, a student may be required by the College to take a Leave of Absence. Examples of extenuating circumstances are:

- No longer being able to meet the technical standards of the program
- Disciplinary sanctions because of sexual misconduct

If required, the student will be notified of the reason and receive a notice of the specific requirements and time frame granted. If more time has elapsed than allowed, the student will be considered an unofficial withdrawal from the program, a refund calculation will be done based on a student's last day of academic related activity. Students returning from a required Leave of Absence must contact the Office of the Registrar to begin the process of reenrollment. In addition to satisfying any requirements stipulated upon acquiring the Leave of Absence (i.e., length of LOA, academic requirements, etc.) other factors, including but not limited to, course offerings and course size limits will affect the student's ability and time frame to re-enroll.

Process

The student must complete the Request for Leave of Absence Form. They will receive written confirmation of the requirements they will need to complete upon returning from their LOA and must sign a Leave of Absence Approval & Acknowledgement form. Failure to complete this form will invalidate the LOA.

Students returning from a Leave of Absence must complete and submit the Request to Return from Leave of Absence form located on the institution's website no less than 3 business days prior to their intended return date.

Students returning from a medical or mental health Leave of Absence are required to submit a Physician's Affidavit, completed, and signed by their treating physician, certifying that the student is fit to complete the program and comply with the program's academic and behavioral requirements, and that they continue to meet the technical standards of the program and the profession.

Students Receiving VA Educational Benefits

Veterans Attendance Policy

Students receiving VA Educational benefits are expected to attend all scheduled classes regularly and on time to achieve the learning goals for their program of study. In an online class the student is expected to log in daily and must do an activity at least once a week.

Any students receiving VA Educational benefits who does not attend classes for 14 consecutive calendar days will be terminated from using VA educational benefits and may also be dropped from all courses for that quarter.

Students who are removed from enrollment prior to the last day of Week 6 will earn a W on their transcript. A "W" will have no impact on a student's CGPA but will be computed in a student's maximum time frame calculation for satisfactory academic progress. Students receiving VA Educational benefits who are removed from class after week 6 will earn an F on their transcript. An "F" will have an impact on both the student's CGPA and maximum time frame calculation. Removal from enrollment may place a student on probation or in academic dismissal status.

A student Veteran who is withdrawn from enrollment by the institution for violating the attendance policy may be permitted to apply for re-entry in the subsequent quarter provided the student is in good academic standing. Students removed from enrollment who seek re-entry will be required to follow all re-entry guidelines.

Standards of Satisfactory Progress for Students Receiving VA Educational Benefits

In addition to adhering to the general standards of satisfactory progress, students receiving Veteran's Administration (VA) educational benefits (VA students) must maintain a minimum cumulative grade point average (CGPA) of 2.0 at the end of each term. In terms 1 through 5 a VA student who falls below a 2.0 will be put on academic probation. If in the following term they still have not achieved a 2.0 they will be placed on a second and final academic probation. Failure to achieve a 2.0 at the end of the second consecutive term of academic probation will result in the student's VA educational benefits being terminated. In term 6 and all subsequent terms, a VA student must meet the City College SAP requirements and achieve a 2.0 or may be academically dismissed from the program. A VA student terminated from VA educational benefits due to unsatisfactory progress may petition the institution to be recertified to receive VA educational benefits after one term has elapsed and after attaining a CGPA of 2.0.

Veterans Credit for Previous Education or Training

City College maintains a written record of the previous education and training of all students receiving VA Educational benefits. City College also documents that appropriate credit has been given for previous education and training in accordance with the City College transfer of credit standards, (see Transfer of Credit policy) with the length of program adjusted accordingly. Students receiving VA Educational benefits will receive transfer of credit (provided that the college can obtain those transcripts from those institutions), regardless of whether the student wants that credit transferred; and, if it falls within the acceptable City College transfer of credit timeframes for specific programs and courses (core program courses must have been taken within the last five years to qualify for transfer of credit).

Veteran Payment

In accordance with Title 38 US Code 3679 subsection (e), this college adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation & Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. The college will not:

- Prevent the student's enrollment;
- Assess a late penalty fee to the student;
- Require the student to secure alternative or additional funding;
- Deny the student access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

Standards of Satisfactory Progress

Students enrolled at City College must be making measurable progress toward the completion of his or her program of study. The College has established satisfactory academic progress (SAP) standards that stipulate

Minimum Standards of Satisfactory Academic Progress for Associate and Bachelor Degree Programs

Students must achieve (a) a minimum cumulative grade point average (CGPA), according to a prescribed schedule of evaluation points, and (b) complete their programs of study within a maximum time frame (MTF) that is one and one-half times the number of credit hours required for his/ her program of study. Standards of satisfactory academic progress, as defined in this catalog, apply to all students. Failure to maintain in SAP may result in loss of financial assistance.

Term	Minimum Required CGPA	Minimum Required % of Credits Completed to Credits Attempted (Completion Rate)
1	1.5	40
2	1.65	40
3[1]	1.8	50
4	1.8	55
5	2.0	60
6[2]-9[2]	2.0	60
Each Subsequent Term[2]	2.0	60

[1] Student not meeting standards does not have to be dismissed; probation is required.
[2] A student not meeting standards is not eligible for financial aid and must be dismissed OR may remain in an extended enrollment status; probation is not allowed at this point.

EMS Programs

In addition to adhering to the general Standards of Satisfactory Progress, (CGPA and MTF), students majoring in Emergency Medical Services/EMT must achieve and maintain (a) a minimum grade of B in all Major Core courses and (b) a minimum grade of C in all general education courses. Students must also adhere to the rules for repeated courses, "Three Strike Rule". Extended Enrollment does NOT apply to students in EMS who violate the Strike Rule.

Veterinary Technology Program

In addition to adhering to the general Standards of Satisfactory Progress, (CGPA and MTF), students majoring in Veterinary Technology must maintain a minimum grade of C in all Major Core courses. A student in this program must also adhere to the rule regarding repeated courses.

Minimum Standards of Academic Progress for Diploma Programs

Term	Minimum Required CGPA	Minimum Required % of Credits Completed to Credits Attempted (Completion Rate)
1[1]	1.8	60
2	2.0	60
Each Subsequent Term[2]	2.0	60

[1] Student not meeting standards does not have to be dismissed; probation is required.
[2] A student not meeting standards is not eligible for financial aid and must be dismissed OR may remain in an extended enrollment status; probation is not allowed at this point.

Bachelor's degree Programs

Bachelor's degree programs, due to transfer credits, are considered as starting in the 7th term or later and therefore no probationary status will occur. If the student does not meet the required CGPA and/or completion minimum they will be dismissed.

Evaluation Points

Satisfactory academic progress is measured at the end of each quarter.

Academic Year (AY)

An academic year is defined as a period that must include at least 30 weeks of instructional time, beginning with the first day of classes and ending on the last day of classes or the last day of examinations, whichever is later.

Maximum Time Frame

You must be on target to complete your program before attempting more than 150% of the credit hours for your program of study. To calculate maximum time frame for your program you multiple the total credits required to complete the program by 1.5. Transfer, withdrawn, incomplete, repeated credit hours all count towards maximum time frame.

Academic Probation

Student has not met the stated minimum requirement of academic progress but is being allowed a term to correct the academic issues of either CGPA and or MTF to meet the SAP requirement and remain eligible for enrollment.

Academic Dismissal

Student has failed to meet the stated minimum requirement of academic progress and is being academically dismissed from the program.

A student may be academically dismissed without being placed on probation or after the probationary period based on when they fall below the minimum SAP requirements (See Eligibility for Extended Enrollment).

Standards of Satisfactory Progress for Students Receiving VA Educational Benefits

In addition to adhering to the general standards of satisfactory progress, students receiving Veteran's Administration (VA) educational benefits (VA students) must maintain a minimum cumulative grade point average (CGPA) of 2.0 at the end of each term. In terms 1 through 5 a VA student who falls below a 2.0 will be put on academic probation. If in the following term they still have not achieved a 2.0 they will be placed on a second and final academic probation. Failure to achieve a 2.0 at the end of the second consecutive term of academic probation will result in the student's VA educational benefits being terminated. In term 6 and all subsequent terms a VA student must meet the City College SAP requirements and achieve a 2.0 or may be academically dismissed from the program.

A VA student terminated from VA educational benefits due to unsatisfactory progress may petition the institution to be recertified to receive VA educational benefits after one term has elapsed and after attaining a CGPA of 2.0. Students using veteran benefits must consult with the Campus Director for advisement prior to changing programs of study.

Academic Changes that will Impact Calculations to Satisfactory Academic Progress (SAP):

Grade Penalty

For a student who withdraws from the College or is dismissed by the College, the withdrawal date or last documented date of educational activity determines whether grades are recorded for that quarter. If the withdrawal date or last known date of educational activity is within the first half of the course, a grade of "W" is given. If the withdrawal date or last known educational activity occurs within the last half of the course, the student will receive a grade in each course. An "F" will be assigned to each requirement that is not completed and averaged in with the grades earned for completed work.

Transfer Courses

A "T" grade is given to students whose courses taken at another institution are being transferred in for required courses at City College. The grade of "T" has no effect on the student's overall grade point average or successful completion of courses. However, a "T" grade is added to hours attempted within the specified maximum time frame.

Course Incompletes

A student who receives an "I" (incomplete) has two weeks from the end of the term or prior to the first date of instruction for the next term, the earlier of the two, to complete the work. The final grade will be calculated into the student's cumulative grade point average. The final grade/credits attempted will be included in the maximum time frame for program completion.

Change of Program

Any City College student who desires to change educational goals and change from one degree program to another must submit a Change of Program Request Form together with a new Enrollment Agreement and application to the admissions department. A student wishing to enter a program for which a degree would be granted must meet the programmatic entry requirements and qualifications specifically intended for the granting of a degree. A request for a change of program will be approved if the student:

- Can show success within another program based on the original entrance/placement test scores
- Has grades in courses already completed
- Has other considerations (i.e. financial obligation incurred)

Students who change programs should consult with their Financial Aid representative to determine if they will have sufficient funds available to complete the new program of study.

If the request for a change of program is approved, the student making the request will be informed of the change as soon as possible, with approval effective at the beginning of the next quarter. Students should complete their current term.

Upon approval of the Change of Program request, ALL previously attempted and earned credits which apply to the new program, Transfer (T) and Advanced Standing (S) courses which count towards the new program completion requirements will be transferred. All credits attempted and grades earned in the student's new program of study will count towards determining satisfactory academic progress and will be calculated within Maximum Time Frame.

Punitive grades earned under the previous program which do not apply to the current program will no longer be calculated within the students CGPA or Maximum Time frame and the student will be allowed to re-set both their MTF and CGPA. Because a Change of Program re-sets a student's CGPA and MTF, students may only request one change of program.

Repeated Courses

A student may repeat courses for which an "F," "D," "C", or "W" was earned. When a student repeats a course for the purpose of raising a failing grade, the highest grade will be used in calculating the student's cumulative grade point average. However, all courses taken are calculated into credit hours attempted for the purpose of the student's Maximum Time Frame (MTF) for completion and remain on a student's transcript. Students may repeat courses as necessary to meet academic requirements unless otherwise limited or prohibited by program-specific academic policies. See also EMS and Veterinary Technology Repeated Courses section.

Financial aid may be received if all other eligibility requirements are met.

A student making a grade of "D" may advance if desired. It's recommended, however, that the course be repeated if it is in the student's major area of study. Courses that are taken and then retaken are both counted towards attempted hours, and the highest grade will be used in calculating the student's CGPA.

EMS and Veterinary Technology Repeated Courses

Repeated Courses in EMS - "Three Strike Rule"

A minimum of a "B" is required to pass ALL core courses in the Emergency Medical Services/Paramedic/EMT program. A grade of "C", "D", "F", or "NP" is considered unsatisfactory and therefore non-passing. No more than 2 core courses may be repeated in the EMS program. Only one repeat of any core course may be attempted. A second failure of the same or failure of a 3rd course will result in dismissal from the program. Receiving an unsatisfactory or non-passing grade will affect the student's progression to any course for which that course is a prerequisite. EMS students cannot advance in their programs with a grade of NP. Students who are dismissed for a violation of the three strike rule are not eligible for extended enrollment status.

Repeated Courses in Veterinary Technology

A minimum grade of a "C" (70%) is required to pass ALL core courses (labeled ATE) in the Veterinary Technology program. A grade of "D", "F", "NP", or failure to achieve minimal objectives for the course is considered unsatisfactory and therefore non-passing. A student who receives a non- passing grade will be required to repeat the course(s). The student must receive a "C" or better in the repeated course. A second failure of the same course will result in dismissal from the program. A third and final attempt at the same course may be granted if a student appeals the dismissal and documents extenuating circumstances to the Program Chair. Receiving an unsatisfactory or non-passing grade will affect the student's progression to any course for which that course is a prerequisite.

Second Degree

Students who wish to earn an additional degree from City College must apply for admission to the College. Upon acceptance to the College, courses previously completed at City College that count toward the new degree program completion requirements will be applied following completion of a degree audit. Only courses previously completed with a final grade of "D" or higher will be applied. Students may request transfer of credit for coursework completed at other institutions following Transfer Courses policies.

Credits attempted and grades earned in the student's new program of study will count towards determining satisfactory academic progress. The College does not offer dual majors.

Academic Withdrawal, Probation and Dismissal Policies

Voluntary Withdrawal from City College

A student must officially withdraw from the College. A student who wishes to withdraw is required to inform the institution in writing of his/ her intention to withdraw by completing a Withdrawal Form. The last day of educational related activity (LDA) determines whether grades are recorded for the quarter. If the LDA is within the first half of the course, a grade of "W" is given. If the LDA occurs within the last half of the course (through week 6), the student will receive a final letter grade in each course. The grade of "W" has no effect on the student's cumulative grade point average or successful completion of courses. However, the grade of "W" is added to hours attempted within the specified maximum time frame.

Unofficial Withdrawal from City College

An unofficial withdrawal is one where the College has not received notice from the student that the student has ceased or will cease attending their program or a student has notified the program of their intent to withdraw but does not complete the Withdrawal Form. An unofficial withdrawal will automatically result in the student being terminated from their program. Students who unofficially withdraw from their program will receive a grade of "F" and may affect the student's future eligibility for Financial Aid.

Academic Probation and Academic Dismissal

Students who fail to earn the required Cumulative Grade Point Average (CGPA) and/or the required completion percentage of credit hours will be counseled and placed on Academic Probation. The probationary period extends for one quarter. While on probation, Title IV funds will be disbursed. At the end of the probationary period, the student's CGPA and credit hours earned are again reviewed using the minimum standards of satisfactory academic progress. If the student's average and credit hours earned equals or exceeds the required minimum, the student is removed from probation. If the student's average and credit hours earned are below the required minimum, the student will be deemed not making satisfactory progress as of the end of the quarter. At this time, their Title IV financial aid will be terminated, and the student will be academically dismissed.

Students placed on Academic Probation or Academic Dismissal will be notified in writing by the Program Chair with a copy placed in the student's permanent academic file. A student who has completed two academic years (six quarters) and then falls below the minimum standard is not eligible for academic probation at that point. It is possible for a student to be academically dismissed without first being placed on probation. In this case, the student may request extended enrollment status.

Financial Aid Warning and Probation

Financial Aid Warning may be assigned to a student who falls below the satisfactory academic progress guidelines. The student may be placed on financial aid warning for one term and may be eligible to receive financial aid. At this point the student is placed on Academic Probation.

Financial Aid Probation is may be assigned to a student who fails to meet satisfactory academic progress after one term on academic probation.

If the student successfully appeals academic dismissal and academic probation is extended for one term with an academic plan to bring them into satisfactory academic progress, financial aid will be disbursed.

In both instances the student will be notified in writing by mail or email of their financial aid status.

Administrative Withdrawal/Dismissal from the College

All students are expected to maintain a satisfactory level of academic achievement, to conduct themselves as responsible adults, and to attend classes regularly.

The College reserves the right to dismiss any student who:

- Fails to maintain satisfactory academic progress.
- Exhibits conduct the administration deems detrimental to the individual, other students, the community, or the College.
- Fails to meet attendance requirements.
- Fails to meet financial obligations to the College as agreed upon. Specific standards of academic progress and class attendance are detailed in the sections of this catalog (see Standards of Academic Progress and Student Code of Conduct Policy).

Reentry Policies: Re-Entry, Extended Enrollment, Financial Aid Probation Reentry

Students who left the institution in good standing and wish to reenter in the same program or a different program must meet the current requirements for entry into the program.

EMS Reentry

A student who wishes to reenter the EMS program after previously withdrawing must:

- Have an active, clear EMT license to start the Paramedic Diploma program
- If the student stopped attending prior to completing EMT1 or EMT2, the student must start again at EMT1.
- If the student stopped attending in any of the Paramedic I-V classes, the student is required to begin again at Paramedic I.

Reestablishing Eligibility for Reentry After Academic Dismissal

There are two ways in which a student may return to enrollment status after Academic Dismissal: Extended Enrollment or Financial Aid Probation.

Extended Enrollment Status

Students not achieving the minimum standards of satisfactory academic progress or who fail to meet the minimum standards at the end of the probationary period will be terminated from the College. Students may enroll in an extended enrollment status for one quarter in the term immediately following their dismissal to attempt to earn eligibility for reentry. Students in an extended enrollment status will be charged the appropriate tuition and fees but will not be eligible for any Title IV financial aid. While in this extended enrollment status, students must attempt to correct their academic deficiencies. The extended enrollment status must be completed within the required maximum time frame. The conditions for extended enrollment status will be agreed upon in writing by the student and the academic department.

EMS students who are dismissed for a violation of the three strike rule are not eligible for either extended enrollment or financial aid probation status.

Financial Aid Probation

To reestablish eligibility for reentry, a student must remain out of school for at least one quarter and the student must be eligible to be on probation at the time of re-entry. If the student is not eligible for probationary status as defined in Satisfactory Academic Progress the student may be eligible for Financial Aid Probation.

Financial Aid Probation is assigned to a student who fails to meet satisfactory academic progress after one term on academic probation and is then academically dismissed. If the student successfully appeals academic dismissal and academic probation is extended for one term with an academic plan to bring them into satisfactory academic progress, Financial aid will be disbursed. In both instances the student will be notified in writing by mail or email of their financial aid status.

Academic Dismissal Appeal Procedure

Students wishing to appeal the determination that they are not maintaining satisfactory progress must submit a letter to Director of Academic Affairs within five (5) calendar days of the date of their official notification. The letter should describe any mitigating circumstances the student feels deserve further consideration, along with pertinent documentation. The letter must demonstrate that such circumstances had an adverse impact on the student's satisfactory progress in the academic program. A decision on the appeal will be made, and the student will be notified accordingly. If the appeal is decided in the student's favor, the probationary period will be extended for one quarter and will be placed on financial aid warning and Title IV funds will be disbursed. Decisions to any appeal will be provided prior to the next quarter start. If the minimum requirements for satisfactory academic progress are not attained at the end of the second term of probation, the student will be academically dismissed.

Students coming back into the same program

The student's Satisfactory Academic Progress must be such that they may be placed on probation. The student must establish a repayment plan and is ineligible for Title IV funds upon reentry. The student must successfully retake courses previously failed or upgrade the skills applicable to the student's educational objective, so that the recalculated CGPA and earned credit hours meet or exceed the minimum requirements to meet Satisfactory Academic Progress and come off probation. At the end of the first quarter after re-entry, if the student has demonstrated improvement to the required minimum SAP, the student will be removed from probation and will be eligible for Title IV funds for the entire payment period in which the student established eligibility. If the student has not reached the minimum requirement, the student will be academically dismissed and will not be eligible for readmission.

Students coming back into a new program

A student may also reestablish eligibility by enrolling in a new program of study. Upon reentry into a new program, the student is eligible for Title IV financial aid. Students may only request one program change; therefore, if a student has previously changed their major, they are not eligible for re-entry. For a student's recalculated SAP under this new program, only credits (grades of "D" and higher) which transfer into the new curriculum will be considered as part of the new maximum time frame and CGPA. Previous Fs and Ws will no longer calculate in a student's new CGPA. Upon approval for re-entry into a new program, the student may be placed on probation based on recalculated CGPA and MTF.

Academic Appeals Process

Final Course Grades Appeal Procedure

Appeals of final course grades must be made within five (5) calendar days of the date when the grade becomes final (posting in the student portal). The Director of Academic Affairs may direct a grade to be changed only when it is determined through the appeal process that a final grade was influenced by any of the following:

1. A personal bias or arbitrary rationale;
2. Standards unreasonably different from those that were applied to other students;
3. Grading was not in compliance with stated course syllabi;
4. A substantial, unreasonable, or unannounced departure from previously articulated standards; or
5. The result of a clear and material mistake in calculating or recording grades or academic progress (See the City College Student Handbook for further information).

Mitigating Circumstances

Mitigating circumstances would include personal injury, poor health, family crisis, or other unusual and significant occurrences outside the control of the student The Campus Director may waive dismissal and extend probation for mitigating circumstances.

Privacy Rights of Students

Confidentiality is maintained according to the Family Education Rights and Privacy Act (FERPA) of 1974 (otherwise known as the Buckley Amendment). The Family Educational Rights and Privacy Act (FERPA) (20 U.S.C. § 1232g; 34 CFR Part 99) is a Federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education.

FERPA gives parents certain rights with respect to their children's education records. These rights transfer to the student when he or she reaches the age of 18 or attends a school beyond the high school level. Students to whom the rights have transferred are "eligible students."

Parents or eligible students have the right to inspect and review the student's education records maintained by the school. Schools are not required to provide copies of records unless, for reasons such as great distance, it is impossible for parents or eligible students to review the records. Schools may charge a fee for copies.

- Parents or eligible students have the right to request that a school correct records which they believe to be inaccurate or misleading. If the school decides not to amend the record, the parent or eligible student then has the right to a formal hearing. After the hearing, if the school still decides not to amend the record, the parent or eligible student has the right to place a statement with the record setting forth his or her view about the contested information.

Generally, schools must have written permission from the parent or eligible student to release any information from a student's education record. However, FERPA allows schools to disclose those records, without consent, to the following parties or under the following conditions (34 CFR § 99.31):

- School officials with legitimate educational interest.
- Other schools to which a student is transferring.
- Specified officials for audit or evaluation purposes.
- Appropriate parties in connection with financial aid to a student.
- Organizations conducting certain studies for or on behalf of the school.
- Accrediting organizations.
- To comply with a judicial order or lawfully issued subpoena.
- Appropriate officials in cases of health and safety emergencies.
- State and local authorities, within a juvenile justice system, pursuant to specific State law.

Directory Information

City College complies with Federal Regulations regarding privacy rights of students. We may disclose, without written consent, "directory" information which we consider to be the student's name, address, telephone number (including cell phone number), date and place of birth, honors and awards, photograph, and dates of attendance.

Parents and students are notified annually of their rights through inclusion in the student handbook and the College Catalog. Parents and eligible students may request that the school not disclose directory information about the student by contacting the registrar at the campus they attend.

Online Policies and Procedures

City College is authorized under State Authorization Reciprocity Agreement ("SARA"). SARA pertains to approval of distance education courses and programs offered across state lines by postsecondary institutions that already have degree authorization in at least one state. SARA centralizes the authorization process for each institution in a single state called the institution's "home state." Colleges or universities in a SARA state therefore only need their home state authorization to offer distance education to students in any other SARA member state, subject to certain limitations. Colleges and universities that are SARA members may provide online education to residents of SARA member state. Currently California, is not part of SARA and students residing in California will not be eligible to apply for City College courses/programs.

City College offers online and blended programs. For fully online programs, City College only accepts students who reside in SARA member states. For our hybrid students (on-campus students taking an online course), we can supplement our traditional campus-based curriculum and programs with online courses. All General Education, Student Life Sciences and some Program based courses are offered in online format only. As such all City College students should have access to a computer and internet access for successful program completion. Students who wish to complete courses online must be aware that successful completion of online courses depends heavily upon self- motivation as well as technical proficiency in computer and internet use. In addition, students must possess good English and writing skills as well as effective time management. Students may take online courses in their first term and so will be required to meet online proficiencies upon matriculation.

None of the City Colleges' current online programs require certification and there are no barriers based on online education which preclude students of SARA member states from completing their education or gaining employment. However, if students move to a non-SARA approved state, this may adversely impact the student's ability to complete the program or gain employment in field.

Technology Requirements

All of City College's courses are supported by use of a learning management system. To ensure students are appropriately prepared:

1. Prior to registration for their first course, students must complete City College's orientation to ensure that they understand the technology necessary for success. Students who do not successfully complete the orientation may re-take this for enrollment in a subsequent quarter.
2. Students without a school-issued device must have their own computer or device that meets the minimum technology requirements. Refer to Technology Requirements for additional information.
3. Students must have high speed Internet access. (Use of a hotspot is not recommended.)
4. Students must have an e-mail address.

Course Cancellation

City College requires that there is a minimum number of students in an online course. In rare circumstances, the College may cancel an online course on the first day of class due to low enrollment or some other eventuality. The College will notify the student with what the new course or status will be created by the course cancellation. Every effort will be made to move students to either another online course which meets their educational requirements or a similar class for hybrid students. Even if a student has logged into the online environment prior to course start, the student will incur no financial liability if the course is cancelled.

Guidelines for Online Course Enrollment

Students MUST be registered for online classes a minimum of five days prior to the start of the term. This allows students an opportunity to prepare for the substantial reading, research, collaborative learning, and writing activities that must be completed in a timely manner.

International Student Policies

International Students are required to adhere to the SEVP governing regulations. As such, pursuant to 8 CFR 214.1 Requirements for admission, extension and maintenance of status International Students in an F-1 status are limited in the online classes that they may take. Only one (1) online course may be taken in a term that counts toward the full course of study that is required to maintain F-1 status.

Online Classroom Policies

Online Weekly Schedule

Students are required to participate each week to maximize their learning potential and to receive both attendance and assignment points. The City College online week begins the first day of the term.

Conduct Policy for Classes

In the online classroom, students will submit assignments and post comments within threaded discussions and answer reflection questions. This is an educational platform and students are expected to behave accordingly and always use education appropriate language and standards. When commenting on other students work or assignments, care should be taken to be respectful even when challenging or disagreeing with someone.

Late Work

No assignment is considered late for the first 14 days of the term. This correlates to City College's 14-day attendance window. Students have 14 days to submit the first two weeks of work without it being considered late. The late policy will commence on Day 15 of the term. Students are required to post assignments no later than the due dates set in the course syllabus. If an instructor decides to accept a late assignment because the student has demonstrated verifiable mitigating circumstances such as death, illness, unplanned event, natural disaster, and or technical issues, late work will have 10% of the grade deducted for each day that the assignment is late. No late assignments will be accepted without prior approval from the instructor.

Verification of Identity During Examinations

Students may be asked to provide directory information (student numbers, special passwords, etc.) during a test for verification of student identity.

Technology Requirements

Students are expected to ensure personal, and school issued devices are up to date regarding operating systems, web browsers, and application versions.

Computer Operating Systems

- Operating System: Windows 10 and newer, Mac OSX 10.14 and newer or Linux – ChromeOS (eligible for continued updates)
- Speed and Processor: 4GB of RAM and 2GHz processor
- Internet Speed: Minimum of 10mps

Mobile

- iOS App: 14 or later

Supported Web Browsers

Microsoft Windows operating system within the 5 newest of each of these browsers:

- Google Chrome
- Firefox
- Microsoft Edge

Mac OS operating systems within the 5 newest of each of these browsers:

- Google Chrome (updateable)
- Firefox

Internet Connection

High Speed Internet (Cable, DSL, etc.) minimum 10 mbps

Student Code of Conduct Policy and Academic Integrity

City College recognizes its students as responsible and capable adults and citizens preparing for a career. Students are, therefore, expected to conduct themselves appropriately during their education process in accordance of what will be expected of them upon graduation and entering the workforce. The City College Student Code of Conduct Policy applies to all students and student organizations endorsed by City College. The Student Conduct Policy shall apply to all student conduct that occurs on a City College campus and/or an event sponsored by City College, inclusive of externships and clinical sites. At the discretion of the Director of Academic Affairs or his or her designee, the policy shall also apply to off-campus student conduct when the conduct, as alleged, adversely affects a substantial college interest and potentially violates a campus policy.

Please refer to the Student Handbook for the complete Code of Conduct Policy.

Anti-Hazing Policy

It is the policy of City College that there will be no initiations (hazing) connected with any College-sponsored club/organization. All clubs/ organizations formed by City College students must be approved by the Campus Director and are under the strict auspices of a staff or faculty member. Any deviation from this policy may result in immediate dismissal.

Definition of Terms

Academic Integrity

City College defines Academic Integrity as *a code of ethics governing honesty in a student's pursuit of scholarly research and application*. As such, infractions of City College's Academic integrity policy are deemed to be a form of academic dishonesty.

Suspension

Suspension is at the discretion of the Campus Director, Director of Academic Affairs, or the Disciplinary Appeals Committee. Suspension should not exceed two academic quarters. Students who are suspended are not eligible for a Leave of Absence.

Conduct Dismissal

A student is administratively dismissed from the College for violation of the student conduct policy.

Disciplinary Procedures

Any City College staff, or faculty member may file a complaint that a student is in violation of the student conduct policy.

- The complaint must be prepared in writing by completing the Disciplinary Notice Form. The complaint should include the nature of the infraction, the date, time, location. The names of students, faculty and or staff or witnesses should be included.
- Complaints should be submitted in a timely manner and should account for no more than 48 hours after the alleged infraction, unless there are extenuating circumstances requiring more time which should be documented.

Disciplinary Sanctions

For cases of infractions of academic integrity, faculty members have two options.

For the first infraction:

- The student may either fail the assignment without the possibility of retaking the assignment or,
- The student may fail the course and be required to repeat the course.

The Program Chair must approve the decision of the instructor.

A copy of the Disciplinary Notice form and any decision made will be placed in the student academic file.

For a second infraction, the student is subject to either:

- Suspension from the College or,
- Conduct Dismissal from the College

For a second infraction, the decision for suspension and/or dismissal will reside with the Program Chair and Director of Academic Affairs since faculty members may not be aware of a student's prior infraction. A copy of the Disciplinary Notice form and any decision made will be placed in the student academic file along with the letter to the student indicating that they have either been suspended or dismissed from school for violation of the student code of conduct.

Special Note: Egregious behavior on the part of a student can result in immediate dismissal from the College. For all other infractions, the final decision rests with the Director of Academic Affairs.

Appeals to Violations of the Code of Conduct Decisions

A student who has been found to be in violation of the City College Code of Conduct will have the opportunity to appeal the decision. The student's appeal must be in writing and within 14 days of the College's decision (see City College Grievance Procedures).

Violence Against Women Act (VAMA) Policy

City College supports the Federal Campus Sexual Assault Victims' Bill of Rights:

- Survivors shall be notified of their options to notify law enforcement.
- Accuser and accused must have the same opportunity to have others present.
- Both parties shall be informed of the outcome of any disciplinary proceeding.
- Survivors shall be notified of counseling services.
- Survivors shall be notified of options for changing academic and living situations.

City College prohibits the offenses of domestic violence, dating violence, sexual assault, and stalking, as defined in the Florida State Statutes.

Please refer to the City College Student Handbook, Faculty Handbook, or Annual Security Report for detailed information on procedures.

Programs of Study

Program Delivery

City College offers Blended programs.

Blended occurs when students take some of their courses via distance learning and some of their programs on-campus.

All externships, clinical, and internships are not offered by distance learning delivery mode.

Through these courses, the college can supplement the traditional campus-based curriculum with courses that meet the unique educational needs of the student by providing online learning opportunities and integrating distance learning techniques and technology. Courses offered in distance learning instructional delivery (online) are designated as such in the course descriptions.

General Education

City College believes that a sound foundation in the liberal arts (general education) is an essential complement to its many career- oriented programs. General education courses ensure that graduates are effective communicators, creative thinkers, as well as collaborative with an awareness of and appreciation for people, cultures, along with contemporary, national, and global issues. Specific General Education requirements are listed under each program. Students who complete BSC1093, BSC1094, or BSC1085, BSC1086 at the

Associate of Science level as a program requirement, may use these as their Science component in the Bachelor Program.

Students pursuing an Associate or bachelor's degree must include subject matter (courses) from the Humanities; Mathematics and the Sciences; and the Social Sciences. We recommend that students take at least one course from each of the following areas: English, Humanities, Sciences, Mathematics, Behavioral Sciences, and Social Sciences.

Students starting a Bachelor program after 10/1/2017 must have 12 quarter credits (or equivalent) of General Education at the 3000/4000 level.

Bachelor of Science Programs

Bachelor of Science in Business Administration

The objective of the Bachelor of Science in Business Administration is to provide students who have already earned an Associate of Science Degree and have an interest in Business with the tools for advancement or possible career shift in leadership positions within the local, national, and international corporate and government communities. The Bachelor of Science Degree in Business Administration is comprised of a theoretical and technical academic emphasis complemented with a general education quantitative and qualitative component. Courses under this program include the Major Core, the Concentration Core, the General Education unit, related requirements, and elective courses to complete degree towards a Bachelor of Science in Business Administration (BSBA). Applicants for this program must have earned an Associate of Science Degree and/or be in Junior standing or have earned a combination of life credit, credit by means of examination and transfer credit totaling a minimum of 72 credits.

Management Major

Effective 9/1/2021 City College is no longer enrolling in the Bachelor of Science in Business Administration program

The Bachelor of Science in Business Administration program with a major in Management offers advanced business, marketing, and operations courses as well as the courses which will provide the student with current and innovative business and managerial techniques. Graduates of the program will have opportunities for entry and mid-management level positions in banking, marketing, sales, personnel, management, and operations. The curriculum consists of a total of one hundred eighty (180) credit hours, presented over sixteen (16) quarters.

Program schedule based on full-time enrollment: 176 weeks; 1760 lecture and 80 lab contact hours.

Program Delivery: Blended, Online

Program Outcomes

- Prepare and analyze financial statements.
- Recognize tools used in a modern information system that will support managed decision making.
- Demonstrate functional knowledge of international management and marketing strategies.
- Develop communication and motivational tools for effective operational and managerial tools.
- Understand the principles, skills, technique, and strategies necessary for managing a firm's value chain.
- Demonstrate the ability to translate a firm's strengths and weaknesses into realistic opportunities and potential threats to a firm's goals.
- Be able to describe the need for global perspective and cross- functional integration for business operations.

Bachelor of Science in Health Care Administration

Campus: Hollywood/Online

The purpose of the Bachelor of Science in Health Care Administration is to provide students who have already earned a health-related associate degree with the knowledge and skills required to pursue entry-level positions in health care management. Students with a non-health care background with sufficient transfer credit to start as a 3rd year student are also eligible for entry. This program encourages a generalist approach to health administration. The focus is to help students acquire knowledge and develop skills in hospital organization and management, marketing, accounting, and budgeting, human resources administration, strategic planning, law and ethics, and health information systems. Students also gain knowledge in oral and written communication, and social/behavioral sciences.

Graduates may perform several duties in a health care setting including creating and implementing strategies and processes to deal with the various business challenges. This may include delivery system integration, regulatory requirements, technological innovations, and restructuring. Managers must also have the ability to assess and improve efficiency and quality. The curriculum is designed to train students as generalists in health care.

The curriculum consists of 184 credit hours presented over sixteen (16) quarters. Applicants for this program must have earned an AS degree and/ or be in Junior standing or have earned a combination of life credit, credit by means of examination and transfer credit totaling a minimum of 72 credits.

Program schedule based on full-time enrollment: 176 weeks; 1840 lecture contact hours.

Program Delivery: Blended, Online

Program Outcomes

- Assess and promote community health especially through the evaluation of health care policies.
- Analyze and assess management systems such as operations and human resources within a health care organization.
- Understand the ethical and legal principles and laws in the health care industry
- Understand leadership, governance, roles, and responsibilities within health care organizations.
- Communicate complex ideas verbally and through the written word.
- Apply financial, economic analysis, organizational development, and behavioral theories to create strategies to improve health care organizations.

Associate Degree Programs

Associate of Science in Allied Health

The Associate of Science Degree is comprised of technical training in a given field combined with a General Education component. General Education courses allow for further development of listening, speaking, reading, and writing skills while technical training will aid the student in achieving his/her full potential for promotion and advancement within a chosen field. City College offers several majors under the Associate of Science Allied Health Degree. These majors include Medical Assisting and Medical Office Administration with a track in Insurance Billing and Coding. Courses under these majors are comprised of a Major component, Concentration Core, General Education unit and required electives to complete degree requirements. Students are eligible to sit for The National Board Certifications in medical specialties including Medical Assistant, Phlebotomy Technician, and Medical Office Assistant which are offered at City College by arrangement with the National Center for Competency Testing (NCCT).

Medical Assisting Major

Campus: Gainesville (Ceased Enrollment)
Hollywood

The Medical Assisting major provides students with opportunities to develop secretarial, laboratory, and clinical skills required to work closely with physicians and other health care professionals. Students apply their classroom knowledge to actual work experiences while on externship at a College approved health care facility. This curriculum is comprised of a total of ninety-two (92) credit hours presented over eight (8) quarters.

Program schedule based on full-time enrollment: 88 weeks; 760 lecture, 220 lab and 160 extern contact hours.

Program Delivery: Blended

Program Outcomes

- Communicate verbally, non-verbally, and in writing with the patient and other health care team members in an appropriate and effective manner.
- Demonstrate knowledge and model professional skills and behavior by applying the ethical principles, legal principles, safety measures, and regulations affecting the profession.
- Demonstrate competency in administrative skills such as patient account management, insurance pre-authorization, referral management, phone protocols, and conducting front desk tasks.
- Demonstrate proficiency of phlebotomy procedures, and patient care procedures on the clinical level including examining room procedures, clinical laboratory procedures and emergency care, (including inpatient care, injection room procedures, and trauma care).
- Appropriately apply medical terminology in patient care, services, and all aspects of workplace management.

Programmatic Requirements

Students enrolling in this program must follow the clinical clearance policy of the college.

As of 1/1/2022 this program was redesigned to require as part of the entrance requirements proof of an active national or state Paramedic certification and is intended to be a degree completer program for those individuals.

Medical Office Administration Major with a Track in Insurance Billing and Coding

Campus: Gainesville (Ceased Enrollment)
Hollywood

The Medical Office Administration Major with a Track in Insurance Billing and Coding provides students with the necessary background, knowledge, and specialized skills for a career in the medical billing and coding profession. Secretarial and administrative skills are emphasized providing graduates with the opportunity to qualify for entry-level opportunities such as Medical Coding Clerk, Medical Billing Specialist, Medical Records Clerk and Medical Office Assistant. The curriculum consists of a total of ninety-six (96) credit hours presented over eight (8) quarters.

Program schedule based on full-time enrollment: 88 weeks; 840 lecture, 140 lab and 150 extern contact hours.

Program Delivery: Blended

Program Outcomes

- Demonstrate competency in using industry software to enter, retrieve or modify medical data.
- Demonstrate written as well as verbal and nonverbal communication skills with the patient and other health care team members in a professional and effective manner.
- Demonstrate knowledge and model professional skills and behavior by applying the ethical principles, legal principles, and regulations affecting the profession.
- Demonstrate skill in claims preparation, dealing with denied claims, and explaining EOB and billing process and procedures to the patient for a variety of government and private insurance companies.
- Effectively use medical terminology and pathophysiology knowledge in a variety of billing and coding scenarios.
- Demonstrate competency in utilizing ICD-X, CPT, and HCPCS coding resources as well as competence in traditional paper/manual and electronic health records.

Programmatic Requirements

Students are required to met the clinical clearance policy of the College.

Associate of Science in Anesthesia Technology

Campus: All Campuses have ceased enrollment

The Anesthesia Technology program at City College is a comprehensive entry-level program designed to prepare competent entry-level Anesthesia Technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. Students will take a variety of didactic and clinical courses with a focus on the Patient Simulation Center that will provide "real life" scenarios of a demanding clinical environment. The integration of lecture, simulation and clinical will help the student transition from the academic/clinical environment to the profession upon graduation. Students will be required to complete 780 hours of extern clinical training in hospitals or other surgical settings. The curriculum is comprised of 99 credits over eight (8) quarters. Ninety-nine (99) credits over eight (8) quarters.

Program schedule based on full-time enrollment: 88 weeks; 620 lecture, 240 lab and 780 extern contact hours.

Program Delivery: Blended

Program Outcome

To prepare competent entry-level Anesthesia Technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

Program Goals

- Model a self-sufficient Anesthesia Technologist who displays positive values, integrity, and professionalism.
- Recognize and verbalize indications for anesthesia intervention and the associated risks and benefits.
- Identify and demonstrate the appropriate anesthesia set up for various surgical procedures.
- Anticipate the needs of the anesthesia provider to assist with the delivery of patient care.
- Demonstrate the ability to maintain and update all relevant anesthesia equipment and troubleshoot as necessary.

Programmatic Entry Requirements

In addition to the regular Admission requirements, students applying to the Anesthesia Technology program have the following admissions criteria:

1. Students wishing to enroll in this program must take a placement test and achieve a minimum score indicated below:
    a. SLE a minimum score of 17 or
    b. WBST a minimum score of 267 in verbal and quantitative skills
2. Students enrolling in this program must meet the clinical clearance policy of the college.
3. Student must hold personal health insurance.
4. Student must have a VECHS background check.
5. Student must complete an Acknowledgement of Florida Statute Section 456.0635.

Associate of Science in Broadcasting

Campus: Ft. Lauderdale (Ceased Enrollment)

The Associate of Science in Broadcasting Major offers graduates the knowledge and skills necessary for entry into the exciting field of broadcasting. The program combines hands-on training and lecture/ discussion courses with general education components that allow for further development in listening, speaking, reading, and writing skills in areas that will aid the student in achieving his/her full potential for promotion and advancement within a chosen field in the broadcasting and mass communication industry.

Graduates will have the opportunity to explore entry-level careers in a wide variety and cross-section of broadcast and mass communication field related to audio production, radio broadcasting, television broadcasting and video production, covering the operations, organization, and production elements of the industry. These include on-air and off-air
tasks related to announcing, news presentation, news gathering and writing, technical operations, advertising sales and marketing, broadcast packaging and distribution, broadcast research, media technology application, media communications, corporate promotions, public relations, media buying and selling, technical media communications, mass communication operations and social marketing and media campaigning.

The curriculum is comprised of ninety-three (93) credit hours presented over eight (8) quarters.

Program schedule based on full-time enrollment: 88 weeks; 850 lecture and 160 lab contact hours.

Program Delivery: Blended

Program Outcomes

- Demonstrate the production competencies required for entry level employment in radio and television related fields.
- Apply the skills necessary to undertake professional production work in the broadcasting and mass communication industry.
- Analyze the foundational concepts and functional know-how required to work as broadcasting and media professionals.
- Apply appropriate discipline and ethical standards required of all professionals with the broadcasting and mass communication industry.
- Identify the cultural, conventional, and legal provisions they need to adhere to as broadcasting and communication media professionals.
- Create and develop programming strategies and programming concepts for any broadcasting genre/format.
- Operate and utilize all radio and television studio and field production equipment.
- Produce, direct, and present a wide variety of live and recorded radio and television programs, including interviews, news and talk shows.
- Produce, write, and direct the production of commercials, infomercials and PSAs for use on radio and television.
- Develop and manage broadcast advertising strategies and campaigns.
- Produce, write, direct and present radio and television newscasts.
- Explain issues and content related to mass media and the broadcasting industry.
- Utilize and apply new media technologies and concepts in broadcasting.
- Demonstrate and apply effective communication skills.

Associate of Science in Cardiovascular Sonography

Campus: Hollywood (ceased enrollment)

The Cardiovascular Sonography Program is a comprehensive entry-level program designed to prepare the student for a rewarding career in the field of diagnostic ultrasound. Cardiovascular sonography specializes in the assessment of cardiac and vascular disease and is one of the fastest growing professions in the allied health care field. The program is designed to include practical didactic lectures integrated with hands-on laboratory in the Ultrasound Training Center. Here the students will learn the operation of various equipment and have the opportunity to practice scanning on fellow students to develop skills prior to the 900 hours of clinical training. The dual training in both cardiac and vascular specialties was developed to provide greater options to our graduates who can work in environments that demand skills in both specialties. The curriculum consists of a total of one hundred and seven (107) credit hours presented over eight (8) quarters.

Program schedule based on full-time enrollment: 88 weeks; 670 lecture, 200 lab and 900 extern contact hours.

Program Delivery: Blended

Program Outcomes

To prepare competent entry-level cardiovascular technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains for noninvasive vascular study and To prepare competent entry-level cardiovascular technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains for adult Echocardiography.

Programmatic Entry Requirements

In addition to the regular Admission requirements, students applying to the Cardiovascular Sonography program have the following admissions criteria:

1. Students wishing to enroll in this program must take a placement test and achieve a minimum score indicated below:
    a. SLE a minimum score of 17 or
    b. WBST a minimum score of 267 in verbal and quantitative skills
2. Students enrolling in this program must meet the clinical clearance policy of the college.
3. Student must hold personal health insurance.
4. Student must have a VECHS background check.
5. Student must complete an Acknowledgement of Florida Statute Section 456.0635.

Associate of Science in Diagnostic Medical Sonography

Campus: Hollywood

The Associate of Science Diagnostic Medical Sonography is a comprehensive entry-level program designed to prepare competent entry- level general and adult cardiac sonographers and vascular technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. The program is designed to include practical didactic lectures integrated with hands-on laboratory in the ultrasound training center. The students will learn the operation of various equipment and have the opportunity to practice scanning on fellow students to develop skills prior to the 700 hours of clinical training. The curriculum consists of a total of one hundred twenty five (125) credit hours presented over seven (7) quarters.

Program schedule based on full-time enrollment: 74 weeks; 985 lecture, 180 lab and 700 extern contact hours.

Program Delivery: Blended

Program Outcomes

Upon completion of the program, graduates will be able to:

- Obtain relevant patient history by oral interview and/or chart review for clinical data such as lab tests or previous imaging scans to enable optimum diagnostic sonograms.
- Operate ultrasound equipment safely and accurately to obtain sonographic images of diagnostic quality.
- Maintain strict hygienic practices in the lab, including hand washing, wearing gloves, cleaning the transducers, etc.
- Perform appropriate exam protocols to record normal anatomy or pathology in the body.
- Perform appropriate exam protocols when executing Doppler scans for evaluation of physiologic data.
- Perform appropriate exam protocols for each area of specialization: obstetrics and gynecology; abdomen and superficial structures; vascular; and adult echocardiography.
- Record data for interpretation and analysis for the supervising physician
- Analyze sonograms using critical thinking skills to compose a preliminary report.
- Demonstrate excellent therapeutic communication skills with patients and with others in the health care setting.
- Respect the privacy of the patients by adhering to HIPAA regulations at all times.
- Conduct oneself in an ethical and legal manner in accordance with the Code of Professional Conduct of the Society of Diagnostic Medical Sonographers. which includes the following in its preamble:
- Sonographers shall act in the best interests of the patient.
- Sonographers shall provide sonographic services with compassion, respect for human dignity, honesty, and integrity.
- Sonographers shall respect the patient's right to privacy, safeguarding confidential information within the constraints of the law.
- Sonographers shall maintain competence in their field.
- Sonographers shall assume responsibility for their actions.

Programmatic Entry Requirements

In addition to the regular Admission requirements, students applying to the Diagnostic Medical Sonography program must have the following admissions criteria:

1. Students wishing to enroll in this program must take a placement test and achieve a minimum score indicated below:
    a. SLE a minimum score of 17 or

Associate of Science in Emergency Medical Services

Campus: Gainesville (Ceased Enrollment)
Hollywood

The Emergency Medical Services Major combines Emergency Medical Technician and Paramedic courses, core general education coursework, and field/clinical externship experiences in the pre-hospital, ambulance, and Fire Rescue service industries. The program follows the latest edition of National Emergency Medical Services Education Standards and prepares the graduate with the knowledge, skills, and professionalism necessary to obtain certification as an Emergency Medical Technician and Paramedic to practice the art and science of out-of-hospital medicine in conjunction with medical direction.

The objective of the program is to prepare competent entry-level Paramedics in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains with or without exit points at the Advanced Emergency Medical Technician and/or Emergency Medical Technician, and/or Emergency Medical Responder levels.

Graduates of this program, with successful certification as a paramedic, may qualify for positions within the out-of-hospital emergency service industry, both in the public and private sectors. Students are eligible to sit for or National Registry certification testing upon successful completion of the EMT and paramedic programs, including successful performance on comprehensive written and practical exams inclusive of all training, skills, and completion of the general education component. The curriculum is comprised of one hundred and eleven (111) credit hours presented over nine (9) quarters.

As of 1/1/2022 this program was redesigned to require as part of the entrance requirements proof of an active national or state Paramedic certification and is intended to be a degree completer program for those individuals.

Program schedule based on full-time enrollment: 99 weeks; 700 lecture, 440 lab and 588 extern contact hours.

Program Delivery: Residential, Blended

Program Outcomes

- Demonstrate comprehension of the roles and responsibilities of an entry-level EMT-P.
- Demonstrate the ability to think appropriately and professionally including responding with appropriate speed in any given emergency situation.
- Understand and apply appropriate psychomotor skills in EMS and Paramedic settings.
- Demonstrate application of professional standards to the affective learning domains, integrity, empathy, self-motivation, appearance, personal hygiene, self-confidence, communications, time management, teamwork, diplomacy, respect, patient advocacy, careful delivery of service, and cultural competence.
- Be certified in Basic Life Support for healthcare providers, Advanced Life Support, Pediatric advanced Life support, Pre-hospital trauma life support, and Advanced medical life support.
- Demonstrate that they are competent team leaders directing patient care.
- Demonstrate competence in using body substance isolation equipment.
- Demonstrate knowledge of appropriate scene safety for all care providers, the patient, and bystanders.
- Demonstrate knowledge of the body, how it works, and how medication affects it.

Programmatic Entry Requirements

In addition to the regular Admission requirements, students applying to the Emergency Medical Services program must have the following admissions criteria:

1. Students wishing to enroll in this program must take a placement test and achieve a minimum score indicated below:
    a. SLE a minimum score of 17 or
    b. WBST a minimum score of 267 in verbal and quantitative skills
2. Students enrolling in this program must meet the clinical clearance policy of the college.
3. Student must hold personal health insurance.
4. Student must have a VECHS background check.
5. Student must complete an Acknowledgement of Florida Statute Section 456.0635.

Course Certification Requirements

Prior to beginning Emergency Medical Technician I:

- Hold and maintain a current CPR certification from an approved Florida Department of Health, Bureau of EMS, U.S. recognized healthcare provider course (i.e. Heart Association, American Red Cross).

Prior to beginning the Paramedic I:

- Hold and maintain a current CPR certification from an approved Florida Department of Health, Bureau of EMS, U.S. recognized healthcare provider course (i.e. Heart Association, American Red Cross).
- Be in the application process to take the State of Florida EMT license examination.

Prior to entry into Paramedic II:

- The student must be EMT Florida state certified in accordance with 64J FAC and provide proof of current Florida State EMT certification.

- In addition, Florida State EMT certification must be maintained throughout the program

Graduation Requirements

Students must meet all graduation requirements as detailed in Academic Policies and Procedures and must successfully pass the skills practical exam delivered by the Medical Director (or their designee) at the completion of the major core courses.

Associate of Science in Private Investigation Services

Campus: Ft. Lauderdale (Ceased Enrollment)

The Associate of Science degree in Private Investigation Services is designed to train students in the main branches of private and civil investigation. Students who complete the Associate of Science in Private Investigation Services program receive a one-year reduction for equivalent experience from the Florida Department of Agriculture and Consumer Services toward their two year internship requirement. Students enrolling in this program should understand that to qualify for state licensure as a private investigator, they must be at least 18 years of age; be a citizen or legal resident of the United States or have been granted authority to work in the United States by the US Department of Homeland Security; have no disqualifying criminal history; and be of good moral character. The curriculum is composed of ninety (90) credit hours presented over eight (8) quarters.

Program schedule based on full-time enrollment: 88 weeks; 810 lecture, 180 lab contact hours.

Program Delivery: Residential/Blended

Program Outcomes

- Understand ethical behavior within their discipline.
- Understand a broad base of private investigation practices, vocabulary, and tools and can appropriately apply this knowledge to variety of private investigation scenarios
- Demonstrate the ability to search, and locate people and assets.
- Understand how to remain anonymous while conducting investigations.
- Demonstrate excellent oral communication and report writing skills.

Programmatic Entry Requirements

Student is required to undergo a National Criminal Background search.

Associate of Science in Radiologic Technology

Campus: Hollywood

The Associate of Science Radiologic Technology program is a comprehensive entry-level program designed to prepare competent entry- level radiologic technologists to perform diagnostic imaging examinations on patients in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. The program is designed to include practical didactic lectures integrated with hands-on laboratory in the ultrasound training center. Here the students will learn the operation of various equipment and have the opportunity to practice scanning on fellow students to develop skills prior to the 1102 hours of clinical training. The curriculum consists of a total of 134 credit hours presented over seven (7) quarters.

Program schedule based on full-time enrollment: 74 weeks; 960 lecture, 140 lab and 1102 externship/clinical contact hours.

Program Delivery: Blended

Program Outcomes

Upon completion of the program, graduates will:

- Be clinically competent
- Communicate effectively
- Use critical thinking and problem-solving skills
- Grow and develop professionally

The program identifies benchmarks to provide a standard by which the effectiveness of the program in achieving its goals can be evaluated.
An assessment plan is in place and can be obtained from the program director.

Program Objectives

Upon graduation, students will receive a certificate of completion and are prepared to meet the requirements to sit for the written examination of the American Registry of Radiologic Technologists (ARRT) and to function as entry level Radiologic Technologists. Specifically, the program's objectives are to have our graduates perform effectively by:

- Applying knowledge of radiation protection for patients, self, and others
- Applying knowledge of anatomy, positioning and radiographic technique to accurately demonstrate anatomical structures on a radiograph
- Determining exposure factors to achieve optimum radiographic technique with a minimum of radiation exposure to patients
- Examining radiographs for the purpose of evaluating technique, positioning and other pertinent technical qualities
- Exercising discretion and judgment in the performance of medical imaging procedures
- Providing patient care essential to radiographic procedures
- Recognizing emergency patient conditions and initiating life-saving treatment within their scope of practice

Student Learning Outcomes

- Students will apply positioning skills
- Students will demonstrate appropriate use of equipment
- Students will practice radiation protection
- Students will employee proper techniques
- Students will use effective oral communication skills with healthcare professionals and patients
- Students will demonstrate effective presentation skills and written communication skills
- Students will adjust all necessary elements to perform non-routine exams
- Students will appropriately evaluate images
- Students will demonstrate professional behavior
- Students will understand ethical decision making
- Students will understand the importance of obtaining membership in professional organizations and obtaining certifications for advanced modalities
- Students will complete the program
- Students will pass the ARRT National Certification on the first attempt
- Graduates will be satisfied with their education and training
- Graduates will be gainfully employed within 6 months
- Employers will be satisfied with graduates' training

Programmatic Entry Requirements

In addition to the regular Admission requirements, students applying to the Radiographic Technology program have the following admissions criteria:

1. Students wishing to enroll in this program must take a placement test and achieve a minimum score indicated below:
    a. SLE a minimum score of 17 or
    b. WBST a minimum score of 267 in verbal and quantitative skills
2. Students enrolling in this program must meet the clinical clearance policy of the college.
3. Student must hold personal health insurance.
4. Student must have a VECHS background check.

5. Student must complete an Acknowledgement of Florida Statute Section 456.0635

Associate of Science in Surgical Technology

Campus: Hollywood
Miami (Ceased Enrollment)

The Surgical Technology Program at City College is a comprehensive entry level program designed to prepare the student for a rewarding career that is academically challenging and professionally rewarding. Students will take a variety of didactic and clinical courses with a focus on the Patient Simulation Center that will provide "real life" scenarios of a demanding clinical environment. The integration of lecture, simulation and clinical will help the student transition from the academic/clinical environment to the profession upon graduation. Students will be required to complete 750 hours of clinical training in the hospital setting. The curriculum is comprised of one hundred and three (103) credits over eight (8) quarters.

Program schedule based on full-time enrollment: 88 weeks; 680 lecture, 200 lab and 750 extern contact hours.

Program Delivery: Blended

Program Outcomes

To prepare competent entry-level surgical technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

Program Goals

Cognitive Domain The student will:

- Comprehend the fundamental concepts of Human Anatomy and Physiology, Pathophysiology, Microbiology, and infectious process and recognize their relationship to safe patient care.
- Understand the principles of safe patient care in the preoperative, intra-operative and postoperative settings.
- Recognize the interdependent role of the surgical technologist with the other team members and ancillary service providers.

Psychomotor Domain The student will:

- Develop and apply fundamental surgical assisting skills through practice and evaluation in the clinical setting.
- Accurately apply the principles of asepsis across the spectrum of common surgical experiences
- Employ the Standard Precautions and other recognized safe practice guidelines in every surgical setting.

Affective Domain The student will:

- Recognize the variety of patients' needs and impact of their personal, physical, emotional, and cultural experiences on rendering patient care.
- Demonstrate professional responsibility in performance, attitude, and personal conduct.
- Practice within the confines of the recognized scope of practice within the healthcare community to provide optimal patient care.

Programmatic Entry Requirements

In addition to the regular Admission requirements, students applying to the Surgical Technology or the Anesthesia Technology program have the following admissions criteria:

1. Students wishing to enroll in this program must take a placement test and achieve a minimum score indicated below:
    a. SLE a minimum score of 17 or
    b. WBST a minimum score of 267 in verbal and quantitative skills
2. Students enrolling in this program must meet the clinical clearance policy of the College.
3. Student must hold personal health insurance.
4. Student must have a VECHS background check.
5. Student must complete an Acknowledgement of Florida Statute Section 456.0635.

Programmatic Requirements

1. Students are required to become Association of Surgical Technologists (AST) members.
2. As per programmatic accreditation students are required to participate in the Certified Surgical Technologists (CST) exam prior to graduation.

Transfer of Current Certified Surgical Technologist Certification

City College will accept persons with a current certified Surgical Technologist Certification into the Associate of Science in Surgical Technology program. Specific details can be found under the Transfer Credit Policy as published in this catalog.

Associate of Applied Science in Veterinary Technology

Campus: Hollywood
Gainesville

The Veterinary Technology Program at City College is a comprehensive entry-level program designed to prepare the student for a career as a veterinary technician. Students will take a variety of didactic and hands- on clinical courses, covering all the areas in which technicians will be expected to perform in the workplace. Externships performed at working clinics will provide 'real-life' scenarios of a demanding clinical environment. The integration of lecture, demonstration and hands-on practice will help the student transition from the academic/clinical environment into the workplace upon graduation. Students will be required to complete 300 hours of externship at a local clinic. The curriculum is comprised of one hundred and one (101) credits over seven (7) quarters.

Program schedule based on full-time enrollment: 70 weeks; 710 lecture, 400 lab and 300 extern contact hours.

Program Delivery: Blended

Program Outcomes

- Demonstrate and apply knowledge, physical skills and behaviors required for entry-level employment in the field of veterinary technology.
- Model a self-sufficient Veterinary Technician who displays positive values, integrity, honesty, empathy, and professionalism.
- Understand the veterinary professions as a whole and remain aligned with professional standards and regulations and participate in professional organizations.
- Increase the professional standards of the industry.
- Demonstrate leadership skills and help colleagues expand knowledge and improve skills.

Programmatic Entry Requirements

In addition to the regular admission requirements, students applying to the Associate of Applied Science in Veterinary Technology program have the following admissions requirements:

1. Students wishing to enroll in this program must take a placement test and achieve a minimum score indicated below:
    a. SLE a minimum score of 17 or
    b. WBST a minimum score of 267 in verbal and quantitative skills
2. Student must have a VECHS Level I background check.
3. Student must hold personal health insurance.

It is recommended that students enrolling in this program are vaccinated for the following:

- Hepatitis B series.
- MMR (Measles, Rubella, and Mumps).
- Tetanus (Td) booster within the last ten years.
- Rabies series

It is recommended that students enrolling in this program be tested for:

- Absence of Tuberculosis (TB)
- Negative PPD skin test within the last 6 months (2-step PPD or single step PPD as part of an annual series) or a negative chest x-ray.

Diploma Programs

Emergency Medical Technician

Campus: Gainesville
Hollywood
Miami

The Emergency Medical Technician (EMT) program follows the latest edition of National Emergency Medical Services Education Standards and prepares the graduate with the knowledge, skills, and professionalism necessary to obtain certification as an Emergency Medical Technician to practice the art and science of out-of-hospital medicine in conjunction with medical direction. Students are eligible to sit for or National Registry certification testing upon successful completion of the EMT program including successful performance on comprehensive written and practical exams inclusive of all training, skills, and completion of the general education component.

The objective of the program is to prepare competent entry-level Emergency Medical Technicians in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

This program is comprised of twenty-seven (27) credit hours presented over twenty eight (28) or thirty three (33) weeks.

Program schedule based on full-time enrollment: 28 weeks; 190 lecture, 100 lab and 96 extern contact hours.

Program Delivery: Blended

Program Outcome

- Demonstrate comprehension of the roles and responsibilities of an entry-level EMT-P.
- Demonstrate the ability to think appropriately and professionally including responding with appropriate speed in any given emergency situation.
- Understand and apply appropriate psychomotor skills in EMS settings.
- Demonstrate application of professional standards to the affective learning domains, integrity, empathy, self-motivation, appearance, personal hygiene, self-confidence, communications, time management, teamwork, diplomacy, respect, patient advocacy, careful delivery of service, and cultural competence.
- Be certified in Basic Life Support for healthcare providers
- Demonstrate that they are competent team leaders directing patient care.
- Demonstrate competence in using body substance isolation equipment.
- Demonstrate knowledge of appropriate scene safety for all care providers, the patient, and bystanders.
- Demonstrate knowledge of the body, how it works, and how medication affects it.

Programmatic Entry Requirements

In addition to the regular Admission requirements, students applying to the Emergency Medical Technician program must have the following before attending classes:

1. Students enrolling in this program must meet the clinical clearance policy of the college.
2. Student must hold personal health insurance.
3. Student must have a VECHS background check.
4. Student must complete an Acknowledgement of Florida Statute Section 456.0635

Major Core		Quarter Credit Hours
EMS1119	Emergency Medical Technician	12
EMS1119L	Emergency Medical Technician Lab	5
EMS1120	Emergency Medical Technician Clinical Education	3.2

Total Major Core Requirements (a minimum grade of B must be earned in each major core course): 19

Related Requirements		
SLS1201	Personal Development	4
PSY1012	Principles of Psychology	4
		Total Credits Required for Graduation: 27

Medical Assistant

Campus: Hollywood
Gainesville

The Medical Assistant Diploma program provides students with opportunities to develop secretarial, laboratory, and clinical skills required to work closely with physicians and other health care professionals.

Students apply their classroom knowledge to actual work experiences while on externship at a College approved health care facility.

Students are eligible to sit for the National Board Certification to become a National Certified Medical Assistant (NCMA) which are offered at City College by arrangement with the National Center for Competency Testing (NCCT).

The curriculum consists of a total of forty-four (44) credit hours presented over four (4) quarters.

Program schedule based on full-time enrollment: 44 weeks; 280 lecture, 220 lab and 160 extern contact hours.

Program Delivery: Blended

Program Outcome

- Communicate verbally, non-verbally, and in writing with the patient and other health care team members in an appropriate and effective manner.
- Demonstrate knowledge and model professional skills and behavior by applying the ethical principles, legal principles, safety measures, and regulations affecting the profession.
- Demonstrate competency in administrative skills such as patient account management, insurance pre-authorization, referral management, phone protocols, and conducting front desk tasks.
- Demonstrate proficiency of phlebotomy procedures, and patient care procedures on the clinical level including examining room procedures, clinical laboratory procedures and emergency care, (including inpatient care, injection room procedures, and trauma care).
- Appropriately apply medical terminology in patient care, services, and all aspects of workplace management.

Programmatic Requirements

Students must meet the clinical clearance policy of the college.

Paramedic

Campus: Hollywood

The Paramedic Diploma program includes field/clinical externship experiences in the pre-hospital, ambulance, and Fire Rescue service industries. The program follows the latest edition of National Emergency Medical Services Education Standards and prepares the graduate with the knowledge, skills, and professionalism necessary to obtain certification as a Paramedic to practice the art and science of out-of-hospital medicine in conjunction with medical direction.

To prepare competent entry-level Paramedics in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains with or without exit points at the Advanced Emergency Medical Technician and/or Emergency Medical Technician, and/or Emergency Medical Responder levels. Graduates of this program, with successful certification as a paramedic, may qualify for positions within the out-of-hospital emergency service industry, both in the public and private sectors. Students are eligible to sit for National Registry certification testing upon successful completion of the paramedic program. Successful completion of the program includes passing scores on comprehensive written and practical exams, required skills and completion of all clinical and field hours.

The curriculum is comprised of sixty one (61) credit hours presented over five (5) quarters.

Program schedule based on full-time enrollment: 55 weeks; 280 lecture, 340 lab and 492 extern contact hours.

Program Delivery: Blended

Program Outcomes

- Demonstrate comprehension of the roles and responsibilities of an entry-level EMT-P.
  - Demonstrate the ability to think appropriately and professionally including responding with appropriate speed in any given emergency situation.
  - Understand and apply appropriate psychomotor skills in EMS and Paramedic settings.
  - Demonstrate application of professional standards to the affective learning domains, integrity, empathy, self-motivation, appearance, personal hygiene, self-confidence, communications, time management, teamwork, diplomacy, respect, patient advocacy, careful delivery of service, and cultural competence.
  - Be certified in Basic Life Support for healthcare providers, Advanced Life Support, Pediatric advanced Life support, Pre-hospital trauma life support, and Advanced medical life support.
  - Demonstrate that they are competent team leaders directing patient care.
  - Demonstrate competence in using body substance isolation equipment.
  - Demonstrate knowledge of appropriate scene safety for all care providers, the patient, and bystanders.
  - Demonstrate knowledge of the body, how it works, and how medication affects it.

Programmatic Entry Requirements

In addition to the regular Admission requirements, students applying to the Paramedic program must have the following admissions criteria:

1. Students wishing to enroll in this program must take a placement test and achieve a minimum score indicated below:
   a. SLE a minimum score of 17 or
   b. WBST a minimum score of 267 in verbal and quantitative skills
2. Students enrolling in this program must meet the clinical clearance policy of the college.
3. Student must hold personal health insurance.
4. Student must have a VECHS background check.
5. Student must complete an Acknowledgement of Florida Statute Section 456.0635.

Graduation Requirements

Students must meet all graduation requirements as detailed in Academic Policies and Procedures and must successfully pass the skills practical exam delivered by the Medical Director (or their designee) at the completion of the major core courses.

Course Descriptions

Advertising (ADV)

ADV1002 Advertising

This course provides an overview of the promotional activities within business. Promotional calendars, public relations techniques, advertising methods, and procedures are explored and analyzed.
Prerequisites: None
Credit Hours: 4

ADV2406 Broadcast Advertising and Sales

This course focuses on broadcast advertising and copywriting, beginning with a basic overview of the advertising industry including advertising objectives, strategies, and demographic profiling, and culminating in a broadcast copywriting workshop. Additionally the 5-step process in the sale of broadcast and cable airtime. Students will learn to convert raw Nielsen Television Ratings Reports, raw Arbitron Radio Ratings Reports, coverage maps and rate cards into valuable sales tools. Students will gain hands-on experience in broadcast and cable advertising and sales through the creation of a multi-media campaign and a tailored sales presentation.
Prerequisites: RTV1000 or RTV1513
Credit Hours: 4

AnesthesiaTechnology (AT)

AT100 Clinical Observation I

Policies and Standards of patient care practice will be introduced. Acronyms and abbreviations will be introduced along with regulatory associations and credentialing in the workplace. In addition, students will take an American Heart Association BLS provider course.
Prerequisites: None
Credit Hours: 1

AT110 Introduction to Anesthesia Technology

This course focuses on the basic fundamentals of Anesthesia Technology including historical, practical, and safety aspects of the profession. Role of the Anesthesia Care Team and our scope of practice will be taught.
Topics covered will include malignant hyperthermia, electrical and fire safety, and patient positioning along with basic monitoring and inhaled agents. Set-up and function of basic equipment for anesthesia care such as EKG, B/P and Pulse Ox monitors.
Prerequisites: None
Credit Hours: 4

AT111 Anesthesia Technician Fundamentals I

This course focuses on the basic fundamentals of various types of anesthesia procedures for patient care. Students will learn about intravenous preparation, surgical positioning for numerous surgical procedures. Basic monitoring devices will be introduced, as it pertains to placing monitoring systems on patients for surgery. Anesthesia gas machine breathing circuits will be discussed. Cleaning and high-level disinfection of all reusable patient equipment will be discussed / taught. Anesthesia care plans will be introduced to the student throughout the course work.
Prerequisites: AT110
Credit Hours: 3

AT112 Anesthesia Technician Fundamentals II

This course focuses on the instrumentation and fundamentals of patient care equipment for extensive procedures that is providing invasive monitoring to the patients. Students will become familiar with the assembly and construction of many invasive monitoring lines used in the operating room.
Prerequisites: AT111
Credit Hours: 3

AT113 Anesthesia Pharmacology

This course focuses on the pharmacokinetics and pharmacodynamics of drugs used in the administration of anesthesia and analgesia. Topics covered will include routes of administration, drug interactions, drug metabolism and elimination, and the various classes of anesthetic agents.
Prerequisites: AT110and HSC1531
Credit Hours: 3

AT114 Anesthesia Technician Instrumentation I

This course focuses on the instrumentation utilized in providing anesthesia including historical, practical, and safety aspects of the profession. Students will learn about tracheal tubes, face masks and airways used in Anesthesia Practice. Topics will cover the systems utilized in patient care,

laryngoscopes, patient warmers, difficult airway management and troubleshooting related equipment. Hazards of the anesthesia machines and breathing systems will also be discussed.
Prerequisites: AT110
Credit Hours: 3

AT115 Anesthesia Technician Instrumentation II

This course focuses on the instrumentation utilized in providing anesthesia including historical, practical, and safety aspects of the profession. Students will learn about instrumentation for delivering and analyzing blood products, Ultrasounds, Neurophysiologic monitoring, and device malfunctions.
Prerequisites: AT112 and AT114
Credit Hours: 3

AT116 Clinical Experience I

This course serves as the first of three clinical experiences, with a focus on the integration of the theory and practical skills applied to the clinical setting. The student will first observe, and then provide support during surgical procedures. Students will be expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures involving direct patient care.
Prerequisites: AT112 and AT113
Credit Hours: 6

AT117 Clinical Experience II

This course serves as the second of three clinical experiences, with a focus on the integration of the theory and practical skills applied to the clinical setting. The student will provide supervised support during surgical procedures. Students will be expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures involving direct patient care.
Prerequisites: AT116
Credit Hours: 6

AT118 Anesthesia Technician Capstone

This course serves as the last of three clinical experiences, with a focus on the integration of the theory and practical skills applied to the clinical setting. The student will provide supervised support during surgical procedures. Students will be expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures involving direct patient care. In addition, students will take an American Heart Association ACLS provider course.
Corequisites: AT116 and AT117
Credit Hours: 6

AT201 Exam Prep

This course will prepare the student for the national certifying exam for anesthesia technologists. Topics covered will include a comprehensive review of the terminology, procedures, instrumentation, and skills acquired over the course of the program. Additional topics will include anatomy and physiology, HIPAA, and basic test-taking techniques.
Prerequisites: None
Credit Hours: 0

AT202 Anesthesia Technician Externship

This course serves as the final externship rotation and consists of 240 externship hours. The student will be expected to fulfill the daily job requirements of an Anesthesia Technologist without support from hospital staff. Students will be expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures involving direct patient care.
Prerequisites: AT116, AT117, and AT118
Credit Hours: 8

Animal Science Technology (ATE)

For Gainesville students ATE designated courses may be taught in it's entirely or lab portions at the separate educational center location, 2400 SW 13th St., Gainesville, FL 32608.

ATE1003C Introduction to the Veterinary Profession

This course is designed to introduce students to the veterinary profession. Topics of discussion include history associated with veterinary and veterinary technicians' roles, professional organizations, descriptions of typical and non-traditional veterinary-related careers, laws and regulations governing the veterinary profession, common breeds of domestic animals, restraining, behavior and medical terminology.
Prerequisites: None
Credit Hours: 4

ATE1030C Laboratory Skills for Veterinary Technicians

This course introduces students to the clinical laboratory; its capabilities as a diagnostic support program for both research and clinical medicine; and the technologies associated with both traditional and less familiar clinical applications. The laboratory portion of this course should prepare students to perform testing, manage and maintain laboratory facilities and technologies, and, finally, introduce recognition skills and preliminary interpretation of disease concerns in animals. Microbiology basics and its use in the veterinary medical setting are introduced.
Prerequisites: ATE1003C and ATE1112C
Credit Hours: 5

ATE1112C Animal Anatomy & Physiology

This course is designed to teach students the anatomy & physiology of common domestic animals (monogastric mammal, ruminate mammal, bird, and reptile). Anatomy & physiology will be taught by organ system. Students will dissect preserved specimens so they are able to visualize and identify each structure and system that was taught in lecture. Comparative and gross anatomy will be stressed, and microscopic anatomy will only be discussed.
Prerequisites: None
Credit Hours: 5

ATE1312C Office Management & Reception Skills

This course helps technician students to understand various front-desk and business management aspects of veterinary practice. The material presented explains sources of hospital revenue; shows how to represent and market preventative health programs and other products and services; introduces methods of record keeping utilizing computer and hard copy files, creating inventory control procedures and records; and introduces materials for client education and communications.
Laboratory exercises reinforce necessary computer skills utilizing actual clinic software programs.
Prerequisites: None
Credit Hours: 4

ATE1602C Animal Nutrition

This course is designed to teach students about general nutrition principles & comparative digestive anatomy. Students then explore the basic nutritional needs of common companion animals, including dogs, cats, horses, cattle, birds, small mammals, reptiles, sheep, and goats. Nutritional needs of diseased cats and dogs will be explored.
Prerequisites: None
Corequisites: None
Credit Hours: 3

ATE1648C Veterinary Imaging Techniques

This course is designed to teach veterinary technology students the skills they'll need to perform imaging such as radiology, ultrasonography & endoscopy. Proper technique and safety are emphasized. Other imaging modalities, such as CR, fluoroscopy, and MRI, are discussed and demonstrated. Special studies included are myelography, urethral contract studies, arthroscopy and others that elucidate normal and abnormal organ systems. Further diagnostic technologies focusing on specific organ systems or supporting specific diagnostic and therapeutic actions will be preliminarily introduced here and presented in greater depth throughout other appropriate areas of course studies.
Prerequisites: ATE1003C and ATE1112C
Credit Hours: 4

ATE1943 Externship A: Office Management & Reception

This course is designed to provide students with real-world experience in the animal hospital. Students will spend a total of 90 hours over 10 weeks at a local animal hospital, performing office manager and reception duties.
Prerequisites: ATE1003C and ATE1312C
Credit Hours: 3

ATE2102C Test Preparation & Skills Review

This course will provide the student with the necessary review in order to prepare them to take the Veterinary Technician National Examination (VTNE). Materials covered will include a comprehensive review of the skills and knowledge covered in the exam.
Prerequisites: ATE1030C, ATE1648C, ATE2610C, ATE2620C, ATE2622C, and ATE2657C
Credit Hours: 3

ATE2411C Veterinary Dentistry

In this course, students will learn about oral anatomy, disease, preventive medicine, and treatments, including how to perform a dental cleaning and chart oral health findings. Client education regarding the impact of overall health that oral health has on a pet is emphasized.
Prerequisites: ATE2657C
Credit Hours: 3

ATE2610C Veterinary Pharmacology

This course introduces the integration of mathematical principles as they pertain to practical clinical scenarios in veterinary medicine. These actions include configuring fluid administration rates, therapeutic drug dosing calculations, dilutions, and conversions in various categories of measure. Commonly used drugs are introduced, organized by class and what diseases they treat. Any special considerations given to particular drugs (safety issues, special administration techniques, etc.) are presented as they arise. Special considerations of controlled substances, drug compounding and online pharmacies are discussed. Pharmacy organization, laws and maintenance is taught. Hands-on practice includes drug administration, prescription dispensing and pharmacy organization & inventory.
Prerequisites: MAT1030, MGF1106, or MTB1344
Credit Hours: 4

ATE2620C Disease Problems in Companion Animals

This course is designed to introduce students to common diseases of companion animals. Diseases are organized by body system. Zoonosis, neoplasia, genetic disorders, and diseases that are contagious are highlighted, and an introduction to epidemiological science& oncology is given. The students are introduced to diagnostics and technologies employed in support of the medical sciences. Specialties in each area of veterinary medicine, both at the veterinary and veterinary technician levels, are discussed with their respective lectures to highlight the scope of clinical medicine for technician students.
Prerequisites: ATE1112C
Credit Hours: 5

ATE2621C Veterinary Nursing & Technical Skills

The course is designed to engage students in the theory and practice of the fundamental principles of veterinary nursing through student care of the sick and hospitalized patient with emphasis on patient care, monitoring and record keeping. Students are introduced to real-life clinical scenarios that include discussions about preventative health surveillance and implementation of a healthcare maintenance program. The course emphasizes an introduction to the study of animal disease and epidemiological aspects of disease processes including zoonotic and reportable diseases. Public and occupational health and safety for veterinary technicians is included. Discussion and elaboration of quarantine principles as an essential component to disease control solidifies a sound foundation in understanding disease processes and principles of disease control in public and private settings. Laboratory actions include development of preventative healthcare programs for specified animal groups in varying holding settings or in the wild. Appropriate technical skill exercises will be integrated into laboratory sessions.
Prerequisites: ATE1112C
Credit Hours: 5

ATE2622C Advanced Veterinary Nursing & Technical Skills

The course is designed to build on the skills introduced in Veterinary Nursing and introduce new, more advanced nursing skills and technical procedures. This course is designed to involve and engage the student in care of the sick and hospitalized patient with emphasis on patient care, monitoring, emergency procedures, and record keeping.
Prerequisites: ATE1030C and ATE2621C
Credit Hours: 5

ATE2657C Anesthesia and Surgery for Veterinary Nurses

This course introduces veterinary technician students to basic principles of veterinary operating room physical organization, technologies, and protocols for procedural preparation of the surgical facility and the surgical patient. Emphases in studies include techniques and protocols for asepsis, pack preparation and sterilization, and aspects of the surgical nursing role pre-, during and post-procedure. The course includes a preliminary review of elective, emergency, non-elective, and special surgical procedures that are encountered in most clinical and research animal programs. An overview of basic concepts in veterinary anesthesia and pain management, relevant medical terminology, pharmacology, technologies, and techniques in anesthesia and pain management are presented. Laboratory exercises will implement and enforce principles of anesthesiology through hands-on experiential actions.
Prerequisites: ATE1112C and ATE2621C
Credit Hours: 5

ATE2680C Animals in Research & Exhibition

This course will focus on husbandry, diseases & veterinary care of animals in the laboratory for use as research models. Additionally, the husbandry, diseases & veterinary care of animals exhibited to the public through zoos and aquariums will be examined. Medical and ethical issues of the use of animals will be discussed. Factors such as environmental enrichment and mental stimulation will be highlighted. Wildlife rehabilitation facilities and principles will be taught.
Prerequisites: None
Credit Hours: 4

ATE2945 Externship C: Veterinary Technician

This externship course is designed to provide students with real-world experience in the animal hospital. Students will spend a total of 210 hours over 11 weeks at a local animal hospital, performing veterinary technician duties.

Prerequisites: ATE1030C, ATE1648C, ATE2411C, ATE2610C, and ATE2620C
Credit Hours: 7

Applied Accounting (ACG, APA)

ACG3085 Accounting concepts and applications

An examination of accounting practices commonly used in the business world. Balance sheets, profit and loss statement and general accounting procedure will be part of the topics discussed. General accounting knowledge will be presented in order to prepare students for the kinds of accounting problems they may face in a managerial role. This course is designed as a refresher for accounting students and a general introduction for non-accounting students.
Prerequisites: Junior standing
Credit Hours: 4

APA1111 Accounting I

The student is introduced to the fundamental principles of accounting as they relate to a sole proprietorship business. The course also includes: starting a double entry accounting system, journalizing business transactions and posting journal entries to the ledger.
Prerequisites: None
Credit Hours: 4
💻Offered Online

APA2121 Accounting II

This course continues the accounting cycle with coverage of bank reconciliations, accounting for fixed assets, methods of inventory evaluation, accounting for bad debts, notes receivable and payable.
Prerequisites: APA1111
Credit Hours: 4
💻Offered Online

APA2132 Accounting III

This course continues the accounting cycle with coverage of partnerships, corporations, long-term liabilities, investments and international operations, and analysis of financial statements.
Prerequisites: APA2121
Credit Hours: 4

APA2501 Payroll Accounting

The study of payroll accounting includes calculating the payroll and payroll taxes along with the preparation of those records and reports that form the foundation of an efficient payroll system.
Prerequisites: APA1111
Credit Hours: 4

APA4803 Corporate Federal Income Taxation

This course covers tax knowledge beyond Individual Federal Income Taxation. The course covers the following topics: Tax Research, Corporate Formations, Corporate Distributions, Tax Levies, Acquisition and Reorganizations, Gift Tax, and Estate Tax.
Prerequisites: APA2121
Credit Hours: 4

Biological Sciences (BSC or MC)

BSC1020 Biology and the Human Experience

This course examines the nature of living organisms with an emphasis on humankind. It examines the evolution of life and the structure and functions of cells. It surveys human biology including anatomy and physiology, human inheritance, disease, and nutrition. Emphasis is placed on the implications and applications of the material to current issues.
Prerequisites: None
Credit Hours: 4
💻Offered Online

BSC1085 Anatomy and Physiology I

This course is a study of the structure, function, and chemistry of the human body considering the following topics: body organization, the cell, tissues, membranes, glands, the integumentary system, the skeletal system, the muscular system, the nervous system, and the special senses.
Prerequisites: None
Corequisites: BSC1085L
Credit Hours: 4

BSC1085L Anatomy and Physiology I Lab

The purpose of this course is to provide the student with laboratory exercises in anatomy and physiology. The course is intended to enhance topics covered in the lecture course. Students will use models, dissection material and laboratory equipment to explore the structure of the skeletal, muscular, and nervous systems.
Prerequisites: None
Corequisites: BSC1085
Credit Hours: 1

BSC1086 Anatomy and Physiology II

This course is the study of structure, function, and chemistry of the human body considering the circulatory system, the respiratory system, the digestive system, the urinary system, fluid and electrolytes and the reproductive system.
Prerequisites: None
Corequisites: BSC1086L
Credit Hours: 4

BSC1086L Anatomy and Physiology II Lab

The purpose of this course is to provide the student with laboratory exercises in anatomy and physiology. The course is intended to enhance topics covered in the lecture course. Students will use models, dissection material and laboratory equipment to explore the structure of the circulatory, respiratory, digestive, urinary, and reproductive systems.
Prerequisites: None
Corequisites: BSC1086
Credit Hours: 1

BSC1093 Anatomy and Physiology of Structural Systems

This course is a study of the structural systems (bone, muscle, etc.) of the human body and the principles of human physiology. The course is designed to enable the student to better understand the health problems of the patient and the physician's diagnosis and treatment.
Prerequisites: HSC1531 or BSC1094
Credit Hours: 4
💻Offered Online

BSC1094 Anatomy and Physiology of Organ Systems

This course is a study of the organ systems (digestive, reproductive, etc.) of the human body and the principles of human physiology.
Prerequisites: HSC1531 or BSC1093
Credit Hours: 4
💻Offered Online

MCB2010 Microbiology

The purpose of this course is to provide the student with a general overview of the field of microbiology. Specifically, the student will learn about cell biology, bacteria, viruses, and the components of the immune system.
Prerequisites: None
Corequisite: MCB2010L
Credit Hours: 4
💻Offered Online

MCB2010L Microbiology Lab

The purpose of this course is to provide the student with laboratory exercises in microbiology. The course is intended to enhance the topics covered in the lecture course. Students will use laboratory equipment (microscope, slides, stains, etc.) and materials (Petri dish, cultures, etc.) to examine microorganisms.
Prerequisites: None
Corequisite: MCB2010
Credit Hours: 1

Business Law (BUL)

Bul2131 Business Law and ethics

This course introduces students to the interrelationship of law and ethics in the contemporary business environment. This includes the impact of the United States legal and litigation system on both laws and ethics for businesses and society. Contract, tort, and intellectual property laws are introduced, along with the Uniform Commercial Code, Equal Employment Opportunity Commission, and other regulatory laws.

Prerequisites: None
Credit Hours: 4
💻Offered Online

Cardiovascular Technology (CVT)

CVT1201C Cardiovascular Physiology Concepts

This course is the study of the cardiovascular system, electrical conductivity of the heart, cellular structure and function, cardiac function, vascular function, organ blood flow, and cardiovascular integration, adaptation, and pathophysiology.
Prerequisites: None
Credit Hours: 5

CVT1325C Peripheral Arterial Testing

This course will review the peripheral arterial anatomy and physiology associated with the peripheral arterial system of both the upper and lower extremities. The student will learn the scanning protocol for the upper and lower arterial system and the diagnostic criteria for assessing vascular disease. This course will include duplex ultrasound, plethysmography (PVR), segmental blood pressures (SBP) and Direct Doppler waveform analysis. The student will also learn various diagnostic treatment and therapeutic options used in the treatment of peripheral arterial disease (PAD).
Laboratory: After preliminary introduction to the ultrasound system and physiologic testing equipment and an overall view of anatomy and physiology, the student will then apply hands-on experience as related to peripheral arterial testing. The student will learn how to obtain various scanning planes, and apply both color and Doppler spectral analysis of the arteries. The student will also learn how to perform Pulse Volume Recordings (PVR), Segmental Blood Pressures (SBP) and Photoplethysmography (PPG) to assess the function of the lower extremities both at rest and with treadmill testing. The student will obtain diagnostic criteria pertinent to the scaling of diagnostic criteria.
Prerequisites: CVT1201C
Credit Hours: 4

CVT1327C Cerebrovascular Sonography

This course will review cerebrovascular anatomy and physiology associated with vascular disease, and the mechanisms for stroke and transient ischemic attacks. The student will learn the scanning protocols for extra and intracranial vascular disease and the criteria for assessing disease. The student will learn the diagnostic and treatment options for patient care including minimally invasive and surgical treatment options including carotid stenting and endarterectomy. The student will learn scanning technique in the ultrasound laboratory related to the theory learned in the classroom.
Laboratory: The student will apply hands-on experience as related to cerebrovascular testing. The student will learn how to obtain various scanning planes, and apply both color and Doppler spectral analysis of the subclavian artery, and the common, internal and external carotid arteries. In addition the student will obtain diagnostic criteria pertinent
to the scaling of diagnostic criteria. Lastly, the student will receive an introduction to transcranial Doppler and imaging as related to cerebrovascular disease.
Prerequisites: CVT1201C
Credit Hours: 4

CVT1329C Venous Testing

This course will be a study of the deep and superficial venous anatomy and the normal and abnormal physiology associated with the venous system. The student will learn scanning of the deep and superficial system of both and upper and lower extremities. The student will review various diagnostic and treatment options while continuing scanning in the ultrasound- training laboratory.
Laboratory: After review of the deep and superficial anatomy of the upper and lower venous system, the student will then apply hands-on experience as related to venous testing. The student will learn how to obtain various scanning planes, and apply both color and Doppler spectral analysis for the veins. Scanning protocols will be practiced and pathological conditions will be displayed. The student will obtain diagnostic criteria pertinent to the scaling of diagnostic criteria.
Prerequisites: CVT1201C
Credit Hours: 4

CVT1502C EKG

This course is designed to teach the students' the fundamental principles and practices of EKG. The students will begin with the basics which include a brief history of the technology, the EKG system, and the components of the QRS complex. The importance of the proper placement of the leads is discussed. Heart function as a component of the autonomic nervous system will be presented. The student will learn the basic principle changes associated with rate, rhythm, axis, hypertrophy and infarction.
Laboratory: The laboratory will closely follow the lectures and provide hands-on experience with an EKG system. Students will learn the purpose of the EKG paper and identify the QRS complex. The relationship between the echocardiogram and EKG will be stressed. The student will learn how to apply EKG leads from the ultrasound system and make basic interpretations of rhythm and rate.
Prerequisites: CVT1201C
Credit Hours: 4

CVT1615C Ultrasound Physics I

This course will explain how mechanical principles are applied to ultrasound imaging. The student will learn how ultrasound images are generated, stored, and manipulated. The course will focus on the basics of sound and ultrasound and how sound waves are measured and transmitted through various tissues in the body. Finally the student will learn how images are stored and what formats may be used for documenting images. Laboratory: The ultrasound physics lab will be the first introduction of the ultrasound system and transducers. The student will learn the various components of the ultrasound system including the monitor, keyboard, track ball and transducers. They will learn the importance of care with transducers and cables. The student will learn how to turn on the system, select transducer and application, enter in "patient's" name, DOB etc., and define the image orientation (Cephalad, Caudad, Trans, and Sagittal planes) and be able to make basic adjustments to the image quality.
Prerequisites: MAT1030
Credit Hours: 4

CVT1616C Ultrasound Physics II

This course will follow Ultrasound Physics I where the student will focus more on Doppler spectral analysis, color flow Doppler and power Doppler as well as storage display and ultrasound safety. The student will gain a basic level of comfort in setting up the ultrasound system for a basic examination. He or she will learn to identify and adjust the basic system controls including system set up, image zoom and magnification, and basic measurements. The student will also will learn to explain the issue of ultrasound safety and how to limit exposure to the patient.
Laboratory**:** The student will have hands-on experience in setting the system up, selecting transducers, specific application and properly identifying the various components of the system. The student will practice obtaining, optimizing, freezing, and analyzing a Doppler spectrum. The student will practice obtaining and optimizing color and power Doppler images and identifying system controls that will help optimize the diagnostic image.
Prerequisites: CVT1615C
Credit Hours: 4

CVT1625C Echocardiography I

This course will introduce the student to echocardiography including a brief history of the echocardiography profession. The student will review physics and instrumentation as it is related specifically to echocardiography. In addition, the student will be provided an overview of echocardiographic techniques, which will be provided in the laboratory. The subject of contrast echocardiography will be discussed. This will be the student's formal introduction to the echocardiographic examination and will follow with lectures on the evaluation of the systolic function of the left ventricle.
Laboratory**:** After preliminary review of the echocardiography system, the student will then apply hands-on experience as related to echocardiography testing. The student will apply scanning technique with physical principles and learn the comprehensive cardiac imaging protocol. In the lab, the student will learn patient position and focus on transducer placement and the approach to transthoracic imaging. While in the lab and scanning fellow students the student will practice the technique in order to assess the systolic function of the left ventricle.
Prerequisites: CVT1201C
Credit Hours: 4

CVT1626C Echocardiography II

Echocardiography II is a course that brings greater depth of learning in cardiac anatomy and function, the role of hemodynamics and an introduction to cardiac disease. The student will initially focus on the cardiac atriums, ventricles, and the atrial septum. The role of hemodynamics will review the method of quantifying cardiac blood flow by measuring blood flow including pressure gradients. Next the student will be introduced to pericardial disease, including cardiac tamponade and pericardial restriction. Lastly the student will focus on valvular disease.
Laboratory**:** The student will advance their skills in the laboratory practicing four chamber views and applying pre and post processing functions to optimize echocardiographic imaging. The student will also learn how to measure cardiac chambers dimensions and as well as cardiac functions including pressure gradients. An overview of M-Mode imaging will be applied at this segment of the laboratory training.
Prerequisites: CVT1625C
Credit Hours: 4

CVT1627C Echocardiography III

This course reviews the common pathologies associated with cardiac disease. Initially the student will study the pulmonary and tricuspid valves. The student will learn about pulmonary stenosis and regurgitation with emphasis on the right ventricular outflow tract. Next the student will be presented with clinical and echocardiographic findings of endocarditis and the evolution of diagnostic criteria to determine the various stages of disease. Prosthetic valves will be reviewed. The student will study echocardiography and coronary artery disease including detection and quantification of wall motion abnormalities. The physiologic basis of stress echocardiography will be discussed followed by the detection of coronary artery disease. The course will complete with a study of dilated cardiomyopathies and inflammatory diseases including Chagus myocarditis.
Laboratory**:** The student will continue to advance their skills in the laboratory with greater emphasis on performing examinations with minimal instructor supervision. The student will be expected to have a comprehensive understanding on prerequisites and image optimization controls. At this point of training the student must perform an examination within a specified time frame and be able to capture images for measurement and interpretation.
Prerequisites: CVT1626C
Credit Hours: 4

CVT2628C Echocardiography IV

This is the final echocardiography course in the program that completes an overview of echocardiography and pathologies. Echocardiography in systemic disease, various other cardiac diseases including hypertrophic and congenital heart diseases, aortic diseases of the large branches of the aorta both thoracic and abdominal will be reviewed.. The student will also review the intensive Care Unit (ICU) and perioperative applications including, intra, and postoperative echocardiography. The student will learn about the various cardiac masses and tumors and review the source of emboli, which is covered in depth in VenousTesting.
Laboratory**:** The student will complete the echocardiography lab by demonstrating the ability to provide a comprehensive echocardiogram without supervision. This will include explaining the procedure to the patient, preparing the patient for the examination, setting up the equipment for a routine study, obtaining 1) parasternal 2) apical, 3) substernal and 4) suprasternal views. The student will be expected to make the necessary adjustments with the ultrasound system to optimize image, color, and Doppler findings. The student will be able to freeze, make measurements, and annotate.
Prerequisites: CVT1627C
Credit Hours: 4

CVT2191 Clinical Externship I

This course is the student's first introduction to clinical imaging in the cardiac and vascular setting. The student will be expected to learn the hospital and department structure, emergency codes and identify the key personnel. While the student should be proficient at scanning a patient without disease, he or she will be expected to "back-scan" patients upon the discretion of the clinical instructor. They will be expected to review findings and help prepare data for interpretation. The student will also assist in escorting the patient from the department and prepare the examination room for the next patient study. The student will be expected to research cases and discuss at a basic level the diagnostic study as it relates to the cardiovascular pathology.
Prerequisites: CVT1627C
Credit Hours: 10

CVT2192 Clinical Externship II

Once the student is oriented to the facility, department, and protocols, he or she will advance to the intermediate stage of their training. After the successful conclusion of 300 hours in Clinical I, the student will be expected to take a more independent role in cardiovascular testing. This includes participating in testing with less supervision but always at the discretion of the clinical supervisor. In addition, the student should be able to complete a comprehensive uncomplicated examination by him or herself within a reasonable amount of time dictated by the clinical instructor. The student should be able to explain findings with patients' clinical symptoms and on a basic level discuss diagnostic and therapeutic options. Students will be expected to stay abreast of current clinical practices as out lined by professional societies and journals.
Prerequisites: CVT2191
Credit Hours: 10

CVT2193 Clinical Externship III

Clinical III represents the final term for clinical training. This course is designed to ensure the student has obtained basic competencies required for entry level cardiovascular employment. The student will be able to perform a variety of cardiovascular studies independently and only require assistance or direction on the most difficult or challenging cases. At this stage of training the student will have learned the ability to integrate clinical findings with cardiovascular testing results. In addition, the student will be able to comment on complimentary diagnostic studies and discussion various treatment options. He or she will also continue with professional journal reviews and communication with colleagues and the schools clinical coordinator
Prerequisites: CVT2192
Credit Hours: 10

Chemistry (CHM)

CHM1020 Introduction to Chemistry

This course provides an overview of elementary principles of modern chemistry, including basic measurements, chemical bonding, chemical reactions, stoichiometry, concentration of solutions, and chemical nomenclature.
Prerequisites: MAT1030 or MGF1106
Corequisites: None
Credit Hours: 4

CHM1033 Chemistry for Health Sciences

This course provides a survey of the principles of Inorganic and General Chemistry, Organic Chemistry and Biochemistry and their applications to human anatomical and physiological functions.
Prerequisites: MAT1030
Corequisites: CHM1033L
Credit Hours: 4

CHM1033L Chemistry for Health Sciences Lab

The purpose of this course is to provide the student with laboratory exercises in chemistry for health sciences. The course is intended to enhance topics covered in the lecture course. Students will use laboratory equipment to perform experiments to explore chemical concepts of General, Inorganic Chemistry, Organic Chemistry and Biochemistry and relate these applications to human anatomical and physiological functions.
Prerequisites: MAT1030
Corequisites: CHM1033
Credit Hours: 1

Computer General Studies (Non-Computer Science) (CGS)

CGS1100C Computer Applications I

This course provides an introductory study of computer topics. Students completing this course will have a solid understanding of how to use a personal computer, access information using the Internet, send and receive email, manage computer files, and utilize operating system tools. In addition, the students will receive hands-on experience with word processing, spreadsheets, and presentation software. The students will also gain an understanding of ethical issues related to the use of computers. This course utilizes classroom lectures and hands-on computer exercises. No prior experience with computers is assumed.
Prerequisites: None
Credit Hours: 4
💻Offered Online

CGS1170C Internet Fundamentals

This course introduces each student to the power of the unlimited information resource known as the Internet. The history of the Internet, how to understand addresses, expediting searches, downloading, and the basics of HTML and Web pages are covered. This is accomplished using hands-on instruction. This course includes a lab component that provides students with additional opportunities to strengthen computer skills.
Prerequisites: None
Credit Hours: 4

CGS1571C Computer Applications II

This course provides an intermediate study of computer topics. Students completing this course will understand how to use a personal computer, access information using the Internet, send and receive email, manage computer files, and utilize operating system tools. This course utilizes classroom lectures and hands-on computer exercises.
Prerequisites: CGS1100C
Credit Hours: 4
💻Offered Online

CGS2510C Computerized Spreadsheets

This course introduces the student to computerized spreadsheets using a current, industry standard application. Formula development, editing, formatting, macro building, graphics, printing, and other features will be performed using hands-on training. Each student will use a state-of the art personal computer. This course includes a lab component that provides students with additional opportunities to strengthen computer skills.
Prerequisites: CGS1100C
Credit Hours: 4

Communications (COM)

COM2612 Social Media and Society

This course explores the evolution and application of social media technologies and ideas. It focuses on contrasting conventional media forms and practices with social media technologies and application. Students will learn the relevance and dynamic value of social media in contemporary mass communication realities. It will contribute to the students' understanding of the changing media environment, analog versus digital technology, printing to digital newspapers, smart phones and tablets and their various uses, new media and their application to conventional media, the internet, advertising, and public relations. Students will also be exposed to issues of ethics, law and global communication policies and practices.
Prerequisites: None
Credit Hours: 4

Developmental Psychology (DEP)

DEP2004 Human Growth and Development

Study of normal human growth and development from conception throughout the life span. Focus is on fundamental changes within an individual's domains of physical, cognitive, and psychosocial development and of interrelationship between the environment and the individual.
Prerequisites: None
Credit Hours: 4
💻Offered Online

Diagnostic Sonography (DS)

DS1100 Fundamentals of Ultrasound

This course is designed to provide the student with an introduction of basic concepts that will prepare the student for the ultrasound field. Sonographic concepts and terminologies, patient care, clinical practices; radiation safety; HIPAA training, and clinical policies and procedures will be introduced. In addition, they will receive instruction on case reports, competencies, and necessary evaluation forms. CPR and Blood Borne Pathogens will be covered.
Prerequisites: None
Credit Hours: 2

DS1110 Cross-Sectional Anatomy

This course is designed to enable the student to conceptualize the major organs and vessels in the thoracic and abdominopelvic cavities in tomographic sections, using transverse (axial), sagittal, coronal, and oblique sections. Portions of the neck and brain will also be studied. Emphasis will be placed on the anatomic relationships between the organs commonly scanned by sonography.
Prerequisites: None
Credit Hours: 3

DS1200 Ethics and Law in Medical Imaging

Content provides a foundation in ethics and law related to the practice of medical imaging. An introduction to terminology, concepts and principles will be presented. Students will examine a variety of ethical and legal issues found in clinical practice.
Prerequisites: None
Credit Hours: 1

DS1210 Abdominal Sonography I

This course is designed to introduce the student to the concepts of sonographic imaging of the abdomen with a focus on relational anatomy of the abdominal organs. Emphasis is placed on the normal sonographic appearance of the abdominal organs and vasculature, along with normal clinical and laboratory findings specific to the system. This includes the liver, gall bladder and biliary system, pancreas, spleen, aorta, inferior vena cava and kidneys. Didactic lectures will be complemented by instructor directed "hands-on" scanning in the scanning lab.
Prerequisites: BSC1093, BSC1094, ENC1100, MAT1030, and PHY1020
Credit Hours: 3

DS1210L Abdominal Sonography I Lab

This course is designed to complement the Abdominal Sonography I lecture material, and to introduce the student to sonographic imaging of the abdomen, with a focus on relational anatomy of the abdominal organs. This course consists of instructor directed "hands-on" scanning in the scanning laboratory. In this course the student should learn the basic foundation of patient preparation, scanning techniques and protocols for performing an abdominal exam. Emphasis is placed on the normal sonographic appearance of the abdominal organs and vasculature along with normal clinical and laboratory findings specific to the system. This includes the liver, gall bladder and biliary system, pancreas, spleen, aorta, inferior vena cava and kidneys. Imaging critique should be performed throughout the course.
Prerequisites: BSC1093, BSC1094, ENC1100, MAT1030, and PHY1020
Credit Hours: 1

DS1220 Obstetric and Gynecologic Sonography I

This course is designed for the student to learn the basic foundation of patient preparation, scanning techniques and protocols for performing gynecologic and obstetric exams. It is also designed to familiarize the student with normal sonographic imaging of the female reproductive system through appropriate usage of transabdominal (TAB) and transvaginal (TVA) probes. Study content should include the normal anatomy of the uterus, vagina, ovaries, and fallopian tubes. In addition, pre-menopausal and post-menopausal sonographic anatomy will be introduced. The anatomic relationships of the genital organs with other structures in the pelvis such as the urinary bladder, ureters, rectum, and muscles will be highlighted. Various congenital anomalies of the uterus, fallopian tubes and ovaries will also be covered. Normal and abnormal first trimester pregnancies are introduced, in addition to normal second and third trimester pregnancies.
Prerequisites: BSC1093, BSC1094, ENC1100, MAT1030, and PHY1020
Credit Hours: 3

DS1220L Obstetric and Gynecologic Sonography I Lab

This course is designed to complement the Obstetric and Gynecologic Sonography I lecture material, and to familiarize the student with normal sonographic imaging of the female reproductive system. This course consists of instructor directed "hands-on" scanning in the scanning laboratory. In this course the student should learn the basic foundation of patient preparation, scanning techniques and protocols for performing gynecologic and obstetric exams. Appropriate usage of transabdominal (TAB) and/or transvaginal (TVA) probes will be covered. Practice should include the normal anatomy of the female reproductive system, as well as its anatomic relationship to other structures in the pelvis. Various concepts related to congenital anomalies of the uterus, fallopian tubes and ovaries will be covered. Sonographic evaluation of normal first, second and third trimester pregnancies should be practiced. Sonographic evaluation of abnormal first trimester pregnancy will also be considered, including viability of the fetus, measuring the Crown Rump Length and nuchal translucency.

Prerequisites: BSC1093, BSC1094, ENC1100, MAT1030, and PHY1020
Credit Hours: 1

DS1230 Sonographic Physics and Instrumentation I

This course is designed to present the basic concepts and principles of ultrasound physics as a foundation for understanding image interpretation. The student should learn the wave theory of sound and how it travels through various media. They should gain knowledge of the principles of how piezoelectricity converts sound energy to electrical energy in ultrasound transducers. They should gain mastery of instrumentation of the equipment and understand how the use of gain compensates for attenuation. They should acquire an understanding of harmonics, different types of resolution, basic Doppler principles and m-mode.
Prerequisites: BSC1093, BSC1094, ENC1100, MAT1030, and PHY1020
Credit Hours: 6

DS1250 Patient Care

This course is designed to introduce the student to the fundamental principles of proper patient care. Content includes history of medical sonography, and the professional role of an ultrasound sonographer in the laboratory setting. Concepts of sonographer‐patient interactions are emphasized, including, maintaining privacy, handling emergency situations, vital signs, utilizing proper body mechanics, maintaining aseptic techniques, following infection control procedures and Universal Standard Precautions when handling hazardous materials. The student will learn about HIPAA regulations and multicultural considerations in patient treatment.
Prerequisites: BSC1093, BSC1094, ENC1100, MAT1030, and PHY1020
Credit Hours: 1

DS1310 Abdominal Sonography II

This course is designed to be a continuation of Abdominal Sonography I with an emphasis on pathophysiology, and recognizing pathologic changes on ultrasound scans of organs in the upper abdomen, such as the liver, kidneys, pancreas, spleen, and vasculature, etc. Students will review multiple images of various disease states and critically evaluate them using the sonographic criteria of "SSALT" ‐ size, shape, acoustic characteristics, location and transonicity.
Prerequisites: DS1210
Credit Hours: 3

DS1310L Abdominal Sonography II Lab

This "hands-on" laboratory scanning course is designed to complement the Abdominal Sonography II lecture material. This course includes an emphasis on recognizing pathologic changes on ultrasound scans of organs in the upper abdomen, such as the liver, kidneys, pancreas, spleen, vasculature, etc. Students will review concepts of various disease states and critically evaluate them using the sonographic criteria of "SSALT" ‐ size, shape, acoustic characteristics, location and transonicity. Imaging critique should be performed throughout the course.
Prerequisites: None
Credit Hours: 1

DS1330 Sonographic Physics and Instrumentation II

This course is designed as a continuation of Sonographic Physics and Instrumentation I. The student should gain a comprehensive knowledge of ultrasound physics and instrumentation. This course reinforces concepts and offers more advanced material in ultrasound theory and instrumentation, fluid hemodynamics, color-flow Doppler, spectral analysis, power Doppler, harmonics, artifacts, etc. Students should gain a comprehensive knowledge of how this imaging modality affects clinical operation, including bio effects, quality assurance, and PAC systems for storing and archiving images. Emphasis will be placed on preparing students to pass the Sonography Principles & Instrumentation (SPI) Examination of the ARDMS. Review and practice questions will be incorporated.
Prerequisites: DS1230
Credit Hours: 6

DS1350 Law and Ethics in Diagnostic Sonography

This course is designed to present to the student the legal and ethical implications of working in medical facilities. The student should learn basic legal principles and doctrines such as torts, professional liability insurance, and informed consent. Ethical issues that health educators, students, and clinicians are faced with in daily practice will be covered. Liability, especially related to the imaging professions, will be emphasized.
Prerequisites: None
Credit Hours: 1

DS1390 Clinical Education I

This course is designed to provide the student with a foundation for scanning for those who are focusing on either General, Obstetric and Gynecologic, Echocardiography or Vascular ultrasound, in the clinical setting. The clinical site may be a laboratory in a hospital, outpatient imaging center, or a private office setting. Students will be instructed on professional behavior expected at a clinical site, including attendance and dress code. In addition, they will receive instruction on case reports, Trajecsys reporting system, competencies, and necessary evaluation forms. Depending on which point in the program a student will be taking this course, it may serve as a first or second exposure to the clinical setting. As a first exposure to the clinical setting, the student should learn to operate equipment safely, perform basic exams and protocols with

supervision, and identify and scan normal structures in the body. As a second exposure to the clinical setting, the student should be honing their scanning skills and completing all scanning objectives that were not achieved in their previous clinical experience.
Prerequisites: None
Credit Hours: 4

DS1420 Obstetric and Gynecological Sonography II

This course is designed to be a continuation of Obstetric and Gynecologic Sonography I. Advanced topics, focusing on pathologic conditions that can be determined by gynecologic and obstetric ultrasound scanning will be covered. The student should learn to recognize abnormal and/or pathologic sonographic patterns of the uterus and adnexa and to correlate the findings with patient history and lab values. Normal and abnormal 2nd and 3rd trimester pregnancy sonography will be covered, including fetal number, fetal position, placental grade, and placental location. Students will review the components of a complete anatomy scan, including the ultrasound appearance of the head, neck, spine, heart, abdomen, pelvis, and extremities. Complications of pregnancy will also be discussed including IUGR, congenital syndromes, fetal disorders, multiple gestations, and placental abnormalities.
Prerequisites: DS1120 and DS1330
Credit Hours: 4

DS1420L Obstetric and Gynecological Sonography II Lab

This "hands-on" laboratory scanning course is designed to complement the Obstetric and Gynecologic Sonography II lecture material. This course covers advanced level scanning techniques, focusing on pathologic conditions that can be determined by gynecologic and obstetric ultrasound scanning. The student should learn to recognize abnormal and/or pathologic sonographic patterns of the uterus and adnexa and to correlate these findings with patient history and lab values. Normal and abnormal 2nd and 3rd trimester sonography will be covered, including fetal number, fetal position, and placental grade and location. Students will review and perfect obtaining the images that comprise the components of a complete anatomy scan. Accurate assessment of gestational age through fetal biometry techniques will be perfected. Complications of pregnancy will also be covered.
Prerequisites: DS1330
Credit Hours: 1

DS1490 Clinical Education II

This course is designed to provide the student with a foundation for scanning for those who are focusing on either General, Obstetric and Gynecologic, Echocardiography or Vascular ultrasound, in the clinical setting. The clinical site may be a laboratory in a hospital, outpatient imaging center, or a private office setting. Students will be instructed on professional behavior expected at a clinical site, including attendance and dress code. In addition, they will receive instruction on case reports, competencies, and necessary evaluation forms. Depending on which point in the program a student will be taking this course, it may serve as a first or second exposure to the clinical setting. As a first exposure to the clinical setting, the student should learn to operate equipment safely, perform basic exams and protocols with supervision, and identify and scan normal structures in the body. As a second exposure to the clinical setting, the student should be honing their scanning skills and completing all scanning objectives that were not achieved in their previous clinical experience.
Prerequisites: DS1330
Credit Hours: 7

DS1540 Sonography of Superficial Structures

This course is designed to provide the student with a basic foundation for ultrasound scanning of the thyroid glands, breast, prostate, and scrotum. It will also include the neonatal head as well as new applications in the field of musculoskeletal ultrasound, consisting of the rotator cuff of the shoulder, developmental dysplasia of the infant hip and carpal tunnel imaging. Normal anatomy and sonographic appearance of these structures will be covered, as well as common pathologic states found in these structures. Lecture time may be complemented with instructor directed hands-on scanning in the student scanning laboratory.
Prerequisites: None
Credit Hours: 3

DS1540L SONOGRAPHY OF SUPERFICIAL STRUCTURES LAB

This "hands-on" scanning laboratory course is designed to complement the Sonography of Superficial Structures lecture material. This course should provide a basic foundation for ultrasound scanning of the thyroid glands, breast, prostate, and scrotum. It will also include the neonatal head, as well as new applications in the field of musculoskeletal ultrasound, consisting of the rotator cuff of the shoulder, developmental dysplasia of the infant hip and carpal tunnel imaging. Normal sonographic appearance of these structures will be covered, as well as common pathologic states found in these structures.
Prerequisites: None
Credit Hours: 1

DS1550 QUALITY MANAGEMENT AND OPERATIONAL ISSUES

This course is designed to focus on the components of quality leadership and operational issues in healthcare, specific to Ultrasound. The role of the various ultrasound and healthcare team members in continuous quality improvement, including quality control, process improvement, operational and leadership issues, will be discussed, as well as the legal and regulatory implications for maintaining compliance.

Prerequisites: None
Credit Hours: 1

DS1590 Clinical Education III

This course is designed to provide the student with additional exposure to scanning for those who are focusing on either General, Obstetric and Gynecologic, Echocardiography or Vascular ultrasound, in the clinical setting. Students will be honing their scanning skills and completing all scanning objectives that were not achieved in their previous clinical experience. The clinical site may be a laboratory in a hospital, outpatient imaging center, or a private office setting. Students will be instructed on professional behavior expected at a clinical site, including attendance and dress code. In addition, they will receive instruction on case reports, competencies, and necessary evaluation forms.
Prerequisites: None
Credit Hours: 7

DS1670 Echocardiography I

This course is designed to provide the student with a basic rudimentary foundation for clinical echocardiography of the adult heart. A review of normal anatomy and physiology of the heart will be presented. The student should learn the elements of a normal echocardiogram, including standard echocardiographic views of the heart chambers, valves, muscles, and the surrounding great vessels. Common heart and valvular diseases, as well as cardiomyopathies will be introduced. They should learn adult cardiac scanning protocols, and how pathology manifests on an echocardiographic scan. Students will become familiar with various modes of cardiac scanning, including M-Mode, color flow Doppler, power Doppler and continuous wave Doppler. Lecture time may be complemented with instructor directed "hands-on" scanning in the scanning laboratory.
Prerequisites: BSC1093, BSC1094, ENC1100, MAT1030, and PHY1020
Credit Hours: 3

DS1670L Echocardiography I Lab

This "hands-on" scanning laboratory course is designed to complement the Echocardiography lecture material. This course is intended to provide a foundation for clinical echocardiography scanning of the adult heart. A review of normal anatomy and physiology of the heart will be presented. The student should learn the elements of a normal echocardiogram, including standard echocardiographic views of the heart chambers, valves, muscles, and the surrounding great vessels.
They should learn adult cardiac scanning protocols, and how pathology manifests on an echocardiographic scan. Students will become familiar with various modes of cardiac scanning, including M-Mode, color flow Doppler, power Doppler and continuous wave Doppler. Imaging critique may be performed throughout the course.
Prerequisites: BSC1093, BSC1094, ENC1100, MAT1030, and PHY1020
Credit Hours: 1

DS1680 Vascular Ultrasound I

This course is designed to provide the student with content on the use of duplex Doppler Ultrasound to interrogate the extra-cranial circulation of the brain, including the carotid arteries. It will also cover interrogation of the arterial and venous circulation of the upper and lower extremities, as well as abdominal vasculature. Normal and pathological conditions will be discussed in correlation with physical findings. Didactic lectures may be complemented by instructor directed "hands-on" scanning in the scanning laboratory.
Prerequisites: BSC1093, BSC1094, ENC1100, MAT1030, and PHY1020
Credit Hours: 3

DS1680L Vascular Ultrasound I Lab

This 'hands-on" scanning laboratory course is designed to complement the Vascular Ultrasound lecture material. This course should provide the student with content on the use of duplex Doppler Ultrasound to interrogate the extra-cranial circulation of the brain, including the carotid arteries. It will also cover interrogation of the arterial and venous circulation of the upper and lower extremities, as well as abdominal vasculature. Normal and pathological conditions will be discussed in correlation with physical findings. Imaging critique may be performed throughout the course.
Prerequisites: BSC1093, BSC1094, ENC1100, MAT1030, and PHY1020
Credit Hours: 1

DS1690 Clinical Education IV

This course is designed to provide the student with additional exposure to scanning for those who are focusing on either General, Obstetric and Gynecologic, Echocardiography or Vascular ultrasound, in the clinical setting. Students will be honing their scanning skills and completing all scanning objectives that were not achieved in their previous clinical experience. The clinical site may be a laboratory in a hospital, outpatient imaging center and /or private office setting. Students will be instructed on professional behavior expected at a clinical site, including attendance, and dress code. In addition, they will receive instruction on case studies, competencies, and necessary evaluation forms.
Prerequisites: None
Credit Hours: 4

DS1750 Case Studies Critiques

This course is designed to educate the student about the components of a case study in ultrasound. The goal of a case study is to accurately describe the details of a patient's ultrasound examination findings. Students will learn to critically analyze anatomical variants, normal, and pathological sonographic findings in images. The study should begin with the patient history derived from an oral interview and patient chart information including, results of relevant lab tests, imaging exams, and possible surgical procedures. The case study should describe the patient preparation for the exam, positioning on the exam table, and the imaging protocols used by the sonographer. The student will research the pathologic findings of each case and will detail the etiology and pathogenesis of the pathology and/or disease, including sonographic manifestations and prognosis. The student will present their case studies to their peers.
Prerequisites: None
Credit Hours: 2

DS1760 Career Development

This course is designed to introduce the student to a comprehensive approach to career development & planning. Students will examine self-awareness and career exploration which should then be incorporated into self-marketing techniques leading to long term effective career decision making. Students will be exposed to useful job searching techniques necessary in today's job marketplace.
Prerequisites: None
Credit Hours: 1

DS1770 Echocardiography II

This course is designed to provide the student with a basic rudimentary foundation for clinical echocardiography of the adult heart. A review of normal anatomy and physiology of the heart will be presented. The student should learn the elements of a normal echocardiogram, including standard echocardiographic views of the heart chambers, valves, muscles, and the surrounding great vessels. Common heart and valvular diseases, as well as cardiomyopathies will be introduced. They should learn adult cardiac scanning protocols, and how pathology manifests on an echocardiographic scan. Students will become familiar with various modes of cardiac scanning, including M-Mode, color flow Doppler, power Doppler and continuous wave Doppler. Lecture time may be complemented with instructor directed "hands-on" scanning in the scanning laboratory.
Prerequisites: DS1670
Credit Hours: 3

DS1770L Echocardiography II Lab

This "hands-on" scanning laboratory course is designed to complement the Echocardiography lecture material. This course is intended to provide a foundation for clinical echocardiography scanning of the adult heart. A review of normal anatomy and physiology of the heart will be presented. The student should learn the elements of a normal echocardiogram, including standard echocardiographic views of the heart chambers, valves, muscles, and the surrounding great vessels.
They should learn adult cardiac scanning protocols, and how pathology manifests on an echocardiographic scan. Students will become familiar with various modes of cardiac scanning, including M-Mode, color flow Doppler, power Doppler and continuous wave Doppler. Imaging critique may be performed throughout the course.
Prerequisites: None
Credit Hours: 1

DS1780 Vascular Ultrasound II

This course is designed to provide the student with content on the use of duplex Doppler Ultrasound to interrogate the extra-cranial circulation of the brain, including the carotid arteries. It will also cover interrogation of the arterial and venous circulation of the upper and lower extremities, as well as abdominal vasculature. Normal and pathological conditions will be discussed in correlation with physical findings. Didactic lectures may be complemented by instructor directed "hands-on" scanning in the scanning laboratory.
Prerequisites: DS1680, DS1330
Credit Hours: 3

DS1780L Vascular Ultrasound II Lab

This "hands-on" scanning laboratory course is designed to complement the Vascular Ultrasound lecture material. This course should provide the student with content on the use of duplex Doppler Ultrasound to interrogate the extra-cranial circulation of the brain, including the carotid arteries. It will also cover interrogation of the arterial and venous circulation of the upper and lower extremities, as well as abdominal vasculature. Normal and pathological conditions will be discussed in correlation with physical findings. Imaging critique may be performed throughout the course.
Prerequisites: DS1330
Credit Hours: 1

DS1800 Registry Review

This course is designed to provide an extensive review to prepare the student to take the American Registry for Diagnostic Medical Sonography (ARDMS) examination for those who are focusing on either Abdomen (General), OB/GYN, Echocardiography, or Vascular specialties. Students will

be given practice (mock) exams. In addition, an array of topics on professionalism will be covered. The role of professional organizations, medical journals, continuing education, interviewing skills and ergonomics at the workplace are among the topics discussed.
Prerequisites General Focus - DS1210, DS1310, DS1220, DS1420
Cardiovascular Focus - DS1670, DS1770, DS1870, DS1680, DS1780
Credit Hours: 6

DS1870 Echocardiography III

This course is designed to provide the student with an extensive foundation for clinical Echocardiography of the adult heart. Expounded cardiac pathology and various cardiac procedures will be presented. Emergency Cardiac cases as well as basic Pharmacology will be introduced. The student will become familiar with the Fundamentals of Pediatric Echocardiography and Congenital heart diseases. Cardiac scanning, including M-Mode, color flow Doppler, power Doppler and continuous wave Doppler as it pertains to the diseases covered, will be instituted. Lecture time may be complemented with instructor directed "hands-on" scanning in the scanning laboratory.
Prerequisites: DS1770
Credit Hours: 3

DS1870L Echocardiography III Lab

This "hands-on" scanning laboratory course is designed to provide the students with additional clinical Echocardiography scanning of the adult heart as well as vascular ultrasound scanning. A review of normal anatomy and physiology of the heart will be presented. The student should reinforce their knowledge of the elements of a normal echocardiogram, including standard echocardiographic views of the heart chambers, valves, muscles, and the surrounding great vessels. They should practice adult cardiac scanning protocols, and how pathology manifests on an echocardiographic scan. Students will become more familiar with various modes of cardiac scanning, including M-Mode, color flow Doppler, power Doppler and continuous wave Doppler. In addition, this course should provide the student with further practice on the use of duplex Doppler ultrasound to interrogate the extracranial circulation of the brain, including the carotid arteries. It will also cover interrogation of the arterial and venous circulation of the upper and lower extremities, as well as abdominal vasculature. Normal and pathological conditions will be reviewed in correlation with physical findings. Imaging critique may be performed throughout the course.
Prerequisites: None
Credit Hours: 1

Economics (ECO)

ECO1000 Introduction to Economics

This course is designed to provide students with a general knowledge of the structure and function of economic systems with major emphasis on the American economy, its strengths, its weaknesses, its history, and its current condition. Emphasis will be placed on economics as a societal and cultural phenomenon, focusing on how it affects daily life, current events, and the future.
Prerequisites: None
Credit Hours: 4
💻Offered Online

ECO2013 Principles of Macroeconomics

Topics in this course include the American economics system, production, income, consumption, and distribution as related to business.
Prerequisites: ENC1100 or ENC1201 or MTB1103 or ECO2027 or ECO1000
Credit Hours: 4

ECO2027 Principles of Microeconomics

Consumer behavior determining demands for good and services. This course introduces the student to the theory of the firm including production, costs and pricing, and distribution to production factors.
Prerequisites: ENC1100 or ENC1201 or MTB1103 or ECO2013 or ECO1000
Credit Hours: 4

Emergency Medical Services (EM or EMS)

EMS1010 Anatomy and Physiology for EMS

Comprehensive course presenting basic information on structure and function of the human body. The course applies principles of anatomy and physiology to show interaction of body systems as they approach homeostasis. Each body system is presented with emphasis on cardiovascular, respiratory and the nervous system. This course meets
the student Anatomy and Physiology objectives found in the US DOT, National highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Education Standards Paramedic curriculum.
Prerequisites: None
Credit Hours: 4

ems1119 Emergency Medical Technician

This course provides emergency medical technician training utilizing the U.S. Department of Transportation National Standard curriculum for emergency medical technician basic. Topics include anatomy and patient assessment, patient handling and movement, assessment and treatment of traumatic injuries, assessment and treatment of medical emergencies, childbirth and pediatric emergencies, psychological and environmental emergencies, crisis intervention, extrication and transportation, and disaster management.

Prerequisites: None
Corequisites: EMS1119L and EMS1120
Credit Hours: 11
💻Offered Online

EMS1119l Emergency Medical Technician Lab

This course consists of practice and evaluations in basic airway skills, oxygen therapy, patient lifting and moving techniques, medication administration, patient assessment, management of trauma and injuries. This course also includes the AHA BLS healthcare provider course.

Prerequisites: Physical examination by a licensed physician, and VECHS (voluntary employment criminal history search) and BLS Provider certification.
Prerequisites: None
Corequisites: EMS1119 and EMS1120
Credit Hours: 5
💻Offered Online

EMS1120 Emergency Medical Technician Clinical education

This clinical course will allow the student to observe and participate in all aspects of basic level support that can be provided in the prehospital setting for different age groups and different disease pathologies such as cardiac, respiratory, injuries caused by trauma and others. This will give the student the opportunity to practice the skills learned in the didactic and laboratory settings and apply their knowledge in real time situations.

Prerequisites: None
Corequisites: EMS1119 and EMS1119L
Credit Hours: 3.2

EMS1671 Paramedic I

This course consists of the preparatory phase of the National Highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Educations Standards Paramedic curriculum. It includes Anatomy and Physiology, Preparatory, Pathophysiology, Patent Assessment, Airway Management, Respirations and Artificial Ventilation, Pharmacology, Medication Administration, Medicine: Respiratory and Gynecology, Obstetrics and Neonatal Care. This is an interactive course that coincides with lecture, skills laboratory, and an externship program.
Prerequisites: EMS1155C
Corequisites: EMS1090L and EMS2690
Credit Hours: 8

EMS1090L Paramedic I Laboratory

Lab skills will be introduced and practiced in conjunction with the cognitive standards being explored each week. The Paramedic I through IV Lab class objectives are to prepare the student for application of skills in the clinical and field experiences. The lab classes will also include the required National Registry portfolio psychomotor skills and scenarios.
Scenarios will be formative and summative Scenario Lab evaluations for pediatric, adult, and geriatric patients covering the following Scenario Topic Areas: Respiratory Distress/Failure, Chest Pain, Cardiac Rhythm Disturbance, Stroke, Overdose, Abdominal Pain, Allergic Reaction/Anaphylaxis, Diabetic Emergency, Psychiatric Condition, Seizure, OB/GYN, Blunt Trauma, Penetrating Trauma, Burns, and Hemorrhage.
Prerequisites: EMS1155C
Corequisites: EMS1671 and EMS2690
Credit Hours: 4

EMS2690 Paramedic I Externship

This course continues Paramedic psychomotor skills related to patient assessment and management in the clinical setting. Skills that have been practiced in the laboratory setting, and in which students have obtained competence, will be practiced in a clinical setting under the direct supervision of an instructor or preceptor in both pre-hospital and in-hospital settings. The student will progress from initially observing (in Paramedic I) to serving as a team leader (in Paramedic V) directing patient care. Emphasis is on safety of the care providers, safety of the patient, and observing all parameters of paramedic patient care including patient confidentiality. Laboratory skills must be mastered prior to the student entering any field or clinical externship.
Prerequisites: EMS1155C
Corequisites: EMS1671 and EMS1090L

Credit Hours: 2

EMS2672 Paramedic II

This course consists of the preparatory phase of the National Highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Educations Standards Paramedic curriculum. It includes Medicine: Medical Overview, Neurology, Abdominal and Gastrointestinal Disorders, Immunology, Infectious Diseases, Endocrine Disorders, Psychiatric, Cardiovascular, Toxicology, Respiratory, Hematology, Genitourinary/Renal, Non-Traumatic, Musculoskeletal Disorders, Diseases of the Eyes, Ears, Nose, and Throat, Shock and Resuscitation, Special Patient Populations: Pediatrics, Geriatrics, Patients with Special Challenges. This is an interactive course that coincides with lecture, skills laboratory, and an externship program.
Prerequisites: EMS1671, EMS2690, EMS1090L, and be a Florida State Licensed EMT
Corequisites: EMS2091L and EMS2691
Credit Hours: 7

EMS2091L Paramedic II Laboratory

This course presents paramedic psychomotor skills from the US DOT, National highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Education Standards Paramedic curriculum. This is a laboratory course and will involve hands-on skills with manikins and other teaching tools. The student must be able to physically kneel, lift other persons to place them on a stretcher, and direct patient care. The laboratory will use training sessions and will progress to patient emergency scenarios in which the student will direct patient care. Laboratory skills must be mastered prior to the student entering any field or clinical externship.
Prerequisites: EMS1671 and be a Florida State Licensed EMT
Corequisites: EMS2672 and EMS2691
Credit Hours: 4

EMS2691 Paramedic II Externship

This course continues Paramedic psychomotor skills related to patient assessment and management in the clinical setting. Skills that have been practiced in the laboratory setting, and in which students have obtained competence, will be practiced in a clinical setting under the direct supervision of an instructor or preceptor in both pre-hospital and in-hospital settings. The student will progress from initially observing (in Paramedic I) to serving as a team leader (in Paramedic V) directing patient care. Emphasis is on safety of the care providers, safety of the patient, and observing all parameters of paramedic patient care including patient confidentiality. Laboratory skills must be mastered prior to the student entering any field or clinical externship.
Prerequisites: EMS1671 and be a Florida State Licensed EMT
Corequisites: EMS2091L and EMS2672
Credit Hours: 2

EMS2673 Paramedic III

This course consists of US DOT, National Highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Educations Standards Paramedic curriculum. The following areas are covered in this course Trauma: Trauma Overview, Bleeding, Chest Trauma, Abdominal and Genitourinary Trauma, Orthopedic Trauma, Soft Tissue Trauma, Head, Facial, Neck, and Spine Trauma, Special Considerations in Trauma, Multi-System Trauma, Environmental Emergencies, Pathophysiology, assessment, and management of Multi-System Trauma; Preparatory: Workforce Safety and Wellness; EMS Operations: Incident Management, Multiple Casualty Incidents, Vehicle Extrication, Hazardous Materials. This is an interactive course that coincides with lecture, skills laboratory
and an externship program.
Prerequisites: EMS2672, and EMS2691, and EMS2091L
Corequisites: EMS2092L and EMS2692
Credit Hours: 5

EMS2092L Paramedic III Laboratory

This course presents paramedic psychomotor skills from the US DOT, National highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Education Standards Paramedic curriculum. This is a laboratory course and will involve hands-on skills with manikins and other teaching tools. The student must be able to physically kneel, lift other persons to place them on a stretcher, and direct patient care. The laboratory will use training sessions and will progress to patient emergency scenarios in which the student will direct patient care. Laboratory skills must be mastered prior to the student entering any field or clinical externship.
Prerequisites: EMS2672
Corequisites: EMS2673 and EMS2692
Credit Hours: 3

EMS2692 Paramedic III Externship

This course continues Paramedic psychomotor skills related to patient assessment and management in the clinical setting. Skills that have been practiced in the laboratory setting, and in which students have obtained competence, will be practiced in a clinical setting under the direct supervision of an instructor or preceptor in both pre-hospital and in-hospital settings. The student will progress from initially observing (in Paramedic I) to serving as a team leader (in Paramedic V) directing patient care. Emphasis is on safety of the care providers, safety of the patient,

and observing all parameters of paramedic patient care including patient confidentiality. Laboratory skills must be mastered prior to the student entering any field or clinical externship.
Prerequisites: EMS2672
Corequisites: EMS2673 and EMS2092L
Credit Hours: 4

EMS2674 Paramedic IV

This course consists of US DOT, National Highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Educations Standards Paramedic curriculum. The areas covered are Preparatory: Medical/Legal and Ethics, EMS Systems; Life Span Development; Public Health; EMS Operations:
Principles of Safely Operating a Ground Ambulance, Air Medical, Terrorism and Disaster. This is an interactive course that coincides with lecture, skills laboratory, and an externship program.
Prerequisites: EMS2673, EMS2692, and EMS2092L
Corequisites: EMS2093L and EMS2693
Credit Hours: 4

EMS2093L Paramedic IV Laboratory

This course presents paramedic psychomotor skills from the US DOT, National highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Education Standards Paramedic curriculum. This is a laboratory course and will involve hands-on skills with manikins and other teaching tools. The student must be able to physically kneel, lift other persons to place them on a stretcher, and direct patient care. The laboratory will use training sessions and will progress to patient emergency scenarios in which the student will direct patient care. Laboratory skills must be mastered prior to the student entering any field or clinical externship.
Prerequisites: EMS2673
Corequisites: EMS2674 and EMS2693
Credit Hours: 3

EMS2693 Paramedic IV Externship

This course continues Paramedic psychomotor skills related to patient assessment and management in the clinical setting. Skills that have been practiced in the laboratory setting, and in which students have obtained competence, will be practiced in a clinical setting under the direct supervision of an instructor or preceptor in both pre-hospital and in-hospital settings. The student will progress from initially observing (in Paramedic I) to serving as a team leader (in Paramedic V) directing patient care. Emphasis is on safety of the care providers, safety of the patient, and observing all parameters of paramedic patient care including patient confidentiality. Laboratory skills must be mastered prior to the student entering any field or clinical externship.
Prerequisites: EMS2673
Corequisites: EMS2674 and EMS2093L
Credit Hours: 4

EMS2675 Paramedic V

This is the capstone course for the Paramedic portion of the program. Students will complete certification or recertification courses in BLS, ACLS, and PALS. Additional certifications such as PHTLS, NALS etc. may be offered. The final weeks of the course will be a National Registry EMT-P exam preparation and review. This is an interactive course that coincides with lecture, skills laboratory, and an externship program.
Prerequisites: EMS2674, EMS2693, and EMS2093L
Corequisites: EMS2094L and EMS2694
Credit Hours: 3

EMS2094L Paramedic V Laboratory

This course presents paramedic psychomotor skills from the US DOT, National highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Education Standards Paramedic curriculum. This is a laboratory course and will involve hands-on skills with manikins and other teaching tools. The student must be able to physically kneel, lift other persons to place them on a stretcher, and direct patient care. The laboratory will use training sessions and will progress to patient emergency scenarios in which the student will direct patient care. Laboratory skills must be mastered prior to the student entering any field or clinical externship.
Prerequisites: EMS2674
Corequisites: EMS2675 and EMS2694
Credit Hours: 3

EMS2694 Paramedic V Externship

This course completes the Paramedic psychomotor skills related to patient assessment and management in the clinical setting. It is a capstone course where students will be spending their field experiences as team leads. Emphasis is on safety of the care providers, safety of the patient, and observing all parameters of paramedic patient care including patient confidentiality. Laboratory skills must be mastered prior to the student entering any field or clinical externship.
Prerequisites: EMS2674
Corequisites: EMS2675 and EMS2094L

Credit Hours: 4

English Composition (EN or ENC)

Credit Hours: 4

ENC1100 College English

This course provides a review of English grammar, mechanics, and paragraph development. The parts of speech are applied to the written communication process. Additional readings are included to highlight elements of composition.
Prerequisites: None
Credit Hours: 4
💻Offered Online

ENC1101 Composition I

In this course, paragraph development leading to the standard 5-part essay is introduced as students achieve clear and effective writing skills. Topics discussed include grammatical instruction, the writing process, and various essay modes.
Prerequisites: ENC1100 or ENC1201
Credit Hours: 4
💻Offered Online

ENC1102 Composition II

The principles of composition are studied and applied. Students obtain experience in expository writing. Methods of research and proper documentation are introduced for the preparation of reports and term papers.
Prerequisites: ENC1101
Credit Hours: 4
💻Offered Online

ENC1201 Business English

This course concentrates on proper English usage for business correspondence. Business terminology, common punctuation errors, English usage, and format will be discussed. At the end of this course, the student will be able to compose effective business correspondence including memos, letters, and short reports. Special consideration is placed on purpose, scope, and audience analysis and adaptation.
Prerequisites: None
Credit Hours: 4
💻Offered Online

ENC4263 Writing for Management

Students learn to communicate more effectively in writing in a wide range of technical and professional situations. Students will examine the variables at work in all writing tasks-writer, reader, information, purpose, and context-and discuss how understanding of these variables works in creating written messages with an appropriate format, tone, and level of detail. Secondary objectives include learning how to respond effectively to and edit documents produced by others.
Prerequisites: ENC1100
Credit Hours: 4
💻Offered Online

Environmental Studies (EVR)

EVR1001 Living in the Environment

This course examines current environmental concerns and their management. It integrates and correlates the features of the natural environment with human activities. Topics include basic ecology, population growth, world health and hunger, energy resources, pollution, environmental regulations and, and Global Climate Change. It explores distribution and abundance of renewable and non-renewable resources, and emphasizes an understanding of environmental problems and their impact on people and society.
Prerequisites: None
Credit Hours: 4
💻Offered Online

Finance (FIN)

Fin3400 Corporate finance

This course reviews the techniques corporations use to access a firm's financial health, evaluate, and plan its future development, and make decisions that enhance its chances of survival and success.

Prerequisites: ECO1000
Credit Hours: 4
💻Offered Online

General Business (GEB)

GEB1011 Business Principles

An overview of the American business system is presented in order to help the student understand the interrelationships among the functional areas of business organization, management, personnel, finance, data processing, marketing, and production. Forms of business ownership, governmental influences, and ethical responsibilities of those in business are also reviewed.
Prerequisites: None
Credit Hours: 4
💻Offered Online

GEB2941 Industry Practicum

This course is a practical application course through which students work in an industry setting for a minimum of 90 hours, acquiring exposure to and experience in the area of business or industry for which they are preparing.
Prerequisites: Approval of the Program Chair
Credit Hours: 3

GEB3444 Business TRENDS AND ISSUES

This course is designed to give students a view of the current issues that are being discussed in the business world. Students will be talking and learning about many hot-button issues in business, in addition to learning the importance of keeping up-to-date on information in their field of study. It is a bridge for students who are not already involved in business as part of their academic career to receive a great deal of information on the current environment in business.

Prerequisites: Junior standing
Credit Hours: 4

Geography (GEA)

GEA1000 Geography

The study of the earth and its features, and of the distribution of life on the earth, including human life and the effects of human activity are discussed.
Prerequisites: None
Credit Hours: 4
💻Offered Online

GEA4191 World Environments

This course will provide a survey of physical, economic, political, and social systems that give unique character to the relationships among world regions. Through analysis of nine world regions and the countries in each, political, demographic, economic, cultural, and environmental themes will be considered in their geographic context. The course is organized to emphasize the comparisons among world regions and the interdependent relationships that are increasing through globalization.
Prerequisites: ENC1100
Credit Hours: 4
💻Offered Online

Health Care Administration (HSA)

HSA1100 Basics of the US Health Care System

This course provides students with a broad, fundamental introduction to the workings of the US Healthcare industry, including the economic, social, political, and technological forces that shape the industry. The role
of state and federal government and regulatory agencies in healthcare delivery is examined.
Prerequisites: None
Credit Hours: 4
💻Offered Online

HSA3160 Health Care Marketing

This course is an introduction to marketing concepts and how they are applied in the health care industry. Students will develop and apply strategies for management and marketing of health care services.
Prerequisites: HSA1100
Credit Hours: 4
💻Offered Online

HSA3173 Health Care Accounting

This course serves as an introduction to financial accounting in the health care industry.
Prerequisites: APA1111

Credit Hours: 4
💻Offered Online

HSA3180 Health Care Management and Leadership

This course is an in-depth examination of the application of management and organizational theory and concepts in health care institutions.
Prerequisite: MAN4151 and HSA1100
Credit Hours: 4
💻Offered Online

HSA4140 Health Care Strategy

This course is a study of the organizational functions of health care facilities. Students will explore strategic planning and management within the unique context of organizations concerned with the delivery and financing of Health Care.
Prerequisites: Final Term
Corequisites: HSA4850 (CAPSTONE)
Credit Hours: 4
💻Offered Online

HSA4170 Health Care Finance

This course focuses on financial management knowledge and an understanding of healthcare finance as it relates to health care organizations inclusive of hospitals, long term care facilities and home health agencies.
Prerequisites: HSA3173
Credit Hours: 4
💻Offered Online

HSA4191 Health Information Systems Management

This course serves to train students in effective planning, design, management, execution, and use of various information system resources. Students will learn how to plan strategically and build the appropriate health management information technology infrastructure and understand implementation challenges to transform the way information is used and shared within and outside healthcare organizations.
Prerequisites: HSA3180
Credit Hours: 4
💻Offered Online

HSA4423 Health Care Law

This course serves as an overview of health care law. Students will focus on legal issues that affect health care organizations. Topics include presentation of the legal responsibilities and constraints of health administration, nursing, and allied health practice at all levels. There will be an emphasis on health licensure, privileged communication, risk management and contemporary legal issues in health care administration.
Prerequisites: MNA1100
Credit Hours: 4
💻Offered Online

HSA4502 Risk Management and Patient Safety

This course provides students with basic knowledge in the implementation of quality improvement, risk management and organizational activities and responsibilities related to quality improvement in health care delivery systems. The course examines the issues of claims management, risk financing and proactive loss control; and the integration between risk management and patient safety functions.
Prerequisites: HSA3180
Credit Hours: 4
💻Offered Online

HSA4850 Health care administration capstone

In this course students will use (a) directed research, (b) client interviews, and (c) observations to construct a thesis/term paper on a selected approved topic within health care. Students must demonstrate a thorough understanding and synthesis of the ethical, legal, social, political, socio-economic, and business issues which impact health care and health care organizations within the United States. This thesis may be (1) based on a case study of an organization and must address a specific issue, or (2) a research paper on a specific health care issue with recommendations on causes and solutions to the defined research problem.

Prerequisites: All Health Care core classes
Corequisites: HSA4140
Credit Hours: 4
💻Offered Online

Health Sciences/Resources (HSC)

HSC1000 Orientation to the Health Sciences

This course provides information needed to build a foundation to those students pursuing a career in a health, medical or science related field. Topics include medical terminology, basic anatomy and physiology, disease prevention and health promotion, cultural diversity, leadership, and ethical responsibilities of healthcare workers. This course also introduces the student to medical math, infection control and OSHA Bloodborne Pathogens standards.
Prerequisites: None
Credit Hours: 4

HSC1403C Medical Emergencies

This course is designed to prepare the student to handle emergency situations and procedures. In addition, students will take an American Heart Association BLS provider course.
Prerequisites: None
Credit Hours: 2

HSC1531 Medical Terminology

This course is designed to instruct students in basic principles of medical word building. The interrelationships of body structures and functions including their related terminology are stressed.
Prerequisites: None
Credit Hours: 4
💻Offered Online

HSC2149 Pharmacology

This survey of drug classifications and calculations provides the student with an overview of how prescription drugs are administered to patients. In addition to learning general guidelines, students will be exposed to confidentiality issues and ethical considerations as they relate to administration and the use of prescription drugs.
Prerequisites: HSC1531 and BSC1093 or BSC1094 or MEA2203
Credit Hours: 4
💻Offered Online

HSC3032 Community Health

This course examines the application of epidemiological and community health concepts in health services management. Additionally, the concepts of community organization, program planning, minority health, health care, mental health, environmental health, drugs, safety, and occupational health are also discussed.
Prerequisites: None
Credit Hours: 4
💻Offered Online

HSC3661 Health Care Communication

This course focuses on health care communication and informatics. Students will analyze key health care issues with an emphasis on health care policies and initiatives that shape health care delivery. This course prepares students to contribute to health communication research, patient counseling, materials design, program management and community relations.
Prerequisites: None
Credit Hours: 4
💻Offered Online

Humanities (HUM)

HUM1020 Humanities

This course examines Eastern and Western humanities, focusing on arts and ideas, with the objective of creating a greater awareness of the world community. This course examines the various cultures of the Near East, Far East, and Africa relative to the Western tradition. The cultural and aesthetic perspectives in Western humanities is also examined, with the objective of facilitating the development of personal aesthetic sensibilities.
Prerequisites: ENC1100
Credit Hours: 4
💻Offered Online

Information Systems Management (ISM)

ISM4011 Management of Information Systems

This course introduces the students to Management Information Systems (MIS) and the appropriate use of MIS tools to gain a strategic and competitive advantage in the marketplace. As tomorrow's managers, entrepreneurs, or business specialists, the students need to know how to use and manage information technology in today's networked enterprises and global markets, such as the Internet, Intranet, and Extranet. In this dynamic environment, they will rely on interconnected networks of information systems for end user collaboration, including communications and computing among end user work groups and teams, and enterprise wide computing, including communications and information processing for business operations, managerial decision making, and strategic advantage.
Prerequisites: Senior Standing
Credit Hours: 4
💻Offered Online

Interdisciplinary Studies (IDS)

IDS2306 Contemporary American Issues

This course is designed to provide an interdisciplinary study of the major issues facing America. Topics include the environment, population, minorities, cities, crime poverty, drugs, religion, values, and foreign policy.
Prerequisites: None
Credit Hours: 4
💻Offered Online

IDS2350 Critical Thinking

This is a course in practical reasoning, designed to sharpen the student’s ability to analyze, evaluate, and construct arguments. There will be an appraisal of the evaluation of evidence, practice in the detection of fallacies and irrelevancies, and the testing of arguments for validity and reliability to understand how these approaches assist in decision-making. Included among these strategies will be examining assumptions, Socratic questioning, analyzing experiences, and evaluation perspectives. These strategies will be applied to a number of real life situations.
Prerequisites: None
Credit Hours: 4
💻Offered Online

IDS2901 Special Topics Directed Independent Study

This course is an open-enrollment special topics course used to cover special subject matters not presently offered. Subjects will vary based on discipline and are subject to Program Chair/Special Topics Advisor approval.
Prerequisites: Candidates must have completed a minimum of five quarters or 60 credits and must have the approval of the Program Chair.
Credit Hours: 1

IDS2902 Special Topics Directed Independent Study

This course is an open-enrollment special topics course used to cover special subject matters not presently offered. Subjects will vary based on discipline and are subject to Program Chair/Special Topics Advisor approval.
Prerequisites: Candidates must have completed a minimum of five quarters or 60 credits and must have the approval of the Program Chair.
Credit Hours: 2

IDS2903 Special Topics Directed Independent Study

This course is an open-enrollment special topics course used to cover special subject matters not presently offered. Subjects will vary based on discipline and are subject to Program Chair/Special Topics Advisor approval.
Prerequisites: Candidates must have completed a minimum of five quarters or 60 credits and must have the approval of the Program Chair.
Credit Hours: 3

IDS2904 Special Topics Directed Independent Study

This course is an open-enrollment special topics course used to cover special subject matters not presently offered. Subjects will vary based on discipline and are subject to Department Chair/Program Chair approval.
Prerequisites: Candidates must have completed a minimum of five quarters or 60 credits and must have the approval of the Program Chair.
Credit Hours: 4

IDS2940 Industry Practicum

This course is a practical application course through which students work in an industry setting for a minimum of 90 hours, acquiring exposure to, and experience in, the area of business or industry for which they are preparing.
Prerequisites: Approval from the Program Chair.
Credit Hours: 3

IDS4914 Research Methods

This course is designed to teach students qualitative and quantitative research methods of educational research. Students will learn to read research reports including experimental, descriptive, qualitative, and historical approaches. Students submit a research proposal as part of the course requirements.
Prerequisites: STA2014, ENC1101, and Senior Standing
Credit Hours: 4
💻Offered Online

IDS4940 Professional Practicum

This course is a practical application course through which students work in an industry setting for a minimum of 120 hours, acquiring exposure to, and experience in, the area of business or industry for which they are preparing.
Prerequisites: Student must complete ALL Major Core requirements. Approval from the Program Chair is required prior to registration.
Credit Hours: 4

Literature (LIT)

LIT2000 Introduction to Literature

This is a basic course in the appreciation of good literature, which is designed to help the student learn the elements, characteristics, and terminology necessary to study poetry, drama, and the short story. Students are required to keep an extensive reading journal and to write a research paper using analytical skills acquired in the course. A variety of films is used to illustrate various techniques employed by authors.
Prerequisites: None
Credit Hours: 4
💻Offered Online

Management (MAN)

MAN2021 Principles of Management

This course introduces students to the essential foundations of the supervisory/management experience. These include management schools of thought, the differences between supervision, management and leadership, effective communication, theories of motivation techniques and teamwork. The functions of management, including planning, organizing, staffing, leading, and controlling are also introduced.
Prerequisites: None
Credit Hours: 4
💻Offered Online

MAN2202 Organizational Theory

This course examines the responsibilities and skills of management within the organization. Topics covered include the role of human resources in development of the organization and the employee. Motivating techniques, organizational change, team building, and trends in current organizations will also be covered. Case studies will assist in the process.
Prerequisites: GEB1011 or MAN2021
Credit Hours: 4
💻Offered Online

MAN2942 Business Industry Practicum

This course is a practical application course through which students work in an industry setting for a minimum of 90 hours acquiring exposure to and experience in the area of business or industry for which they are preparing.
Prerequisites: GEB1011, MAN2021, and approval of the Program Chair
Credit Hours: 4

MAN3605 Cross Cultural Human Relations

This is a skill-based course, which focuses on the impact of culture on business relationships, including negotiations.
Prerequisites: Junior Standing
Credit Hours: 4
💻Offered Online

MAN4151 Organizational Behavior and Human Resource Development

This course studies the behavior, structure, and processes of organizations. Topics such as group inter-group behavior, teamwork, motivation, communication, cultural diversity, global cultural considerations, and reward systems are studied as it relates to human resource development and training.
Prerequisites: MAN2021 or MAN2202 or GEB3444 or MNA3037
Credit Hours: 4
💻Offered Online

MAN4504 Operations Management

This course will examine applications that range from high-tech manufacturing to high-tech service in a review of the traditional topics of the field. Students will learn that operations management is best done with significant cross-functional integration and requires a global perspective for many of the topics. Accounting, finance, marketing, human resources, management, purchasing, logistics, and engineering impact how firms are run operationally. An emphasis will be placed on services, globalization, and cross-functional integration.
Prerequisites: MAN2021
Credit Hours: 4
💻Offered Online

MAN4720 Business Policy and Strategy

A study of long term strategy and planning management as it relates to the decision making process. Strategic management is introduced as the set of decisions and actions that will result in the design and activation of strategies to achieve the objectives of an organization. Particular attention will be paid to independent development of corporate objectives and a concise mission statement for a company.
Prerequisites: SBM1000 or MAN2021 or GEB3444 or MNA3037, and Senior standing
Credit Hours: 4
💻Offered Online

Management-Applied (MNA)

MNA1100 Principles of Human Resources

This course is designed to familiarize students with employment laws including the Americans with Disabilities Act, the Equal Pay Act, Worker's Compensation, general provisions of OSHA, personnel practices, the hiring process, performance appraisal, employee rights and discipline, employee retention, and employee unions.
Prerequisites: None
Credit Hours: 4
💻Offered Online

MNA3037 Project Management and Planning

This class is a general introduction class in project management designed to give students an exposure in the general project management concepts. This course is meant to provide students with a framework on which to build project management knowledge that relates to their own specific subset of knowledge. The class will give students a platform on which to rest the knowledge that they gain throughout the rest of the program.
Prerequisites: Junior Standing
Credit Hours: 4
💻Offered Online

MNA3038 Project Estimation and Budgeting

The content of this class deals with two of the most important components of project management, the need for on-time and within budget completion. This class will familiarize students with these concepts and develop a set of skills that the students can use to ensure that these vital goals are attained. They will be able to work with limitations to achieve the goals of the project.
Prerequisites: Junior Standing
Credit Hours: 4
💻Offered Online

MNA3521 Quality Assurance and Evaluation

This course is designed to teach how aspects of the quality management framework apply to the conduct of a project as well as the product, process, or service developed as a result of the project. The class will give students the skills it takes to apply a quality philosophy and standard to the projects in which they will be involved. The course will also start to prepare students for the rigorous standards of customer service, both internal and external, that are expected in project management.
Prerequisites: Junior Standing
Credit Hours: 4
💻Offered Online

MNA4039 Project Risk Management

This course is designed to give insight into the problems that may arise in a project setting. This course will also give students the needed skills to identify risks and make preparations to diffuse and solve conflicts. This course will also allow students to become familiar in the preparation and skills used to diffuse risk in the project management setting.
Prerequisites: Junior Standing
Credit Hours: 4
💻Offered Online

MNA4574 Contracts and Procurement

This course will familiarize students with the cost side of project management. Students will be given a thorough overview of estimating project costs through discussion of contracts and procurement. Students will learn how to negotiate contracts for goods or services associated with projects as well as accurately identify and summarize the cost involved in a project. In addition there will be a focus on developing the skill necessary for students to be able to successfully negotiate a variety of aspects of a project such as resources, timing, scope, etc.
Prerequisites: Junior Standing
Credit Hours: 4
💻Offered Online

MNA4920 Project Management Seminar

To allow students to have a concrete first-hand experience in guiding a project from start to finish. The course is meant to deliver a real life project to students with the help of community organizations and allow students to participate in all aspects of the project while gaining experience in the field of project management. The experience is meant to allow them to have some exposure through real experience to the field in which they are to receive their degrees. As a capstone course, this class will provide a key assessment of the students' preparedness to apply their skills in a real world situation.
Prerequisites: Junior Standing
Credit Hours: 4
💻Offered Online

Marketing (MAR)

MAR1011 Principles of Marketing

The fundamental concepts of marketing principles and their functions are examined. Marketing dynamics and strategic planning are explored in the marketing environment.
Prerequisites: None
Credit Hours: 4
💻Offered Online

MAR2141 International Business

This course explains the fundamentals of international business in the challenging global environment. It explores and analyzes trade, investment, cultural and legal forces of international markets.
Prerequisites: GEB1011 or MAR1011
Credit Hours: 4

MAR2405 Principles of Sales

Presented in this course are the basic principles and techniques of selling. Emphasis is placed on effective presentations and communication skills. Selling is studied as a marketing process in retail and industrial markets.
Prerequisites: None
Credit Hours: 4

MAR3414 Sales Strategies

A study of various aspects of the salesperson's job, including fundamental sales skills, the buying process, principles of communicating effectively, adapting to the needs and unique styles of each customer, prospecting, planning, discovering needs, using visual aids, conducting effective demonstrations, responding to objections, obtaining commitment, and providing after-sale service. Students in this course should learn sales strategies and principles of selling so that they will have enough self-confidence to begin making calls if provided with no additional training by their employers.
Prerequisites: MAR1011 or MAR2405 or MAN2021
Credit Hours: 4
💻Offered Online

MAR4156 Global Marketing

An overview of the essential issues and the unique considerations confronting the marketing decision-makers in a global environment. The study will include comparative advantages, disadvantages, the interdependence of global marketing, and the importance of global research and market perceptions. Special attention will be directed toward the issues and differences confronting a domestic company wishing to do business in another country.
Prerequisites: ADV1002 or MAR1011
Credit Hours: 4
💻Offered Online

MAR4333 Integrated Advertising

An in-depth review of the shift from the conventional methods of advertising to the more widely recognized approach of implementing an integrated marketing communications strategy (IMC). This course conveys that one must recognize how a firm uses all of the promotional tools available to deliver a unified message to the consumer. The IMC perspective represents one of the most influential changes in business practices for the 21st century.
Prerequisites: MAR1011 or ADV1002
Credit Hours: 4
💻Offered Online

MAR4503 Consumer Behavior

This course examines cultural, social, and individual variables and how they are incorporated into buyer decisions processes and marketing practices.
Prerequisites: MAR1011
Credit Hours: 4
💻Offered Online

MAR4403 Sales Management

A study of various aspects of the sales manager's job, including fundamental sales skills, management skills, and the ability to train, lead, inspire and supervise salespeople. Students in this course should learn sales forecasting, public relations, advertising, sales promotions, planning, motivation, and what is needed to effectively and successfully manage and lead a sales team.
Prerequisites: MAN2021 or MAR3414
Credit Hours: 4

Mathematics (MAT)

MAT1030 College Algebra

This course provides the student with an opportunity to experience Algebra as a process that enhances logical thinking and a discipline that has real world applications. Skills such as operations with Real Numbers, Linear Equations and Inequalities, Polynomials, Exponents, Quadratic Equations, Roots, Radicals, and Cross Multiplication of algebraic expressions are practiced.
Prerequisites: None
Credit Hours: 4
💻Offered Online

Mathematics - General and Finite (MGF)

MGF1106 Topics in College Mathematics

Through a unique problem-solving approach, this course provides an insight into what mathematics is and what it accomplishes. Topics include logic, estimation, numeration systems, number theory, algebra, functions and graphs, geometry mathematical systems, probability, and statistics.
Prerequisites: None
Credit Hours: 4
💻Offered Online

Mathematics - Technical and Business (MTB)

MTB1103 Business Math

This course provides a review of the basic applications of mathematics relating to such calculations as bank and sales records, interest, promissory notes and interest variables, percentages, commission, cash and trade discounts, markup, and other typical business calculations.
Prerequisites: None
Credit Hours: 4
💻Offered Online

MTB1344 Algebra and Trigonometry

This course is the study of the concepts and practice of algebra and trigonometry skills. Factoring, algebraic fractions, logarithmic and exponential equations, vectoring, and graphing functions are practiced.
Prerequisites: None
Credit Hours: 4

MTB2324 Calculus I

This course is designed to provide the students with the concepts of limits and differential and integral calculus in the context of practical problems.
Prerequisites: MTB1344
Credit Hours: 4

Medical Assisting Technology (MEA)

MEA1226C Examining Room Procedures

This course introduces the student to medical office procedures. Included are studies of general pharmacology, vital signs, electrocardiography, patient examination preparation and procedures, identification and care of instruments and equipment, asepsis, sterilization, and radiology.
Prerequisites: HSC1531 and BSC1093 or BSC1094 or MEA2203
Credit Hours: 4

MEA1245C Phlebotomy Procedures

This course provides students with an opportunity to learn principles of sterile and aseptic technique, criteria for selection of site for fingerstick and/or phlebotomy withdrawal techniques. Emphasis is placed on the proper handling and processing of laboratory specimens. This course includes four hours of AIDS/HIV training.
Prerequisites: HSC1531
Credit Hours: 4

MEA1346C Computerized Medical Office Management

This course introduces the student to computerized medical office management using a current industry standard application such as Medisoft or Medical Manager. The student will learn how to set up support files and maintain patient information. The course includes instruction in accounting, communications, insurance claims processing, practice management, office management, appointments, clinical histories, billing, and report generating.
Prerequisites: CGS1100C
Credit Hours: 4

MEA2203 Pathophysiology

This course is a study of the diseases and disorders of the human body, including signs and symptoms, physical manifestations, anatomical abnormalities, etiology, diagnosis, and treatment.
Prerequisites: None
Credit Hours: 4

MEA2235 Medical Law and Ethics

This is a study of the interrelationship of law and medicine. Emphasis is placed on law of torts, administrative agencies, and consumer protection, as well as classes of contracts, breach of contract and remedies available under the law. Special emphasis is placed on ethics for a health care delivery team member. This course includes four hours of AIDS/HIV Awareness Training and two hours of HIPAA Training.
Prerequisites: None
Credit Hours: 4
💻Offered Online

MEA2257C Basic X-Ray Machine Operation

This course is a combination of lecture and demonstration of the use of radiographic equipment as related to patient care.
Prerequisites: None
Credit Hours: 4

MEA2260C Clinical Laboratory Procedures

This course introduces the techniques for performing routine laboratory tests. These include physical, chemical, and microscopic examinations of urine and urine test interpretation; techniques for obtaining blood samples for hemoglobin, hematocrits, and differential counts from blood smears; agglutination and coagulation tests for pregnancy; and other common conditions tested in the physician's office. This course includes four hours of AIDS/HIV training.
Prerequisites: HSC1531 and BSC1093 or BSC1094 or MEA2203
Credit Hours: 4

MEA2803 Medical Assisting Externship

The student applies skills obtained through classroom and laboratory instruction to actual work situations. Medical Assistant students are placed with a physician's office or other suitable facility to provide a broad training experience and on-the-job performance evaluation. The student is required to complete a minimum of 160 hours externship and 10 hours of classroom lecture.
Prerequisites: Completion of all Medical Assisting core courses and approval of the Program Chair/Director of Health Sciences Education.

Credit Hours: 6

Nutrition (HUN)

HUN1206 Nutrition

This course introduces the student to the basic fundamentals of nutrition, including the micro and macronutrients found in food and how the body processes them. The relationship between diet and health is also discussed. Students will learn principles of planning a balanced diet and how to make healthier food choices.
Prerequisites: None
Credit Hours: 4
💻Offered Online

Philosophy (PHI)

PHI2014 Introduction to Philosophy

This course is designed as an introduction for students having no previous college work in comparative belief systems with the focus being the perennial issues of human existence. The fundamental assumptions, terminology, and schools of thought used to address issues in metaphysics, epistemology, ethics, and aesthetics will be examined. Major philosophical problems will be explored with emphasis placed on establishing relevance to personal philosophy.
Prerequisites: None
Credit Hours: 4
💻Offered Online

PHI4609 Ethics

Students will become familiar with the philosophy of ethics and moral theology. Emphasis will be on applying moral theory to practical moral questions of the twentieth century.
Prerequisites: None
Credit Hours: 4
💻Offered Online

Physics (PHY)

PHY1020 Physics

This course is designed to introduce the student to the laws, fundamental principles, and problem solving methods of modern physics. This course will deal with the basic concepts that surround us in the physical world such as, mechanics, electromagnetism, waves, sound, light and astronomy.
Prerequisites: None
Credit Hours: 4
💻Offered Online

Political Science (POS)

POS1041 American National Government

This course is designed to provide a comprehensive examination of the American political system. Through this course, students will become familiar with the theory, organization, principles, and functions of the American national government and various elements within the political system that work to shape policy outcomes.
Prerequisites: None
Credit Hours: 4
💻Offered Online

Psychology (PSY)

PSY1012 Principles of Psychology

This course is an introduction to the field of psychology as the scientific study of the behavior of man. Specialized terminology in the field of psychology is introduced. Topics studied include the principles of behavior, the scientific method in psychology, perception, learning, thinking and problem solving techniques.
Prerequisites: None
Credit Hours: 4
💻Offered Online

HUS2520 Abnormal Psychology

This course is an introduction to the etiology, treatment, and prevention of abnormal behavior. Specialized terminology in the field of abnormal psychology is introduced. Topics studied include the use of DSM as a diagnostic tool. The impact of mental illness on the family is stressed.

Students will study symptoms of schizophrenia, bipolar disorder, and other forms of psychopathology. Emphasis is placed on community resources, medications, stressors, risk, recognizing decompensation signs, when to seek professional help and effective ways of communicating with a person who has mental illness.
Prerequisites: DEP2004 or PSY1012
Credit Hours: 4

Radiologic Technology (RT)

RT1100 Fundamentals of Radiologic Sciences

A course of study designed to provide an overview of the foundations in radiography and the practitioner's role in the health care delivery system. Principles, practices, and policies of the health care organization are examined and discussed, in addition to the professional responsibilities of the radiographer.
Prerequisites: None
Credit Hours: 1
💻Offered Online

RT1130 Introduction to Principles of Radiographic Exposure

This introductory course provides students with the basic knowledge of atomic structure, electricity, and electromagnetism. The foundations for radiation-producing equipment; the production of radiation; radiation safety; and radiation interaction with matter will be established.
Prerequisites: None
Credit Hours: 4

RT1140 Patient Care I

This course is the first in a two-part series that equips students with the knowledge to care for patients in the healthcare setting. Students will learn how to deliver care safely and effectively to a diverse patient population.
Prerequisites: None
Credit Hours: 2
💻Offered Online

RT1150 Radiographic Procedures I

This course is the first of four that reviews anatomy, patient positioning, and projections of essential radiography procedures. Students are concurrently enrolled in Image Analysis and Laboratory courses that correspond with the Procedures course.
Prerequisites: None
Credit Hours: 2
💻Offered Online

RT1150L Radiographic Procedures I Lab

Utilizing the non-energized laboratories, students are instructed on how to perform essential procedures. Student practice and subsequent procedure testing are included in this course.
Prerequisites: None
Credit Hours: 1

RT1160 Image Analysis I

This course prepares students to evaluate radiographic images to ensure quality assurance standards are met. Image analysis guidelines, including characteristics of optimal images; image display; and terminology will be discussed.
Prerequisites: None
Credit Hours: 1

RT1190 Introduction to Clinical Education

Content and clinical educational experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize, and evaluate concepts and theories in the performance of radiologic procedures. The first portion of the course is designed to provide the student an introduction to patient care and clinical practices; radiation safety; clinical policies and procedures; and an overview of clinical progression required to complete the program. The remaining portion of the course will enable the student to utilize didactic concepts in the clinical setting. Through structured, sequential, competency-based clinical assignments, concepts of team practice; patient care and assessment; professional development; and competent performance of radiologic imaging and total quality management are discussed, examined, and evaluated.
Prerequisites: None
Credit Hours: 3

RT1240 Patient Care II

This course is designed to provide the advanced concepts of patient care. Trauma, mobile and surgical radiography are described. Basic concepts of pharmacology are discussed. The theory and practice of basic techniques of venipuncture and administration of diagnostic contrast agents and/or intravenous medications is included. The appropriate delivery of patient care during these procedures is emphasized.
Prerequisites: RT1140
Credit Hours: 2
💻Offered Online

RT1250 Radiographic Procedures II

This course is the second of four that reviews anatomy, patient positioning, and projections of essential radiography procedures. Students are concurrently enrolled in Image Analysis and Laboratory courses that correspond with the Procedures course.
Prerequisites: RT1150
Credit Hours: 2
💻Offered Online

RT1250L Radiographic Procedures II Lab

Utilizing the non-energized laboratories, students are provided the instruction to perform essential procedures. Student practice and subsequent procedure testing are included in this course.
Prerequisites: RT1150L
Credit Hours: 1

RT1260 Image Analysis II

This course prepares students to evaluate radiographic images to ensure quality assurance standards are met. Image analysis guidelines, including characteristics of optimal images; image display; and terminology will be discussed.
Prerequisites: None
Credit Hours: 1

RT1290 Clinical Education I

Content and clinical educational experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize, and evaluate concepts and theories in the performance of radiologic procedures. Students will utilize didactic concepts in the clinical setting. Through structured, sequential, competency-based clinical assignments, concepts of team practice; patient care and assessment; professional development; and competent performance of radiologic imaging and total quality management are discussed, examined, and evaluated
Prerequisites: RT1150L and RT1250L
Credit Hours: 4

RT1330 Principles of Radiographic Exposure I

This course establishes the foundation of image production, quality, and equipment. Concepts of radiation safety and protection are reinforced.
Prerequisites: RT1130
Credit Hours: 4

RT1350 Radiographic Procedures III

This course is the third of seven that reviews anatomy, patient positioning, and projections of essential radiography procedures. This is a course of radiographic positions building on the basic procedures learned in RT1150 and RT1250.
Prerequisites: RT1250
Credit Hours: 1

RT1350L Radiographic Procedures III Lab

Utilizing the non-energized laboratories, students are provided the instruction to perform essential procedures. Student practice and subsequent procedure testing are included in this course.
Prerequisites: RT1250L
Credit Hours: 1

RT1360 Image Analysis III

This course is designed to provide additional instruction when analyzing advanced radiographic images. Students will be able to determine if a radiograph has an adequate level of contrast and density, and what factors to adjust if a radiograph is inadequately exposed. The processes for properly evaluating radiographic images with a higher degree of critical thinking will be taught. Actual images will be used for demonstration and analysis.
Prerequisites: RT1260
Credit Hours: 1

RT1390 Clinical Education II

Content and clinical educational experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize, and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential, competency-based clinical assignments concepts of team practice, patient care and assessment, professional development, and competent performance of radiologic imaging and total quality management are discussed, examined, and evaluated.
Prerequisites: RT1250L
Credit Hours: 4

RT1450 Radiographic Procedures IV

This course is the fourth of seven that reviews anatomy, patient positioning, and projections of essential radiography procedures. Students are concurrently enrolled in Image Analysis and Laboratory courses that correspond with the Procedures course.
Prerequisites: RT1350
Credit Hours: 2

RT1450L Radiographic Procedures IV Lab

Utilizing the non-energized laboratories, students are provided the instruction to perform advanced imaging procedures. Student practice and subsequent procedure testing are included in this course.
Prerequisites: RT1350L
Credit Hours: 1

RT1460 Image Analysis IV

This course prepares students to evaluate radiographic images to ensure quality assurance standards are met. Image analysis guidelines, including characteristics of optimal images; image display; and terminology will be discussed.
Prerequisites: RT1360
Credit Hours: 1

RT1490 Clinical Education III

Content and clinical educational experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize, and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential, competency-based clinical assignments concepts of team practice, patient care and assessment, professional development, and competent performance of radiologic imaging and total quality management are discussed, examined, and evaluated.
Prerequisites: RT1350L
Credit Hours: 6

RT1510 Special Procedures

This course is designed to concentrate on the advanced studies performed in the radiology department, such as procedures of the urinary and digestive systems, and those performed in the interventional suite. Students will learn about injection instrumentation, as well as contrast indications and safety.
Prerequisites: None
Credit Hours: 1

RT1520 Radiographic Pathology

Course is designed to introduce concepts related to disease and etiological consideration with emphasis on radiologic appearance of disease and impact on exposure factor selection. It also presents basic information on the pathologic process; signs and symptoms; and diagnosis and prognosis of various diseases.
Prerequisites: None
Credit Hours: 2

RT1550 Radiographic Procedures V

This course is the fifth of seven that reviews anatomy, patient positioning, and projections of essential radiography procedures. Students are concurrently enrolled in Image Analysis and Laboratory courses that correspond with the Procedures course.
Prerequisites: RT1450
Credit Hours: 2

RT1550L Radiographic Procedures V Lab

Utilizing the non-energized laboratories, students are provided the instruction to perform advanced imaging procedures. Student practice and subsequent procedure testing are included in this course.
Prerequisites: RT1450L
Credit Hours: 1

RT1560 Image Analysis V

This course prepares students to evaluate radiographic images to ensure quality assurance standards are met. Image analysis guidelines, including characteristics of optimal images; image display; and terminology will be discussed.
Prerequisites: RT1460
Credit Hours: 1

RT1590 Clinical Education IV

Content and clinical educational experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize, and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential, competency-based clinical assignments concepts of team practice, patient care and assessment, professional development, and competent performance of radiologic imaging and total quality management are discussed, examined, and evaluated.
Prerequisites: RT1450L
Credit Hours: 6

RT1610 Advanced Imaging Modalities

This is a specialized course of study designed to enhance knowledge of radiologic imaging by introducing the student to advanced imaging modalities. Modalities that can be pursued as post- primary pathways will be discussed. Additionally, career opportunities and salaries will be explored.
Prerequisites: None
Credit Hours: 1

RT1630 Principles of Radiographic Exposure II

Content imparts an understanding of the components, principles and operation of computed radiography and digital imaging systems found in diagnostic radiology. Image acquisition, display, archiving, and retrieval are discussed. Principles of digital system quality assurance and maintenance are presented. Students will learn advanced concepts in digital imaging acquisition to enable them to apply those concepts in clinic.
Prerequisites: RT1330
Credit Hours: 4

RT1650 Radiographic Procedures VI

This course is the sixth of seven that reviews anatomy, patient positioning, and projections of essential radiography procedures. Students are concurrently enrolled in Image Analysis and Laboratory courses that correspond with the Procedures course.
Prerequisites: RT1550
Credit Hours: 2

RT1650L Radiographic Procedures VI Lab

Utilizing the non-energized laboratories, students are provided the instruction to perform advanced imaging procedures. Student practice and subsequent procedure testing are included in this course.
Prerequisites: RT1550L
Credit Hours: 1

RT1660 Image Analysis VI

This course prepares students to evaluate radiographic images to ensure quality assurance standards are met. Image analysis guidelines, including characteristics of optimal images; image display; and terminology will be discussed.
Prerequisites: RT1560
Credit Hours: 1

RT1690 Clinical Education V

Content and clinical educational experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize, and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential, competency-based clinical assignments concepts of team practice, patient care and assessment, professional development, and competent performance of radiologic imaging and total quality management are discussed, examined, and evaluated.
Prerequisites: RT1550L
Credit Hours: 6

RT1710 Mammography

This is a specialized course of study detailing the radiographic examination of the breasts and related positioning and pathology. This course will provide both a historical view of mammography, including breast anatomy and physiology, positioning, compression, technique selection, patient education, quality control, and advanced imaging, including implants and studies related to breast pathology and specialized views. The student will learn quality control, optimal functioning of dedicated mammography equipment including stereotactic needle biopsies and digital mammography.
Prerequisites: None

Credit Hours: 2

RT1711 Computed Tomography

Content provides entry-level radiography students with the principles related to computed tomography (CT) imaging
Prerequisites: None
Credit Hours: 2

RT1720 Radiation Biology and Advanced Protection

The Radiation Biology content of the course provides an overview of the principles of the interaction of radiation with living systems. Radiation effects on molecules, cells, tissues, and the body as a whole are presented. Factors affecting biological response are presented, including acute and chronic effects of radiation. The Advanced Protection content of the course is designed to present an overview of the principles of radiation protection, including the responsibilities of the radiographer for patients, personnel, and the public. Radiation health and safety requirements of federal and state regulatory agencies, accreditation agencies and healthcare organizations are incorporated.
Prerequisites: None
Credit Hours: 3

RT1750 Radiographic Procedures VII

This course is the seventh of seven that reviews anatomy, patient positioning, and projections of essential radiography procedures. Students are concurrently enrolled in Image Analysis and Laboratory courses that correspond with the Procedures course.
Prerequisites: RT1650
Credit Hours: 2

RT1750L Radiographic Procedures VII Lab

Utilizing the non-energized laboratories, students are instructed on how to perform essential procedures. Student practice and subsequent procedure testing are included in this course.
Prerequisites: RT1650L
Credit Hours: 1

RT1760 Image Analysis VII

This course prepares students to evaluate radiographic images to ensure quality assurance standards are met. Image analysis guidelines, including characteristics of optimal images; image display; and terminology will be discussed.
Prerequisites: RT1660
Credit Hours: 1

RT1780 Career Development

This course is designed to introduce the student to a comprehensive approach to career development & planning. Students will be exposed to useful self-marketing strategies, effective interviewing techniques and job searching skills necessary in today's job marketplace. Upcoming graduates will also be given an in-depth understanding of Human
Resources within the Healthcare/Medical field and apply trusted techniques to assist in their successful transition from education to employment.
Prerequisites: None
Credit Hours: 1
💻Offered Online

RT1790 Clinical Education VI

Content and clinical educational experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize, and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential, competency-based clinical assignments concepts of team practice, patient care and assessment, professional development, and competent performance of radiologic imaging and total quality management are discussed, examined, and evaluated.
Prerequisites: RT1650L
Credit Hours: 6

RT1800 Registry Review

This course is a comprehensive review of radiography. It is designed to be both a review and detailed guide, with questions and answers, for students preparing to successfully pass the Registry examination administered by the ARRT. All subject areas will be reviewed and test taking strategies discussed.
Prerequisites: RT1150, RT1250, RT1330, RT1350, RT1450, RT1550, RT1630, RT1650, RT1750
Credit Hours: 4

Small Business Management (SBM)

SBM1000 Small Business Management

A study of management concepts underlying the operation of a small business including: planning, operating, evaluating and controlling the enterprise. Fundamentals of financing, budgeting, marketing, promotion, and profit analysis are examined.
Prerequisites: GEB1011 or MAN2021
Credit Hours: 4
Offered Online

Sociology (SYG)

SYG2000 Sociology

This is an integrated survey of the fundamental sociological concepts of culture, forms of collective behavior, community and social organization, social interaction, and social change. Students write a research paper based on some facet of sociology presented in class.
Prerequisites: None
Credit Hours: 4
Offered Online

SYG2430 Marriage and the Family

This course will examine families in terms of structure, roles, and functions. Emphasis will be placed on understanding the family life cycle; change in motivation to marry, divorce, and remarriage; nontraditional relationships, parenting roles, and sex education.
Prerequisites: SYG2000
Credit Hours: 4

Sociology of Demography (SYD)

SYD4700 Race and Ethnic Relations

In this class, we will look at minority groups in the U.S. (racial, ethnic, cultural, and religious); discuss the relationship of minority status to socioeconomic and political stratification; compare U.S. ethnic social relations to that of minority groups in other societies and contexts; look at what anthropological and sociological theory tell us about the sociocultural processes of ethnic formation, maintenance, and interrelationship; try to understand ethnic prejudice and discrimination and their causes; and look in depth on how these "global" processes act out locally in our community
Prerequisites: None
Credit Hours: 4
Offered Online

Spanish (SPN)

SPN1120 Spanish

This course will emphasize communicative skills, listening, speaking, reading, and writing. Students will make oral presentations, read short texts, and write brief Spanish compositions. Basic grammar skills will be introduced.
Prerequisites: None
Credit Hours: 4

Speech Communication (SPC)

SPC1017 Oral Communication

This course is designed to equip the student with better speaking skills, whether in business, social, or civic life. The student will develop the ability to speak clearly and effectively; to think and express ideas effectively; and to plan, compose and deliver speeches of various kinds. Special consideration is placed on purpose, scope and audience analysis and adaptation.
Prerequisites: None
Credit Hours: 4

Statistics (STA)

STA2014 Statistics

This course examines the essential issues and methods used to employ statistical techniques. The unique considerations of describing, summarizing, and analyzing statistical data are presented.
Prerequisites: MTB1103 or MAT1030 or MGF1106 or MTB1344
Credit Hours: 4
Offered Online

Student Life Skills (SLS)

SLS1201 Personal Development

This course is designed to give students exposure to concepts and skills that can help the student make changes in their academic performance and their lives. These lessons are facilitated towards student issues, challenges while attending school and transitioning long-term career goals for success upon graduation.
Prerequisites: None
Credit Hours: 4
💻Offered Online

SLS2301 Professional Strategies

This course prepares each student for obtaining career positions through proven professional strategies. Resume writing, interviewing techniques, job lead researching, communication skills and career planning are studied in detail. The application of the principles taught in this innovative course provides invaluable tools for professional career planning.
Prerequisites: None
Credit Hours: 4
💻Offered Online

Surgical Technology (STS)

STS1021 Surgical Observation

This course provides the student with an opportunity to experience the clinical setting as a prelude to the didactic program. Students will spend time weekly within the operating room observing a wide variety of surgical procedures. Prior to the initial extern placement the students will receive training in CPR, HIPAA compliance, and patient confidentiality.
Prerequisites: None
Credit Hours: 1

STS1302 Introduction to Surgical Technology

This course focuses on the basic fundamentals of Surgical Technology by introducing students to the surgical arena. Key concepts include scope of practice, physical environment, hospital organization, standards of conduct, professionalism, interpersonal communication, and teamwork skills.
Prerequisites: None
Credit Hours: 4

STS1307C Operating Room Technique I - Instrumentation

This course will focus on the fundamental concepts of surgical technology in regards to instrumentation. This course focuses specifically on instrument classification, instrument names, instrument parts, instrument materials, instrument finishes and the uses of the instrumentation themselves. During the course the student will have the opportunity to learn the relationship between instrument type and usage. This course also focuses on the function, assembly, and care of specialty and accessory equipment used in a surgical setting. Finally, the course will review the various supplies used in the operating room.
Prerequisites: HSC1531
Credit Hours: 2

STS1304C Operating Room Technique II

This course will focus on the fundamental concepts of surgical technology. Topics covered will include equipment and supplies used during surgery, instrumentation, patient positioning, proper techniques for setting up a surgical case, and circulating the sterile field. Key concepts include surgical asepsis, consent, case selection, instrumentation, room preparation, preparation of the sterile field, performing the surgical count, and monitoring the sterile field. The student will also learn the importance of the consent and preference card.
Prerequisites: STS1307C
Credit Hours: 4

STS1340C Surgical Pharmacology and Aseptic Technique

This course focuses on the principles of asepsis and sterile technique, as well as the medications used in the surgical setting. Key concepts include surgical conscience, disinfection, sterilization, hemostasis, emergency situations, radiological and chemical injuries, biological warfare, basic principles of pharmacology as it relates the operating room and the fundamental principles of asepsis and the practice of sterile technique.
Prerequisites: STS1302 or HSC1531
Corequisites: STS1304C
Credit Hours: 4

STS2270 Clinical Aspects I

This course serves as the first of three externship experiences, with a focus on the integration of the theory and practical skills applied to the clinical setting. Students become familiarized with facilities, procedures, and practices of the working surgical environment. Students observe and

begin participating in a wide variety of surgical procedures. Students are expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures where the student scrubbed in. All scrubbed cases are applied towards the 120 documented cases required for successful completion of the program.
Prerequisites: STS2326 and STS1304C
Credit Hours: 8

STS2271 Clinical Aspects II

This course serves as the second of three externship experiences, with a focus on the integration of the theory and practical skills applied to the clinical setting. Students become familiarized with facilities, procedures, and practices of the working surgical environment. Students observe and begin participating in general, genitourinary, gynecologic, otorhinolaryngologic, ophthalmic, oral, and maxillofacial, plastic and reconstructive, neurologic, and orthopedic procedures. Students are expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures where the student scrubbed in. All scrubbed cases are applied towards the 120 documented cases required for successful completion of the program.
Prerequisites: STS2270
Credit Hours: 8

STS2272 Clinical Aspects III

This is the final of three externship experiences, with a focus on the integration of the theory and practical skills applied to the clinical setting. The student is expected to demonstrate the required skills of the surgical technology profession with little to no supervision. Students are expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures where the student scrubbed in. All scrubbed cases are applied towards the 120 documented cases required for successful completion of the program.
Prerequisites: STS2271
Credit Hours: 8

STS2325C Surgical Procedures I

This course introduces the student to the specific steps during basic, intermediate, and advanced surgical procedures. Topics covered will include anatomy, etiology and the disease processes necessitating surgical intervention in addition to the individual procedures. Key concepts include diagnostic examinations, wound healing, sutures, needles, and stapling devices, surgical procedures covering: general, obstetrics and gynecology, ophthalmic, otorhinolaryngologic, oral and maxillofacial, and genitourinary surgery. The student will gain a better understanding of relating the pathological disease to the course of surgical intervention.
Prerequisites: STS1302, HSC1531, BSC1085, BSC1086, BSC1085L, and BSC1086L
Credit Hours: 4

STS2326 Surgical Procedures II

This course will focus on the fundamental concepts of surgical technology. Topics covered will include floor plan design, the various support departments, equipment, and supplies used during surgery, instrumentation, patient positioning, proper techniques for setting up a surgical case, and circulating the sterile field. Key concepts include
surgical asepsis, consent, and case selection, instrumentation, and room preparation, preparation of the sterile field, performing the surgical count, and monitoring the sterile field. Students perform “mock surgery” and will demonstrate surgical procedure set ups for Orthopedic, Neuro, Plastic, Vascular, and Cardio-thoracic surgery.
Prerequisites: STS2325C
Credit Hours: 4

STS2936 Exam Prep

Upon completion of this course, the student shall be ready to attempt the national CST exam. This course will provide the student with the necessary review in order to give the best possibility of successfully attempting the national certifying exam. Materials covered will include a comprehensive review of all body systems, instrumentation, procedural methods, supplies, medications, as well a test-taking techniques.
Prerequisites: STS2271
Credit Hours: 1
