ACADEMIC CATALOG

2022/2023

This catalog is current as of the time of printing. The College reserves the right to make changes in course content, equipment, materials, organizational policy, tuition, and curriculum as circumstances dictate, after publication. The College expects its students to have knowledge of the information presented in this catalog and in other publications.

The College is in compliance with the following: Title IV (The Civil Rights Act), Title IX (Discrimination on the Basis of Sex), The Equal Credit Opportunity Act (Discrimination in Lending), and The Age Discrimination Act. City College admits students of any race, color, national and ethnic origin to all rights, privileges, programs, and activities generally accorded or made available to students at the institution. It does not discriminate on the basis of race, color, or national and ethnic origin in administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other institutionally administered programs.

About City College

Statement of Control

City College is an institution of higher learning owned by Allied Health Programs FL, LLC.

Board of Directors

Role	Name
Chairman	Yedidiah Langsam, PhD, AEMT-P
Board Member	Jerry Rozenberg, PA-C, EMT-P
Board Member	Sarah Bokow, BA, LPCSD
Board Member	Joseph Bove, MD, FACEP
Board Member	Josef Schenker, MD
Board Member	R. Esther Curry, BA
Board Member	Dennis Buchanan, JD, MBA, BSN

Accreditation

Accrediting Bureau of Health Education Schools (ABHES)

City College is institutionally accredited by the Accrediting Bureau of Health Education Schools (ABHES).

Accrediting Bureau of Health Education Schools (ABHES)

6116 Executive Blvd. Suite 730
North Bethesda, MD 20852
(301) 291-7550
www.abhes.org

The City College Associate of Science in Surgical Technology programs are programmatically accredited by the Accrediting Bureau of Health Education Schools (ABHES).

State License

City College is licensed by the Commission for Independent Education, Florida Department of Education, 325 W. Gaines Street, Suite 1414, Tallahassee, FL 32399-0400. Information regarding the College may be obtained by contacting the Executive Director, Commission for Independent Education, Department of Education, Tallahassee, Florida, (888) 224-6684.

U.S. Department of Homeland Security Authorization

The College is authorized by the U.S. Department of Homeland Security to accept and enroll non-immigrant students.

Veterans Administration Assistant Program

City College is approved by the Florida State Approving Agency (SAA) to train veterans and other eligible persons under the Veterans Administration Assistance Program.

In accordance with Title 38 US Code 3679 subsection (e), this college adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation & Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. The college will not:

- Prevent the student's enrollment.
- Assess a late penalty fee to the student.
- Require the student to secure alternative or additional funding.
- Deny the student access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

State Authorization Reciprocity Agreement ("NC-SARA")

City College is authorized under the State Authorization Reciprocity Agreement ("SARA"). Colleges and universities that are NC-SARA members may provide online education to residents of other NC-SARA member states.

Non-Discrimination Statement

City College admits students of any race, color, national and ethnic origin to all rights, privileges, programs, and activities generally accorded or made available to students at the institution. It does not discriminate on the basis of race, color, national and ethnic origin in administration of its educational policies, admission policies, scholarship and loan programs, and athletic and other institutionally administered programs.

History

City College was originally established in 1984 as Draughon's College of Business, a branch of Draughon's Junior College of Business founded in 1896 in Paducah, Kentucky. In May 1988, City College, Inc. established a branch campus in Gainesville, Florida. The College received approval from the State Board of Independent Colleges and Universities (SBICU) to offer Associate of Science degrees at the Fort Lauderdale campus in Fall 1989, and at the Gainesville campus in Fall 1991.

In June 1997, City College expanded its educational facilities to include a branch in Miami, Florida. In July 1999 the College received approval from SBICU to offer Bachelor of Science degrees. Quality education continues to be the goal of City College. "Your Job Tomorrow Is Our Job Today!" City College is committed to providing our students with an Extraordinary Educational Experience.

In August 2011, City College established a branch campus in Hollywood, Florida. The first students started October 3, 2011. Initial programs offered at the campus were Emergency Medical Services, Allied Health, and Business. The campus continues to grow and in 2014 two new programs were added, Veterinary Technology and Cardiovascular Sonography.

In March 2021, City College locations were purchased by Allied Health Programs FL, LLC and two new programs were added to the Hollywood location, associate degrees in Diagnostic Medical Sonography and Radiologic Technology.

On July 25, 2022, the Hollywood Campus was approved to be the Main Campus and the Ft. Lauderdale campus was closed.

Philosophy

City College is dedicated to the training and education of men and women for a full life and a successful career in a number of fields. The College offers its students a quality education in an atmosphere of personalized attention. City College considers the student as an individual and strive to be aware at all times of the needs of each member of its student body.

The College seeks to give students an understanding of and respect for their own and others' ideas and thoughts. Graduates of City College are imbued with the belief that they should understand and practice their responsibilities to family, individuals, and community by becoming effective and contributing citizens.

Mission

The mission of City College is to educate and train students in their chosen major for employment in specific career fields. The College awards Diplomas, Associate of Science, Associate of Applied Science, and Bachelor of Science degrees based on the student's successful completion of required coursework.

Goals and Objectives

The following goals are integral to the mission of the College:

- To maintain employer satisfaction within the community by providing professionally trained and educated graduates for industry, business, health care and government.
- To encourage students to realize the importance of reaching personal and professional goals through self-motivation, individual growth, and the pursuit of excellence.
- To prepare students for employment in specific career fields.
- To facilitate entry of graduates into their chosen careers.

- To offer sound educational programs at the Associate's and bachelor's degree levels.
- To continually evaluate and appraise every facet of the College's programs to ensure relevance to the needs of the employment community, effective preparation of students for success in career and compatibility with the College's standards.

Campuses

Hollywood - Main Campus

6565 Taft Street
Hollywood, Florida
(954) 744-1777

The College occupies approximately 16,500 square feet on the second and third floors of the building. Lecture classrooms and computer labs are available for all programs. Specialized labs are as follows:

Allied Health labs are equipped to simulate a professional environment. Students practice skills on practice arms, torsos, and other manikin equipment. Labs include an eye wash station, sharps container and biohazardous waste containers.

The Emergency Medical Services laboratory has an ambulance simulator, manikins, and equipment to allow for simulation of real-life scenarios.

Diagnostic Medical Sonography has an ultrasound laboratory with industry standard ultrasound machines.

Veterinary Technology labs reflect a veterinary facility. The students practice on both models and live animals. There is an x-ray machine, surgical room, and equipment to support basic surgical and non- surgical procedures.

Surgical Technology lab has a "sub-sterile" room where a bay sink is in place that emulates actual operating room equipment. Also in this room are instrumentation, supplies and other material that is used to simulate a real-world environment.

Gainesville - Non-Main Campus

2400 S.W. 13th Street
Gainesville, FL 32608
(352) 327-9210

The College occupies a building of approximately 21,500 square feet. Lecture classrooms and computer labs are available for all programs. Specialized labs are as follows:

Veterinary Technology lab occupies approximately 10,000 square feet and reflect a veterinary facility. The students practice on both models and live animals. There is an x-ray machine, surgical room, and equipment to support basic surgical and non- surgical procedures.

Transferability of Credit

City College provides a well-rounded education to students resulting in increased marketability in a specific career field. Most students come to City College to be trained in a specific profession that will enable them to enter the workforce upon graduation.

The College does not guarantee that credits earned at City College will transfer to another institution. Transferability of credits is always at the discretion of the evaluating institution. Many factors are reviewed in the evaluation of transfer credits. Policies on the similarity of programs, course content, credit or contact hours, and minimum academic standards may be set by each individual institution. Students interested in transferring credits to another institution should contact the transcript evaluator at that institution directly.

City College does participate in the Florida Statewide Course Numbering System. This common numbering system is used by all public postsecondary institutions in Florida and by twenty-six participating non-public institutions. The major purpose of this system is to facilitate the transfer of courses between participating institutions.

Admission Policies

City College welcomes applications from qualified applicants who desire an education that equips them with the skills to begin productive careers and become industry professionals. A "rolling admissions" policy governs most City College programs. Most programs commence quarterly.

Qualifications for Admissions

To be eligible for the programs offered by the City College an applicant must, at minimum:

- be at least 18 years of age
- be in good mental and physical health, free from any physical handicaps which would interfere with their work
- meet the "Technical Standards" for admission
- possess a high school diploma or high school equivalency diploma

Paramedic Diploma Program:

All applicants seeking admission into this Program are required to:

- be certified as a Florida EMT and,
- take and pass an additional section of the Entrance Exam (EMS Knowledge) and receive a score of 80% or higher

Associate of Science in Emergency Medical Services:

All applicants seeking admission into the Program are required to provide proof of valid Paramedic certification on the state or national level.

Associate of Science Allied Health Medical Assisting:

All applicants seeking admission into the Program are required to provide proof of valid certification or registration as a Medical Assistant.

Admission Process

All programs:

- Complete an application which can be found online at www.citycollege.edu/Apply
- Submit the application fee, if applicable.
- Submit official transcripts as evidence of high school graduation or equivalent
- Submit official college transcripts, if applicable.
- Receive a favorable recommendation after the interview process.
- Pass all required screenings and clearances within the required timeframes.

Diagnostic Medical Sonography, Radiologic Technology, Emergency Medical Services, Allied Health, Surgical Technology, Veterinary Technology degree programs as well as the Paramedic diploma program:

- Submit a minimum of one professional letter of recommendation
- Submit a personal statement

Pass or be exempt from the required sections of the entrance examination as detailed below:

Entrance testing: Minimum Scores for Entry

Program:	Entrance Exam	Score:	Waiver Eligible:	Attempts:
MA Diploma	N/A	N/A	Yes	
EMT Diploma	N/A	N/A	Yes	
Paramedic Diploma	SLE	17	Yes	2
AS Medical Assisting	SLE	14	Yes	2
AS Medical Office Administration	SLE	14	Yes	2
AS Diagnostic Medical Sonography	SLE	17	Yes	2
AS Emergency Medical Services	SLE	17	Yes	2
AS Radiologic Technology	SLE	17	Yes	2
AS Surgical Technology	SLE	17	Yes	2
AS Veterinary Technology	SLE	17	Yes	2
BS Healthcare Administration	N/A	N/A	Yes	N/A

Applicants are allowed two attempts to successfully complete the entrance examination.

Proof of High School Graduation

To gain admission into City College, a prospective student must provide proof of graduation in the form of the following:

An official high school or college transcript from an institution whose academic rigor, accreditation and academic standards are deemed appropriate by City College. Transfer students and high school graduates must request their official transcript of grades. Official transcripts must be received in a sealed envelope or officially via email/e-transcript. The transcript must adhere to the issuing institutions requirements for an official transcript (i.e. seal, signatures, etc.).

Passing General Equivalency Diploma (GED) test scores. Applicants who have taken the GED exam in lieu of a standard high school diploma must submit evidence of a satisfactory performance on the exam to the Admissions Department.

In the event the student cannot provide either of the above, the student may provide an official transcript from a post-secondary school whose accreditation is recognized by the US Department of Education approved school – that demonstrates completion of an Associate, Bachelor, Masters, or higher degree.

Certificates of attendance and/or completion, Exceptional Student diplomas, or Special Student diplomas are not considered qualifying documents for admission. Students who have a non-US High School Diploma should refer to the section on “International High School and College Transcripts” for U.S. High School equivalency requirements. Please note: All transcripts must be submitted in English and evaluated by an acceptable agency on the Evaluation Agency List found on the school’s website.

Homeschooling

City College considers applications from individuals who have completed a home school program. The prospective student must submit a homeschooled transcript listing all coursework completed. The transcript will evidence:

1. Final grades and units earned for each course completed.
2. A brief description of each course the student has taken with information regarding the teaching materials. This may include the title and author of all textbooks, reference materials, DVDs, and other teaching media or activities utilized.
3. The methods used for evaluation should accompany the homeschooled transcript.

If homeschooled applicants previously attended another school or have completed courses through the Florida Virtual School or through dual enrollment at a local college or university, official transcripts are required, and those courses should also be reflected on the homeschooled transcript. In addition, homeschooled applicants must submit a completed and notarized Home School Affidavit that verifies compliance with state statutory requirements that govern home school education.

International Students

International students interested in entering City College must demonstrate that they have graduated from a secondary school, recognized by the Ministry of Education or equivalent entity, in their home country. All international students must be fluent in English before they enroll. Applicants will be asked to furnish proof of English language competency. Students must also demonstrate that they are able to meet all costs of their education without financial aid unless they are eligible non-citizens.

International High School and College Transcripts

Applicants to City College who completed high school and or college outside of the United States must have their transcripts evaluated by an Agency on the approved “Evaluation Agency List” : <https://www.citycollege.edu/admissions/application-checklist/> Prospective students are responsible for the cost and fees associated with the translation and evaluation of their diplomas. The evaluation of the high school transcript must state that it is equivalent to a US High School Diploma.

College evaluations must include:

- Evidence of an equivalent degree
- A course-by- course description indicating the number of credits earned and grade received.

Admissions Testing Exemptions

Applicants to City College may be exempted from the **Verbal Section** testing if they can provide evidence of achieving a letter grade of C or higher in a college-level, credit bearing English class, or by meeting one of the following:

SAT Written and Reading	500 and above
ACT English	19 and above
TOEFL by hand	500 and above
TOEFL by Computer	173 and above
iBT	61 and above
AP	3 and above
CLEP	50 and above
IB	4 and above

Applicants to City College may be exempted from the **Math Section** testing if they can provide evidence of achieving a letter grade of C or higher in a college-level, credit bearing Math class, or by meeting the following:

SAT Written and Reading	500 and above
ACT English	19 and above
TOEFL by hand	500 and above
TOEFL by Computer	173 and above
iBT	61 and above
AP	3 and above

CLEP	50 and above
IB	4 and above
IELTS	Overall band score of 6.0

Technical Standards

Each applicant/student must possess certain physical and mental attributes to be able to complete the program to which they applied. It is the applicant /student's responsibility to notify the program of any changes that would result in them not meeting the applicable technical standards. Any applicant who does not meet the technical standards applicable to the program for which they are applying is ineligible for admission to the program.

Any student whose status changes while enrolled and no longer meets the technical standards, as outlined, may not be allowed to continue to progress through the program.

Details pertaining to each program's technical standards, can be found at www.citycollege.edu

EMT-Basic Program Enrollment Policy

In addition to all other criteria, enrollment into the EMT-Basic Program is contingent on a student successfully passing an assessment, which will be conducted by the Program Chair prior to the fifteenth session of the program. The assessment may include, but not necessarily be limited to, attendance, class participation, behavior, homework, compliance with the medical clearance process, and general cooperation with program faculty. A student who does not successfully pass this assessment will have their enrollment rescinded and may not progress to the fifteenth session of the program.

Criminal Background Screening

In 2009, the Florida Legislature enacted a law which precludes a state board from allowing a person to sit for a licensure examination if the person was convicted (regardless of how the conviction was entered of a long list of criminal acts. For further information, you should consult Florida Statute Section 456.013(3)(a), 456.039(1), 456.072(2), 464.018, and the other laws and regulations for the health care profession in which you are enrolled.

State licensing boards have their own list of offenses which they believe should preclude a person from practicing a particular health profession, particularly if the criminal act relates directly to their chosen health care field. There are occasions when a particular health care board might allow licensure if the applicant has had their rights restored, or if the conviction was entered many years ago, but this process is different from one board to another.

Health facilities, including hospitals, doctor's offices, and health clinics, may have a list of additional offenses that prohibit City College from placing students in clinical rotations as part of their required educational program if the student has been arrested or convicted of any of these criminal offenses.

As a result, all students, without promises of immunity or threats of coercion, are required to undergo a criminal background screening through a third-party servicer prior to commencing their program. If a student refuses to undergo a criminal background screening, or if the results of the criminal background screening results are positive, the college may request additional information or documentation related to the screening. The report and the additional information will be brought to the College's legal counsel for review and determination based on the College's standing policy.

At any time during a student's enrollment, a criminal background screening may be required by the College and/or any of its clinical affiliates. If the results of a student's criminal background screening required by the College and/or any of its clinical affiliates (whether the student is being screened for the first time or being re-screened) are positive, the student will be placed on clinical probation and will not be allowed to return to the clinical setting. The result of the criminal background screening and any additional documentation provided by the student, will be brought to the College's legal counsel for review and determination based on the College's standing policy.

Students have an ongoing obligation to notify the College within 30 days if they are arrested or convicted for a misdemeanor or criminal offense while enrolled at the College. Each student who enrolls into one of the programs listed above should expect the following process.

If it is determined by the College that the student's criminal background screening precludes participation in an externship or clinical rotation, or from sitting for the state licensing examination, the College may dismiss the student from the program and will retain all charged tuition.

Drug Screening

All students, without promises of immunity or threats of coercion, must have a drug screening conducted prior to the first day of instruction. If a student does not complete their drug screening on time, refuses to conduct a drug screening, submits an unacceptable urine sample or the screening results come back positive, the student's enrollment into the program may be rescinded.

Once enrolled in the program, students may be subject to a drug screening at any time in the program, including but not limited to:

- Random drug screening tests by the College and/or any of its clinical affiliates
- During the clinical clearance process at a specific clinical affiliate
- Prior to the first day of the second year of their program.

The following is the process for the drug screenings listed above:

Any student who refuses to conduct a drug screening test when requested by the College or any of its affiliates, or who submits an unacceptable urine sample, may face disciplinary procedures, up to and including dismissal from their program.

Failing a Drug Screening

If a student fails a drug screening administered by a clinical affiliate, the student will be placed on clinical suspension and will be sent to a facility approved by the College to be retested. The student will not be allowed to return to the clinical setting until they have been cleared by the applicable facility. (If the test is positive, refer to the policy below.)

If a student fails a drug screening administered, (whether the student was randomly tested, retested because they failed a drug screening administered by a clinical affiliate, or during their annual physical examination), the student will be suspended from clinical rotations for thirty days. At the end of the suspension period, the student will be required to repeat their drug screening at an approved facility. In addition, the student will be required to sign an agreement stating that they will remain drug free throughout the duration of the program. If a student does not receive medical clearance after their repeat drug screening, they will be dismissed from the program unless they seek treatment and provide proof of successful completion of a drug addiction treatment program. Students must receive approval for a treatment program prior to enrolling in it if that program will be used as the basis for re-entry into their program. If a student chooses to seek treatment, they may be required to take a Leave of Absence or withdraw while in treatment.

Clinical Clearance

Medical Clearance

Prior to the first day of class, each student must be medically cleared, at their own expense, by a qualified healthcare provider. Clearance must be completed prior to the beginning of the clinical internship phase of their program. Failure to do so may result in disciplinary action. Students will not be permitted to participate in any clinical internship without being medically cleared. Students are required to sign a release authorizing disclosure of their health information to clinical internship/externship sites.

Medical Clearance includes the following:

- Medical History and Physical Exam
- Proof of Immunity of Measles, Mumps, Rubella, Varicella and Hepatitis B
- A PPD or QuantiFERON-TB Gold Blood Test
- Immunization of Tetanus and Influenza
- 10 Panel Drug Test

A student's medical clearance is valid for one year from when they first received clearance from a qualified healthcare provider.

Students must always maintain medical clearance while enrolled in the program. Students must renew their medical clearance each year that they are enrolled in the program. A student's annual medical clearance must be completed prior to the due date provided by the Clinical Clearance Department. Failure to do so may result in suspension or dismissal from the program.

Health Insurance

Students are required to have, and provide acceptable documentation of, active health insurance coverage throughout the duration of the program. Failure to possess active health insurance coverage may result in disciplinary action.

CPR, Bloodborne Pathogens, HIPAA and Fit Testing

Prior to beginning their clinical rotations, students are required to successfully complete the CPR, Bloodborne Pathogens, HIPAA and Fit Testing components of clinical orientation provided by the College. Bloodborne Pathogens training must be completed annually and will be provided by the College during students' second year orientation.

Late Starts Policy

City College may permit a student to begin instruction up to one calendar week after the program has started. When permitted, the student may begin instruction no later than the first day of the second week. Students entering the program after the official start date of the class will be required to make up all missed material pursuant to the *Make-Up Policy* as published in the Catalog. Refund calculations for late starters will be based on the student's actual start date, not the date of the program start.

Junior and Senior Standing Status

An academic year is defined as a period beginning with the first day of classes, ending on the last day of examinations and is a minimum of 30 weeks of instruction. Applicants to the Bachelor programs must have earned an Associate of Science degree and/or be in junior standing (earned a combination of life credit, credit by examination and/or transfer credit totaling a minimum of 72 quarter credits or its equivalent).

Junior standing is the equivalent of two (2) academic years (72 quarter credits or its equivalent) earned through a combination of life credit, credit by means of examination and transfer credit.

Senior Standing status is the equivalent of three (3) academic years which is 108 quarter credits or its equivalent, earned through a combination of life credit, credit by means of examination and transfer credit.

Advanced Placement

Students who have successfully completed specialized and/or advanced courses in high school, have gained certain skill competencies or have gathered significant life experiences may request advanced placement in a subject area under certain conditions.

Advanced Placement Through Credit by Examination

These conditions include:

- The course is required in the program (including elective requirements). EMT Diploma and Paramedic Diploma core courses are not eligible for advanced placement through credit by exam.
- The student can document established competency and/or has the approval of the Director of Academic Affairs.
- The Advanced Placement Through Credit by Examination must be taken within the first six (6) months of enrollment. Exceptions to this rule may be approved by the Director of Academic Affairs but cannot be approved during the student's final quarter.
- A grade of 86% or better is scored on the comprehensive examination.

The advanced placement fee has been paid. The fee for the examination is \$150.00 for **EACH** comprehensive examination or advanced standing credit requested. This fee is charged regardless of the outcome of the examination.

Advanced Placement Through Credit for Prior Learning/Life Experience

City College offers applicants the opportunity to obtain college credit for previous employment experience. Credit is given to students who can demonstrate that the knowledge and skills they acquired from work, non- classroom study, etc. are equivalent to the learning outcomes expected for particular courses within the College.

Students who intend to obtain credit for prior learning and life experience must be in good academic standing and the course must:

- Be required for degree completion
- Not have an advanced standing/credit by examination option
- Not be an Externship course
- Not be an EMS core course
- Not be a general education course

Students must submit to the Director of Admission an experiential portfolio for each course they wish to receive credit for, along with an Advanced Standing for Professional Life/Work Experience Request Form. The portfolio will be given to the Director of Academic Affairs for review and approval in consultation with the Program Chair. The portfolio must be approved within the first six (6) months of enrollment, must be approved three (3) weeks in advance of the term and a student may only submit a portfolio once per course.

No more than 25% of core program courses may be transferred through prior learning/life experience. This 25% is part of the larger 50% of transfer credit allowed for an Associate of Science or 60% for the Bachelor of Science.

The fee for the experiential portfolio review is \$100.00 per course. This fee is charged regardless of the outcome of the portfolio review.

Transfer Credits

City College evaluates credits for transfer from accredited colleges, universities, technical and business schools, accredited by agencies recognized by CHEA or USDE. Requests for award of Transfer Credit must be approved a minimum of three (3) weeks prior to the start of the quarter in which the course(s) are scheduled. Student must apply for transfer credit prior to starting a potentially comparable course. Official transcripts from all colleges attended must be received no later than thirty (30) days after the start of the student's first term at City College to receive transfer credit.

City College will accept no more than 75% of transfer credits into an associate degree program and no more than 50% of the program core for bachelor's level programs.

Criteria for acceptance for transfer of credit are as follows:

1. The courses for transfer are similar in objectives and content with at least 80% equivalency to those offered by City College.
2. The credit was earned at an accredited institution as recognized by the Department of Education or CHEA.
3. Credits transferred from institutions operating on quarters of ten to twelve weeks are accepted as direct equivalent credits. Semester credits are multiplied by 1.5 to convert them into quarter credits. Fractional portions of credits are rounded on a course-to-course basis.
4. The courses for transfer can be applied toward graduation requirements and will be calculated as part of MTF within the SAP policy.
5. The letter grade (or equivalent) in the course for transfer is a "C" or better (provided the "C" grade is defined as 70% or better).
6. Credits in skill or technical courses/Major Core must have been awarded no more than five (5) years prior to the student's acceptance by City College.
7. Major core courses being considered for transfer in the Emergency Medical Services program must be from a programmatically accredited school.
8. Major core courses being considered for transfer in the Veterinary Technology program must be from an AVMA-CVTEA accredited program. If essential skills are completed in the course, the student must be able to provide evidence of successful completion of those skills.

Transfer Credit for Students with Advanced Placement (AP), CLEP or IB Courses

Students who have earned the score specified below on CLEP, AP or IB courses will be accepted for transfer credit for those courses with City College equivalents. The scores required for this are:

A score of 4 or higher on the College Board AP Examinations

A score of 50 or above on the College Level Examination Program (CLEP)

A score of 4 or higher on International Baccalaureate (IB) Courses

Credit will NOT be awarded based on another institutions award of AP, CLEP or IB credit. Student must request that their official AP, CLEP or IB transcript be sent to City College. Requests for AP, CLEP or IB credit must be made within the student's first term.

The decision of the Director of Academic Affairs is final on questions of transfer credits. No official evaluation of transfer of credit is made until the student has been accepted by the College, and an official transcript or official scores (AP and CLEP) from the institution awarding the credits is received by the Program Chair and approved by the Registrar.

Transfer Credit for Students with Associate Degrees

Associate of Arts

Students who have earned an Associate of Arts degree from an accredited institution (accrediting agency recognized by CHEA or USDE) may transfer the general education on a course-by-course basis to fulfill the 24-credit hour general education requirement in all City College Associate degree programs. Equivalency will be evaluated based on a comparison of course prefix, title, course descriptions and syllabi. Students may be required to complete specific general education courses where required by degree program.

Associate of Science

Students who have earned an Associate of Science degree from an accredited institution (accrediting agency recognized by CHEA or USDE) may have their credit transferred on a course-by-course basis provided that the courses are at least 80% equivalent in objectives and content to those offered by City College. Equivalency will be evaluated based on a comparison of course prefix, title, course descriptions and syllabi. Students may be required to complete specific general education courses where required by degree program.

Transfer of Active Florida Emergency Medical Technician License

City College will accept persons with an active Florida Emergency Medical Technician (EMT) license into the Paramedic Diploma. The prospective student must meet all entrance requirements.

Transfer of Active National or State Paramedic License

City College will accept persons with an active national or state paramedic license into the Associate of Science in Emergency Medical Services. These students will be given transfer credit for all core related courses.

Persons with an active Paramedic License must complete 25% or more of the Associate of Science in Emergency Medical Services to be granted an Associates of Science degree from City College.

Transfer of Medical Assistant Certification

City College will accept persons who have successfully completed an accredited Medical Assisting Program and have achieved national certification into the Associate of Science in Allied Health. These students will be given transfer credit for all core related courses. The prospective student must meet all entrance requirements.

Persons with an active Medical Assisting certification must complete 25% or more of the Associate of Science in Allied Health to be granted an Associates of Science degree from City College.

Transfer of Active Certified Surgical Technologist Certification

City College will accept persons with an active certified Surgical Technologist Certification into the Associate of Science in Surgical Technology. These students will be given transfer credit for all core related courses. The prospective student must meet all entrance requirements.

Persons with an active certified Surgical Technologist Certification must complete 25% or more of the Surgical Technology Program to be granted an Associates of Science degree in Surgical Technology from City College.

Transfer of Credit into Bachelor's Program

City College has a variety of methods for students to either begin or transfer into a bachelor's degree.

Transfer of Credits from a Previous Associates Degree or a combination of Prior Learning Credits

Students have earned a prior Associates Degree and can transfer at least 60 semester credits (inclusive of Credit for Prior Learning/Life Experience credits) into a Bachelor's program.

Previous City College students who earned an associate degree may matriculate into a bachelor's program. Previous City College students who have NOT earned an associate degree are NOT eligible to transfer from an AS to a BS program, without having earned an associate's degree. Students who start in an AS program are expected to complete that AS program. Students who earned an Occupational Associates may be required to take a placement test to determine placement into Math and/or English courses.

Transfer of Active Technical and Professional Certifications to a Bachelor's Healthcare Administration Program

City College will accept persons with active Technical and Professional certifications from an accredited schools into the Bachelor of Science in Healthcare Administration. Active Technical and Professional Certifications may count towards 52 credits of transfer credit.

Applicant may also receive an additional 8 credits in Credit for Life Experience for SLS1201 and SLS2301 provided that the applicant can provide at least 12 months of active ongoing employment. Student will be required to complete the Credit for Life Experience request and pay the fee for this evaluation.

All other previous college coursework regardless of if a degree was earned or not will be assessed for granting of additional credits.

Applicants may register for this either online or on-campus.

Veterans Credit for Previous Education or Training

City College maintains a written record of the previous education and training of all students receiving VA Educational benefits. City College also documents that appropriate credit has been given for previous education and training in accordance with the City College transfer of credit standards, (see Transfer of Credit policy) with the length of program adjusted accordingly. Students receiving VA Educational benefits will receive transfer of credit (provided that the college can obtain those transcripts from those institutions), regardless of whether the student wants that credit transferred; and, if it falls within the acceptable City College transfer of credit timeframes for specific programs and courses (core program courses must have been taken within the last five years to qualify for transfer of credit).

Re-Admission Policy

In the event a student has been terminated or has withdrawn from any program at City College, they may apply and be considered a Re-Applicant for admission into any program, provided that:

- a minimum of one academic term has passed from the date of their termination or withdrawal
- the student meets the entrance requirements for the program to which they are applying
- the student's original application packet is no more than two years old

All applicants of City College, regardless of the amount of time that has passed since their attendance, will have their previous history at the institution taken into consideration when making the admission decision. A student's re-admission will not be finalized until they have been cleared by the Financial Services Office.

Process for Readmission

The student must submit a readmission application with the required non-refundable application fee. If the program being applied to requires an entrance exam, the entrance exam may be waived. An interview with the appropriate Program Committee is required before acceptance into the Program. Should the student be accepted, based on previous performance and at the discretion of the program's Program Committee, the student may be given transfer credit as per the Transfer Credit Policy as published in the Institutional Catalog and be exempted from certain portions of the didactic and/or clinical phase of the program. A student who is readmitted to City College and chooses to enroll will be required to pay the then current tuition rate.

A student who is denied readmission may only reapply for admission after at least six months have passed from the time they were denied. In the event a student is terminated, withdraws or is involuntarily withdrawn from the institution a second time, they may only reapply for admission after at least two years have passed from the time of their termination or withdrawal. Their application for readmission will be treated as a new application, including payment of all fees and tuition.

Students seeking readmission who are only missing two or less general education courses can bypass the above committee, so long as their overall City College GPA is a minimum of 2.5 and they have no disciplinary issues on record.

Financial Aid Information

Procedures and Forms by Which Students Apply for Assistance

The following types of aid are available individually or in combination to those who qualify and must be applied for annually. Applications for federal programs are available on the internet at <http://www.fafsa.ed.gov>. Applicants should complete the free application for Federal Student Aid (FAFSA). Scholarship procedures are listed on the City College website, <http://www.citycollege.edu/scholarships>

Types of Aid Available

Loan Programs

(ALL LOANS MUST BE REPAYED)

William D. Ford Federal Direct Loan Programs

Federal Direct Subsidized Stafford Loans: also referred to as Direct Stafford Loans or Direct Loans. "Subsidized" means the federal government pays the interest on these loans while the student is enrolled at least half-time during grace periods and deferments (postponements of repayment). The student must demonstrate financial need to receive this type of loan.

Federal Direct Unsubsidized Loans: also referred to as Direct Stafford Loans or Direct Loans. The federal government does not pay the interest on these loans while the student is attending college, in a grace period, or in deferment. A student may qualify for an unsubsidized Loan regardless of financial need.

Federal Direct PLUS Loans: for parents with good credit histories who want to borrow for their dependent students. The yearly limit on the Parents' Loans for Undergraduate Students (PLUS) is equal to the cost of attendance minus any other financial aid received. The interest will vary every July 1 but will never exceed 9%. Repayment begins within 60 days after the disbursement of funds. The chart below shows **estimated** monthly payments and total interest charges for 7.9 percent loans of varying amounts, with typical repayment periods. Rates may be different.

Federal Direct Consolidation Loans: one or more federal education loans combined into a new Direct Loan. Only one monthly payment is made to the U.S. Department of Education. For additional information, booklets are available in the Financial Aid Office on Direct Loan Programs.

Sample Loan Repayment Plan

Total Amount	Loan Number Payments	of Monthly Payment	Total Repaid
\$ 3,500.00	120	\$ 50.00	\$ 4,471.00
\$ 5,000.00	120	\$ 58.00	\$ 6,905.00
\$ 7,500.00	120	\$ 83.00	\$10,357.00
\$10,500.00	120	\$121.00	\$14,500.00
\$15,000.00	120	\$173.00	\$20,714.00

A **Dependent Undergraduate** student can borrow up to:

\$5,500.00, if the student is a first-year student enrolled in a program of study that is a full academic year. No more than \$3,500 of this amount may be in subsidized loans.

\$6,500.00, if the student has earned a minimum of 36 credits and the remainder of the program of study is a full academic year. No more than \$4,500 of this amount may be in subsidized loans.

An **Independent Undergraduate** student can borrow up to:

\$9,500.00, if the student is a first-year student enrolled in a program of study that is a full academic year. No more than \$3,500 of this amount may be in subsidized loans.

\$10,500.00, if the student has completed a minimum of 36 credits and the remainder of the program of study is a full academic year. No more than \$4,500 of this amount may be in subsidized loans.

\$12,500.00, if the student has completed their 2nd year of study and is enrolled in a degree seeking program that will award a bachelor's degree and the remainder of the program of study is a full academic year. No more than \$5,500 of this amount may be in subsidized loans.

For periods of undergraduate study that are less than an academic year, the amounts a student can borrow will be less than those above.

Interest rates are determined by the Federal government each spring for new loans being made in the upcoming award year, which runs from July 1 to the following June 30. Each loan will have a fixed interest rate for the life of the loan. Interest rates for new Direct Loans made on or after July 1, 2021, and before July 1, 2022 are 3.73% for Direct Subsidized and Direct Unsubsidized, and 6.28% for Direct Plus.

The amounts listed above are the maximums a student may borrow. However, a student cannot borrow more than the cost of attendance minus any other financial aid received.

All applicants must complete entrance and exit counseling per Federal Regulation. Counseling can be completed at <http://www.studentloans.gov>

Scholarships and Grants

Florida Bright Future Scholarship Program

The Florida Bright Future Scholarship Program is a state of Florida scholarship program with three levels:

- Florida Academic Scholars Award
- Florida Medallion Scholars Award
- Florida Gold Seal Vocational Scholars Award

For eligibility requirements, award amounts and deadlines, visit the Florida Department of Education website: <http://www.floridastudentfinancialaid.org>.

Alumni Scholarship

City College is offering its associate degree alumnus a scholarship when they matriculate to one of its bachelor's degree programs. The scholarship is available to all Alumni who enroll for the first time in a City College B.S. degree program. The scholarship is for \$1500.00, which is disbursed as \$500.00 per term for the first three consecutive terms.

Applicants must be a City College Associate of Science Degree alumnus who enroll for and are accepted into a City College Bachelor of Science Degree program. Students who previously enrolled or attended Bachelor of Science Degree programs at City College are not eligible.

Hollywood and Altamonte Springs campus graduates may use the scholarship towards a bachelor's program online, or at another City College campus offering bachelor's degrees.

Federal Pell Grant

The eligibility for this award is computed primarily through the FAFSA (Free Application for Federal Student Aid) on the basis of a student and/or parents' income and assets, household size, and number of family members in college. All students are encouraged to apply. The filing deadline for the award year is June 15 for new applications. The awarding period extends from July 1 to June 30th.

Florida Student Assistance Grant

The Florida Student Assistance Grant program (FSAG) is a financial aid program available to students who meet all eligibility criteria and demonstrate substantial financial "need." An FSAG award can range from \$200.00 - \$3,260.00 per academic year. Eligibility for an FSAG is determined by the institution. The application deadline is September 15.

To be eligible for FSAG, you must:

- Meet Florida residency requirement.
- Enroll as a full-time student (12 credit hours each term).
- Be a degree-seeking undergraduate student.
- Be a U.S. citizen or eligible non-citizen.
- Cannot hold a bachelor's degree.
- Be registered with the Selective Service, if required.
- Not owe a refund in any state or federal grant or scholarship and not be in default on any state or federal student loan unless satisfactory arrangements have been made to repay.

Federal Supplemental Educational Opportunity Grant

The Federal Supplemental Educational Opportunity Grant (FSEOG) is a grant for undergraduate students having the greatest financial need, as determined by the FAFSA. It is administered directly by the financial aid office and is offered on a first come first serve basis for eligible students, until the funds are spent.

C.M. Fike Memorial Scholarship

This scholarship is intended to assist City College students to pursue a degree in their chosen field. Applicants should apply for the scholarship prior to the start of the term. The scholarship is an annual award paid quarterly on or about the third week in the term. Scholarship award amounts are based on the number of credits that a student is taking each term. The awards are as follows:

\$1,000.00 for students taking 9 or more credit hours per term.

\$750.00 for students taking 6 – 8 credit hours per term.

Applicants must:

- Complete the enrollment process and be accepted into a City College program
- Submit the scholarship application prior to the start of the term
- Start classes as stated on the enrollment agreement
- Maintain satisfactory academic progress
- Reapply each year for additional funding Scholarship applications can be found on our website.

Policies and Procedures Verification

The College has developed the following policies and procedures regarding the verification of information provided by applicants for Federal Aid under the Title IV Programs:

Only those students who are selected for verification by the Department of Education will be required to submit supporting documentation.

All students will be notified on a timely basis if they have been selected for verification and the supporting documentation that is required of them. The student will be notified via the Student Portal, email, or a phone call. The institution will use as its reference the most recent verification guide supplied by the Department of Education. At that time, the student will be informed of the time parameters and the consequences of not completing the verification and any other documentation needed. The institution will assist the student by making any corrections to any information that is inaccurate.

If there is a change to the student's eligibility the student will be contacted, and a new estimated award letter will be presented to the student explaining the difference in their eligibility.

A Federal Direct Stafford Loan application may be certified by the College prior to the completion of verification.

No Federal or Campus-Based funds will be disbursed prior to the completion of verification.

The student will have 60 days after his/her last day of attendance or the end of the academic year, whichever is earlier, to complete verification. However, in the interim, the student must have made arrangements with the College for payment of all tuition and fees due or risk dismissal at the option of the College. After 60 days, all financial aid that might have been due is forfeited.

If the student supplies inaccurate information on any application and refuses to correct same after being counseled by the institution, the College must refer this case to the Department of Education for resolution. Unless required by the Department of Education, no financial aid will be disbursed to the student.

Refund Policy

Should a student voluntarily cancel or be dismissed for any reason, all refunds of tuition will be made according to the following refund schedule. Student may cancel the enrollment by telephone, in person, or in writing.

All refunds will be made within thirty (30) days of the date of determination. Official date of determination is the following:

The date the student notifies the College of his/her withdrawal or their last day of academic related activity, whichever is the later of the two

The date when the College becomes aware that the student ceased attendance from all courses for the term

For students who withdraw after classes begin, the following refund policy will apply:

First Quarter of the Program

If a student withdraws (and notifies the Registrar's office, in writing, of his/her intent to withdraw) during the first quarter of the program:

Week the Student Withdraws or is Dismissed	College Retains Percentage of Total Quarter's Tuition
First Week	0% of the total quarter's tuition
Second Week	20% of the total quarter's tuition
Third Week	100% of the total quarter's tuition

Second and Remaining Quarter's in the Program

If a student withdraws or is dismissed during the second and any remaining quarters in the program:

Week the Student Withdraws or is Dismissed	College Retains Percentage of Total Quarter's Tuition
First Week	10% of the total quarter's tuition
Second Week	20% of the total quarter's tuition
Third Week	100% of the total quarter's tuition

Tuition and fees shall also be refunded in full, for the current term, under the following circumstances:

- Course was canceled by the college
- Involuntary call to active military duty
- Documented death of the student
- Exceptional circumstances, with approval by the President of the College

There is no refund or adjustment in tuition charges for a reduction in credit hours after the first week of classes for a quarter as specified in this policy.

Percentage of completion is computed from the published quarter start date to last date of actual attendance, rather than credit earned. The last date of attendance is the last day a student had academically related activity, which may include projects, clinical experience, or examinations. Any amounts determined to be owed to the College because of these calculations, are due and payable in full on the effective date of the withdrawal. Any refund of less than \$1.00 which would normally be refunded to Title IV Programs may be retained by City College.

Return of Title IV Funds

The 1998 Higher Education Amendments, section 484B prescribes the amount of Title IV funds a student has earned at the time when a student ceases attendance and the amount of federal aid that must be returned or disbursed. The amount earned is based on the amount of time the student has spent in attendance. It is based on a proportional calculation through 60 percent of the payment period. Under these provisions, the calculation of Title IV funds is not concerned with refunding institutional charges.

If a recipient of Title IV grant or loan funds withdraws from an institution after beginning attendance, the institution must determine the amount of Title IV funds earned by the student. If the amount of Title IV grant or loan funds the student was disbursed is greater than the amount the student earned, unearned funds must be returned. If the amount the student was disbursed is less than the amount the student earned; the student is eligible to receive a post-withdrawal disbursement in the amount of the earned aid that the student has not received but was otherwise eligible for.

The percentage of the period completed is the number of calendar days completed in the payment period divided by the total number of calendar days in the same period.

Responsibility of a Student to Return Unearned Title IV, HEA Program Funds - The student is responsible for all unearned Title IV, HEA program assistance that the institution is not required to return. A student's unearned grant funds are an overpayment and are subject to repayment. A student who owes an overpayment because of withdrawal will retain his or her eligibility for Title IV, HA program funds for 45 days from the earlier of the date the institution sends a notification to the student of the overpayment, or the date the institution was required to notify the student of the overpayment. If a student does not take the appropriate repayment action during this 45-day period, the student becomes ineligible on the 46th day and remains ineligible until the student enters into a repayment agreement with the U.S. Department of Education that re-establishes the student's eligibility.

Designated Office to Contact for Withdrawal - The student must contact the Registrar's office to withdraw. The student should also meet with the Director of Financial Aid to determine any financial liability created by withdrawal prior to the end of the term.

Refund Distribution Policy for Federal Title IV Programs

Any refund based on the appropriate calculation will be refunded to the following program in the order listed below:

1. Federal Direct Unsubsidized
2. Federal Direct Subsidized
3. Federal Direct PLUS Loan
4. Federal Pell Grant
5. FSEOG
6. Other SFA Programs
7. Other Federal, State, private, or institutional sources of aid
8. The student

Financial Aid Warning & Probation

Financial Aid Warning is assigned to a student who fails to meet satisfactory academic progress and is placed on academic probation. If a student is placed on financial aid warning and achieves a CGPA of 2.0 and/or MTF to meet SAP requirements at the end of the next term/quarter, the Financial Aid Warning is lifted.

Financial Aid Probation is assigned to a student who fails to meet satisfactory academic progress after one term/quarter on academic probation/financial aid warning and is then academically dismissed. If the student successfully appeals academic dismissal and academic probation is extended for one term with an academic plan to bring them into satisfactory academic progress, the student will continue to remain on Financial Aid Probation and Title IV funding will be disbursed. In both instances the student will be notified in writing by mail or email of their financial aid status.

If a student has been academically dismissed, to reestablish for reentry, a student must be evaluated and deemed eligible to return on academic probation. A student who is readmitted after dismissal for failure to meet Satisfactory Academic Progress standards is readmitted on Financial Aid Probation and is not eligible for Title IV funds until the student has achieved a 2.0 CGPA and/or MTF to meet SAP requirements at the end of the returning term/quarter.

General Information

Office/Class Hours

Administrative Offices

Monday – Thursday 8:00 AM – 6:00 PM

Friday 8:00 AM – 3:00 PM

Classes may be held during the following hours:

Monday – Thursday 8:00 AM – 11:00 PM

Friday 8:00 AM – 5:00 PM

Sunday 9:00 AM – 5:00 PM

The College reserves the right to establish and alter the scheduled hours of administrative office and class meetings. Changes to hours will be posted.

Change of Name or Address

When a student has a change of name because of marriage or divorce, or change of address or telephone number, it is imperative that these changes be reported to the Registrar's office. A name change requires proper documentation and therefore, a student must complete a [Change of Name](#) form.

The College frequently encounters the need to contact its students, by mail, phone, or e-mail. If the contact information is not correct, the student will not receive pertinent communication regarding classes, graduation, financial aid, etc. Students are responsible to log into their student portal to update their student record with any changes made to personal information including a change in mailing or e-mail address.

Program Handbook

City College, in addition to the Catalog, may provide students with a Program Handbook. These specialized handbooks provide additional programmatic rules and regulations for enrolled students.

Policy Changes

Students will be notified of any academic and/or administrative policy changes that happen after the publication of the annual catalog. This will be done through one or more of the following: posting addendums of the catalog on the college's website, notices on campus bulletin board, or indirect email notices to the students' city college email address.

Degrees and Diplomas

Every student who has successfully completed a program of study and fulfilled all obligations to the College will be awarded a degree and receive a diploma during annual graduation exercises. Replacement cost for a lost or misplaced diploma is \$50.00. Graduates can request another copy of their diploma by completing the [Request for Duplicate Diploma](#) form.

Technology Requirements

Students are expected to ensure personal, and school issued devices are up to date regarding operating systems, web browsers, and application versions.

Computer Operating Systems

Operating System: Windows 10 and newer, Mac OSX 10.14 and newer or Linux – ChromeOS (eligible for continued updates)

Speed and Processor: 4GB of RAM and 2GHz processor

Internet Speed: Minimum of 10mps

Mobile

iOS App: 14 or later

Supported Web Browsers

Microsoft Windows operating system within the 5 newest of each of these browsers:

Google Chrome

Firefox

Microsoft Edge

Mac OS operating systems within the 5 newest of each of these browsers:

Google Chrome (updateable)

Firefox

Internet Connection

High Speed Internet (Cable, DSL, etc.) minimum 10 mbp

Bulletin Boards

Bulletin boards are the property of the school. Students wishing to place notices on the bulletin boards must submit the notice to the Campus Director for approval. Upon approval, the notice will be posted on the bulletin board(s).

Facilities

Eating and drinking are prohibited in City College labs and classrooms. The College provides student areas for these activities. Smoking, including e-cigarettes, is strictly prohibited in all indoor areas of City College.

Smoking is permitted outside in designated areas.

Children on Campus

Minors are not allowed in class sessions or in the library. Unattended minors are not permitted in any area of the campus.

Parking

Sufficient parking for cars is available at all campuses. Students may be required to have a visible City College parking permit decal on their vehicle or risk having their vehicle towed at the owner's expense. Specific information regarding each campus is available from the Campus Director. Available parking is not guaranteed.

Use of School Equipment and Property

College equipment and property are not to be removed from the building.

A student wishing to use the equipment may do so during scheduled lab periods under supervision of a faculty member. (See Student Code of Conduct Policy).

City College Logos

All City College logos are the property of the college and may not be reproduced without approval from the Campus Director.

Loss of Personal Property

The College does not assume responsibility for the loss of books or other personal property. However, all faculty and students are instructed to place all articles found in the "Lost and Found" located in the library so that they may be claimed by the owner.

Policy Changes

Students will be notified of any academic and/or administrative policy changes that happen after the publication of the annual catalog. This will be done through one or more of the following: posting addendums of the catalog on the college's website, notices on campus bulletin board, or indirect email notices to the students' city college email address.

Indemnification

The student releases and holds harmless the institution, its employees, its agents, and representatives from and against all liabilities, damages, and other expenses which may be imposed upon, incurred by, or asserted against it or them by reason of bodily injury or property damage which may be suffered by the student from any cause, while enrolled as a student in the institution. When students are permitted to participate in individual or group tests, training, or demonstrations of ability, techniques, commodities, equipment, or procedures relating to course or intramural activities under the auspices of the College, the student and parties executing the student enrollment contract authorize participation by the student and releases the institution, and its officers, agents, and employees from any and all responsibility for injury and damage to person or property.

School Closing

In the event of labor disputes or acts of nature (i.e., fire, flood, hurricane, tornado, etc.), the College reserves the right to suspend training at the site affected for a period not to exceed 90 days, or to relocate to a suitable substitute site. In the event the school closes the term may be extended to provide sufficient time to complete course/hour requirements.

Health Safety and Security Disclosure

Annually City College publishes a Health, Safety and Security Disclosures which contains the following policies:

- Copyright Infringement Policies and Sanctions
- FERPA and Student Permanent Record
- Drug Abuse Prevention Program
- Infection Control/Universal Precautions
- Prevention and Awareness Program for Sexual Misconduct and Harassment
- Weapons Possession Policy
- Fire Safety Plan
- Identification Cards/Swipe Cards
- Emergency Management Plan
- Campus Lockdown Policy
- Clery Act
- Annual Security Report

Student and Graduate Services

Orientation

Prior to the start of the program, students must attend a mandatory new student Orientation. The goals and objectives of the New Student Orientation session are to:

- Assist students with acclimating to continuing education, the college and the program.
- Introduce students to the resources and services available to support their educational and personal goals, including the college's library, academic advisement and assistance, as well as student services.
- Familiarize students with the college's campus environment and physical facilities.
- Create an atmosphere that promotes confidence, a positive attitude and an excitement for learning.
- Offer students an opportunity to meet with faculty, staff, continuing students, as well as other new students.
- Provide new students with comprehensive information regarding institutional and program-specific policies, procedures and processes.
- Ensure that students are aware of the college's policies pertaining to sexual harassment prevention, drug and alcohol abuse prevention, as well as plagiarism and copyright infringement.
- Train students on how to access the Student Portal where they can review their academic and attendance status.
- Train students on how to utilize the College's Learning Management System in order to complete coursework provided via blended delivery.
- Familiarize students with campus safety requirements and procedures.

Academic Counseling

Upon recognition by a student or a faculty member that an academic problem exists, a counseling session with the Program Chair or a faculty member will be scheduled. This counseling session will occur either in person, phone call or via video call. The objective of the counseling session is to help identify the problems that may be the source of the academic issues. Once these problems are recognized a remediation plan will be suggested to help find a solution.

CANVAS

All of City College's courses are supported by use of a learning management system. To ensure students are appropriately prepared:

- Prior to registration for their first course, students must complete City College's orientation to ensure that they understand the technology necessary for success. Students who do not successfully complete the orientation may re-take this for enrollment in a subsequent quarter.
- Students without a school-issued device must have their own computer or device that meets the minimum technology requirements. Refer to Technology Requirements for additional information.
- Students must have high speed Internet access. (Use of a hotspot is not recommended.)
- Students must have a working e-mail address.

Learning Center

City College has established a Learning Center to address the needs of students requiring academic assistance or remediation in their efforts to achieve and maintain satisfactory academic progress. The Learning Center is staffed with faculty members who are available to assist students with their academic needs. If a faculty member feels that a student needs additional assistance outside the scope of the Learning Center, they may recommend that the student seek additional tutorial services beyond those provided by the Learning Center. Students who wish to utilize the Learning Center must register at least one week prior to the requested date, by completing the [Learning Center Request Form](#) which requires the following information:

- Student name
- Program
- Course
- Subject
- Specific topic(s) with which they need assistance

Career Services and Development

The Career Services staff offers career assistance to graduates and current students. While City College does not guarantee employment, every effort is made to bring potential employers together with eligible graduates who have the skills employers seek. In addition, we continually seek to form new employer partnerships for jobs, externship opportunities and in field career placements.

The Career Services Department provides the following services to graduates and current students:

- Arrange opportunities to meet and interview with prospective employers both on and off campus
- Assist with writing resumes
- Practice interview skills with mock interviews
- Develop job search skills and professional readiness

City College maintains graduate employment information in annual reports that contain comprehensive statistical data covering graduate employment activity.

Library

The mission of the City College Library Staff is to support and foster intellectual discovery, critical thinking, and lifelong learning. The City College libraries are the centers for information resources related to all program areas. Students and faculty have access to up-to-date information that will assist them in their chosen field of study, and in becoming life-long learners. The libraries provide both print materials and a full suite of online resources. In addition, the libraries provide students access to printing, photocopying and computers with Microsoft Office and Internet access.

Housing

Housing is not provided by City College.

Injury/Illness and Incident Reporting Policy

Injury/Illness

During participation in program activities, students are required to report all injuries/illnesses to their Program Director and/or Clinical Coordinator. The Program Director and/or Clinical Coordinator may request a written incident report regarding the injury/illness.

If an injury or illness occurs during a clinical rotation, all clinical affiliates have agreed to provide initial emergency medical care.

Incident Report Policy

Students are covered under the college's Malpractice and Student Accident Insurance policy while participating in educational activities. Any potential incidents (i.e. errors of omission, commission, negligence, etc.) injuries or illnesses are to be reported to your Program Director within 24 hours of occurrence with a written *Incident Report*. A senior administrative member must be notified of any unusual occurrence/incident either immediately, via the Emergency On-Call System or by the next business day after an incident occurs.

Listed below are examples of incidents that may occur, and depending on their severity, whether the student needs to notify administration immediately or by the next business day. The list below is to be used as a guide. The student should use their best judgment should an incident occur.

An incident is defined as any unusual event or circumstance that a student is involved in, which can include, but is not limited to, the following:

Immediate Notification Required

- The ambulance a student is riding on for a rotation was involved in a motor vehicle accident
- A student is involved in a needle stick injury
- A student is exposed to a communicable disease while on a clinical rotation (i.e. Tuberculosis, Meningitis, etc.)
- Any radiation exposure incident
- A patient is injured by a student's action or inaction

Next Business Day Notification Required

- Refusal of a preceptor/supervisor to allow a student to perform the skills required to meet the objectives of the rotation
- Altercations with other students, preceptors, staff, patients or family members
- Injury which occurs during a program activity (i.e. lecture, lab or clinical rotation)
- Unusual occurrence at any clinical rotation
- Emotional trauma
- Any occurrence which may result in potential for litigation (i.e. errors of commission, omission, negligence, etc.)

In addition to verbal notification as delineated above, all incidents must also be documented within forty-eight (48) hours of occurrence according to the procedure described below.

The elements to be included in an incident report include the following:

- Name of individual(s) involved
- Details of incident (location, date of incident, time of incident, description of incident, etc.)
- Witnesses to the event(s)
- If an injury occurred treatment rendered, if necessary, or refusal of care statement
- Corrective actions taken following the incident

Incident Report Procedure

The procedure for reporting an incident is as follows:

- If necessary, the student will obtain whatever assistance is required (i.e. medical attention, etc.) following the incident.
- The student will complete an incident report providing all the required information (the Incident Report form can be found at www.citycollege.edu).

The Program Chair will review and if necessary, investigate the incident and determine any appropriate follow up.

Services Available for Students with Disabilities

In compliance with the Americans with Disabilities Act (ADA), City College provides reasonable accommodations to students with professionally diagnosed and documented disabilities. The Campus Director for each campus serves as the ADA Coordinator for that campus and will confer with the Director of Academic Affairs regarding academic accommodations.

Policy Regarding Documentation of Disabilities

Students seeking accommodations from City College based on a diagnosis of a disability are required to submit documentation to verify eligibility. Documentation of a disability consists of the providing results of professional testing, evaluation and a written report that addresses specific academic needs of the student. The cost and responsibility for providing this professional evaluation shall be borne **by the student**.

Students with disabilities who are requesting accommodations should make timely and appropriate disclosures and requests, preferably at least six (6) weeks in advance of the class for which accommodation is requested.

The student must provide City College with medical or other diagnostic documentation that confirms their impairment and contains recommendations for specific accommodations. Requests that are not supported by proper documentation may not be approved.

The following guidelines are provided in the interest of assuring that the evaluation and report are appropriate for documenting eligibility. Documentation presented to the Campus Director and Director of Academic Affairs will remain confidential and will not be included in the student's academic file. The Director of Academic Affairs is available to consult with diagnosticians regarding these guidelines. The report should:

- Be prepared by a professional, within the last three years, (e.g. licensed psychiatrist, psychologist, qualified to diagnose the disability).
- Be comprehensive. Written reports should be consistent with the diagnostic criteria found in the American Psychological Association: Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition (DSM-IV) or the DSM-IV-TR (Text Revision). A battery of psychological tests and behavior rating scales, a thorough social and educational history and interviews with the student are essential.
- Be on professional letterhead, signed by the individual making the diagnosis, and include the following information:
 - How long the diagnostician has treated the student and the date of last contact.
 - Instruments, procedures, and data sources used to diagnose.
 - Current symptoms that satisfy the DSM-IV or DSM-IV-TR criteria and the approximate date of onset.
 - DSM-IV or DSM-IV-TR diagnosis.
 - Treatment being used (e.g. medication, counseling, etc.).
 - How this disorder impacts the student in the postsecondary environment.
 - Diagnostician's name, title, license number, address, and phone number. How long the diagnostician has treated the student and the date of last contact.
- Be current. In most cases, this means within the past three years, and the assessment was completed when the individual was an adult (age 18). Since assessment constitutes the basis for determining reasonable accommodations, it is in the student's best interest to provide recent and appropriate documentation to serve as the basis for decision-making about a student's need for accommodation in an academically competitive environment.
- Present clear and specific evidence, which identifies the individual's present level of functioning and how the student's education may be impacted.
- State the specific accommodations being requested.
- Provide sufficient data to support the academic adjustment(s) requested. The documentation should demonstrate the individual has a disability as defined in the Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act of 1973.

Students will be provided a written determination regarding a request for accommodation. Faculty will be notified in writing regarding any specific accommodation granted for a student on their class roster.

Academic Policies

Course Numbering Guide

City College course numbers consist of a two or three letter alpha prefix followed by a three- or four-digit course number. The two or three letter alpha prefix identifies the academic discipline (see Course Descriptions). The level is specified by the first digit, as follows: 1 for freshman level; 2 for sophomore level; 3 for junior level; and 4 for senior level. The last two digits are reserved for departmental use in indicating sequence of courses. Laboratory courses are identified by an "L" after the three- or four-digit course number. "C" indicates combined lab/lecture course.

City College participates in the Florida Statewide Course Numbering System (SCNS). SCNS courses have a standardized three-letter prefix followed by a four-digit course number.

Florida's Statewide Course Numbering System

(Section 1007.24, Florida Statutes)

Courses in this catalog are identified by prefixes and numbers that were assigned by Florida's Statewide Course Numbering System (SCNS). This numbering system is used by all public postsecondary institutions in Florida and by participating nonpublic institutions. The major purpose of this system is to facilitate the transfer of courses between participating institutions. Students and administrators can use the online SCNS to obtain course descriptions and specific information about course transfer between participating Florida institutions. This information is at the SCNS website at <https://flscns.fldoe.org>

Each participating institution controls the title, credit, and content of its own courses and recommends the first digit of the course number to indicate the level at which students normally take the course. Course prefixes and the last three digits of the course numbers are assigned by members of faculty discipline committees appointed for that purpose by the Florida Department of Education in Tallahassee. Individuals nominated to serve on these committees are selected to maintain a representative balance as to type of institution and discipline field or specialization.

The course prefix and each digit in the course number have a meaning in the SCNS. The listing of prefixes and associated courses is referred to as the "SCNS taxonomy." Descriptions of the content of courses are referred to as "statewide course profiles."

Example of Course Identifier

General Rule for Course Equivalencies

Within the SCNS framework equivalent courses at different institutions are identified by the same prefixes and same last three digits of the course number and are guaranteed to be transferable between participating institutions that offer the course, with a few exceptions, as listed below in Exceptions to the General Rule for Equivalency.

For example, a freshman composition skills course is offered by 84 different public and nonpublic postsecondary institutions. Each institution uses "ENC1101" to identify its freshman composition skills course. The level code is the first digit and represents the year in which students normally take the course at a specific institution. In the SCNS taxonomy, "ENC" means "English Composition," the century digit "1" represents "Freshman Composition," the decade digit "0" represents "Freshman Composition Skills," and the unit digit "1" represents "Freshman Composition Skills I."

In the sciences and certain other areas, a "C" or "L" after the course number is known as a lab indicator. The "C" represents a combined lecture and laboratory course that meets in the same place at the same time. The "L" represents a laboratory course or the laboratory part of a course that has the same prefix and course number but meets at a different time or place.

Transfer of any successfully completed course from one participating institution to another is guaranteed in cases where the course to be transferred is equivalent to one offered by the receiving institution. Equivalencies are established by the same prefix and last three digits and comparable faculty credentials at both institutions. For example, ENC 1101 is offered at a community college. The same course is offered at a state university as ENC 2101. A student who has successfully completed ENC 1101 at a Florida College System institution is guaranteed to receive transfer credit for ENC 2101 at the state university if the student transfers. The student cannot be required to take ENC 2101 again since ENC 1101 is equivalent to ENC 2101. Transfer credit must be awarded for successfully completed equivalent courses and used by the receiving institution to determine satisfaction of requirements by transfer students on the same basis as credit awarded to the native students. It is the prerogative of the receiving institution, however, to offer transfer credit for courses successfully completed that have not been designated as equivalent. **NOTE:** Credit generated at institutions on the quarter-term system may not transfer the equivalent number of credits to institutions on the semester-term system. For example, 4.0 quarter hours often transfers as 2.67 semester hours.

The Course Prefix

The course prefix is a three-letter designator for a major division of an academic discipline, subject matter area, or subcategory of knowledge. The prefix is not intended to identify the department in which a course is offered. Rather, the content of a course determines the assigned prefix to identify the course

Prefix	Level Code (first digit)	Century Digit (second digit)	Decade Digit (third digit)	Unit Digit (fourth digit)	Lab Code
ENC	1	1	0	1	
English Composition	Lower (Freshman)	Freshman Composition	Freshman Composition	Freshman Composition	No Laboratory

Authority for Acceptance of Equivalent Courses

Section 1007.24(7), Florida Statutes, states:

Any student who transfers among postsecondary institutions that are fully accredited by a regional or national accrediting agency recognized by the United States Department of Education and that participate in the statewide course numbering system shall be awarded credit by the receiving institution for courses satisfactorily completed by the student at the previous institutions. Credit shall be awarded if the courses are judged by the appropriate statewide course numbering system faculty committees representing school districts, public postsecondary educational institutions, and participating nonpublic postsecondary educational institutions to be academically equivalent to courses offered at the receiving institution, including equivalency of faculty credentials, regardless of the public or nonpublic control of the previous institution.

The Department of Education shall ensure that credits to be accepted by a receiving institution are generated in courses for which the faculty possess credentials that are comparable to those required by the accrediting association of the receiving institution. The award of credit may be limited to courses that are entered in the statewide course numbering system.

Credits awarded pursuant to this subsection shall satisfy institutional requirements on the same basis as credits awarded to native students.

Exceptions to the General Rule for Equivalency

Since the initial implementation of the SCNS, specific disciplines or types of courses have been excepted from the guarantee of transfer for equivalent courses. These include courses that must be evaluated individually or courses in which the student must be evaluated for mastery of skill and technique. The following courses are exceptions to the general rule for course equivalencies and may not transfer. Transferability is at the discretion of the receiving institution.

Courses not offered by the receiving institution.

For courses at non-regionally accredited institutions, courses offered prior to the established transfer date of the course in question

Courses in the _900-999 series are not automatically transferable and must be evaluated individually. These include such courses as Special Topics, Internships, Apprenticeships, Practical, Study Abroad, Theses, and Dissertations.

Applied academics for adult education courses.

Graduate courses.

Internships, apprenticeships, practical, clinical experiences, and study abroad courses with numbers other than those ranging from 900- 999.

Applied courses in the performing arts (Art, Dance, Interior Design, Music, and Theatre) and skills courses in Criminal Justice (academy certificate courses) are not guaranteed as transferable. These courses need evidence of achievement (e.g., portfolio, audition, interview, etc.).

Courses at Non-Regionally Accredited Institutions

The SCNS makes available on its home page (<http://scns.fldoe.org>) a report entitled “Courses at Non-Regionally Accredited Institutions” that contains a comprehensive listing of all nonpublic institution courses in the SCNS inventory, as well as each course’s transfer level and transfer effective date. This report is updated monthly.

Questions about the SCNS and appeals regarding course credit transfer decisions should be directed to the Assistant Chief Academic Officer, City College, 6565 Taft Street Hollywood FL 33024 or to the Florida Department of Education, Office of Articulation, 1401 Turlington Building, Tallahassee, Florida 32399-0400. Reports and technical information may be requested by calling the SCNS office at (850) 245-0427 or at <http://scns.fldoe.org>.

Unit of Credit

City College awards credit on a quarter system. One quarter credit hour is equivalent to ten (10) class hours of instruction, twenty (20) hours of laboratory study, thirty (30) hours of externship, or a combination of the three with appropriate homework and study. A class hour is fifty (50) minutes.

All new programs released on or after September 1, 2022, will define Unit of Credit as follows: One quarter credit hour is equivalent to ten (10) class hours of instruction, twenty (20) hours of laboratory study, fifty (50) hours of externship, or a combination of the three with appropriate homework and study. A class hour is fifty (50) minutes. Programs subject to this definition of Unit of Credit will include a specific statement within the program requirements.

Grading System

Final grades are issued at the end of each quarter based on the following criteria:

Letter Grade	Number Grade	Quality Points	Effect of MTF Calculation
A	90-100	4.0	Yes
B	80-89	3.0	Yes
C	70-79	2.0	Yes
D	60-69	1.0	Yes
F	Below 60	0.0	Yes
I	Incomplete	0.0	Yes
W	Withdrawal	0.0	Yes
S	Satisfactory	0.0	Yes
T	Transfer Credit	0.0	Yes

P	Pass	0.0	Yes
NP	No Pass	0.0	Yes
AU	Audit	0.0	No

The number of quality points awarded in a course is determined by multiplying the number of credit hours for that subject by the number of quality points earned in the course. The grade point average (GPA) is computed by dividing the total number of quality points by the total number of credit hours attempted. Grades of "W," "S," "P," "NP," "I," "AU" and "T" are not used in the GPA calculation.

Individual progress records are permanently maintained by the College for each student. All grades awarded by faculty are included in the record and are available to the student. Grade reports are issued to the student each quarter.

Incomplete Grade

An "I" or incomplete grade is given when a student has not completed the work necessary for one of the above grades. Incomplete grades are granted at the discretion of the faculty member and must be approved by the Program Chair. In order to receive an incomplete grade, the student must submit a written request to the course instructor. Upon approval, a Learning Contract will be put in place specifying the remaining assignments or other course deliverables and the final due date. The student has a maximum of two weeks from the end of the term to complete the work. Once work is completed students recorded grade and course average will be the minimum passing grade for the program. If it is not completed, the student may receive an "F" for the course. The final grade/credits attempted will be included in the maximum time frame for program completion.

Transfer Courses

A "T" grade is given to students whose courses were taken at another institution and are being transferred in for required courses at City College. The grade of "T" has no effect on the student's overall grade point average or successful completion of courses. However, a "T" grade is added to hours attempted and earned within the specified maximum time frame.

Advanced Standing for Professional Life/Work Experience

A grade of "S" is given for the appropriate City College course, and the student is credited with having earned this curriculum requirement. The grade of "S" has no effect on the student's cumulative grade point average or successful completion of courses. However, the grade of "S" is added to hours attempted and earned within the specified maximum time frame (See Advanced Standing policy).

Course Cancellation

The College reserves the right to cancel any classes which do not have a minimum number of students enrolled. The College will notify the student by email, or telephone call (voice or text). If the College cancels any class which was part of a program of study for an existing student, the College will offer an appropriate substitution which will enhance the educational objective for the student involved. All course substitutions made in a student's program of study must be approved by the Director of Academic Affairs and documented in writing in the student's permanent file. Course equivalencies are maintained by the Registrar.

Individualized Learning Contracts

An individualized learning contract is an instrument which serves as a guide to monitor and direct a student's academic progress and compliance with requirements. It identifies the process and stipulations to which the student is required to adhere as a condition of remaining in the program. An individualized learning contract, signed by the student, may be required as a result of circumstances including, but not limited to, a conditional grant of appeal, absences requiring makeups, or failure of a non-progression course. Stipulations included in an individualized learning contract may include, but not be limited to, requiring the student to audit or retake a course, make up missed clinical days, take or retake a course during the next available offering, be placed on probation for a defined period, pass a non-progression course on the first attempt, or pass a failed course on the second attempt without the ability to take a comprehensive examination. The terms of an individualized learning contract may supersede any other published policies, procedures or processes.

Auditing Classes

The ability to audit a course is available to students in specific circumstances. A student may be required to audit a course as a part of a learning contract to reinforce concepts and assist the student in mastering specific learning outcomes.

A student who is required to audit a course, regardless of reason, is responsible for meeting attendance requirements, completing assignments, participating in quizzes, exams and other academically related activities as specified in the syllabus, but will not receive a grade for the audited course. An Individualized Learning Contract will be created by the Program Chair and signed by the student for any course that must be repeated via audit. The contract will include any auditing requirements and must be approved by the Director of Academic Affairs.

Auditing Courses as Part of Re-Admission

Based on student performance on a placement exam for readmission to a program, a readmitted student may be required to audit multiple courses within the program quarter of the program that they have been placed based on their exam. The student is responsible for ensuring they have access to the textbook and any resources for the course(s) audited.

Auditing Combined Courses

An active student who fails a portion of a "combined" course may be required to audit a previously completed portion of that course to provide additional support and remediation for the failed portion of the course. (For example, a student who fails the lab component of a combined course may be required to audit the didactic (lecture) portion of the course).

Auditing Courses in Cohort-based Programs

For cohort-based programs, an active student who fails a pre-requisite course may be required to repeat the failed course and audit additional courses from the same quarter of the course that is being repeated.

[Rationale: Concurrent courses may provide additional reinforcement of content that will support the student in mastering concepts.]

Converting an Audited Course to a Repeated Course

Students who achieve a higher grade in an audited course may exercise a one-time request to have an audited course be added to their official academic transcript as a repeated course and count towards their GPA. The original grade earned for the class will remain on the transcript, but the grade points will not be factored into the overall grade point average. This grade change request must be approved by the Director of Academic Affairs.

Institutional Residency Requirement

To earn a degree from City College, City College requires that a certain percentage of courses be completed at City College, which is referred to as 'residency.' Students must complete a minimum of 25% of the program in residency at City College. This does not include Advanced Credit for Life Experience or Advanced Standing by Examination as those credits are Included in the percentage granted for Transfer Credit.

Graduation Requirements

Every student who has successfully completed a course of study and fulfilled all obligations to the College will be awarded the appropriate Diploma or Degree. The candidate for a diploma or degree must:

- Successfully complete all specified requirements for the diploma/degree.
- Earn the required cumulative grade point average as published.
- Achieve a specific level of performance in each skill area required for graduation.

Students may not be able to walk in the graduation ceremony if they have not met the requirements for graduation in their program.

Graduation with Honors

Students who meet the requirements for graduation, and whose cumulative grade point average meets the following criteria, are conferred their degrees with the honors indicated. Cumulative Grade Point Average for Honors:

Summa Cum Laude	3.90-4.00
Magna Cum Laude	3.70-3.89
Cum Laude	3.50-3.69

Complete Status

A completer is a student who is no longer enrolled in the campus and who has either completed the time allowed or attempted the maximum allowable number of credits for the program of study but did not accomplish one of the following graduation requirements:

1. Achieve a GPA of at least 2.0.
2. Attain required competencies or skills.
3. Satisfy non-academic requirements.

Transcripts

An official transcript is provided to any student who requests one in writing and is free of indebtedness to the College. The first copy is free of charge. Additional copies will be issued for a fee. To officially request a transcript, please click [HERE](#). Please refer to the schedule of fees for the cost.

Standards of Satisfactory Progress

Students enrolled at City College must be making measurable progress toward the completion of his or her program of study. Student satisfactory academic progress is measured through the attendance, assessments and progression policies listed below.

Attendance Policy

To maintain a quality program and to ensure compliance with regulatory requirements, the following attendance policy is in effect:

Students must be present during the first week of instruction of the program to be considered an enrolled student. Students who are not present during this period will have their enrollment rescinded.

Attendance at all lecture, laboratory and clinical education sessions is mandatory.

One (1) absence is defined as one (1) missed session.

The course schedule will be provided to each student prior to the first day of the quarter/term. In addition to the course schedule, the number of absences for each course may be found in the course syllabi provided to the students during the first session of each course. Class participation is counted toward a student's course average. Attendance affects a student's class participation grade and is included as part of the class participation as published on each course syllabus.

Any absence requiring a make-up must be made up pursuant to the *Make-Up Policy*.

Subject to the *Attendance Policy*, students must complete a minimum of 90% of a program's total clock hours, and students may not be absent for more than 10% of a program's total clock hours. Hours missed while on a Leave of Absence count toward the 10% maximum hours allowed to miss.

Time Off

Students are allowed time off for extenuating circumstances or documented medical emergencies. Examples of such absences include, but are not limited to, admission to a hospital for treatment, serious or contagious illness, bereavement of a non-immediate family member, jury duty and mandatory court dates.

For lecture and lab sessions, students who need to use allowed time off for scheduled events must submit a *Request for Time Off Form* as soon as they become aware of the anticipated absence. Students who use allowed time off for an unanticipated event must submit a *Request for Time Off Form* within two weeks following the date of the absence. The request must include a detailed description of the circumstance, accompanied by detailed supporting documentation. The Campus Director and/or the Program Chair, will review the submitted form and documentation and will determine whether or not the circumstance meets the required criteria for allowed time off. Absences for which a *Request for Time Off Form* is not submitted, or which do not meet the criteria for allowed time off, may affect a student's class participation grade. All time off must be made up pursuant to the *Make-Up Policy*.

For clinical sessions, students are not required to submit a *Request for Time Off Form*.

All absences, regardless of whether they meet the criteria for allowed time off, may not exceed the maximum number of absences per course as detailed in the tables below.

The college's attendance policy consists of Classroom, Laboratory and Clinical Absences as follows:

Classroom and Laboratory Absences

The following are the maximum number of allowed classroom absences per course per term/quarter:

Classroom Absences

Blended

Courses that have both a synchronous and asynchronous component.

Students can be absent for one (1) weeks' worth of material. For example, if a course is scheduled to occur twice during a week a student can be absent twice for the course.

Full Distance

Courses that only have an asynchronous component.

Students can be absent for one (1) weeks' worth of material.

Laboratory Absences

Students may not miss any laboratory sessions. All missed laboratory sessions must be made up on campus during the make-up session for which the student is scheduled. Students can only make up one lab session per course per quarter.

Definition of Late, Absent and Left Early for Lecture and Laboratory Courses

The following table represents the definition of lecture and lab Late, Absent and Left Early:

Student Arrival/Departure	Student Considered
Arrives/logs in within 15 minutes of class scheduled start time	Late
Arrives/logs in more than 15 minutes after scheduled class start time	Absent
Departs/logs out within 15 minutes of scheduled class end time	Left Early
Departs/logs out more than 15 minutes before the scheduled class end time	Absent

Three lates/leaving early per course are considered one absence as calculated toward the student's course grade.

Clinical Internship/Externship Absences

The following are the maximum number of allowed clinical internship/externship absences per course per term/quarter:

Radiologic Technology, Diagnostic Medical Sonography, Medical Assistant, Veterinary Technology and Surgical Technology programs:

Scheduled Clinical Hours per Week	Maximum Hours
14 hours (2 days)	14 hours (2 days)
21 hours (3 days)	21 hours (3 days)
28 hours (4 days)	28 hours (4 days)

One day of clinical internship/externship is equal to 7 hours.

Paramedic Program:

Total Hours Required per Course	Maximum Absences
120 Hours	2 shifts
288 Hours	3 shifts

A shift may consist of 8 or 12 hours.

EMT Program:

Maximum Shifts:	1 Shift
-----------------	---------

A shift may consist of 8 or 12 hours.

All absences must be logged in Trajecsys or Platinum Planner on or before the date of absence. Absences not logged in Trajecsys on or before the date of absence will be required to be made up.

Definition of Late, Left Early, Half-Absence and Absence for Clinical Internship/Externship

Radiologic Technology, Diagnostic Medical Sonography, Medical Assistant, Veterinary Technology and Surgical Technology programs:

The following table represents the definition of clinical Late, Half-Absence and Absence:

Student Arrival/Presence	Student Considered
Arrives within one hour of the scheduled shift start time	Late
Fails to clock out	Left Early
Present for 50% of scheduled rotation time	Half-Absence
Present for less than 50% of scheduled rotation time or fails to clock in and out	Absence

Three lates/left early per course are considered one absence as calculated toward the student's course grade.

Exceeding Maximum Absences

Students who exceed the maximum number of classroom, laboratory or clinical internship absences will receive a grade of "F" and will be considered to have failed the course regardless of their calculated course average. Students who fail a course are required to follow the Progression Policy as published in the Catalog.

Breaks

Breaks will be provided during class. Students are expected to be back in class, ready to continue at the time specified by their instructor. Students who do not return on time will be marked late.

Student Portal

Students can view their attendance through their student portal. Students will be advised and counseled as they near the maximum percentage allowed.

Absence Notification

Students are required to notify their Program Chair, Clinical Coordinator or any administrative office staff if they will not be attending class or clinic that day.

Attendance Procedure

Lecture and Laboratory

Attendance procedures will be explained during orientation and may include one or all of the following: sign in and out sheets, verbal attendance, swipe card system and biometric swiping system.

Class will start exactly on the assigned hour. Students are expected to be on time. The definition of late is up to the discretion of their instructor but will be no later than 15 minutes after the scheduled start time. Excessive tardiness will not be tolerated and is considered unprofessional conduct and may lead to the student's dismissal from the program.

All students must notify their Program Chair and/or faculty member if they need to leave early. Any student leaving before the end of class without notifying their Program Chair and/or faculty member will be marked absent for the class.

Clinical Internship/Externship

Clinical attendance is logged and monitored using Trajecsyst or Platinum Planner, a web-based clinical reporting system. All clock-ins and clock-outs must be performed within 50 feet of the clinical facility, using a GPS-enabled mobile device.

Radiologic Technology, Diagnostic Medical Sonography, Medical Assistant, Nursing and Surgical Technology programs:

Students are required to clock in and out via Trajecsyst upon arrival to, and departure from, their clinical site. Students are also required to clock in and out before and after their lunch break or the break closest to the midpoint of their shift. During the 1st and 2nd quarter that students are scheduled for clinical internships, students are provided three opportunities per quarter to fail to clock in or clock out. After the third failure, two points will be deducted from the student's course grade per occurrence.

Clinical shifts will start exactly on the assigned hour, and students are expected to be on time. The definition of late is up to the discretion of the Clinical Coordinator, but will be no later than one hour after the scheduled shift start time. Excessive tardiness is considered unprofessional conduct and will not be tolerated, and may result in the student's dismissal from the program.

If a student must leave early from their rotation for any reason they must inform their assigned clinical instructor or supervisor/preceptor AND either their Program Chair or Clinical Coordinator. Failure to inform one of these individuals will result in the student being penalized for a full day's absence. Repeated infractions of this type are grounds for dismissal from the program.

Exceptions

In the event of any exceptions (e.g. the attendance logging feature is down), students are required to send a message to the Program Chair and Clinical Coordinator through Trajecsyst or Platinum Planner, at the time that they are unable to clock in or out, notifying them of the issue. The Clinical Coordinator will verify the student's attendance and enter that record on their behalf. If a student does not send the required message at the scheduled time, the exception will be considered a failure to clock in or out.

Failure to Clock In or Out

A student may fail to clock in or out up to three times per quarter for the beginning and end of their shift in which case the Clinical Coordinator will verify the student's attendance and enter that record on their behalf. Students who exceed the maximum number of allowed failures will be subject to the Attendance Policy.

Volunteering During Off Hours and Holidays

Students may only rotate at City College's affiliated clinical sites during the shifts and hours assigned to them by their Program Chair or Clinical Coordinator. Student may not "volunteer" during off hours in his or her profession's department to obtain additional clinical experience.

Paramedic Program:

While working as an EMT (not during an assigned rotation shift), students may not assist or perform any paramedic skills during an ALS call.

Make-Up Policy

As per the *Attendance Policy* and *Progression Policy* published in the Catalog, missed classroom sessions, clinical sessions and failed courses may be required to be made up according to the *Make-Up Policy* found below. When required, make-up sessions/activities may not interfere with regularly scheduled classes or other activities and may be conducted on Sundays. Failure to abide by this policy may result in disciplinary action.

Quizzes

Quizzes cannot be made up. Students who miss a quiz will receive a grade of zero.

Exams and Midterms

Students who miss an exam will receive a grade of a zero for the missed exam. Students are allowed to make up one exam per course. Make-up exams must be taken within one week of the original exam date, during one of the college's scheduled exam make-up sessions. Students who fail to take the make-up exam within the required time frame will receive a grade of zero for that exam. Students who successfully complete a make-up exam within the required time frame will have ten points deducted from the grade they achieve on the exam.

Final Exams

Under extenuating circumstances and with written approval from the Campus Director, a student who misses a final exam will be allowed to make up that exam. Make-up final exams must be taken prior to the scheduled comprehensive exam date for that term/quarter. Completion of the make-up exam will result in the actual numerical score obtained.

Lecture Sessions

Students are not required to make up lectures. To ensure that the student masters the missed course material, students are required to complete a make-up assignment for all missed lectures by completing an assignment correlated to the material covered during missed session.

Program Chairs will provide students with the details and due date of the make-up assignment. The due date will be based on the missed session, and will be no later than the date of the courses' final exam. All make-up assignments will be kept on file in a student's record.

If the student has not handed in their assignment prior to finals week, a grade of "Incomplete" will be recorded for that course. Please refer to the "Incomplete" Grade policy published in the Institutional Catalog.

Absences Exceeding 10% of Total Program Clock Hours

Students returning from extended absences (e.g. Leave of Absence) that result in total absences exceeding 10% of total program clock hours are required to meet with their program chair to determine whether the student can continue with their current cohort or whether the student will be required to retake the course with the next cohort.

Laboratory Sessions

All missed laboratory sessions must be made up on campus on a 1:1 ratio.

Clinical Sessions

All clinical internship/externship absences are required to be made up as pursuant to the published *Attendance Policy*. Students may be scheduled to make up clinical absences on Sundays, during vacation time, or after their original graduation date which may delay their graduation date to allow time for the make-up work to be completed.

Any required clinical absences that have been made up, will not be deducted from the total number of absences accumulated.

Failing a Non-Progression Course

Lecture and/or Laboratory Courses

A student who fails a course must attend the course at the next available date and pass that course. Students are allowed to retake non-progression courses one time for a total of two attempts per course. Students retaking a failed course must pass it on the first attempt and will not be eligible for a comprehensive examination.

Clinical Course

A student who fails a clinical course must repeat and pass that course. Students may be given credit for up to 50% of the total clinical hours previously completed during the failed course. Students will be assigned to a clinical site based on site availability. Students can fail no more than one clinical course during their enrollment. Students who fail more than one clinical course during their enrollment will be dismissed from the program.

Leave of Absence

A Leave of Absence is a temporary interruption in a student's program of study due to an extenuating circumstance. Leave of Absence refers to the specific period during a program when a student is not in attendance and will return to complete the program. There are two types of Leave of Absences, a full leave, and a short leave.

The time frame granted for a Full Leave of Absence is a minimum of fifteen (15) consecutive days up to a full term.

The time frame granted for a Short Term is fourteen (14) consecutive days.

Requested Leave of Absence

Under extenuating circumstances, students are eligible to request a Leave of Absence (LOA). If approved, the student will receive a notice of the specific requirements and time frame granted for the leave. Any student who exceeds the timeframe granted for the leave will be considered to have unofficially withdrawn from the program as of their last day of attendance. In addition to reviewing the exceptional circumstances pertaining to the need for a LOA, the student must:

- be maintaining satisfactory academic progress
- be in good standing
- have their financial balance up to date

Students are eligible for only one LOA per academic year. Students returning from a Leave of Absence must contact the Office of the Registrar to begin the process of reenrollment. In addition to satisfying any requirements stipulated upon granting of the Leave of Absence (i.e., length of LOA, academic requirements, etc.) other factors, including but not limited to, course offerings and course size limits will affect the student's ability and time frame to re-enroll.

Process

The student must complete the Request for Leave of Absence Form and attach a written letter requesting a LOA and specify the reasons for that request. The letter must be signed and dated by the student. The Campus Director, in consultation with the Program Chair, will render a decision approving or disapproving the LOA, the length of time the LOA will be in effect, and the requirements the student will need to complete, to make up any material missed. Students must not assume the LOA has been granted. They will receive written confirmation of the decision and must sign a Leave of Absence Approval & Acknowledgement form. Failure to complete this form will invalidate the LOA.

Required Leave of Absence

Under extenuating circumstances, a student may be required by the College to take a Leave of Absence. Examples of extenuating circumstances are:

- No longer being able to meet the technical standards of the program
- Disciplinary sanctions because of sexual misconduct

If required, the student will be notified of the reason and receive a notice of the specific requirements and time frame granted. If more time **has elapsed** than allowed, the student will be considered an unofficial withdrawal from the program, a refund calculation will be done based on a student's last day of academic related activity. Students returning from a required Leave of Absence must contact the Office of the Registrar to begin the process of reenrollment. In addition to satisfying any requirements stipulated upon acquiring the Leave of Absence (i.e., length of LOA, academic requirements, etc.) other factors, including but not limited to, course offerings and course size limits will affect the student's ability and time frame to re-enroll.

Process

The student must complete the Request for Leave of Absence Form. They will receive written confirmation of the requirements they will need to complete upon returning from their LOA and must sign a Leave of Absence Approval & Acknowledgement form. Failure to complete this form will invalidate the LOA.

Students returning from a Leave of Absence must complete and submit the Request to Return from Leave of Absence form located on the institution's website no less than 3 business days prior to their intended return date.

Students returning from a medical or mental health Leave of Absence are required to submit a Physician's Affidavit, completed, and signed by their treating physician, certifying that the student is fit to complete the program and comply with the program's academic and behavioral requirements, and that they continue to meet the technical standards of the program and the profession.

Examples of Approved Leave of Absences

Acceptable leaves include but are not limited to, maternity, paternity, bereavement, national guard or military duty, jury duty, immediately loss of childcare, adoption, or medical leave.

Maternity Leave

The purpose of Maternity Leave is to provide new mothers with an opportunity to recuperate from childbirth. A student who is pregnant and will need to take a Maternity Leave must notify their Program Chair of the expected birth no less than thirty days prior to their anticipated date of delivery. The student will be granted a two-week Maternity Leave beginning on the date of delivery. A learning contract will be created detailing the process for the student to make up any material (e.g. exams, quizzes, homework, assignments and clinical hours) missed while on Maternity Leave.

Students with extenuating circumstances that may require them to take a longer Maternity Leave, (e.g. the student has been placed on bed rest or delivered via a cesarean section, etc.) may submit to the Campus Director a request in writing for additional time. The student must submit a note from their physician requesting the additional leave as medically necessary, which will be reviewed by the Campus Director who will review the request and grant accommodations on a case-by-case basis.

Students returning from maternity leave, just like other students returning from a medical or mental health Leave of Absence, just submit a *Physician's Affidavit* certifying that the student is fit to complete the program academic and behavioral requirements (the technical standards of the program and profession). If a student is not medically cleared to return to the clinical setting following their Maternity Leave, they may remain on leave just for their clinical course until medically cleared.

The College has a dedicated lactation room available for all students. To reserve the room, contact the administrative office.

Paternity Leave

Students will be granted one day of Paternity Leave for the date of the birth or adoption of their child; however, they will be required to make up any missed material and clinical hours at a later date, pursuant to the *Make-up Policy*.

Bereavement

When a death occurs in a student's immediate family, (spouse, parent, sibling, child) the student will be exempt for three (3) consecutive days within one week from when the death occurred.

Exceptional situations that may need additional accommodations will be reviewed on a case-by-case basis, and accommodations will be made accordingly.

The student will be responsible for any material missed while on leave per the *Make-up Policy*.

Infectious Disease

Any student who has an infectious disease (e.g. influenza, pneumonia, etc.) may not participate in educational activities. Others should never be put at risk from student with an infectious disease. Students with an infectious disease will still be required to follow the published attendance policy. If a student's illness requires excessive absences, they may be required to take a medical Leave of Absence. Please refer to the Leave of Absence Policy for additional information.

Requirement for Physician Medical Release

In the case where any illness/injury which requires the student to miss three or more consecutive days of educational activities, the student will be required to submit a medical release by a physician before being allowed to return to class or participate in educational activities.

Minimum Standards for Academic Progress

Minimum Standards of Satisfactory Academic Progress for Associate and Bachelor Degree Programs

Students must achieve (a) a minimum cumulative grade point average (CGPA), according to a prescribed schedule of evaluation points, and (b) complete their programs of study within a maximum time frame (MTF) that is one and one-half times the number of credit hours required for his/ her program of study. Standards of satisfactory academic progress, as defined in this catalog, apply to all students. Failure to maintain SAP may result in loss of financial assistance.

Term	Minimum Required CGPA	Minimum Required % of Credits Completed to Credits Attempted (Completion Rate)
1	1.5	40

2	1.65	40
3 ¹	1.8	50
4	1.8	55
5	2.0	60
6 ² 9 ²	2.0	60
Each Subsequent Term ²	2.0	60

¹ Student not meeting standards does not have to be dismissed; probation is required.

² A student not meeting standards is not eligible for financial aid and must be dismissed OR may remain in an extended enrollment status; probation is not allowed at this point.

Bachelor's degree Programs

Bachelor's degree programs, due to transfer credits, are considered as starting in the 7th term or later and therefore no probationary status will occur. If the student does not meet the required CGPA and/or completion minimum, they will be dismissed.

EMS Programs

In addition to adhering to the general Standards of Satisfactory Progress, (CGPA and MTF), students majoring in Paramedic/EMT must achieve and maintain (a) a minimum grade of B in all Major Core courses and (b) a minimum grade of C in all general education courses. Students must also adhere to the rules for repeated courses.

Radiologic Technology, Diagnostic Medical Sonography and Surgical Technology Programs

In addition to adhering to the general Standards of Satisfactory Progress, (CGPA and MTF), students majoring in the above programs must maintain a minimum grade of C in all core courses. A student in this program must also adhere to the rule regarding repeated courses.

Minimum Standards of Academic Progress for Diploma Programs

Term	Minimum Required CGPA	Minimum Required % of Credits Completed to Credits Attempted (Completion Rate)
1 ¹	1.8	60
2	2.0	60
Each Subsequent Term ²	2.0	60

¹ Student not meeting standards does not have to be dismissed; probation is required.

² A student not meeting standards is not eligible for financial aid and must be dismissed OR may remain in an extended enrollment status; probation is not allowed at this point.

EMT & Paramedic Diploma

In addition to adhering to the general Standards of Satisfactory Progress, (CGPA and MTF), students majoring in EMT or Paramedic must achieve and maintain (a) a minimum grade of B in all core courses and (b) a minimum grade of C in all general education courses. Students must also adhere to the rules regarding repeated courses.

Medical Assistant Program

In addition to adhering to the general Standards of Satisfactory Progress, (CGPA and MTF), students majoring in the above programs must maintain a minimum grade of C in all core courses. A student in this program must also adhere to the rule regarding repeated courses.

Standards of Satisfactory Progress for Students Receiving VA Educational Benefits

In addition to adhering to the general standards of satisfactory progress, students receiving Veteran's Administration (VA) educational benefits (VA students) must maintain a minimum cumulative grade point average (CGPA) of 2.0 at the end of each term. In terms 1 through 5 a VA student who falls below a 2.0 will be put on academic probation. If in the following term, they still have not achieved a 2.0 they will be placed on a second and final academic probation. Failure to achieve a 2.0 at the end of the second consecutive term of academic probation will result in the student's VA educational benefits being terminated. In term 6 and all subsequent terms, a VA student must meet the City College SAP requirements and achieve a 2.0 or may be academically dismissed from the program. A VA student terminated from VA educational benefits due to unsatisfactory progress may petition the institution to be recertified to receive VA educational benefits after one term has elapsed and after attaining a CGPA of 2.0.

Extended Enrollment Status

Students not achieving the minimum standards of satisfactory academic progress or who fail to meet the minimum standards at the end of the probationary period will be dismissed from the College. Students may enroll in an extended enrollment status for one quarter in the term immediately following their dismissal to attempt to earn eligibility for reentry. Students in an extended enrollment status will be charged the appropriate tuition and fees but will not be eligible for any Title IV financial aid. While in this extended enrollment status, students must attempt to correct their academic deficiencies. The extended enrollment status must be completed within the required maximum time frame. The conditions for extended enrollment status will be agreed upon in writing by the student and the academic department.

EMS students who are dismissed for a violation of the rule regarding repeat courses are not eligible for either extended enrollment or financial aid probation status.

Maximum Time Frame (MTF)

You must be on target to complete your program before attempting more than 150% of the credit hours for your program of study. To calculate maximum time frame for your program you multiply the total credits required to complete the program by 1.5. Transfer, withdrawn, incomplete, repeated credit hours all count towards maximum time frame.

Diploma Programs	Credits	MTF
Emergency Medical Technician	18	27
Paramedic	54	81
Medical Assisting	31	46

Associate of Applied Science Programs	Credits	MTF
Veterinary Technology	101	151

Associate of Science Programs	Credits	MTF
Medical Assisting	92	138
Medical Office Administration Major with a track in Insurance Billing and Coding	96	144
Diagnostic Medical Sonography	99	148
Emergency Medical Services	111	166
Radiologic Technology	98	147
Surgical Technology	90	135

Bachelor of Science Programs	Credits	MTF
Healthcare Administration	184	276

Academic Probation

Students who have not met the stated minimum requirement of academic progress can be placed on Academic Probation. Academic Probation will allow a student one term to correct the academic issues of either CGPA and or MTF to meet the SAP requirement. Students who are not able to remove themselves from Academic Probation after one term may be dismissed from the College. In addition, students receiving financial aid will be placed on Financial Aid Warning.

Evaluation Points

Satisfactory academic progress is measured at the end of each quarter.

Academic Year (AY)

An academic year is defined as a period that must include at least 30 weeks of instructional time, beginning with the first day of classes and ending on the last day of classes or the last day of examinations, whichever is later.

Comprehensive Examination Policy

Qualifying for a Comprehensive Exam

Student is registered for up to three (3) core courses in a quarter:

A student who fails one core course in a quarter may qualify for a comprehensive exam for the failed core courses. The results of the comprehensive exam will determine the student's requirements to meet the objectives of the failed core course.

Student is registered for four (4) or more core courses in a quarter:

A student who fails two core courses in a quarter may qualify for a comprehensive exam for each of the failed core courses. The results of the comprehensive exam(s) will determine the student's requirements to meet the objectives of the failed core course.

To qualify for a comprehensive exam a student's core course average must be a minimum of 65 (D)

Results of the Comprehensive Exam

90 to 100: The student will be considered to have passed the course and will receive the minimum passing grade as their recorded score.

80 to 89: The student will be required to complete an independent course of study that meets the objectives of the course. A learning contract will be signed by the student detailing the objective criteria they are required to complete. Once complete the minimum passing grade will be recorded as their score.

79 or below:

- Progression Course – the student has failed the course and is subject to dismissal from the program.
- Non-Progression Course – the student will need to make-up the course as per the Make-Up Policy as published in the Catalog

Academic Changes that will Impact Calculations to Satisfactory Academic Progress (SAP):

Grade Penalty

For a student who withdraws from the College or is dismissed by the College, the withdrawal date or last documented date of educational activity determines whether grades are recorded for that quarter. If the withdrawal date or last known date of educational activity is within the first half of the course, a grade of "W" is given. If the withdrawal date or last known educational activity occurs within the last half of the course, the student will receive a grade in each course. An "F" will be assigned to each requirement that is not completed and averaged in with the grades earned for completed work.

Transfer Courses

A "T" grade is given to students whose courses taken at another institution are being transferred in for required courses at City College. The grade of "T" has no effect on the student's overall grade point average or successful completion of courses. However, a "T" grade is added to hours attempted within the specified maximum time frame.

Course Incompletes

A student who receives an "I" (incomplete) has two weeks from the end of the term or prior to the first date of instruction for the next term, the earlier of the two, to complete the work. The final grade will be calculated into the student's cumulative grade point average. The final grade/credits attempted will be included in the maximum time frame for program completion.

Change of Program

Any City College student who desires to change educational goals and change from one program to another must submit a Change of Program Request Form together with a new Enrollment Agreement and application to the admissions department. A student wishing to enter a program for which a degree would be granted must meet the programmatic entry requirements and qualifications specifically intended for the granting of a degree. A request for a change of program will be approved if the student:

- Can show success within another program based on the original entrance/placement test scores
- Has grades in courses already completed
- Has other considerations (i.e., financial obligation incurred)

Students who change programs should consult with their Financial Aid representative to determine if they will have sufficient funds available to complete the new program of study.

If the request for a change of program is approved, the student making the request will be informed of the change as soon as possible, with approval effective at the beginning of the next quarter. Students should complete their current term.

Upon approval of the Change of Program request, ALL previously attempted and earned credits which apply to the new program, Transfer (T) and Advanced Standing (S) courses which count towards the new program completion requirements will be transferred. All credits attempted and grades earned in the student's new program of study will count towards determining satisfactory academic progress and will be calculated within Maximum Time Frame.

Punitive grades earned under the previous program which do not apply to the current program will no longer be calculated within the students CGPA or Maximum Time frame and the student will be allowed to re-set both their MTF and CGPA. Because a Change of Program re-sets a student's CGPA and MTF, students may only request one change of program.

Repeated Courses

General Education Courses

A student may repeat courses for which an "F," "D," "C," or "W" was earned. When a student repeats a course for the purpose of raising a failing grade, the highest grade will be used in calculating the student's cumulative grade point average. However, all courses taken are calculated into credit hours attempted for the purpose of the student's Maximum Time Frame (MTF) for completion and remain on a student's transcript. Students may repeat courses only once to meet academic requirements unless otherwise limited or prohibited by program-specific academic policies.

Financial aid may be received if all other eligibility requirements are met.

A student making a grade of "D" may advance if desired and so long as the student's CGPA remains above the minimum GPA required for the program Courses that are taken and then retaken are both counted towards attempted hours, and the highest grade will be used in calculating the student's CGPA.

Core Courses

Students must complete all core courses in the sequence prescribed in the curriculum. When applicable, all prerequisite course(s) must be completed before beginning an advanced course. Courses considered prerequisite courses are delineated in the catalog and course syllabi.

Students must pass all core courses in a quarter/term in order to progress to the next quarter/term in the program. Students are required to pass all courses in the program in order to graduate from the program.

If a student fails one core course in a quarter/term:

- If the failed course is a Progression Course, they face dismissal from the program. Courses considered progression courses are delineated in the catalog and on the course syllabi.
- If the failed course is not a Progression Course, the course must be made up as per the *Make-Up Policy* published in the Catalog.

Second Degree

Students who wish to earn an additional degree from City College must apply for admission to the College. Upon acceptance to the College, courses previously completed at City College that count toward the new degree program completion requirements will be applied following completion of a degree audit. Only courses previously completed with a final grade of "D" or higher will be applied. Students may request transfer of credit for coursework completed at other institutions following Transfer Courses policies.

Credits attempted and grades earned in the student's new program of study will count towards determining satisfactory academic progress. The College does not offer dual majors.

Student Code of Conduct Policy and Academic Integrity

Code of Conduct

City College tries to instill in each student a love of learning, commitment to fair and honorable conduct, and respect for the safety and welfare of others. It also strives to protect its community of interests from the influence of those who do not embody these values in their conduct, and to protect the integrity of the College and its property for the benefit of all.

Because the College is an educational institution, the Code of Conduct has education as its foremost aim; it is not intended to be a solely punitive process nor a substitute for the law. The Code aims to sustain an environment conducive to learning, promote a climate of mutual respect, foster open dialogue that promotes learning and understanding, promote individual well-being and personal development, and encourage the application of ethical decision-making in the daily life of its students.

This Code applies to all students enrolled in the College, in their conduct both on campus and at clinical affiliates.

Expectations of Conduct

City College expects that all students act honorably, demonstrating a keen sense of ethical conduct. The College expects that its students behave respectfully, providing particular consideration for other people and for property. The College expects that students act responsibly, being accountable for the safety and wellbeing of themselves and others.

Students are expected to be trustworthy, demonstrating honest character upon which others may rely with confidence.

The College reserves the right to suspend or dismiss a student for conduct that is determined to be detrimental to the best interest of the College, its students, its community of interests and its clinical affiliates, or which violate the College's campus security and safety policies. Instances of misconduct that are considered violations of this Code and could result in disciplinary action against a student include, but are not limited to the following:

Honor and Ethics

- Attempting, assisting, knowingly permitting, or encouraging any conduct in violation of the College's expectations of students' conduct.
- Failure to comply with the direction of the College's Staff when they are acting in performance of their duties.
- Failure to comply with and/or knowingly violating the terms of any disciplinary action imposed or any mutual agreement reached in accordance with this Code.
- Disrupting the normal operations of the College
- Misuse of computer or network resources, including but not limited to, use of another individual's identification or password; using computer or network resources to send anonymous, obscene, or abusive messages; using computer or network resources in violation of copyright laws; use of computer or network resources to interfere with the normal operation of the Center's computer system; or any other violation of policies established by the College's Information Technology Department.
- Violating the College's rules, regulations, or policies.
- Violating any government laws or ordinances.

Respect and Consideration

- Causing physical harm to any person, animal or living object.
- Physical abuse, verbal abuse, threats, intimidation, harassment, coercion, or other conduct that threatens or endangers the emotional or physical health or safety of any person.
- Behaving in a manner that a reasonable person would consider alarming, disorderly, or indecent.
- Violating the College's *Sexual Misconduct Policy*.
- Using social media or electronic devices in a manner that violates this Code, including but not limited to, cyber bullying.

Responsibility and Accountability

- Violating the College's Alcohol and Drug Abuse Policy including but not limited to:
- Use or possession of alcoholic beverages. This includes being in the presence of alcoholic beverages and not consuming
- Intoxication
- Use or possession of any illegal drug or controlled substance (including prescribed medications) except as expressly permitted by law
- Manufacture or distribution of any illegal drug or controlled substance (including prescribed medications) except as expressly permitted by law
- Using, possessing, or storing any weapon on campus without prior written authorization from the Campus Director
- Using, possessing, or storing fireworks, explosives, or dangerous or flammable chemicals on the College's premises
- Intentionally misusing, damaging, or tampering with fire or other safety equipment, including covering or disabling a smoke detector
- Possession or use of items commonly associated or interpreted as drug paraphernalia (hookah, bongs, pipes, etc.)
- Participating in behavior considered to be inappropriate by a college staff member

Trustworthiness and Honesty

- Intentional misrepresentation, including but not limited to:
 - Providing false or misleading information to a college staff member.
 - Filing a false or misleading report with college staff or law enforcement officials.
 - Manufacture, use, intended use, purchase or possession of false documents, identification, or access devices
 - Impersonating another individual through email, social media, electronic communication or other means
- Violating the Honor Code of the College
- Using or being in or on the College's premises not during business hours without express permission from a college staff member
- Misuse of property
- Destroying, damaging, or vandalizing property

- Inappropriately participating in the Code of Conduct and/or investigation processes, including but not limited to:
 - Providing false or misleading information during an investigation
 - Filing a conduct complaint as a means to retaliate, harass, coerce, or intimidate another person
 - Attempting to influence the impartiality of the parties involved in the investigation and/or incident prior to or during the course of the investigation; harassment or intimidation of the parties involved in the investigation and/or incident, during, or after a conduct meeting or hearing
 - Influencing another person to engage in any of the aforementioned acts

For the Code of Ethics applicable to each program, please refer to each program's section in Part 2 of the Catalog.

Honor Code & Academic Integrity

The responsibility for maintaining standards of unimpeachable honesty in all academic and clinical work falls upon every student who is part of City College. The Honor Code is based on the fundamental expectations that every student at the College will conduct themselves according to the Honor Code and will not tolerate actions of others which would violate the Honor Code.

Dishonesty, in any form, will NOT be tolerated. Dishonesty will result in disciplinary action up to and including termination. Examples of violations of the Honor Code are but not limited to the following:

Classroom Dishonesty

- Cheating on course or proficiency examination by the use of books, notes, or other aids when these are not permitted, or by copying from another student.
- Submission of similar papers or projects in more than one course without permission of the instructor(s).
- Collusion: Two or more students helping each other on an examination or assignment, unless specifically permitted by the instructor.
- Use of substitutes: Sitting in for another student at an examination or permitting someone else to sit in for oneself.
- Plagiarism: The submission of another's work as one's own original work without proper acknowledgment of the source.
- The concealment, destruction, or inappropriate modification of classroom or other instructional material, i.e., posted exams, library materials, laboratory supplies, audio/visual aids and computers or computer programs.

Examination Dishonesty

- Altering an examination or a paper after it has been graded for the purpose of fraudulently requesting a revision of the grade.
- Use of unauthorized materials for an exam or project (e.g., use of calculators on an exam where they have been prohibited, beepers, cell phones, PDA's or other electronic devices).
- Circulation and/or use of unauthorized "old exams".
- Unauthorized possession of an exam, even if inadvertent or un-premeditated.

Clinical Dishonesty

- Falsification of patient or institutional records.
- Concealing information or activities that affect the safety and well-being of patients.
- Inappropriate violation of patient confidentiality.
- Engaging in activities that are contrary to professional codes of ethics or standards or practice as defined by the program, clinical facility, or professional associations.
- Misrepresenting one's role as a student to an institution, patient, or to the public at large so as to mislead them in their expectations of the student's competencies and/or limitations.
- Failure to seek supervision for clinical activities or neglecting to obtain required clearance for such clinical activities.
- Falsifying or altering any clinical documentation.
- Signing in or out for other students.

Professional Dress Code

Students are required to always wear program-issued uniforms and ID Badges while in the classroom or in the clinical setting. Uniforms must be clean and in good repair.

Shoes

Open toe shoes including sandals, flip-flops, etc. may NOT be worn in the classroom or at the clinical setting. In the clinical setting, shoes must be black or white only.

Baseball Caps/Hats

At no time should a student wear a baseball cap or hat in the classroom or clinical setting. Students may wear a baseball cap or hat during field internships only.

Hair

Hair must be kept clean and neatly trimmed. Those with long hair must wear it tied up at all times. Hair dyed an unnatural color is not permitted.

Facial Hair

Beards and mustaches are permitted if they are kept neatly trimmed. Those students without beards or mustaches must be clean shaven at all times

Makeup and Jewelry

Makeup suitable for daytime wear is acceptable. Cologne, after shave and perfume is permitted if not overpowering. Necklaces, chains and bracelets must be worn under one's shirt or blouse. One earring per ear is permitted provided they do not hang below the lobe of the ear. No additional facial or body piercings are allowed.

Nails

Nails should be always kept short in length. Only clear nail polish is permitted.

Students not appropriately attired will be sent home and will receive a negative evaluation for that rotation. Appropriate attire is essential to being a professional in today's work environment. Students are encouraged to dress in appropriate school attire. Some educational programs/departments have specific dress requirements which are detailed in lab/clinical guidelines handbook

Anti-Hazing Policy

It is the policy of City College that there will be no initiations (hazing) connected with any College-sponsored club/organization. All clubs/ organizations formed by City College students must be approved by the Campus Director and are under the strict auspices of a staff or faculty member. Any deviation from this policy may result in immediate dismissal.

Coaching and Counseling Policy

The primary purpose of coaching and counseling is to assure compliance with the rules and regulations of the College and its programs, which have been established as an aid in achieving the objectives of the programs. Proper administration of the coaching and counseling policy has the advantage of development of the student body, and personnel, so that the teamwork necessary to achieve the objectives is easily obtained.

City College's policies are designed in a manner that is corrective rather than punitive, in a uniform, consistent and non-discriminatory manner.

There are various forms of discipline, as part of the Coaching and Counseling Policy, each recognized by the College as equitable and proper. The administration of discipline by the College toward a student may embrace all of the forms in a progressive manner or may include only one of them, depending upon the severity of the offense. The proper implementation of this policy rests ultimately upon the exercise of judgment. No guide will substitute for this, although certain general rules may be recommended as an aid to arrive at equitable solution to disciplinary problems.

The forms of coaching, counseling and discipline which may be utilized include:

Coaching

Instances of student misconduct which are not so serious as to warrant a counseling or dismissal may be corrected by verbally coaching the student. The coaching session will be recorded and maintained in the student's academic record. Signature by the student is not required for a coaching session.

Counseling

Instances of student misconduct which are not so serious as to warrant dismissal may be corrected through counseling. The counseling should be formalized in writing on a record of counseling and maintained in the student's academic record. Signature or confirmation of receipt by the student may be required for a counseling. This counseling will also include a plan of action, required by the student and further recommendations, if any.

Examples include but are not limited to any of the following reasons:

Warning	Examples
Academic	Failure to maintain a passing average
Attendance	Excessive absence or lateness
Clinical Performance	Failure to demonstrate proficiency in required competencies
Professional Behavior	Failure to behave in a professional manner; failure to report an accident or incident; sleeping at an inappropriate time; soliciting from patients, etc.

Probation

Upon recognition that a problem exists which are not so serious as to warrant dismissal but too serious for just a written counseling or a problem that has not been corrected through remedial actions or recommended remedial actions have not been completed by the required date, a student may be placed on probation. Students on probation will be given written notice of their status and a copy of the notice will become part of their academic record. The length of the probationary period will be stated on the notification. Probation status may occur as a result of but is not limited to any of the following reasons:

Reason	Length of Probation	Further actions if reason has not been corrected by the end of the probationary term
A failing average at the midpoint evaluation of a course	Remainder of the quarter/term	See <i>Progression Policy</i>
A failing average of a non-progression course at the final evaluation of the quarter/term	The next quarter/term	See <i>Progression Policy</i>
Lack of professional ethics and conduct Lack of Cooperation Inability to accept his/her role as a student Inappropriate behavior towards patients, staff or classmates Refusal to comply with professional appearance codes Creating disruptions in the classroom or clinical area	Remainder of the academic year	See <i>Disciplinary Policy</i>
Excessive absenteeism or lateness	Remainder of the quarter/term	See <i>Attendance Policy</i>
Consistently poor clinical performance as demonstrated by evaluation results	Remainder of the academic year	See <i>Disciplinary Policy</i>
Failure to meet financial obligations	Remainder of the quarter/term	See <i>Disciplinary Policy</i>

Students placed on probation for two consecutive quarters/terms will remain on probation for the remainder of their enrollment at the College.

Suspension

A student who violates their probationary status or depending on the seriousness of a specific incident or situation, a student may be suspended from the College.

If a student faces dismissal from their program as a result of an incident that requires an investigation, the student may be suspended pending the results of the investigation. Students who are suspended will be given verbal and/or written notice of their status and a copy of the written notice will become part of their academic record. The reason and length of the suspension period will be stated. Any absences accumulated while on suspension will not count toward their total absences allowed for the academic year, however, any material missed must be made up as per the Make-Up Policy published in the Institutional Catalog. Any clinical rotation hours missed must be made up.

Absences accrued by students placed on suspension for any reason other than a pending investigation (e.g. failing to meet financial obligations, failing to meet clinical clearance requirements, failing to follow published policies, etc.) will count toward the student's allowed absences.

Students may face emergency suspension for violating the College's Campus Security and Safety Policy.

Dismissal

Dismissal from a program may result from, but not be limited to, any of the following reasons:

- If terms of probationary status have not been met
- Excessive lateness
- Excessive absences
- Poor clinical performance
- Inability to meet clinical requirements
- Any affective behavioral problem
- Falsification of any paperwork
- Any cheating on assessments (e.g., exams or quizzes, writing assignments, etc.)
- Failure to meet financial obligations
- Failure to maintain satisfactory academic progress
- Violation of any regulation or policy as detailed in the Catalog or in each program handbook.

The student will be informed of the reason for the dismissal. The student will receive a dismissal letter and a copy will be maintained in the student's record. The student may appeal the dismissal according to the procedure outlined in the *Appeals Policy* as published in the Catalog.

Withdrawal Policy

A student who intends on terminating their studies at City College must officially notify the College. There are two types of withdrawal, Voluntary and Unofficial:

Voluntary Withdrawal from City College

A student who wishes to withdraw is required to inform the institution in writing of his/ her intention to withdraw by completing a [Withdrawal Form](#). The last day of educational related activity (LDA) determines whether grades are recorded for the quarter. If the LDA is within the first half of the course, a grade of "W" is given. If the LDA occurs within the last half of the course (through week 6), the student will receive a final letter grade in each course. The grade of "W" has no effect on the student's cumulative grade point average or successful completion of courses. However, the grade of "W" is added to hours attempted within the specified maximum time frame.

Unofficial Withdrawal from City College

An unofficial withdrawal is one where either

- the College has not received notice from the student that the student has ceased or will cease attending their program and the student has not attended classes for 7 consecutive days, or
- a student has notified the program of their intent to withdraw but does not complete the Withdrawal Form

An unofficial withdrawal will automatically result in the student being dismissed from their program. Students who unofficially withdraw from their program will receive a grade of "F" and may affect the student's future eligibility for Financial Aid.

Dispute/Complaint/Grievance/Appeals Policy

Students enrolled at City College have the right to submit a dispute, complaint/grievance and appeal any decisions according to the procedures described below. The person filing the dispute complaint/grievance or appeal must be the alleged victim of unfair treatment as it relates to their status as a student. A dispute, complaint/grievance or appeal cannot be filed on behalf of another person.

Dispute of a Grade

Disputes of final course grades must be made within five (5) calendar days of the date when the grade becomes final (posting in the student portal). Students should first attempt to resolve the dispute with their Program Chair. If the student is not satisfied with the results, they may submit a detailed written statement to the Director of Academic Affairs.

The Director of Academic Affairs may direct a grade to be changed only when it is determined through the process that a final grade was influenced by any of the following:

- A personal bias or arbitrary rationale.
- Grading was not in compliance with stated course syllabi.
- The result of a clear and material mistake in calculating or recording grades or academic progress

Complaints/Grievances

A student can submit a complaint or grievance regarding a decision that has been made that is NOT related to an academic or disciplinary decision. Any complaint or grievance submitted must include the following information:

- A statement as to how the decision or action is unfair and has adversely affected you including which institutional policies, program policies, state and/or federal laws have not been followed.
- The name of the person(s) against whom the grievance is filed (if applicable).
- A statement as to how said person is responsible for the action or decision (if applicable).
- Remedy sought

Complaint/Grievance Process

Step 1: If a student has a complaint that is not related to an academic decision or disciplinary decision, they should present the complaint in writing and signed by the student to their Program Chair within five (5) business days of its occurrence. The Program Chair will review and investigate the complaint and report any findings and/or corrective actions to be made, back to the student within five (5) business days.

If a student does not feel comfortable submitting their complaint to their Program Chair, they can start at Step 2.

Step 2: If the student feels that the complaint has not been resolved in Step 1, or they don't feel comfortable submitting their complaint to their Program Chair, it can be submitted to the Campus Director as a representative for the Program Committee. The complaint must be in writing and signed by the student, within five (5) business days of the student receiving the response from their Program Chair or from when the incident occurred. A Program Committee meeting will be convened to which the student may or may not be asked to attend, within ten (10) business days from when the student submits the grievance to the Campus Director. A grievance presented to the Campus Director will be answered in writing within five (5) business days of the date of the Program Committee meeting.

Appeals

If a student believes that a decision made does not follow any of the College's published policies, procedures, and processes, they may submit a written appeal to the Campus Director.

An appeal is an official request for a decision made by the College to be reviewed and revised or overturned because of a belief that it does not follow one or more of the College's published policies, procedures, and processes, or that a policy was inequitably applied.

Appeals, and any accompanying documentation, must be submitted to the Campus Director by the student using the College's Appeal Request Form which can be found in the Resources section of the College's website. The appeal must be received within five business days from when the student was provided the written decision and must clearly include the published policy that they believe was not followed or inequitably applied as well as the remedy being sought.

To be considered, appeals must include any published policy, procedure and/or process that the student believes was not followed or inequitably applied.

An appeal request will be reviewed and, if it meets the required criteria, the Campus Director will convene a Program Committee meeting within ten business days of receipt of the appeal request. It is at the discretion of the Campus Director whether the student will be invited to attend the meeting. If the student is invited to attend the meeting and fails to do so, a decision may be made in their absence. The student will receive written notification of the Program Committee's decision within five business days of the Program Committee meeting.

If a dismissed student does not submit an appeal within the required time frame, the decision will become final.

Once the decision is final, the student will be considered a dismissed student for all purposes (including, but not limited to, readmission, financial aid, etc.).

Appeals Process

The following is the process to be followed for students who would like to appeal a disciplinary decision:

Step 1: The student should submit in writing and signed by the student, the appeal to the Campus Director as a representative of the Program Committee, within five (5) business days of the student receiving the decision from their Program Chair. A Program Committee meeting will be convened to which the student may or may not be asked to attend, within ten (10) business days from when the student submits the appeal to the Campus Director. An appeal presented to the Campus Director will be answered in writing within five (5) business days of the date of the Program Committee meeting.

Step 2: If the appeal is not resolved in Step 1, the final appeal shall be presented to the Chief Operating Officer, in writing and signed by the student, within five (5) business days of the student receiving the decision from the Campus Director. The Chief Operating Officer will have fifteen (15) business days to review the appeal and any related documents (i.e., student's files, attendance sheets, etc.). The Chief Operating Officer may consult or convene a committee to review the final appeal. A meeting with the student may be requested or required to obtain additional information as deemed necessary by the Chief Operating Officer or the committee. Any decisions made by the Chief Operating Officer, or the committee will be final.

No representation, including but not limited to, legal representation, will be allowed during any meeting held as part of the grievance/appeal process.

Students who feel a grievance is not resolved by the college to their satisfaction may refer their grievance to: Executive Director, Commission for Independent Education, Florida Department of Education 325 W. Gaines Street, Suite 1414, Tallahassee, Florida, 32399-0400, (888) 224-6684 and/or ABHES, 6116 Executive Blvd., Suite 730, North Bethesda, MD 20852; (301) 291-7550

Distance Education students, who have completed the internal institutional grievance process and the applicable state grievance process, may appeal non-instructional complaints to the FL - SARA PRDEC Council. For additional information on the complaint process, please visit the FL - SARA Complaint Process <http://www.fldoe.org/sara/complaint-process.html>

Programs of Study

Program Delivery Method

City College offers programs in a blended/Hybrid delivery format.

Blended/Hybrid programs occur when students take some of their coursework via distance method and on-campus.

All externships, clinical courses and internships are offered via residential format.

Through these courses, the college can supplement the traditional campus-based curriculum with courses that meet the unique educational needs of the student by providing online learning opportunities and integrating distance learning techniques and technology. Courses offered in distance learning instructional delivery (online) are designated as such in the course descriptions.

Note: Fully distance education courses offered at the Non-main Campuses are facilitated through a consortium agreement and delivered by City College, Hollywood.

General Education

City College believes that a sound foundation in liberal arts (general education) is an essential complement to its many career- oriented programs. General education courses ensure that graduates are effective communicators, creative thinkers, as well as collaborative with an awareness of and appreciation for people, cultures, along with contemporary, national, and global issues. Specific General Education requirements are listed under each program. Students who complete BSC1093, BSC1094, or BSC1085, BSC1086 at the Associate of Science level as a program requirement, may use these as their Science component in the Bachelor of Science program.

Students pursuing an associate degree or bachelor's degree must include subject matter (courses) from the Humanities; Mathematics and the Sciences; and the Social Sciences. We recommend that students take at least one course from each of the following areas: English, Humanities, Sciences, Mathematics, Behavioral Sciences, and Social Sciences.

English		Quarter Credit Hours
ENC1100	College English	4
ENC1101	Composition I	4
ENC1102	Composition II	4
LIT2000	Introduction to Literature	4
Humanities		
HUM1020	Humanities	4
IDS2350	Critical Thinking	4
PHI2014	Introduction to Philosophy	4

SYG2430	Marriage and The Family	4

Bachelor of Science Programs

Bachelor of Science in Healthcare Administration

Campus: Hollywood

The purpose of the Bachelor of Science in Healthcare Administration is to provide students who have already earned a health-related associate degree with the knowledge and skills required to pursue entry-level positions in healthcare management. Students with a non-health care background with sufficient transfer credit to start as a 3rd year student are also eligible for entry. This program encourages a generalist approach to health administration. The focus is to help students acquire knowledge and develop skills in hospital organization and management, marketing, accounting, and budgeting, human resources administration, strategic planning, law and ethics, and health information systems. Students also gain knowledge in oral and written communication, and social/behavioral sciences.

Graduates may perform several duties in a healthcare setting including creating and implementing strategies and processes to deal with the various business challenges. This may include delivery system integration, regulatory requirements, technological innovations, and restructuring. Managers must also have the ability to assess and improve efficiency and quality. The curriculum is designed to train students as generalists in healthcare.

The curriculum consists of 184 credit hours presented over sixteen (16) quarters. Applicants for this program must have earned an AS degree and/or be in junior standing or have earned a combination of life credit, credit by means of examination and transfer credit totaling a minimum of 72 credits.

Program schedule based on full-time enrollment: 176 weeks; 1840 lecture contact hours.

Program Delivery: Full Distance

Program Outcomes

- Assess and promote community health especially through the evaluation of healthcare policies.
- Analyze and assess management systems such as operations and human resources within a healthcare organization.
- Understand the ethical and legal principles and laws in the healthcare industry
- Understand leadership, governance, roles, and responsibilities within healthcare organizations.
- Communicate complex ideas verbally and through the written word.
- Apply financial, economic analysis, organizational development, and behavioral theories to create strategies to improve health care organizations.

Curriculum

Major Core		Quarter Credit Hours
APA1111	Accounting I	4
HSA1100	Basics of the US Health Care System	4

Total Credits Required for Graduation:		184

Associate Degree Programs

Associate of Science in Allied Health, Medical Assisting

Campus: Hollywood

The Associate of Science Degree is comprised of technical training in a given field combined with a General Education component. General Education courses allow for further development of listening, speaking, reading, and writing skills while technical training will aid the student in achieving his/her full potential for promotion and advancement within a chosen field. Courses are comprised of a Major component, Concentration Core, General Education unit and required electives to complete degree requirements. Students are eligible to sit for The National Board Certifications in medical specialties including Medical Assistant, Phlebotomy Technician, and Medical Office Assistant which are offered at City College by arrangement with the National Center for Competency Testing (NCCT).

The Medical Assisting major provides students with opportunities to develop secretarial, laboratory, and clinical skills required to work closely with physicians and other healthcare professionals. Students apply their classroom knowledge to actual work experiences while on externship at a College approved healthcare facility. This curriculum is comprised of a total of ninety-two (92) credit hours presented over eight (8) quarters.

Program schedule based on full-time enrollment: 80 weeks; 760 lecture, 220 lab and 160 extern contact hours.

Program Delivery: Blended

Program Outcomes

- Communicate verbally, non-verbally, and in writing with the patient and other health care team members in an appropriate and effective manner.
- Demonstrate knowledge and model professional skills and behavior by applying the ethical principles, legal principles, safety measures, and regulations affecting the profession
- Demonstrate competency in administrative skills such as patient account management, insurance pre-authorization, referral management, phone protocols, and conducting front desk tasks
- Demonstrate proficiency of phlebotomy procedures, and patient care procedures on the clinical level including examining room procedures, clinical laboratory procedures and emergency care, (including inpatient care, injection room procedures, and trauma care)
- Appropriately apply medical terminology in patient care, services, and all aspects of workplace management

Programmatic Entry Requirements

Applicant wishing to enroll in this program must follow the clinical clearance policy of the college.

Associate of Science in Diagnostic Medical Sonography

Campus: Hollywood

The Associate of Science Diagnostic Medical Sonography is a comprehensive entry-level program designed to prepare competent entry-level general and adult cardiac sonographers and vascular technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. The program is designed to include practical didactic lectures integrated with hands-on laboratory in the ultrasound training center. The students will learn the operation of various equipment and have the opportunity to practice scanning on fellow students to develop skills prior to the 700 hours of clinical training. The curriculum consists of a total of one hundred twenty five (125) credit hours presented over seven (7) quarters.

Program schedule based on full-time enrollment: 74 weeks; 985 lecture, 180 lab and 700 extern contact hours.

Program Delivery: Blended

Program Outcomes

Upon completion of the program, graduates will be able to:

- Obtain relevant patient history by oral interview and/or chart review for clinical data such as lab tests or previous imaging scans to enable optimum diagnostic sonograms.
- Operate ultrasound equipment safely and accurately to obtain sonographic images of diagnostic quality.
- Maintain strict hygienic practices in the lab, including hand washing, wearing gloves, cleaning the transducers, etc.
- Perform appropriate exam protocols to record normal anatomy or pathology in the body.
- Perform appropriate exam protocols when executing Doppler scans for evaluation of physiologic data.
- Perform appropriate exam protocols for each area of specialization: obstetrics and gynecology; abdomen and superficial structures; vascular; and adult echocardiography.
- Record data for interpretation and analysis for the supervising physician
- Analyze sonograms using critical thinking skills to compose a preliminary report.
- Demonstrate excellent therapeutic communication skills with patients and with others in the health care setting.
- Respect the privacy of the patients by adhering to HIPAA regulations at all times.
- Conduct oneself in an ethical and legal manner in accordance with the Code of Professional Conduct of the Society of Diagnostic Medical Sonographers. which includes the following in its preamble:
 - Sonographers shall act in the best interests of the patient.
 - Sonographers shall provide sonographic services with compassion, respect for human dignity, honesty, and integrity.
 - Sonographers shall respect the patient's right to privacy, safeguarding confidential information within the constraints of the law.
 - Sonographers shall maintain competence in their field.
- Sonographers shall assume responsibility for their actions.

Programmatic Entry Requirements

In addition to the regular Admission requirements, students applying to the Diagnostic Medical Sonography program must have the following admissions criteria:

1. Students wishing to enroll in this program must take a placement test and achieve a minimum score indicated below:
 - a. SLE a minimum score of 17 or
 - b. WBST a minimum score of 267 in verbal and quantitative skills
2. Students enrolling in this program must meet the clinical clearance policy of the college.
3. Student must hold personal health insurance.
4. Student must have a VECHS background check.

Student must complete an Acknowledgement of Florida Statue Section 456.0635

Associate of Science in Emergency Medical Services

Campus: Hollywood

The Emergency Medical Services Major combines Emergency Medical Technician and Paramedic courses, core general education coursework, and field/clinical externship experiences in the pre-hospital, ambulance, and Fire Rescue service industries. The program follows the latest edition of National Emergency Medical Services Education Standards and prepares the graduate with the knowledge, skills, and professionalism necessary to obtain certification as an Emergency Medical Technician and Paramedic to practice the art and science of out-of-hospital medicine in conjunction with medical direction.

The objective of the program is to prepare competent entry-level Paramedics in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains with or without exit points at the Advanced Emergency Medical Technician and/or Emergency Medical Technician, and/or Emergency Medical Responder levels.

Graduates of this program, with successful certification as a paramedic, may qualify for positions within the out-of-hospital emergency service industry, both in the public and private sectors. Students are eligible to sit for or National Registry certification testing upon successful completion of the EMT and paramedic programs, including successful performance on comprehensive written and practical exams inclusive of all training, skills, and completion of the general education component. The curriculum is comprised of one hundred and eleven (111) credit hours presented over nine (9) quarters.

Program schedule based on full-time enrollment: 90 weeks; 700 lecture, 440 lab and 588 extern contact hours.

Program Delivery: Residential, Blended

Program Outcomes

- Demonstrate comprehension of the roles and responsibilities of an entry-level EMT-P.
- Demonstrate the ability to think appropriately and professionally including responding with appropriate speed in any given emergency situation.
- Understand and apply appropriate psychomotor skills in EMS and Paramedic settings.
- Demonstrate application of professional standards to the affective learning domains, integrity, empathy, self-motivation, appearance, personal hygiene, self-confidence, communications, time management, teamwork, diplomacy, respect, patient advocacy, careful delivery of service, and cultural competence.
- Be certified in Basic Life Support for healthcare providers, Advanced Life Support, Pediatric advanced Life support, Pre-hospital trauma life support, and Advanced medical life support.
- Demonstrate that they are competent team leaders directing patient care.
- Demonstrate competence in using body substance isolation equipment.
- Demonstrate knowledge of appropriate scene safety for all care providers, the patient, and bystanders.
- Demonstrate knowledge of the body, how it works, and how medication affects it.

Programmatic Entry Requirements

In addition to the regular Admission requirements, applicants applying to the Emergency Medical Services program must have the following admissions criteria:

- Applicants must take the SLE placement test and achieve a minimum score of 17
- Applicants must meet the clinical clearance policy of the college
- Applicant must hold personal health insurance
- Applicant must have a VECHS background check
- Applicant must complete an Acknowledgement of Florida Statute Section 456.0635

Course Certification Requirements

Prior to beginning Emergency Medical Technician I:

- Hold and maintain a current CPR certification from an approved Florida Department of Health, Bureau of EMS, U.S. recognized healthcare provider course (i.e., Heart Association, American Red Cross).

Prior to beginning the Paramedic I:

- Hold and maintain a current CPR certification from an approved Florida Department of Health, Bureau of EMS, U.S. recognized healthcare provider course (i.e., Heart Association, American Red Cross).
- Be in the application process to take the State of Florida EMT license examination.

Prior to entry into Paramedic II:

- The student must be EMT Florida state certified in accordance with 64J FAC and provide proof of current Florida State EMT certification.

In addition, Florida State EMT certification must be maintained throughout the program

Graduation Requirements

Students must meet all graduation requirements as detailed in Academic Policies and Procedures and must successfully pass the skills practical exam delivered by the Medical Director (or their designee) at the completion of the major core courses.

Associate of Science in Radiologic Technology

Campus: Hollywood

The Associate of Science Radiologic Technology program is a comprehensive entry-level program designed to prepare competent entry-level radiologic technologists to perform diagnostic imaging examinations on patients in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. The program is designed to include practical didactic lectures integrated with hands-on laboratory in the ultrasound training center. Here the students will learn the operation of various equipment and have the opportunity to practice scanning on fellow students to develop skills prior to the 1102 hours of clinical training. The curriculum consists of a total of 134 credit hours presented over seven (7) quarters.

Program schedule based on full-time enrollment: 74 weeks; 960 lecture, 140 lab and 1102 externship/clinical contact hours.

Program Delivery: Blended

Program Outcomes

Upon completion of the program, graduates will:

- Be clinically competent
- Communicate effectively
- Use critical thinking and problem-solving skills
- Grow and develop professionally

The program identifies benchmarks to provide a standard by which the effectiveness of the program in achieving its goals can be evaluated. An assessment plan is in place and can be obtained from the program director.

Program Objectives

Upon graduation, students will receive a certificate of completion and are prepared to meet the requirements to sit for the written examination of the American Registry of Radiologic Technologists (ARRT) and to function as entry level Radiologic Technologists. Specifically, the program's objectives are to have our graduates perform effectively by:

- Applying knowledge of radiation protection for patients, self, and others
- Applying knowledge of anatomy, positioning and radiographic technique to accurately demonstrate anatomical structures on a radiograph
- Determining exposure factors to achieve optimum radiographic technique with a minimum of radiation exposure to patients
- Examining radiographs for the purpose of evaluating technique, positioning and other pertinent technical qualities
- Exercising discretion and judgment in the performance of medical imaging procedures
- Providing patient care essential to radiographic procedures
- Recognizing emergency patient conditions and initiating life-saving treatment within their scope of practice

Student Learning Outcomes

- Students will apply positioning skills
- Students will demonstrate appropriate use of equipment
- Students will practice radiation protection
- Students will employ proper techniques
- Students will use effective oral communication skills with healthcare professionals and patients
- Students will demonstrate effective presentation skills and written communication skills
- Students will adjust all necessary elements to perform non-routine exams
- Students will appropriately evaluate images
- Students will demonstrate professional behavior
- Students will understand ethical decision making
- Students will understand the importance of obtaining membership in professional organizations and obtaining certifications for advanced modalities
- Students will complete the program
- Students will pass the ARRT National Certification on the first attempt
- Graduates will be satisfied with their education and training
- Graduates will be gainfully employed within 6 months
- Employers will be satisfied with graduates' training

Programmatic Entry Requirements

In addition to the regular Admission requirements, students applying to the Radiographic Technology program have the following admissions criteria:

1. Students wishing to enroll in this program must take a placement test and achieve a minimum score indicated below:
 - a. SLE a minimum score of 17 or
 - b. WBST a minimum score of 267 in verbal and quantitative skills
2. Students enrolling in this program must meet the clinical clearance policy of the college.
3. Student must hold personal health insurance.
4. Student must have a VECBS background check.

5. Student must complete an Acknowledgement of Florida Statute Section 456.0635

Associate of Science in Surgical Technology

Campus: Hollywood

The Surgical Technology Program at City College is a comprehensive entry level program designed to prepare the student for a rewarding career that is academically challenging and professionally rewarding. Students will take a variety of didactic and clinical courses with a focus on the Patient Simulation Center that will provide “real life” scenarios of a demanding clinical environment. The integration of lecture, simulation and clinical will help the student transition from the academic/clinical environment to the profession upon graduation. Students will be required to complete 750 hours of clinical training in the hospital setting. The curriculum is comprised of one hundred and three (103) credits over eight (8) quarters.

Program schedule based on full-time enrollment: 80 weeks; 680 lecture, 200 lab and 750 extern contact hours.

Program Delivery: Blended

Program Outcomes

To prepare competent entry-level surgical technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

Program Goals

Cognitive Domain The student will:

- Comprehend the fundamental concepts of Human Anatomy and Physiology, Pathophysiology, Microbiology, and infectious process and recognize their relationship to safe patient care.
- Understand the principles of safe patient care in the preoperative, intra-operative and postoperative settings.
- Recognize the interdependent role of the surgical technologist with the other team members and ancillary service providers.

Psychomotor Domain The student will:

- Develop and apply fundamental surgical assisting skills through practice and evaluation in the clinical setting.
- Accurately apply the principles of asepsis across the spectrum of common surgical experiences
- Employ the Standard Precautions and other recognized safe practice guidelines in every surgical setting.

Affective Domain The student will:

- Recognize the variety of patients’ needs and impact of their personal, physical, emotional, and cultural experiences on rendering patient care.
- Demonstrate professional responsibility in performance, attitude, and personal conduct.
- Practice within the confines of the recognized scope of practice within the healthcare community to provide optimal patient care.

Programmatic Entry Requirements

In addition to the regular Admission requirements, students applying to the Surgical Technology or the Anesthesia Technology program have the following admissions criteria:

1. Students wishing to enroll in this program must take a placement test and achieve a minimum score indicated below:
 - a. SLE a minimum score of 17 or
 - b. WBST a minimum score of 267 in verbal and quantitative skills
2. Students enrolling in this program must meet the clinical clearance policy of the College.
3. Student must hold personal health insurance.
4. Student must have a VECHS background check.
5. Student must complete an Acknowledgement of Florida Statute Section 456.0635.

Programmatic Requirements

1. Students are required to become Association of Surgical Technologists (AST) members.
2. As per programmatic accreditation students are required to participate in the Certified Surgical Technologists (CST) exam prior to graduation.

Transfer of Current Certified Surgical Technologist Certification

City College will accept persons with a current certified Surgical Technologist Certification into the Associate of Science in Surgical Technology program. Specific details can be found under the Transfer Credit Policy as published in this catalog.

Associate of Applied Science in Veterinary Technology

Campus: Hollywood, Gainesville (Ceased Enrollment)

The Veterinary Technology Program at City College is a comprehensive entry-level program designed to prepare the student for a career as a veterinary technician. Students will take a variety of didactic and hands-on clinical courses, covering all the areas in which technicians will be expected to perform in the workplace. Externships performed at working clinics will provide 'real-life' scenarios of a demanding clinical environment. The integration of lecture, demonstration and hands-on practice will help the student transition from the academic/clinical environment into the workplace upon graduation. Students will be required to complete 300 hours of externship at a local clinic. The curriculum is comprised of one hundred and one (101) credits over seven (7) quarters.

Program schedule based on full-time enrollment: 70 weeks; 710 lecture, 400 lab and 300 extern contact hours.

Program Delivery: Blended

Program Outcomes

- Demonstrate and apply knowledge, physical skills and behaviors required for entry-level employment in the field of veterinary technology.
- Model a self-sufficient Veterinary Technician who displays positive values, integrity, honesty, empathy, and professionalism.
- Understand the veterinary professions as a whole and remain aligned with professional standards and regulations and participate in professional organizations.
- Increase the professional standards of the industry.
- Demonstrate leadership skills and help colleagues expand knowledge and improve skills.

Programmatic Entry Requirements

In addition to the regular admission requirements, students applying to the Associate of Applied Science in Veterinary Technology program have the following admissions requirements:

- Students wishing to enroll in this program must take the SLE placement test and achieve a minimum score of 17.
- Student must have a VECHS Level I background check.
- Student must hold personal health insurance.

It is recommended that students enrolling in this program are vaccinated for the following:

- Hepatitis B series
- MMR (Measles, Rubella, and Mumps)
- Tetanus (Td) booster within the last ten years
- Rabies series

It is recommended that students enrolling in this program be tested for:

- Absence of Tuberculosis (TB)
- Negative PPD skin test within the last 6 months (2-step PPD or single step PPD as part of an annual series) or a negative chest x-ray

Progression Policy

ATE2657C Anesthesia and Surgery for Veterinary Nurses: Students must pass the Midterm with a grade of 70% or better to participate in the clinical component of the course. Students will have one attempt to retake the midterm. If a student cannot participate in the clinical component of the course, they will receive a grade of "F" and will need to follow the policies as dictated in the Repeat Course Policy.

Clinical/Laboratory Guidelines

Please refer to the program's handbook for the complete rules and regulations pertaining to the program's clinical and lab component.

Diploma Programs

Emergency Medical Technician

Campus: Gainesville
Hollywood

The Emergency Medical Technician (EMT) program follows the latest edition of National Emergency Medical Services Education Standards and prepares the graduate with the knowledge, skills, and professionalism necessary to obtain certification as an Emergency Medical Technician to practice the art and science of out-of-hospital medicine in conjunction with medical direction. Students are eligible to sit for or National Registry certification testing upon successful completion of the EMT program including successful performance on comprehensive written and practical exams inclusive of all training, skills, and completion of the general education component.

The objective of the program is to prepare competent entry-level Emergency Medical Technicians in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains.

This program is comprised of twenty-seven (27) credit hours presented over twenty eight (28) or thirty three (33) weeks.

Program schedule based on full-time enrollment: 28 weeks; 190 lecture, 100 lab and 96 extern contact hours.

Program Delivery: Blended

Program Outcome

- Demonstrate comprehension of the roles and responsibilities of an entry-level EMT-P.
- Demonstrate the ability to think appropriately and professionally including responding with appropriate speed in any given emergency situation.
- Understand and apply appropriate psychomotor skills in EMS settings.
- Demonstrate application of professional standards to the affective learning domains, integrity, empathy, self-motivation, appearance, personal hygiene, self-confidence, communications, time management, teamwork, diplomacy, respect, patient advocacy, careful delivery of service, and cultural competence.
- Be certified in Basic Life Support for healthcare providers
- Demonstrate that they are competent team leaders directing patient care.
- Demonstrate competence in using body substance isolation equipment.
- Demonstrate knowledge of appropriate scene safety for all care providers, the patient, and bystanders.
- Demonstrate knowledge of the body, how it works, and how medication affects it.

Programmatic Entry Requirements

In addition to the regular Admission requirements, students applying to the Emergency Medical Technician program must have the following before attending classes:

1. Students enrolling in this program must meet the clinical clearance policy of the college.
2. Student must hold personal health insurance.
3. Student must have a VECHS background check.
4. Student must complete an Acknowledgement of Florida Statute Section 456.0635

Medical Assistant

Campus: Hollywood
Gainesville

The Medical Assistant Diploma program provides students with opportunities to develop secretarial, laboratory, and clinical skills required to work closely with physicians and other health care professionals.

Students apply their classroom knowledge to actual work experiences while on externship at a College approved health care facility.

Students are eligible to sit for the National Board Certification to become a National Certified Medical Assistant (NCMA) which are offered at City College by arrangement with the National Center for Competency Testing (NCCT).

The curriculum consists of a total of forty-four (44) credit hours presented over four (4) quarters.

Program schedule based on full-time enrollment: 44 weeks; 280 lecture, 220 lab and 160 extern contact hours.

Program Delivery: Blended

Program Outcome

- Communicate verbally, non-verbally, and in writing with the patient and other health care team members in an appropriate and effective manner.
- Demonstrate knowledge and model professional skills and behavior by applying the ethical principles, legal principles, safety measures, and regulations affecting the profession.
- Demonstrate competency in administrative skills such as patient account management, insurance pre-authorization, referral management, phone protocols, and conducting front desk tasks.
- Demonstrate proficiency of phlebotomy procedures, and patient care procedures on the clinical level including examining room procedures, clinical laboratory procedures and emergency care, (including inpatient care, injection room procedures, and trauma care).
- Appropriately apply medical terminology in patient care, services, and all aspects of workplace management.

Programmatic Requirements

Students must meet the clinical clearance policy of the college.

Paramedic

Campus: Hollywood

The Paramedic Diploma program includes field/clinical externship experiences in the pre-hospital, ambulance, and Fire Rescue service industries. The program follows the latest edition of National Emergency Medical Services Education Standards and prepares the graduate with the knowledge, skills, and professionalism necessary to obtain certification as a Paramedic to practice the art and science of out-of-hospital medicine in conjunction with medical direction.

To prepare competent entry-level Paramedics in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains with or without exit points at the Advanced Emergency Medical Technician and/or Emergency Medical Technician, and/or Emergency Medical Responder levels. Graduates of this program, with successful certification as a paramedic, may qualify for positions within the out-of-hospital emergency service industry, both in the public and private sectors. Students are eligible to sit for National Registry certification testing upon successful completion of the paramedic program. Successful completion of the program includes passing scores on comprehensive written and practical exams, required skills and completion of all clinical and field hours.

The curriculum is comprised of sixty one (61) credit hours presented over five (5) quarters.

Program schedule based on full-time enrollment: 55 weeks; 280 lecture, 340 lab and 492 extern contact hours.

Program Delivery: Blended

Program Outcomes

- Demonstrate comprehension of the roles and responsibilities of an entry-level EMT-P.
 - Demonstrate the ability to think appropriately and professionally including responding with appropriate speed in any given emergency situation.
 - Understand and apply appropriate psychomotor skills in EMS and Paramedic settings.
 - Demonstrate application of professional standards to the affective learning domains, integrity, empathy, self-motivation, appearance, personal hygiene, self-confidence, communications, time management, teamwork, diplomacy, respect, patient advocacy, careful delivery of service, and cultural competence.
 - Be certified in Basic Life Support for healthcare providers, Advanced Life Support, Pediatric advanced Life support, Pre-hospital trauma life support, and Advanced medical life support.
 - Demonstrate that they are competent team leaders directing patient care.
 - Demonstrate competence in using body substance isolation equipment.
 - Demonstrate knowledge of appropriate scene safety for all care providers, the patient, and bystanders.
 - Demonstrate knowledge of the body, how it works, and how medication affects it.

Programmatic Entry Requirements

In addition to the regular Admission requirements, students applying to the Paramedic program must have the following admissions criteria:

1. Students wishing to enroll in this program must take a placement test and achieve a minimum score indicated below:
 - a. SLE a minimum score of 17 or
 - b. WBST a minimum score of 267 in verbal and quantitative skills
2. Students enrolling in this program must meet the clinical clearance policy of the college.
3. Student must hold personal health insurance.
4. Student must have a VECHS background check.
5. Student must complete an Acknowledgement of Florida Statute Section 456.0635.

Graduation Requirements

Students must meet all graduation requirements as detailed in Academic Policies and Procedures and must successfully pass the skills practical exam delivered by the Medical Director (or their designee) at the completion of the major core courses.

Major Core		Quarter Credit Hours
EMS1671	Paramedic I	8
EMS1090L	Paramedic I Laboratory	4
EMS2690	Paramedic I Externship	2
EMS2672	Paramedic II	8
EMS2091L	Paramedic II Laboratory	4
EMS2691	Paramedic II Externship	2
EMS2673	Paramedic III	5

EMS2092L	Paramedic III Laboratory	3
EMS2692	Paramedic III Externship	4
EMS2674	Paramedic IV	4
EMS2093L	Paramedic IV Laboratory	3
EMS2693	Paramedic IV Externship	4
EMS2675	Paramedic V	3
EMS2094L	Paramedic V Laboratory	3
EMS2694	Paramedic V Externship	4
		Total Credits Required for Graduation: 61

Course Descriptions

Advertising (ADV)

ADV1002 Advertising

This course provides an overview of the promotional activities within business. Promotional calendars, public relations techniques, advertising methods, and procedures are explored and analyzed.

Prerequisites: None

Credit Hours: 4

Animal Science Technology (ATE)

 For Gainesville students ATE designated courses may be taught in it's entirely or lab portions at the separate educational center location, 2400 SW 13th St., Gainesville, FL 32608.

ATE1003C Introduction to the Veterinary Profession

This course is designed to introduce students to the veterinary profession. Topics of discussion include history associated with veterinary and veterinary technicians' roles, professional organizations, descriptions of typical and non-traditional veterinary-related careers, laws and regulations governing the veterinary profession, common breeds of domestic animals, restraining, behavior and medical terminology.

Prerequisites: None

Credit Hours: 4

ATE1030C Laboratory Skills for Veterinary Technicians

This course introduces students to the clinical laboratory; its capabilities as a diagnostic support program for both research and clinical medicine; and the technologies associated with both traditional and less familiar clinical applications. The laboratory portion of this course should prepare students to perform testing, manage and maintain laboratory facilities and technologies, and, finally, introduce recognition skills and preliminary interpretation of disease concerns in animals. Microbiology basics and its use in the veterinary medical setting are introduced.

Prerequisites: ATE1003C and ATE1112C

Credit Hours: 5

ATE1112C Animal Anatomy & Physiology

This course is designed to teach students the anatomy & physiology of common domestic animals (monogastric mammal, ruminant mammal, bird, and reptile). Anatomy & physiology will be taught by organ system. Students will dissect preserved specimens so they are able to visualize and identify each structure and system that was taught in lecture. Comparative and gross anatomy will be stressed, and microscopic anatomy will only be discussed.

Corequisites: ATE2621C

Credit Hours: 5

ATE1312C Office Management & Reception Skills

This course helps technician students to understand various front-desk and business management aspects of veterinary practice. The material presented explains sources of hospital revenue; shows how to represent and market preventative health programs and other products and services; introduces methods of record keeping utilizing computer and hard copy files, creating inventory control procedures and records; and introduces materials for client education and communications.

Laboratory exercises reinforce necessary computer skills utilizing actual clinic software programs.

Prerequisites: None

Credit Hours: 4

ATE1602C Animal Nutrition

This course is designed to teach students about general nutrition principles & comparative digestive anatomy. Students then explore the basic nutritional needs of common companion animals, including dogs, cats, horses, cattle, birds, small mammals, reptiles, sheep, and goats. Nutritional needs of diseased cats and dogs will be explored.

Prerequisites: None

Corequisites: None

Credit Hours: 3

ATE1648C Veterinary Imaging Techniques

This course is designed to teach veterinary technology students the skills they'll need to perform imaging such as radiology, ultrasonography & endoscopy. Proper technique and safety are emphasized. Other imaging modalities, such as CR, fluoroscopy, and MRI, are discussed and demonstrated. Special studies included are myelography, urethral contract studies, arthroscopy and others that elucidate normal and abnormal organ systems. Further diagnostic technologies focusing on specific organ systems or supporting specific diagnostic and therapeutic actions will be preliminarily introduced here and presented in greater depth throughout other appropriate areas of course studies.

Prerequisites: ATE1003C and ATE1112C

Credit Hours: 4

ATE1943 Externship A: Office Management & Reception

This course is designed to provide students with real-world experience in the animal hospital. Students will spend a total of 90 hours over 10 weeks at a local animal hospital, performing office manager and reception duties.

Prerequisites: ATE1003C and ATE1312C

Credit Hours: 3

ATE2102C Test Preparation & Skills Review

This course will provide the student with the necessary review in order to prepare them to take the Veterinary Technician National Examination (VTNE). Materials covered will include a comprehensive review of the skills and knowledge covered in the exam.

Prerequisites: ATE1030C, ATE1648C, ATE2610C, ATE2620C, ATE2622C, and ATE2657C

Credit Hours: 3

ATE2411C Veterinary Dentistry

In this course, students will learn about oral anatomy, disease, preventive medicine, and treatments, including how to perform a dental cleaning and chart oral health findings. Client education regarding the impact of overall health that oral health has on a pet is emphasized.

Prerequisites: ATE2657C

Credit Hours: 3

ATE2610C Veterinary Pharmacology

This course introduces the integration of mathematical principles as they pertain to practical clinical scenarios in veterinary medicine. These actions include configuring fluid administration rates, therapeutic drug dosing calculations, dilutions, and conversions in various categories of measure. Commonly used drugs are introduced, organized by class and what diseases they treat. Any special considerations given to particular drugs (safety issues, special administration techniques, etc.) are presented as they arise. Special considerations of controlled substances, drug compounding and online pharmacies are discussed. Pharmacy organization, laws and maintenance is taught. Hands-on practice includes drug administration, prescription dispensing and pharmacy organization & inventory.

Prerequisites: MAT1030, MGF1106, or MTB1344

Credit Hours: 4

ATE2620C Disease Problems in Companion Animals

This course is designed to introduce students to common diseases of companion animals. Diseases are organized by body system. Zoonosis, neoplasia, genetic disorders, and diseases that are contagious are highlighted, and an introduction to epidemiological science & oncology is given. The students are introduced to diagnostics and technologies employed in support of the medical sciences. Specialties in each area of veterinary medicine, both at the veterinary and veterinary technician levels, are discussed with their respective lectures to highlight the scope of clinical medicine for technician students.

Prerequisites: ATE1112C

Credit Hours: 5

ATE2621C Veterinary Nursing & Technical Skills

The course is designed to engage students in the theory and practice of the fundamental principles of veterinary nursing through student care of the sick and hospitalized patient with emphasis on patient care, monitoring and record keeping. Students are introduced to real-life clinical scenarios that include discussions about preventative health surveillance and implementation of a healthcare maintenance program. The course emphasizes an introduction to the study of animal disease and epidemiological aspects of disease processes including zoonotic and reportable diseases. Public and occupational health and safety for veterinary technicians is included. Discussion and elaboration of quarantine principles as an essential component to disease control solidifies a sound foundation in understanding disease processes and principles of disease control in public and private settings. Laboratory actions include development of preventative healthcare programs for specified animal groups in varying holding settings or in the wild. Appropriate technical skill exercises will be integrated into laboratory sessions.

Corequisites: ATE1112C

Credit Hours: 5

ATE2622C Advanced Veterinary Nursing & Technical Skills

The course is designed to build on the skills introduced in Veterinary Nursing and introduce new, more advanced nursing skills and technical procedures. This course is designed to involve and engage the student in care of the sick and hospitalized patient with emphasis on patient care, monitoring, emergency procedures, and record keeping.

Prerequisites: ATE1030C and ATE2621C

Credit Hours: 5

ATE2657C Anesthesia and Surgery for Veterinary Nurses

This course introduces veterinary technician students to basic principles of veterinary operating room physical organization, technologies, and protocols for procedural preparation of the surgical facility and the surgical patient. Emphases in studies include techniques and protocols for asepsis, pack preparation and sterilization, and aspects of the surgical nursing role pre-, during and post-procedure. The course includes a preliminary review of elective, emergency, non-elective, and special surgical procedures that are encountered in most clinical and research animal programs. An overview of basic concepts in veterinary anesthesia and pain management, relevant medical terminology, pharmacology, technologies, and techniques in anesthesia and pain management are presented. Laboratory exercises will implement and enforce principles of anesthesiology through hands-on experiential actions.

Prerequisites: ATE1112C and ATE2621C

Credit Hours: 5

ATE2680C Animals in Research & Exhibition

This course will focus on husbandry, diseases & veterinary care of animals in the laboratory for use as research models. Additionally, the husbandry, diseases & veterinary care of animals exhibited to the public through zoos and aquariums will be examined. Medical and ethical issues of the use of animals will be discussed. Factors such as environmental enrichment and mental stimulation will be highlighted. Wildlife rehabilitation facilities and principles will be taught.

Prerequisites: None

Credit Hours: 4

ATE2945 Externship C: Veterinary Technician

This externship course is designed to provide students with real-world experience in the animal hospital. Students will spend a total of 210 hours over 11 weeks at a local animal hospital, performing veterinary technician duties.

Prerequisites: ATE1030C, ATE1648C, ATE2411C, ATE2610C, and ATE2620C

Credit Hours: 7

Applied Accounting (ACG, APA)

ACG3085 Accounting concepts and applications

An examination of accounting practices commonly used in the business world. Balance sheets, profit and loss statement and general accounting procedure will be part of the topics discussed. General accounting knowledge will be presented in order to prepare students for the kinds of accounting problems they may face in a managerial role. This course is designed as a refresher for accounting students and a general introduction for non-accounting students.

Prerequisites: Junior standing

Credit Hours: 4

APA1111 Accounting I

The student is introduced to the fundamental principles of accounting as they relate to a sole proprietorship business. The course also includes: starting a double entry accounting system, journalizing business transactions, and posting journal entries to the ledger.

Prerequisites: None

Credit Hours: 4

🖥️ Offered Online

APA2121 Accounting II

This course continues the accounting cycle with coverage of bank reconciliations, accounting for fixed assets, methods of inventory evaluation, accounting for bad debts, notes receivable and payable.

Prerequisites: APA1111

Credit Hours: 4

🖥️ Offered Online

APA2132 Accounting III

This course continues the accounting cycle with coverage of partnerships, corporations, long-term liabilities, investments and international operations, and analysis of financial statements.

Prerequisites: APA2121

Credit Hours: 4

APA2501 Payroll Accounting

The study of payroll accounting includes calculating the payroll and payroll taxes along with the preparation of those records and reports that form the foundation of an efficient payroll system.

Prerequisites: APA1111

Credit Hours: 4

APA4803 Corporate Federal Income Taxation

This course covers tax knowledge beyond Individual Federal Income Taxation. The course covers the following topics: Tax Research, Corporate Formations, Corporate Distributions, Tax Levies, Acquisition and Reorganizations, Gift Tax, and Estate Tax.

Prerequisites: APA2121

Credit Hours: 4

Biological Sciences (BSC or MC)

BSC1020 Biology and the Human Experience

This course examines the nature of living organisms with an emphasis on humankind. It examines the evolution of life and the structure and functions of cells. It surveys human biology including anatomy and physiology, human inheritance, disease, and nutrition. Emphasis is placed on the implications and applications of the material to current issues.

Prerequisites: None

Credit Hours: 4

 Offered Online

BSC1050 Human Anatomy & Physiology

This course will establish structural systems of the human body, gross and microscopic anatomy. Structure and function of cells and different tissues and the mechanisms for maintaining homeostasis. Organ localization and structural characteristics will be examined including the Integument, Skeletal, Muscular, Cardiovascular, Respiratory, Nervous/Lymphatic, Digestive, Endocrine, Urinary, and Reproductive systems. Upon completion of the course, students will know and recognize normal anatomy and physiology, to understand the anatomical significance for their health profession and clinical application.

Prerequisites: None

Credit Hours: 6

BSC1085 Anatomy and Physiology I

This course is a study of the structure, function, and chemistry of the human body considering the following topics: body organization, the cell, tissues, membranes, glands, the integumentary system, the skeletal system, the muscular system, the nervous system, and the special senses.

Prerequisites: None

Corequisites: BSC1085L

Credit Hours: 4

BSC1085L Anatomy and Physiology I Lab

The purpose of this course is to provide the student with laboratory exercises in anatomy and physiology. The course is intended to enhance topics covered in the lecture course. Students will use models, dissection material and laboratory equipment to explore the structure of the skeletal, muscular, and nervous systems.

Prerequisites: None

Corequisites: BSC1085

Credit Hours: 1

BSC1086 Anatomy and Physiology II

This course is the study of structure, function, and chemistry of the human body considering the circulatory system, the respiratory system, the digestive system, the urinary system, fluid and electrolytes and the reproductive system.

Prerequisites: None

Corequisites: BSC1086L

Credit Hours: 4

BSC1086L Anatomy and Physiology II Lab

The purpose of this course is to provide the student with laboratory exercises in anatomy and physiology. The course is intended to enhance topics covered in the lecture course. Students will use models, dissection material and laboratory equipment to explore the structure of the circulatory, respiratory, digestive, urinary, and reproductive systems.

Prerequisites: None

Corequisites: BSC1086

Credit Hours: 1

BSC1093 Anatomy and Physiology of Structural Systems

This course is a study of the structural systems (bone, muscle, etc.) of the human body and the principles of human physiology. The course is designed to enable the student to better understand the health problems of the patient and the physician's diagnosis and treatment.

Prerequisites: HSC1531 or BSC1094

Credit Hours: 4

 Offered Online

BSC1094 Anatomy and Physiology of Organ Systems

This course is a study of the organ systems (digestive, reproductive, etc.) of the human body and the principles of human physiology.

Prerequisites: HSC1531 or BSC1093

Credit Hours: 4

🖥️ Offered Online

MCB2010 Microbiology

The purpose of this course is to provide the student with a general overview of the field of microbiology. Specifically, the student will learn about cell biology, bacteria, viruses, and the components of the immune system.

Prerequisites: None

Corequisite: MCB2010L

Credit Hours: 4

🖥️ Offered Online

MCB2010L Microbiology Lab

The purpose of this course is to provide the student with laboratory exercises in microbiology. The course is intended to enhance the topics covered in the lecture course. Students will use laboratory equipment (microscope, slides, stains, etc.) and materials (Petri dish, cultures, etc.) to examine microorganisms.

Prerequisites: None

Corequisite: MCB2010

Credit Hours: 1

Computer General Studies (Non-Computer Science) (CGS)

CGS1100C Computer Applications I

This course provides an introductory study of computer topics. Students completing this course will have a solid understanding of how to use a personal computer, access information using the Internet, send and receive email, manage computer files, and utilize operating system tools. In addition, the students will receive hands-on experience with word processing, spreadsheets, and presentation software. The students will also gain an understanding of ethical issues related to the use of computers. This course utilizes classroom lectures and hands-on computer exercises. No prior experience with computers is assumed.

Prerequisites: None

Credit Hours: 4

🖥️ Offered Online

Chemistry (CHM)

CHM1020 Introduction to Chemistry

This course provides an overview of elementary principles of modern chemistry, including basic measurements, chemical bonding, chemical reactions, stoichiometry, concentration of solutions, and chemical nomenclature.

Prerequisites: MAT1030 or MGF1106

Credit Hours: 4

Developmental Psychology (DEP)

DEP2004 Human Growth and Development

Study of normal human growth and development from conception throughout the life span. Focus is on fundamental changes within an individual's domains of physical, cognitive, and psychosocial development and of interrelationship between the environment and the individual.

Prerequisites: None

Credit Hours: 4

🖥️ Offered Online

Diagnostic Sonography (DS)

DS1210 Abdominal Sonography I

This course is designed to introduce the student to the concepts of sonographic imaging of the abdomen with a focus on relational anatomy of the abdominal organs. Emphasis is placed on the normal sonographic appearance of the abdominal organs and vasculature, along with normal clinical and laboratory findings specific to the system. This includes the liver, gall bladder and biliary system, pancreas, spleen, aorta, inferior vena cava and kidneys. Didactic lectures will be complemented by instructor directed “hands-on” scanning in the scanning lab.

Prerequisites: BSC1050, MAT1030, and PHY1020

Credit Hours: 3

DS1211L Abdominal Sonography I Lab

This course is designed to complement the Abdominal Sonography I lecture material, and to introduce the student to sonographic imaging of the abdomen, with a focus on relational anatomy of the abdominal organs. This course consists of instructor directed “hands-on” scanning in the scanning laboratory. In this course the student should learn the basic foundation of patient preparation, scanning techniques and protocols for performing an abdominal exam. Emphasis is placed on the normal sonographic appearance of the abdominal organs and vasculature along with normal clinical and laboratory findings specific to the system. This includes the liver, gall bladder and biliary system, pancreas, spleen, aorta, inferior vena cava and kidneys. Imaging critique should be performed throughout the course.

Prerequisites: BSC1050, MAT1030, and PHY1020

Credit Hours: 2

DS1220 Obstetric and Gynecologic Sonography I

This course is designed for the student to learn the basic foundation of patient preparation, scanning techniques and protocols for performing gynecologic and obstetric exams. It is also designed to familiarize the student with normal sonographic imaging of the female reproductive system through appropriate usage of transabdominal (TAB) and transvaginal (TVA) probes. Study content should include the normal anatomy of the uterus, vagina, ovaries, and fallopian tubes. In addition, pre-menopausal and post-menopausal sonographic anatomy will be introduced. The anatomic relationships of the genital organs with other structures in the pelvis such as the urinary bladder, ureters, rectum, and muscles will be highlighted. Various congenital anomalies of the uterus, fallopian tubes and ovaries will also be covered. Normal and abnormal first trimester pregnancies are introduced, in addition to normal second and third trimester pregnancies.

Prerequisites: BSC1050, MAT1030, and PHY1020

Credit Hours: 3

DS1220L Obstetric and Gynecologic Sonography I Lab

This course is designed to complement the Obstetric and Gynecologic Sonography I lecture material, and to familiarize the student with normal sonographic imaging of the female reproductive system. This course consists of instructor directed “hands-on” scanning in the scanning laboratory. In this course the student should learn the basic foundation of patient preparation, scanning techniques and protocols for performing gynecologic and obstetric exams. Appropriate usage of transabdominal (TAB) and/or transvaginal (TVA) probes will be covered. Practice should include the normal anatomy of the female reproductive system, as well as its anatomic relationship to other structures in the pelvis. Various concepts related to congenital anomalies of the uterus, fallopian tubes and ovaries will be covered. Sonographic evaluation of normal first, second and third trimester pregnancies should be practiced. Sonographic evaluation of abnormal first trimester pregnancy will also be considered, including viability of the fetus, measuring the Crown Rump Length and nuchal translucency.

Prerequisites: BSC1050, MAT1030, and PHY1020

Credit Hours: 1

DS1230 Sonographic Physics and Instrumentation I

This course is designed to present the basic concepts and principles of ultrasound physics as a foundation for understanding image interpretation. The student should learn the wave theory of sound and how it travels through various media. They should gain knowledge of the principles of how piezoelectricity converts sound energy to electrical energy in ultrasound transducers. They should gain mastery of instrumentation of the equipment and understand how the use of gain compensates for attenuation. They should acquire an understanding of harmonics, different types of resolution, basic Doppler principles and m-mode.

Prerequisites: BSC1050, MAT1030, and PHY1020

Credit Hours: 6

DS1250 Patient Care

This course is designed to introduce the student to the fundamental principles of proper patient care. Content includes history of medical sonography, and the professional role of an ultrasound sonographer in the laboratory setting. Concepts of sonographer - patient interactions are emphasized, including, maintaining privacy, handling emergency situations, vital signs, utilizing proper body mechanics, maintaining aseptic techniques, following infection control procedures and Universal Standard Precautions when handling hazardous materials. The student will learn about HIPAA regulations and multicultural considerations in patient treatment.

Prerequisites: BSC1050, MAT1030, and PHY1020

Credit Hours: 1

DS1310 Abdominal Sonography II

This course is designed to be a continuation of Abdominal Sonography I with an emphasis on pathophysiology, and recognizing pathologic changes on ultrasound scans of organs in the upper abdomen, such as the liver, kidneys, pancreas, spleen, and vasculature, etc. Students will review multiple images of various disease states and critically evaluate them using the sonographic criteria of “SSALT” - size, shape, acoustic characteristics, location and transonicity.

Prerequisites: DS1210

Credit Hours: 3

DS1310L Abdominal Sonography II Lab

This “hands-on” laboratory scanning course is designed to complement the Abdominal Sonography II lecture material. This course includes an emphasis on recognizing pathologic changes on ultrasound scans of organs in the upper abdomen, such as the liver, kidneys, pancreas, spleen, vasculature, etc. Students will review concepts of various disease states and critically evaluate them using the sonographic criteria of “SSALT” – size, shape, acoustic characteristics, location and transonicity. Imaging critique should be performed throughout the course.

Prerequisites: None

Credit Hours: 1

DS1330 Sonographic Physics and Instrumentation II

This course is designed as a continuation of Sonographic Physics and Instrumentation I. The student should gain a comprehensive knowledge of ultrasound physics and instrumentation. This course reinforces concepts and offers more advanced material in ultrasound theory and instrumentation, fluid hemodynamics, color-flow Doppler, spectral analysis, power Doppler, harmonics, artifacts, etc. Students should gain a comprehensive knowledge of how this imaging modality affects clinical operation, including bio effects, quality assurance, and PAC systems for storing and archiving images. Emphasis will be placed on preparing students to pass the Sonography Principles & Instrumentation (SPI) Examination of the ARDMS. Review and practice questions will be incorporated.

Prerequisites: DS1230

Credit Hours: 6

DS1390 Clinical Education I

This course is designed to provide the student with a foundation for scanning for those who are focusing on either General, Obstetric and Gynecologic, Echocardiography or Vascular ultrasound, in the clinical setting. The clinical site may be a laboratory in a hospital, outpatient imaging center, or a private office setting. Students will be instructed on professional behavior expected at a clinical site, including attendance and dress code. In addition, they will receive instruction on case reports, Trajecsys reporting system, competencies, and necessary evaluation forms. Depending on which point in the program a student will be taking this course, it may serve as a first or second exposure to the clinical setting. As a first exposure to the clinical setting, the student should learn to operate equipment safely, perform basic exams and protocols with supervision, and identify and scan normal structures in the body. As a second exposure to the clinical setting, the student should be honing their scanning skills and completing all scanning objectives that were not achieved in their previous clinical experience.

Prerequisites: None

Credit Hours: 3

DS1420 Obstetric and Gynecological Sonography II

This course is designed to be a continuation of Obstetric and Gynecologic Sonography I. Advanced topics, focusing on pathologic conditions that can be determined by gynecologic and obstetric ultrasound scanning will be covered. The student should learn to recognize abnormal and/or pathologic sonographic patterns of the uterus and adnexa and to correlate the findings with patient history and lab values. Normal and abnormal 2nd and 3rd trimester pregnancy sonography will be covered, including fetal number, fetal position, placental grade, and placental location. Students will review the components of a complete anatomy scan, including the ultrasound appearance of the head, neck, spine, heart, abdomen, pelvis, and extremities. Complications of pregnancy will also be discussed including IUGR, congenital syndromes, fetal disorders, multiple gestations, and placental abnormalities.

Prerequisites: DS1120 and DS1330

Credit Hours: 4

DS1421L Obstetric and Gynecological Sonography II Lab

This “hands-on” laboratory scanning course is designed to complement the Obstetric and Gynecologic Sonography II lecture material. This course covers advanced level scanning techniques, focusing on pathologic conditions that can be determined by gynecologic and obstetric ultrasound scanning. The student should learn to recognize abnormal and/or pathologic sonographic patterns of the uterus and adnexa and to correlate these findings with patient history and lab values. Normal and abnormal 2nd and 3rd trimester sonography will be covered, including fetal number, fetal position, and placental grade and location. Students will review and perfect obtaining the images that comprise the components of a complete anatomy scan. Accurate assessment of gestational age through fetal biometry techniques will be perfected. Complications of pregnancy will also be covered.

Prerequisites: DS1330

Credit Hours: 2

DS1491 Clinical Education II

This course is designed to provide the student with a foundation for scanning for those who are focusing on either General, Obstetric and Gynecologic, Echocardiography or Vascular ultrasound, in the clinical setting. The clinical site may be a laboratory in a hospital, outpatient imaging center, or a private office setting. Students will be instructed on professional behavior expected at a clinical site, including attendance and dress code. In addition, they will receive instruction on case reports, competencies, and necessary evaluation forms. Depending on which point in the program a student will be taking this course, it may serve as a first or second exposure to the clinical setting. As a first exposure to the clinical setting, the student should learn to operate equipment safely, perform basic exams and protocols with supervision, and identify and scan normal structures in the body. As a second exposure to the clinical setting, the student should be honing their scanning skills and completing all scanning objectives that were not achieved in their previous clinical experience.

Prerequisites: DS1330

Credit Hours: 3

DS1540 Sonography of Superficial Structures

This course is designed to provide the student with a basic foundation for ultrasound scanning of the thyroid glands, breast, prostate, and scrotum. It will also include the neonatal head as well as new applications in the field of musculoskeletal ultrasound, consisting of the rotator cuff of the shoulder, developmental dysplasia of the infant hip and carpal tunnel imaging. Normal anatomy and sonographic appearance of these structures will be covered, as well as common pathologic states found in these structures. Lecture time may be complemented with instructor directed hands-on scanning in the student scanning laboratory.

Prerequisites: None

Credit Hours: 3

DS1540L Sonography of Superficial Structures Lab

This “hands-on” scanning laboratory course is designed to complement the Sonography of Superficial Structures lecture material. This course should provide a basic foundation for ultrasound scanning of the thyroid glands, breast, prostate, and scrotum. It will also include the neonatal head, as well as new applications in the field of musculoskeletal ultrasound, consisting of the rotator cuff of the shoulder, developmental dysplasia of the infant hip and carpal tunnel imaging. Normal sonographic appearance of these structures will be covered, as well as common pathologic states found in these structures.

Prerequisites: None

Credit Hours: 1

DS1550 Quality Management and Operational Issues

This course is designed to focus on the components of quality leadership and operational issues in healthcare, specific to Ultrasound. The role of the various ultrasound and healthcare team members in continuous quality improvement, including quality control, process improvement, operational and leadership issues, will be discussed, as well as the legal and regulatory implications for maintaining compliance.

Prerequisites: None

Credit Hours: 1

DS1591 Clinical Education III

This course is designed to provide the student with additional exposure to scanning for those who are focusing on either General, Obstetric and Gynecologic, Echocardiography or Vascular ultrasound, in the clinical setting. Students will be honing their scanning skills and completing all scanning objectives that were not achieved in their previous clinical experience. The clinical site may be a laboratory in a hospital, outpatient imaging center, or a private office setting. Students will be instructed on professional behavior expected at a clinical site, including attendance and dress code. In addition, they will receive instruction on case reports, competencies, and necessary evaluation forms.

Prerequisites: None

Credit Hours: 3

DS1670 Echocardiography I

This course is designed to provide the student with a basic rudimentary foundation for clinical echocardiography of the adult heart. A review of normal anatomy and physiology of the heart will be presented. The student should learn the elements of a normal echocardiogram, including standard echocardiographic views of the heart chambers, valves, muscles, and the surrounding great vessels. Common heart and valvular diseases, as well as cardiomyopathies will be introduced. They should learn adult cardiac scanning protocols, and how pathology manifests on an echocardiographic scan. Students will become familiar with various modes of cardiac scanning, including M-Mode, color flow Doppler, power Doppler and continuous wave Doppler. Lecture time may be complemented with instructor directed “hands-on” scanning in the scanning laboratory.

Prerequisites: BSC1050, MAT1030, and PHY1020

Credit Hours: 3

DS1670L Echocardiography I Lab

This “hands-on” scanning laboratory course is designed to complement the Echocardiography lecture material. This course is intended to provide a foundation for clinical echocardiography scanning of the adult heart. A review of normal anatomy and physiology of the heart will be presented. The student should learn the elements of a normal echocardiogram, including standard echocardiographic views of the heart chambers, valves, muscles, and the surrounding great vessels.

They should learn adult cardiac scanning protocols, and how pathology manifests on an echocardiographic scan. Students will become familiar with various modes of cardiac scanning, including M-Mode, color flow Doppler, power Doppler and continuous wave Doppler. Imaging critique may be performed throughout the course.

Prerequisites: BSC1050, MAT1030, and PHY1020

Credit Hours: 1

DS1680 Vascular Ultrasound I

This course is designed to provide the student with content on the use of duplex Doppler Ultrasound to interrogate the extra-cranial circulation of the brain, including the carotid arteries. It will also cover interrogation of the arterial and venous circulation of the upper and lower extremities, as well as abdominal vasculature. Normal and pathological conditions will be discussed in correlation with physical findings. Didactic lectures may be complemented by instructor directed “hands-on” scanning in the scanning laboratory.

Prerequisites: BSC1050, MAT1030, and PHY1020

Credit Hours: 3

DS1680L Vascular Ultrasound I Lab

This “hands-on” scanning laboratory course is designed to complement the Vascular Ultrasound lecture material. This course should provide the student with content on the use of duplex Doppler Ultrasound to interrogate the extra-cranial circulation of the brain, including the carotid arteries. It will also cover interrogation of the arterial and venous circulation of the upper and lower extremities, as well as abdominal vasculature. Normal and pathological conditions will be discussed in correlation with physical findings. Imaging critique may be performed throughout the course.

Prerequisites: BSC1050, MAT1030, and PHY1020

Credit Hours: 1

DS1690 Clinical Education IV

This course is designed to provide the student with additional exposure to scanning for those who are focusing on either General, Obstetric and Gynecologic, Echocardiography or Vascular ultrasound, in the clinical setting. Students will be honing their scanning skills and completing all scanning objectives that were not achieved in their previous clinical experience. The clinical site may be a laboratory in a hospital, outpatient imaging center and /or private office setting. Students will be instructed on professional behavior expected at a clinical site, including attendance, and dress code. In addition, they will receive instruction on case studies, competencies, and necessary evaluation forms.

Prerequisites: None

Credit Hours: 3

DS1750 Case Studies Critiques

This course is designed to educate the student about the components of a case study in ultrasound. The goal of a case study is to accurately describe the details of a patient’s ultrasound examination findings. Students will learn to critically analyze anatomical variants, normal, and pathological sonographic findings in images. The study should begin with the patient history derived from an oral interview and patient chart information including, results of relevant lab tests, imaging exams, and possible surgical procedures. The case study should describe the patient preparation for the exam, positioning on the exam table, and the imaging protocols used by the sonographer. The student will research the pathologic findings of each case and will detail the etiology and pathogenesis of the pathology and/or disease, including sonographic manifestations and prognosis. The student will present their case studies to their peers.

Prerequisites: None

Credit Hours: 2

DS1770 Echocardiography II

This course is designed to provide the student with a basic rudimentary foundation for clinical echocardiography of the adult heart. A review of normal anatomy and physiology of the heart will be presented. The student should learn the elements of a normal echocardiogram, including standard echocardiographic views of the heart chambers, valves, muscles, and the surrounding great vessels. Common heart and valvular diseases, as well as cardiomyopathies will be introduced. They should learn adult cardiac scanning protocols, and how pathology manifests on an echocardiographic scan. Students will become familiar with various modes of cardiac scanning, including M-Mode, color flow Doppler, power Doppler and continuous wave Doppler. Lecture time may be complemented with instructor directed “hands-on” scanning in the scanning laboratory.

Prerequisites: DS1670

Credit Hours: 3

DS1770L Echocardiography II Lab

This “hands-on” scanning laboratory course is designed to complement the Echocardiography lecture material. This course is intended to provide a foundation for clinical echocardiography scanning of the adult heart. A review of normal anatomy and physiology of the heart will be presented. The student should learn the elements of a normal echocardiogram, including standard echocardiographic views of the heart chambers, valves, muscles, and the surrounding great vessels.

They should learn adult cardiac scanning protocols, and how pathology manifests on an echocardiographic scan. Students will become familiar with various modes of cardiac scanning, including M-Mode, color flow Doppler, power Doppler and continuous wave Doppler. Imaging critique may be performed throughout the course.

Prerequisites: None

Credit Hours: 1

DS1780 Vascular Ultrasound II

This course is designed to provide the student with content on the use of duplex Doppler Ultrasound to interrogate the extra-cranial circulation of the brain, including the carotid arteries. It will also cover interrogation of the arterial and venous circulation of the upper and lower extremities, as

well as abdominal vasculature. Normal and pathological conditions will be discussed in correlation with physical findings. Didactic lectures may be complemented by instructor directed “hands-on” scanning in the scanning laboratory.

Prerequisites: DS1680, DS1330

Credit Hours: 3

DS1780L Vascular Ultrasound II Lab

This “hands-on” scanning laboratory course is designed to complement the Vascular Ultrasound lecture material. This course should provide the student with content on the use of duplex Doppler Ultrasound to interrogate the extra-cranial circulation of the brain, including the carotid arteries. It will also cover interrogation of the arterial and venous circulation of the upper and lower extremities, as well as abdominal vasculature. Normal and pathological conditions will be discussed in correlation with physical findings. Imaging critique may be performed throughout the course.

Prerequisites: DS1330

Credit Hours: 1

DS1790 Clinical Education V

This course is designed to provide the student with additional exposure to scanning for those who are focusing on either General, Obstetric and Gynecologic, Echocardiography or Vascular ultrasound, in the clinical setting. Students will be honing their scanning skills and completing all scanning objectives that were not achieved in their previous clinical experience. The clinical site may be a laboratory in a hospital, outpatient imaging center and /or private office setting. Students will be instructed on professional behavior expected at a clinical site, including attendance, and dress code. In addition, they will receive instruction on case studies, competencies, and necessary evaluation forms.

Prerequisites: None

Credit Hours: 3

DS1800 Registry Review

This course is designed to provide an extensive review to prepare the student to take the American Registry for Diagnostic Medical Sonography (ARDMS) examination for those who are focusing on either Abdomen (General), OB/GYN, Echocardiography, or Vascular specialties. Students will be given practice (mock) exams. In addition, an array of topics on professionalism will be covered. The role of professional organizations, medical journals, continuing education, interviewing skills and ergonomics at the workplace are among the topics discussed.

Prerequisites General Focus - DS1210, DS1310, DS1220, DS1420

Cardiovascular Focus - DS1670, DS1770, DS1870, DS1680, DS1780

Credit Hours: 0

DS1870 Echocardiography III

This course is designed to provide the student with an extensive foundation for clinical Echocardiography of the adult heart. Expounded cardiac pathology and various cardiac procedures will be presented. Emergency Cardiac cases as well as basic Pharmacology will be introduced. The student will become familiar with the Fundamentals of Pediatric Echocardiography and Congenital heart diseases. Cardiac scanning, including M-Mode, color flow Doppler, power Doppler and continuous wave Doppler as it pertains to the diseases covered, will be instituted. Lecture time may be complemented with instructor directed “hands-on” scanning in the scanning laboratory.

Prerequisites: DS1770

Credit Hours: 3

DS1870L Echocardiography III Lab

This “hands-on” scanning laboratory course is designed to provide the students with additional clinical Echocardiography scanning of the adult heart as well as vascular ultrasound scanning. A review of normal anatomy and physiology of the heart will be presented. The student should reinforce their knowledge of the elements of a normal echocardiogram, including standard echocardiographic views of the heart chambers, valves, muscles, and the surrounding great vessels. They should practice adult cardiac scanning protocols, and how pathology manifests on an echocardiographic scan. Students will become more familiar with various modes of cardiac scanning, including M-Mode, color flow Doppler, power Doppler and continuous wave Doppler. In addition, this course should provide the student with further practice on the use of duplex Doppler ultrasound to interrogate the extracranial circulation of the brain, including the carotid arteries. It will also cover interrogation of the arterial and venous circulation of the upper and lower extremities, as well as abdominal vasculature. Normal and pathological conditions will be reviewed in correlation with physical findings. Imaging critique may be performed throughout the course.

Prerequisites: None

Credit Hours: 1

Economics (ECO)

ECO1000 Introduction to Economics

This course is designed to provide students with a general knowledge of the structure and function of economic systems with major emphasis on the American economy, its strengths, its weaknesses, its history, and its current condition. Emphasis will be placed on economics as a societal and cultural phenomenon, focusing on how it affects daily life, current events, and the future.

Prerequisites: None

Credit Hours: 4
📖 Offered Online

Emergency Medical Services (EM or EMS)

EMS1010 Anatomy and Physiology for EMS

Comprehensive course presenting basic information on structure and function of the human body. The course applies principles of anatomy and physiology to show interaction of body systems as they approach homeostasis. Each body system is presented with emphasis on cardiovascular, respiratory and the nervous system. This course meets the student Anatomy and Physiology objectives found in the US DOT, National highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Education Standards Paramedic curriculum.

Prerequisites: None

Credit Hours: 4

EMS1090L Paramedic I Laboratory

Lab skills will be introduced and practiced in conjunction with the cognitive standards being explored each week. The Paramedic I through IV Lab class objectives are to prepare the student for application of skills in the clinical and field experiences. The lab classes will also include the required National Registry portfolio psychomotor skills and scenarios.

Scenarios will be formative and summative Scenario Lab evaluations for pediatric, adult, and geriatric patients covering the following Scenario Topic Areas: Respiratory Distress/Failure, Chest Pain, Cardiac Rhythm Disturbance, Stroke, Overdose, Abdominal Pain, Allergic Reaction/Anaphylaxis, Diabetic Emergency, Psychiatric Condition, Seizure, OB/GYN, Blunt Trauma, Penetrating Trauma, Burns, and Hemorrhage.

Prerequisites: EMS1155C

Corequisites: EMS1671 and EMS2690

Credit Hours: 4

EMS1119 Emergency Medical Technician

This course provides emergency medical technician training utilizing the U.S. Department of Transportation National Standard curriculum for emergency medical technician basic. Topics include anatomy and patient assessment, patient handling and movement, assessment and treatment of traumatic injuries, assessment and treatment of medical emergencies, childbirth and pediatric emergencies, psychological and environmental emergencies, crisis intervention, extrication and transportation, and disaster management.

Prerequisites: None

Corequisites: EMS1119L and EMS1120

Credit Hours: 11

📖 Offered Online

EMS1119L Emergency Medical Technician Lab

This course consists of practice and evaluations in basic airway skills, oxygen therapy, patient lifting and moving techniques, medication administration, patient assessment, management of trauma and injuries. This course also includes the AHA BLS healthcare provider course.

Prerequisites: Physical examination by a licensed physician, and VECHS (voluntary employment criminal history search) and BLS Provider certification.

Prerequisites: None

Corequisites: EMS1119 and EMS1120

Credit Hours: 5

📖 Offered Online

EMS1120 Emergency Medical Technician Clinical Education

This clinical course will allow the student to observe and participate in all aspects of basic level support that can be provided in the prehospital setting for different age groups and different disease pathologies such as cardiac, respiratory, injuries caused by trauma and others. This will give the student the opportunity to practice the skills learned in the didactic and laboratory settings and apply their knowledge in real time situations.

Prerequisites: None

Corequisites: EMS1119 and EMS1119L

Credit Hours: 2

EMS1120 Emergency Medical Technician Clinical Education

This clinical course will allow the student to observe and participate in all aspects of basic level support that can be provided in the prehospital setting for different age groups and different disease pathologies such as cardiac, respiratory, injuries caused by trauma and others. This will give the student the opportunity to practice the skills learned in the didactic and laboratory settings and apply their knowledge in real time situations.

Prerequisites: None

Corequisites: EMS1119 and EMS1119L

Credit Hours: 3

EMS1671 Paramedic I

The course will cover introductory material including the study of Anatomy and Physiology, which includes Cells, Tissues and Organs, Chemistry, Skeletal system, Muscular System, Nervous System, Respiratory System, Endocrine System, Cardiovascular System, Lymphatic System, Digestive System, Nutrition, Metabolism, GI/GU Systems, Reproductive and Human Development.

Corequisites: EMS2180L and EMS2190

Credit Hours: 8

EMS2091L Paramedic II Laboratory

This course presents paramedic psychomotor skills from the US DOT, National highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Education Standards Paramedic curriculum. This is a laboratory course and will involve hands-on skills with manikins and other teaching tools. The student must be able to physically kneel, lift other persons to place them on a stretcher, and direct patient care. The laboratory will use training sessions and will progress to patient emergency scenarios in which the student will direct patient care. Laboratory skills must be mastered prior to the student entering any field or clinical externship.

Prerequisites: EMS1671, and EMS1090L, and EMS2690

Corequisites: EMS2672 and EMS2691

Credit Hours: 4

EMS2092L Paramedic III Laboratory

This course presents paramedic psychomotor skills from the US DOT, National highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Education Standards Paramedic curriculum. This is a laboratory course and will involve hands-on skills with manikins and other teaching tools. The student must be able to physically kneel, lift other persons to place them on a stretcher, and direct patient care. The laboratory will use training sessions and will progress to patient emergency scenarios in which the student will direct patient care. Laboratory skills must be mastered prior to the student entering any field or clinical externship.

Prerequisites: EMS2672, and EMS2691, and EMS2091L

Corequisites: EMS2673 and EMS2692

Credit Hours: 3

EMS2093L Paramedic IV Laboratory

This course presents paramedic psychomotor skills from the US DOT, National highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Education Standards Paramedic curriculum. This is a laboratory course and will involve hands-on skills with manikins and other teaching tools. The student must be able to physically kneel, lift other persons to place them on a stretcher, and direct patient care. The laboratory will use training sessions and will progress to patient emergency scenarios in which the student will direct patient care. Laboratory skills must be mastered prior to the student entering any field or clinical externship.

Prerequisites: EMS2673, EMS2692, and EMS2092

Corequisites: EMS2674 and EMS2693

Credit Hours: 3

EMS2094L Paramedic V Laboratory

This course presents paramedic psychomotor skills from the US DOT, National highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Education Standards Paramedic curriculum. This is a laboratory course and will involve hands-on skills with manikins and other teaching tools. The student must be able to physically kneel, lift other persons to place them on a stretcher, and direct patient care. The laboratory will use training sessions and will progress to patient emergency scenarios in which the student will direct patient care. Laboratory skills must be mastered prior to the student entering any field or clinical externship.

Prerequisites: EMS2674, EMS2693, and EMS2093L

Corequisites: EMS2675 and EMS2694

Credit Hours: 3

EMS2180L Paramedic I Lab

The course will consist of practice and evaluations of BLS skills including Patient Assessment, Bleeding and Fracture Management, and CPR. In addition, students will practice and evaluations in the following areas: Intravenous therapy, Intraosseous therapy and Medication Administration.

Corequisites: EMS1671 and EMS2190

Credit Hours: 3

EMS2190 Clinical Education I

The clinical course will begin with Clinical Education I and continue with Clinical Education II. It will allow the student to observe and participate in the highest level of care that can be provided in the prehospital setting.

Corequisites: EMS1671 and EMS2180L

Credit Hours: 2

EMS2280L Paramedic II Lab

The course will consist of practice and evaluations of Basic and Advanced Airway skills, including Endotracheal Intubation, Alternative Airways, Assessment of the Patient who has medical or traumatic etiology using Basic and Advanced diagnostic tools, as well as medication administration through the respiratory route. Students will participate in asynchronous coursework including lab simulations in preparation for their on-campus labs.

Prerequisites: EMS1671, EMS2180L and EMS2190

Corequisites: EMS2672 and EMS2290

Credit Hours: 4

EMS2290 Clinical Education II

The clinical course will continue with Field Internship II. It will allow the student to observe and participate in the highest level of care that can be provided in the prehospital setting; in the Anesthesia/Intubation clinical setting allowing the student to perform and/or assist in advanced airway skills; and in the Adult Emergency Room allowing the student to perform and assist in advanced airway skills, patient assessment, intravenous access, and medication administration.

Prerequisites: EMS1671, EMS2180L and EMS2190

Corequisites: EMS2672 and EMS2280L

Credit Hours: 2

EMS2380L Paramedic III Lab

The course will consist of practice and evaluations in the following areas: Skills practice and evaluations in the following disciplines EKG Interpretation, 12 Lead EKG Interpretation, Defibrillation, Cardioversion, Transcutaneous Pacing and Scenarios.

Prerequisites: EMS2672, EMS2280L and EMS2290

Corequisites: EMS2675 and EMS2390

Credit Hours: 4

EMS2390 Clinical Education III

The clinical course will continue with Field Internship II and Field Internship III, Adult Emergency Room, participate in Emergency Department Teaching Rounds, the Cardiac / Intensive Care Unit, and the Psychiatric Unit. Rotating within these departments allows the student to perform and assist in advanced airway skills, cardiac monitoring, rhythm interpretations, 12 lead placement and interpretations, defibrillation, cardioversion, Transcutaneous pacing, patient assessments with different medical morphologies with critical and noncritical emergencies as well as intravenous access and medication administrations.

Prerequisites: EMS2672, EMS2280L and EMS2290

Corequisites: EMS2390 and EMS2380L

Credit Hours: 2

EMS2480L Paramedic IV Lab

The course will consist of practice and evaluations in the following areas: AHA PALS provider course, oral scenario skills and Megacode in patients of different ages with different medical and trauma disorders as well as be evaluated in skills that have not been performed in the field or clinical setting.

Prerequisites: EMS2675, EMS2380L and EMS2390

Corequisites: EMS2490 and EMS2490

Credit Hours: 3

EMS2490 Clinical Education IV and Capstone

The clinical course will start with final Field Internship, Adult Emergency Room, Labor and Delivery Unit, and the Pediatric Emergency Room. These rotations will allow the student to perform and assist in advanced airway skills, cardiac monitoring, rhythm interpretations, 12 lead placement and interpretations, defibrillation, cardioversion, Transcutaneous pacing, patient assessments with different medical morphologies, dealing with pediatric patients with critical and noncritical emergencies as well as intravenous access and medication administrations

Prerequisites: EMS2675, EMS2380L and EMS2390

Corequisites: EMS2490 and EMS2480L

Credit Hours: 4

EMS2672 Paramedic II

The course will cover basic Pharmacology including General Principles of Pharmacology, Drug Classifications, Intravenous Therapy, and Principles of Medication Administration. Students will be taught all aspects of Medication Administration. This course will also cover Basic and Advanced Airway Management as well as medication administration via the airway and respiratory route.

Prerequisites: EMS1671, EMS2180L and EMS2190

Corequisites: EMS2280L and EMS2290

Credit Hours: 7

EMS2673 Paramedic III

This course consists of US DOT, National Highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Educations Standards Paramedic curriculum. The following areas are covered in this course Trauma: Trauma Overview, Bleeding, Chest Trauma, Abdominal and Genitourinary Trauma, Orthopedic Trauma, Soft Tissue Trauma, Head, Facial, Neck, and Spine Trauma, Special Considerations in Trauma, Multi-System Trauma, Environmental Emergencies, Pathophysiology, assessment, and management of Multi-System Trauma; Preparatory: Workforce Safety and Wellness; EMS Operations: Incident Management, Multiple Casualty Incidents, Vehicle Extrication, Hazardous Materials. This is an interactive course that coincides with lecture, skills laboratory and an externship program.

Prerequisites: EMS2672, and EMS2691, and EMS2091L

Corequisites: EMS2092L and EMS2692

Credit Hours: 5

EMS2674 Paramedic IV

This course consists of US DOT, National Highway Traffic Safety Administration, National Emergency Medical Services Core Content, Scope of Practice Model, and Educations Standards Paramedic curriculum. The areas covered are Preparatory: Medical/Legal and Ethics, EMS Systems; Life Span Development; Public Health; EMS Operations:

Principles of Safely Operating a Ground Ambulance, Air Medical, Terrorism and Disaster. This is an interactive course that coincides with lecture, skills laboratory, and an externship program.

Prerequisites: EMS2673, EMS2692, and EMS2092L

Corequisites: EMS2093L and EMS2693

Credit Hours: 4

EMS2675 Paramedic III

This course presents the objectives contained in the 2009 U.S. Department of Transportation National EMS Education Standards for Paramedic. This course stresses theory and procedures used by a comprehensive emergency medical system in advanced pre-hospital care of the emergency patient. Topics studied include the following medical emergencies: cardiology, pulmonary, neurology, endocrinology, allergies, gastroenterology, renal, toxicology, hematology, environmental conditions, communicable diseases, gynecology, obstetrics and psychiatric emergencies. The following trauma emergencies include burns, spinal, thoracic, abdominal, musculoskeletal, head, facial, soft tissue, hemorrhage and shock.

Prerequisites: EMS2672, EMS2280L and EMS2290

Corequisites: EMS2390 and EMS2380L

Credit Hours: 7

EMS2675 Paramedic V

This is the capstone course for the Paramedic portion of the program. Students will complete certification or recertification courses in BLS, ACLS, and PALS. Additional certifications such as PHTLS, NALS etc. may be offered. The final weeks of the course will be a National Registry EMT-P exam preparation and review. This is an interactive course that coincides with lecture, skills laboratory, and an externship program.

Prerequisites: EMS2674, EMS2693, and EMS2093L

Corequisites: EMS2094L and EMS2694

Credit Hours: 3

EMS2676 Paramedic IV

This course presents the objectives contained in the 2009 U.S. Department of Transportation National EMS Education Standards for Paramedic. This course stresses theory and procedures used by a comprehensive emergency medical system in advanced pre-hospital care of the emergency patient. Topics studied include the following: neonatology, pediatrics, geriatrics, abuse and assault, patients with special challenges, acute interventions for the chronic care patient, assessment-based management, ambulance operations, medical incident command, rescue awareness and operations, hazardous materials incidents and crime scene awareness.

Prerequisites: EMS2675, EMS2380L and EMS2390

Corequisites: EMS2490 and EMS2480L

Credit Hours: 8

EMS2690 Paramedic I Externship

This course continues Paramedic psychomotor skills related to patient assessment and management in the clinical setting. Skills that have been practiced in the laboratory setting, and in which students have obtained competence, will be practiced in a clinical setting under the direct supervision of an instructor or preceptor in both pre-hospital and in-hospital settings. The student will progress from initially observing (in Paramedic I) to serving as a team leader (in Paramedic V) directing patient care. Emphasis is on safety of the care providers, safety of the patient, and observing all parameters of paramedic patient care including patient confidentiality. Laboratory skills must be mastered prior to the student entering any field or clinical externship.

Prerequisites: EMS1155C

Corequisites: EMS1671 and EMS1090L

Credit Hours: 2

EMS2691 Paramedic II Externship

This course continues Paramedic psychomotor skills related to patient assessment and management in the clinical setting. Skills that have been practiced in the laboratory setting, and in which students have obtained competence, will be practiced in a clinical setting under the direct supervision of an instructor or preceptor in both pre-hospital and in-hospital settings. The student will progress from initially observing (in Paramedic I) to serving as a team leader (in Paramedic V) directing patient care. Emphasis is on safety of the care providers, safety of the patient, and observing all parameters of paramedic patient care including patient confidentiality. Laboratory skills must be mastered prior to the student entering any field or clinical externship.

Prerequisites: EMS1671, and EMS1090L, and EMS2690

Corequisites: EMS2091L and EMS2672

Credit Hours: 2

EMS2692 Paramedic III Externship

This course continues Paramedic psychomotor skills related to patient assessment and management in the clinical setting. Skills that have been practiced in the laboratory setting, and in which students have obtained competence, will be practiced in a clinical setting under the direct supervision of an instructor or preceptor in both pre-hospital and in-hospital settings. The student will progress from initially observing (in Paramedic I) to serving as a team leader (in Paramedic V) directing patient care. Emphasis is on safety of the care providers, safety of the patient, and observing all parameters of paramedic patient care including patient confidentiality. Laboratory skills must be mastered prior to the student entering any field or clinical externship.

Prerequisites: EMS2672, and EMS2691, and EMS2091L

Corequisites: EMS2673 and EMS2092L

Credit Hours: 4

EMS2693 Paramedic IV Externship

This course continues Paramedic psychomotor skills related to patient assessment and management in the clinical setting. Skills that have been practiced in the laboratory setting, and in which students have obtained competence, will be practiced in a clinical setting under the direct supervision of an instructor or preceptor in both pre-hospital and in-hospital settings. The student will progress from initially observing (in Paramedic I) to serving as a team leader (in Paramedic V) directing patient care. Emphasis is on safety of the care providers, safety of the patient, and observing all parameters of paramedic patient care including patient confidentiality. Laboratory skills must be mastered prior to the student entering any field or clinical externship.

Prerequisites: EMS2673, EMS2692, and EMS2092L

Corequisites: EMS2674 and EMS2093L

Credit Hours: 4

EMS2694 Paramedic V Externship

This course completes the Paramedic psychomotor skills related to patient assessment and management in the clinical setting. It is a capstone course where students will be spending their field experiences as team leads. Emphasis is on safety of the care providers, safety of the patient, and observing all parameters of paramedic patient care including patient confidentiality. Laboratory skills must be mastered prior to the student entering any field or clinical externship.

Prerequisites: EMS2674, EMS2693, and EMS2093L

Corequisites: EMS2675 and EMS2094L

Credit Hours: 4

English Composition (EN or ENC)

ENC1100 College English

This course provides a review of English grammar, mechanics, and paragraph development. The parts of speech are applied to the written communication process. Additional readings are included to highlight elements of composition.

Prerequisites: None

Credit Hours: 4

 Offered Online

ENC1101 Composition I

In this course, paragraph development leading to the standard 5-part essay is introduced as students achieve clear and effective writing skills. Topics discussed include grammatical instruction, the writing process, and various essay modes.

Prerequisites:

Credit Hours: 4

 Offered Online

ENC1102 Composition II

The principles of composition are studied and applied. Students obtain experience in expository writing. Methods of research and proper documentation are introduced for the preparation of reports and term papers.

Prerequisites: ENC1101

Credit Hours: 4

🖥️ Offered Online

ENC1201 Business English

This course concentrates on proper English usage for business correspondence. Business terminology, common punctuation errors, English usage, and format will be discussed. At the end of this course, the student will be able to compose effective business correspondence including memos, letters, and short reports. Special consideration is placed on purpose, scope, and audience analysis and adaptation.

Prerequisites: None

Credit Hours: 4

🖥️ Offered Online

ENC4263 Writing for Management

Students learn to communicate more effectively in writing in a wide range of technical and professional situations. Students will examine the variables at work in all writing tasks-writer, reader, information, purpose, and context-and discuss how understanding of these variables works in creating written messages with an appropriate format, tone, and level of detail. Secondary objectives include learning how to respond effectively to and edit documents produced by others.

Prerequisites: ENC1101

Credit Hours: 4

🖥️ Offered Online

Environmental Studies (EVR)

EVR1001 Living in the Environment

This course examines current environmental concerns and their management. It integrates and correlates the features of the natural environment with human activities. Topics include basic ecology, population growth, world health and hunger, energy resources, pollution, environmental regulations and, and Global Climate Change. It explores distribution and abundance of renewable and non-renewable resources and emphasizes an understanding of environmental problems and their impact on people and society.

Prerequisites: None

Credit Hours: 4

🖥️ Offered Online

Geography (GEA)

GEA1000 Geography

The study of the earth and its features, and of the distribution of life on the earth, including human life and the effects of human activity are discussed.

Prerequisites: None

Credit Hours: 4

🖥️ Offered Online

GEA4191 World Environments

This course will provide a survey of physical, economic, political, and social systems that give unique character to the relationships among world regions. Through analysis of nine world regions and the countries in each, political, demographic, economic, cultural, and environmental themes will be considered in their geographic context. The course is organized to emphasize the comparisons among world regions and the interdependent relationships that are increasing through globalization.

Prerequisites: ENC1101

Credit Hours: 4

🖥️ Offered Online

Health Care Administration (HSA)

HSA1100 Basics of the US Health Care System

This course provides students with a broad, fundamental introduction to the workings of the US Healthcare industry, including the economic, social, political, and technological forces that shape the industry. The role of state and federal government and regulatory agencies in healthcare delivery is examined.

Prerequisites: None

Credit Hours: 4

🖥️ Offered Online

HSA3160 Health Care Marketing

This course is an introduction to marketing concepts and how they are applied in the health care industry. Students will develop and apply strategies for management and marketing of health care services.

Prerequisites: HSA1100

Credit Hours: 4

 Offered Online

HSA3173 Health Care Accounting

This course serves as an introduction to financial accounting in the health care industry.

Prerequisites: APA1111

Credit Hours: 4

 Offered Online

HSA3180 Health Care Management and Leadership

This course is an in-depth examination of the application of management and organizational theory and concepts in health care institutions.

Prerequisite: MAN4151 and HSA1100

Credit Hours: 4

 Offered Online

HSA4140 Health Care Strategy

This course is a study of the organizational functions of health care facilities. Students will explore strategic planning and management within the unique context of organizations concerned with the delivery and financing of Health Care.

Prerequisites: Final Term

Corequisites: HSA4850 (CAPSTONE)

Credit Hours: 4

 Offered Online

HSA4170 Health Care Finance

This course focuses on financial management knowledge and an understanding of healthcare finance as it relates to health care organizations inclusive of hospitals, long term care facilities and home health agencies.

Prerequisites: HSA3173

Credit Hours: 4

 Offered Online

HSA4191 Health Information Systems Management

This course serves to train students in effective planning, design, management, execution, and use of various information system resources. Students will learn how to plan strategically and build the appropriate health management information technology infrastructure and understand implementation challenges to transform the way information is used and shared within and outside healthcare organizations.

Prerequisites: HSA3180

Credit Hours: 4

 Offered Online

HSA4423 Health Care Law

This course serves as an overview of health care law. Students will focus on legal issues that affect health care organizations. Topics include presentation of the legal responsibilities and constraints of health administration, nursing, and allied health practice at all levels. There will be an emphasis on health licensure, privileged communication, risk management and contemporary legal issues in health care administration.

Prerequisites: MNA1100

Credit Hours: 4

 Offered Online

HSA4502 Risk Management and Patient Safety

This course provides students with basic knowledge in the implementation of quality improvement, risk management and organizational activities and responsibilities related to quality improvement in health care delivery systems. The course examines the issues of claims management, risk financing and proactive loss control; and the integration between risk management and patient safety functions.

Prerequisites: HSA3180

Credit Hours: 4

 Offered Online

HSA4850 Health care administration capstone

In this course students will use (a) directed research, (b) client interviews, and (c) observations to construct a thesis/term paper on a selected approved topic within health care. Students must demonstrate a thorough understanding and synthesis of the ethical, legal, social, political, socio-

economic, and business issues which impact health care and health care organizations within the United States. This thesis may be (1) based on a case study of an organization and must address a specific issue, or (2) a research paper on a specific health care issue with recommendations on causes and solutions to the defined research problem.

Prerequisites: All Health Care core classes

Corequisites: HSA4140

Credit Hours: 4

 Offered Online

Health Sciences/Resources (HSC)

HSC1000 Orientation to the Health Sciences

This course provides information needed to build a foundation to those students pursuing a career in a health, medical or science related field. Topics include medical terminology, basic anatomy and physiology, disease prevention and health promotion, cultural diversity, leadership, and ethical responsibilities of healthcare workers. This course also introduces the student to medical math, infection control and OSHA Bloodborne Pathogens standards.

Prerequisites: None

Credit Hours: 4

SC1403C Medical Emergencies

This course is designed to prepare the student to handle emergency situations and procedures. In addition, students will take an American Heart Association BLS provider course.

Prerequisites: None

Credit Hours: 2

HSC1531 Medical Terminology

This course is designed to instruct students in basic principles of medical word building. The interrelationships of body structures and functions including their related terminology are stressed.

Prerequisites: None

Credit Hours: 4

 Offered Online

HSC3032 Community Health

This course examines the application of epidemiological and community health concepts in health services management. Additionally, the concepts of community organization, program planning, minority health, health care, mental health, environmental health, drugs, safety, and occupational health are also discussed.

Prerequisites: None

Credit Hours: 4

 Offered Online

HSC3661 Health Care Communication

This course focuses on health care communication and informatics. Students will analyze key health care issues with an emphasis on health care policies and initiatives that shape health care delivery. This course prepares students to contribute to health communication research, patient counseling, materials design, program management and community relations.

Prerequisites: None

Credit Hours: 4

 Offered Online

Humanities (HUM)

HUM1020 Humanities

This course examines Eastern and Western humanities, focusing on arts and ideas, with the objective of creating a greater awareness of the world community. This course examines the various cultures of the Near East, Far East, and Africa relative to the Western tradition. The cultural and aesthetic perspectives in Western humanities are also examined, with the objective of facilitating the development of personal aesthetic sensibilities.

Prerequisites: None

Credit Hours: 4

 Offered Online

Interdisciplinary Studies (IDS)

IDS2306 Contemporary American Issues

This course is designed to provide an interdisciplinary study of the major issues facing America. Topics include the environment, population, minorities, cities, crime poverty, drugs, religion, values, and foreign policy.

Prerequisites: None

Credit Hours: 4

 Offered Online

IDS2350 Critical Thinking

This is a course in practical reasoning, designed to sharpen the student's ability to analyze, evaluate, and construct arguments. There will be an appraisal of the evaluation of evidence, practice in the detection of fallacies and irrelevancies, and the testing of arguments for validity and reliability to understand how these approaches assist in decision-making. Included among these strategies will be examining assumptions, Socratic questioning, analyzing experiences, and evaluation perspectives. These strategies will be applied to a number of real-life situations.

Prerequisites: None

Credit Hours: 4

 Offered Online

IDS2904 Special Topics Directed Independent Study

This course is an open-enrollment special topics course used to cover special subject matters not presently offered. Subjects will vary based on discipline and are subject to Department Chair/Program Chair approval.

Prerequisites: Candidates must have completed a minimum of five quarters or 60 credits and must have the approval of the Program Chair.

Credit Hours: 4

 Offered Online

IDS4914 Research Methods

This course is designed to teach students qualitative and quantitative research methods of educational research. Students will learn to read research reports including experimental, descriptive, qualitative, and historical approaches. Students submit a research proposal as part of the course requirements.

Prerequisites: STA2014, ENC1101, and Senior Standing

Credit Hours: 4

 Offered Online

Literature (LIT)

LIT2000 Introduction to Literature

This is a basic course in the appreciation of good literature, which is designed to help the student learn the elements, characteristics, and terminology necessary to study poetry, drama, and the short story. Students are required to keep an extensive reading journal and to write a research paper using analytical skills acquired in the course. A variety of films are used to illustrate various techniques employed by authors.

Prerequisites: None

Credit Hours: 4

 Offered Online

Management (MAN)

MAN2021 Principles of Management

This course introduces students to the essential foundations of the supervisory/management experience. These include management schools of thought, the differences between supervision, management and leadership, effective communication, theories of motivation techniques and teamwork. The functions of management, including planning, organizing, staffing, leading, and controlling are also introduced.

Prerequisites: None

Credit Hours: 4

 Offered Online

MAN2202 Organizational Theory

This course examines the responsibilities and skills of management within the organization. Topics covered include the role of human resources in development of the organization and the employee. Motivating techniques, organizational change, team building, and trends in current organizations will also be covered. Case studies will assist in the process.

Prerequisites: GEB1011 or MAN2021

Credit Hours: 4

 Offered Online

MAN4151 Organizational Behavior and Human Resource Development

This course studies the behavior, structure, and processes of organizations. Topics such as group inter-group behavior, teamwork, motivation, communication, cultural diversity, global cultural considerations, and reward systems are studied as it relates to human resource development and training.

Prerequisites: MAN2021 or MAN2202 or GEB3444 or MNA3037

Credit Hours: 4

 Offered Online

Management-Applied (MNA)

MNA1100 Principles of Human Resources

This course is designed to familiarize students with employment laws including the Americans with Disabilities Act, the Equal Pay Act, Worker's Compensation, general provisions of OSHA, personnel practices, the hiring process, performance appraisal, employee rights and discipline, employee retention, and employee unions.

Prerequisites: None

Credit Hours: 4

 Offered Online

MNA3037 Project Management and Planning

This class is a general introduction class in project management designed to give students an exposure in the general project management concepts. This course is meant to provide students with a framework on which to build project management knowledge that relates to their own specific subset of knowledge. The class will give students a platform on which to rest the knowledge that they gain throughout the rest of the program.

Prerequisites: Junior Standing

Credit Hours: 4

 Offered Online

or MAR3414

Credit Hours: 4

Mathematics (MAT)

MAT1030 College Algebra

This course provides the student with an opportunity to experience Algebra as a process that enhances logical thinking and a discipline that has real world applications. Skills such as operations with Real Numbers, Linear Equations and Inequalities, Polynomials, Exponents, Quadratic Equations, Roots, Radicals, and Cross Multiplication of algebraic expressions are practiced.

Prerequisites: None

Credit Hours: 4

 Offered Online

Mathematics - General and Finite (MGF)

MGF1106 Topics in College Mathematics

Through a unique problem-solving approach, this course provides an insight into what mathematics is and what it accomplishes. Topics include logic, estimation, numeration systems, number theory, algebra, functions and graphs, geometry mathematical systems, probability, and statistics.

Prerequisites: None

Credit Hours: 4

 Offered Online

Mathematics - Technical and Business (MTB)

MTB1344 Algebra and Trigonometry

This course is the study of the concepts and practice of algebra and trigonometry skills. Factoring, algebraic fractions, logarithmic and exponential equations, vectoring, and graphing functions are practiced.

Prerequisites: None

Credit Hours: 4

Marketing (MAR)

MAR1011 Principles of Marketing

The fundamental concepts of marketing principles and their functions are examined. Marketing dynamics and strategic planning are explored in the marketing environment.

Prerequisites: None

Credit Hours: 4

 Offered Online

Medical Assisting (MEA)

MEA1226C Examining Room Procedures

This course introduces the student to medical office procedures. Included are studies of general pharmacology, vital signs, electrocardiography, patient examination preparation and procedures, identification and care of instruments and equipment, asepsis, sterilization, and radiology.

Prerequisites: HSC1531 and BSC1093 or BSC1094 or MEA2203

Credit Hours: 4

MEA1245C Phlebotomy Procedures

This course provides students with an opportunity to learn principles of sterile and aseptic techniques, criteria for selection of site for fingerstick and/or phlebotomy withdrawal techniques. Emphasis is placed on the proper handling and processing of laboratory specimens. This course includes four hours of AIDS/HIV training.

Prerequisites: HSC1531

Credit Hours: 4

MEA1346C Computerized Medical Office Management

This course introduces the student to computerized medical office management using a current industry standard application such as Medisoft or Medical Manager. The student will learn how to set up support files and maintain patient information. The course includes instruction in accounting, communications, insurance claims processing, practice management, office management, appointments, clinical histories, billing, and report generating.

Prerequisites: CGS1100C

Credit Hours: 4

MEA2149C Pharmacology and Drug Administration

This course introduces student to drug classifications, interactions and calculations of drugs administered to patients. The student will be instructed in the basic rules of preparation and administration of parenteral and non-parenteral medications. Understanding parts of a prescription, transcribing prescription orders and communicating with patients.

Prerequisites: HSC1531

Credit Hours: 4

MEA2235 Medical Law and Ethics

This is a study of the interrelationship of law and medicine. Emphasis is placed on law of torts, administrative agencies, and consumer protection, as well as classes of contracts, breach of contract and remedies available under the law. Special emphasis is placed on ethics for a health care delivery team member. This course includes four hours of AIDS/HIV Awareness Training and two hours of HIPAA Training.

Prerequisites: None

Credit Hours: 4

 Offered Online

MEA2260C Clinical Laboratory Procedures

This course introduces the techniques for performing routine laboratory tests and CLIA waived testing. These include physical, chemical, and microscopic examinations of urine and urine test interpretation. Also included are blood collection techniques for diagnostic testing; and other non-blood sample collection obtained in the physician's office

Prerequisites: HSC1531

Credit Hours: 4

MEA2270C Clinical Procedures for Specialties and Electrocardiogram

This course introduces the student to the clinical procedures for specialties. Included are the studies of vital signs, electrocardiography, patient examination preparation, pediatric development, and geriatric care. In addition, students will learn preparation for minor surgical procedures and radiology.

Prerequisites: HSC1531

Credit Hours: 4

MEA2803 Medical Assisting Externship

The student applies skills obtained through classroom and laboratory instruction to actual work situations. Medical Assistant students are placed with a physician's office or other suitable facility to provide a broad training experience and on-the-job performance evaluation. The student is required to complete a minimum of 160 hours externship.

Prerequisites: MEA2260C, MEA2149C, and MEA2270C

Credit Hours: 6

MEA2810 Medical Assisting Registry Review

This course is designed to provide an introductory review to prepare the student to take the national certification test for Medical Assisting. Students will be given practice (mock) exams to complete. In addition, students will be covering topics on professionalism, resume writing, thank you and cover letters, and interview techniques.

Prerequisites: MEA2260C, MEA2149C, and MEA2270C

Credit Hours: 0

HIM2270 Medical Insurance

This course offers a broad overview of various types of insurance and introduces specialized insurance forms related to the medical profession. Special emphasis is on insurance vocabulary and the proper completion of forms.

Prerequisites: HSC1531

Credit Hours: 4

Nutrition (HUN)

HUN1206 Nutrition

This course introduces the student to the basic fundamentals of nutrition, including the micro and macronutrients found in food and how the body processes them. The relationship between diet and health is also discussed. Students will learn principles of planning a balanced diet and how to make healthier food choices.

Prerequisites: None

Credit Hours: 4

🖥️ Offered Online

Philosophy (PHI)

PHI2014 Introduction to Philosophy

This course is designed as an introduction for students having no previous college work in comparative belief systems with the focus being the perennial issues of human existence. The fundamental assumptions, terminology, and schools of thought used to address issues in metaphysics, epistemology, ethics, and aesthetics will be examined. Major philosophical problems will be explored with emphasis placed on establishing relevance to personal philosophy.

Prerequisites: None

Credit Hours: 4

🖥️ Offered Online

PHI4609 Ethics

Students will become familiar with the philosophy of ethics and moral theology. Emphasis will be on applying moral theory to practical moral questions of the twentieth century.

Prerequisites: None

Credit Hours: 4

🖥️ Offered Online

Physics (PHY)

PHY1020 Physics

This course is designed to introduce the student to the laws, fundamental principles, and problem-solving methods of modern physics. This course will deal with the basic concepts that surround us in the physical world such as, mechanics, electromagnetism, waves, sound, light and astronomy.

Prerequisites: None

Credit Hours: 4

🖥️ Offered Online

Political Science (POS)

POS1041 American National Government

This course is designed to provide a comprehensive examination of the American political system. Through this course, students will become familiar with the theory, organization, principles, and functions of the American national government and various elements within the political system that work to shape policy outcomes.

Prerequisites: None
Credit Hours: 4
🖥️ Offered Online

Psychology (PSY)

PSY1012 Principles of Psychology

This course is an introduction to the field of psychology as the scientific study of the behavior of man. Specialized terminology in the field of psychology is introduced. Topics studied include the principles of behavior, the scientific method in psychology, perception, learning, thinking and problem-solving techniques.

Prerequisites: None
Credit Hours: 4
🖥️ Offered Online

Radiologic Technology (RT)

RT1100 Fundamentals of Radiologic Sciences

A course of study designed to provide an overview of the foundations in radiography and the practitioner's role in the health care delivery system. Principles, practices, and policies of the health care organization are examined and discussed, in addition to the professional responsibilities of the radiographer.

Prerequisites: None
Credit Hours: 1
🖥️ Offered Online

RT1130 Introduction to Principles of Radiographic Exposure I

This introductory course provides students with the basic knowledge of atomic structure, electricity, and electromagnetism. The foundations for radiation-producing equipment; the production of radiation; radiation safety; and radiation interaction with matter will be established.

Prerequisites: None
Credit Hours: 2

RT1140 Patient Care I

This course is the first in a two-part series that equips students with the knowledge to care for patients in the healthcare setting. Students will learn how to deliver care safely and effectively to a diverse patient population.

Prerequisites: None
Credit Hours: 2

RT1150 Radiographic Procedures I

This course is the first of four that reviews anatomy, patient positioning, and projections of essential radiography procedures. Students are concurrently enrolled in Image Analysis and Laboratory courses that correspond with the Procedures course.

Prerequisites: None
Credit Hours: 2

RT1150L Radiographic Procedures I Lab

Utilizing the non-energized laboratories, students are instructed on how to perform essential procedures. Student practice and subsequent procedure testing are included in this course.

Prerequisites: None
Credit Hours: 1

RT1160 Image Analysis I

This course prepares students to evaluate radiographic images to ensure quality assurance standards are met. Image analysis guidelines, including characteristics of optimal images; image display; and terminology will be discussed.

Prerequisites: None
Credit Hours: 1

RT1230 Introduction to Principles of Radiographic Exposure II

This course is the second in a series providing students with the basic knowledge of atomic structure, electricity, and electromagnetism. The foundations for radiation-producing equipment; the production of radiation; radiation safety; and radiation interaction with matter will be established.

Prerequisites: RT1130

Credit Hours: 2

RT1250 Radiographic Procedures II

This course is the second of four that reviews anatomy, patient positioning, and projections of essential radiography procedures. Students are concurrently enrolled in Image Analysis and Laboratory courses that correspond with the Procedures course.

Prerequisites: RT1150

Credit Hours: 2

RT1250L Radiographic Procedures II Lab

Utilizing the non-energized laboratories, students are provided the instruction to perform essential procedures. Student practice and subsequent procedure testing are included in this course.

Prerequisites: RT1150L

Credit Hours: 1

RT1260 Image Analysis II

This course prepares students to evaluate radiographic images to ensure quality assurance standards are met. Image analysis guidelines, including characteristics of optimal images; image display; and terminology will be discussed.

Prerequisites: None

Credit Hours: 1

RT1290 Clinical Education I

Content and clinical educational experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize, and evaluate concepts and theories in the performance of radiologic procedures. Students will utilize didactic concepts in the clinical setting. Through structured, sequential, competency-based clinical assignments, concepts of team practice; patient care and assessment; professional development; and competent performance of radiologic imaging and total quality management are discussed, examined, and evaluated.

Prerequisites: RT1150L and RT1250L

Credit Hours: 3

RT1330 Principles of Radiographic Exposure I

This course establishes the foundation of image production, quality, and equipment. Concepts of radiation safety and protection are reinforced.

Prerequisites: RT1130

Credit Hours: 4

RT1350 Radiographic Procedures III

This course is the third of seven that reviews anatomy, patient positioning, and projections of essential radiography procedures. This is a course of radiographic positions building on the basic procedures learned in RT1150 and RT1250.

Prerequisites: RT1250

Credit Hours: 1

RT1350L Radiographic Procedures III Lab

Utilizing the non-energized laboratories, students are provided the instruction to perform essential procedures. Student practice and subsequent procedure testing are included in this course.

Prerequisites: RT1250L

Credit Hours: 1

RT1360 Image Analysis III

This course is designed to provide additional instruction when analyzing advanced radiographic images. Students will be able to determine if a radiograph has an adequate level of contrast and density, and what factors to adjust if a radiograph is inadequately exposed. The processes for properly evaluating radiographic images with a higher degree of critical thinking will be taught. Actual images will be used for demonstration and analysis.

Prerequisites: RT1260

Credit Hours: 1

RT1390 Clinical Education II

Content and clinical educational experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize, and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential, competency-based clinical assignments concepts of team practice, patient care and assessment, professional development, and competent performance of radiologic imaging and total quality management are discussed, examined, and evaluated.

Prerequisites: RT1250L

Credit Hours: 3

RT1450 Radiographic Procedures IV

This course is the fourth of seven that reviews anatomy, patient positioning, and projections of essential radiography procedures. Students are concurrently enrolled in Image Analysis and Laboratory courses that correspond with the Procedures course.

Prerequisites: RT1350

Credit Hours: 2

RT1450L Radiographic Procedures IV Lab

Utilizing the non-energized laboratories, students are provided the instruction to perform advanced imaging procedures. Student practice and subsequent procedure testing are included in this course.

Prerequisites: RT1350L

Credit Hours: 1

RT1460 Image Analysis IV

This course prepares students to evaluate radiographic images to ensure quality assurance standards are met. Image analysis guidelines, including characteristics of optimal images; image display; and terminology will be discussed.

Prerequisites: RT1360

Credit Hours: 1

RT1490 Clinical Education III

Content and clinical educational experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize, and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential, competency-based clinical assignments concepts of team practice, patient care and assessment, professional development, and competent performance of radiologic imaging and total quality management are discussed, examined, and evaluated.

Prerequisites: RT1350L

Credit Hours: 3

RT1510 Special Procedures

This course is designed to concentrate on the advanced studies performed in the radiology department, such as procedures of the urinary and digestive systems, and those performed in the interventional suite. Students will learn about injection instrumentation, as well as contrast indications and safety.

Prerequisites: None

Credit Hours: 2

RT1520 Radiographic Pathology

Course is designed to introduce concepts related to disease and etiological consideration with emphasis on radiologic appearance of disease and impact on exposure factor selection. It also presents basic information on the pathologic process; signs and symptoms; and diagnosis and prognosis of various diseases.

Prerequisites: None

Credit Hours: 2

RT1550 Radiographic Procedures V

This course is the fifth of seven that reviews anatomy, patient positioning, and projections of essential radiography procedures. Students are concurrently enrolled in Image Analysis and Laboratory courses that correspond with the Procedures course.

Prerequisites: RT1450

Credit Hours: 2

RT1550L Radiographic Procedures V Lab

Utilizing the non-energized laboratories, students are provided the instruction to perform advanced imaging procedures. Student practice and subsequent procedure testing are included in this course.

Prerequisites: RT1450L

Credit Hours: 1

RT1560 Image Analysis V

This course prepares students to evaluate radiographic images to ensure quality assurance standards are met. Image analysis guidelines, including characteristics of optimal images; image display; and terminology will be discussed.

Prerequisites: RT1460

Credit Hours: 1

RT1590 Clinical Education IV

Content and clinical educational experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize, and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential, competency-based clinical assignments

concepts of team practice, patient care and assessment, professional development, and competent performance of radiologic imaging and total quality management are discussed, examined, and evaluated.

Prerequisites: RT1450L

Credit Hours: 4

RT1610 Advanced Imaging Modalities

This is a specialized course of study designed to enhance knowledge of radiologic imaging by introducing the student to advanced imaging modalities. Modalities that can be pursued as post- primary pathways will be discussed. Additionally, career opportunities and salaries will be explored.

Prerequisites: None

Credit Hours: 1

RT1630 Principles of Radiographic Exposure II

Content imparts an understanding of the components, principles and operation of computed radiography and digital imaging systems found in diagnostic radiology. Image acquisition, display, archiving, and retrieval are discussed. Principles of digital system quality assurance and maintenance are presented. Students will learn advanced concepts in digital imaging acquisition to enable them to apply those concepts in clinic.

Prerequisites: RT1330

Credit Hours: 4

RT1650 Radiographic Procedures VI

This course is the sixth of seven that reviews anatomy, patient positioning, and projections of essential radiography procedures. Students are concurrently enrolled in Image Analysis and Laboratory courses that correspond with the Procedures course.

Prerequisites: RT1550

Credit Hours: 2

RT1650L Radiographic Procedures VI Lab

Utilizing the non-energized laboratories, students are provided the instruction to perform advanced imaging procedures. Student practice and subsequent procedure testing are included in this course.

Prerequisites: RT1550L

Credit Hours: 1

RT1660 Image Analysis VI

This course prepares students to evaluate radiographic images to ensure quality assurance standards are met. Image analysis guidelines, including characteristics of optimal images; image display; and terminology will be discussed.

Prerequisites: RT1560

Credit Hours: 1

RT1690 Clinical Education V

Content and clinical educational experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize, and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential, competency-based clinical assignments concepts of team practice, patient care and assessment, professional development, and competent performance of radiologic imaging and total quality management are discussed, examined, and evaluated.

Prerequisites: RT1550L

Credit Hours: 4

RT1710 Mammography

This is a specialized course of study detailing the radiographic examination of the breasts and related positioning and pathology. This course will provide both a historical view of mammography, including breast anatomy and physiology, positioning, compression, technique selection, patient education, quality control, and advanced imaging, including implants and studies related to breast pathology and specialized views. The student will learn quality control, optimal functioning of dedicated mammography equipment including stereotactic needle biopsies and digital mammography.

Prerequisites: None

Credit Hours: 2

RT1711 Computed Tomography

Content provides entry-level radiography students with the principles related to computed tomography (CT) imaging

Prerequisites: None

Credit Hours: 2

RT1720 Radiation Biology and Advanced Protection

The Radiation Biology content of the course provides an overview of the principles of the interaction of radiation with living systems. Radiation effects on molecules, cells, tissues, and the body as a whole are presented. Factors affecting biological response are presented, including acute and chronic effects of radiation. The Advanced Protection content of the course is designed to present an overview of the principles of radiation protection, including the responsibilities of the radiographer for patients, personnel, and the public. Radiation health and safety requirements of federal and state regulatory agencies, accreditation agencies and healthcare organizations are incorporated.

Prerequisites: None

Credit Hours: 3

RT1750 Radiographic Procedures VII

This course is the seventh of seven that reviews anatomy, patient positioning, and projections of essential radiography procedures. Students are concurrently enrolled in Image Analysis and Laboratory courses that correspond with the Procedures course.

Prerequisites: RT1650

Credit Hours: 2

RT1750L Radiographic Procedures VII Lab

Utilizing the non-energized laboratories, students are instructed on how to perform essential procedures. Student practice and subsequent procedure testing are included in this course.

Prerequisites: RT1650L

Credit Hours: 1

RT1760 Image Analysis VII

This course prepares students to evaluate radiographic images to ensure quality assurance standards are met. Image analysis guidelines, including characteristics of optimal images; image display; and terminology will be discussed.

Prerequisites: RT1660

Credit Hours: 1

RT1790 Clinical Education VI

Content and clinical educational experiences are designed to sequentially develop, apply, critically analyze, integrate, synthesize, and evaluate concepts and theories in the performance of radiologic procedures. Through structured, sequential, competency-based clinical assignments concepts of team practice, patient care and assessment, professional development, and competent performance of radiologic imaging and total quality management are discussed, examined, and evaluated.

Prerequisites: RT1650L

Credit Hours: 4

RT1800 Registry Review

This course is a comprehensive review of radiography. It is designed to be both a review and detailed guide, with questions and answers, for students preparing to successfully pass the Registry examination administered by the ARRT. All subject areas will be reviewed and test taking strategies discussed.

Prerequisites: RT1150, RT1250, RT1330, RT1350, RT1450, RT1550, RT1630, RT1650, RT1750

Credit Hours: 0

Sociology (SYG)

SYG2000 Sociology

This is an integrated survey of the fundamental sociological concepts of culture, forms of collective behavior, community and social organization, social interaction, and social change. Students write a research paper based on some facet of sociology presented in class.

Prerequisites: None

Credit Hours: 4

🖥️ Offered Online

SYG2430 Marriage and the Family

This course will examine families in terms of structure, roles, and functions. Emphasis will be placed on understanding the family life cycle; change in motivation to marry, divorce, and remarriage; nontraditional relationships, parenting roles, and sex education.

Prerequisites: SYG2000

Credit Hours: 4

Sociology of Demography (SYD)

SYD4700 Race and Ethnic Relations

In this class, we will look at minority groups in the U.S. (racial, ethnic, cultural, and religious); discuss the relationship of minority status to socioeconomic and political stratification; compare U.S. ethnic social relations to that of minority groups in other societies and contexts; look at what anthropological and sociological theory tell us about the sociocultural processes of ethnic formation, maintenance, and interrelationship; try to understand ethnic prejudice and discrimination and their causes; and look in depth on how these "global" processes act out locally in our community

Prerequisites: None

Credit Hours: 4

 Offered Online

Speech Communication (SPC)

SPC1017 Oral Communication

This course is designed to equip the student with better speaking skills, whether in business, social, or civic life. The student will develop the ability to speak clearly and effectively; to think and express ideas effectively; and to plan, compose and deliver speeches of various kinds. Special consideration is placed on purpose, scope and audience analysis and adaptation.

Prerequisites: None

Credit Hours: 4

Statistics (STA)

STA2014 Statistics

This course examines the essential issues and methods used to employ statistical techniques. The unique considerations of describing, summarizing, and analyzing statistical data are presented.

Prerequisites: MTB1103 or MAT1030 or MGF1106 or MTB1344

Credit Hours: 4

 Offered Online

Student Life Skills (SLS)

SLS1201 Personal Development

This course is designed to give students exposure to concepts and skills that can help the student make changes in their academic performance and their lives. These lessons are facilitated towards student issues, challenges while attending school and transitioning long-term career goals for success upon graduation.

Prerequisites: None

Credit Hours: 4

 Offered Online

SLS2301 Professional Strategies

This course prepares each student for obtaining career positions through proven professional strategies. Resume writing, interviewing techniques, job lead researching, communication skills and career planning are studied in detail. The application of the principles taught in this innovative course provides invaluable tools for professional career planning.

Prerequisites: None

Credit Hours: 4

 Offered Online

Surgical Technology (STS)

STS1021 Surgical Observation

This course provides the student with an opportunity to experience the clinical setting as a prelude to the didactic program. Students will spend time weekly within the operating room observing a wide variety of surgical procedures. Prior to the initial extern placement the students will receive training in CPR, HIPAA compliance, and patient confidentiality.

Prerequisites: None

Credit Hours: 1

STS1302 Introduction to Surgical Technology

This course focuses on the basic fundamentals of Surgical Technology by introducing students to the surgical arena. Key concepts include scope of practice, physical environment, hospital organization, standards of conduct, professionalism, interpersonal communication, and teamwork skills.

Prerequisites: None

Credit Hours: 4

STS1307C Operating Room Technique I - Instrumentation

This course will focus on the fundamental concepts of surgical technology in regards to instrumentation. This course focuses specifically on instrument classification, instrument names, instrument parts, instrument materials, instrument finishes and the uses of the instrumentation themselves. During the course the student will have the opportunity to learn the relationship between instrument type and usage. This course also focuses on the function, assembly, and care of specialty and accessory equipment used in a surgical setting. Finally, the course will review the various supplies used in the operating room.

Prerequisites: HSC1531

Credit Hours: 2

STS1304C Operating Room Technique II

This course will focus on the fundamental concepts of surgical technology. Topics covered will include equipment and supplies used during surgery, instrumentation, patient positioning, proper techniques for setting up a surgical case, and circulating the sterile field. Key concepts include surgical asepsis, consent, case selection, instrumentation, room preparation, preparation of the sterile field, performing the surgical count, and monitoring the sterile field. The student will also learn the importance of the consent and preference card.

Prerequisites: STS1307C

Credit Hours: 4

STS1340C Surgical Pharmacology and Aseptic Technique

This course focuses on the principles of asepsis and sterile technique, as well as the medications used in the surgical setting. Key concepts include surgical conscience, disinfection, sterilization, hemostasis, emergency situations, radiological and chemical injuries, biological warfare, basic principles of pharmacology as it relates the operating room and the fundamental principles of asepsis and the practice of sterile technique.

Prerequisites: STS1302 or HSC1531

Corequisite: STS1304C

Credit Hours: 4

STS2270 Clinical Aspects I

This course serves as the first of three externship experiences, with a focus on the integration of the theory and practical skills applied to the clinical setting. Students become familiarized with facilities, procedures, and practices of the working surgical environment. Students observe and begin participating in a wide variety of surgical procedures. Students are expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures where the student scrubbed in. All scrubbed cases are applied towards the 120 documented cases required for successful completion of the program.

Prerequisites: STS2326 and STS1304C

Credit Hours: 8

STS2271 Clinical Aspects II

This course serves as the second of three externship experiences, with a focus on the integration of the theory and practical skills applied to the clinical setting. Students become familiarized with facilities, procedures, and practices of the working surgical environment. Students observe and begin participating in general, genitourinary, gynecologic, otorhinolaryngologic, ophthalmic, oral, and maxillofacial, plastic and reconstructive, neurologic, and orthopedic procedures. Students are expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures where the student scrubbed in. All scrubbed cases are applied towards the 120 documented cases required for successful completion of the program.

Prerequisites: STS2270

Credit Hours: 8

STS2272 Clinical Aspects III

This is the final of three externship experiences, with a focus on the integration of the theory and practical skills applied to the clinical setting. The student is expected to demonstrate the required skills of the surgical technology profession with little to no supervision. Students are expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures where the student scrubbed in. All scrubbed cases are applied towards the 120 documented cases required for successful completion of the program.

Prerequisites: STS2271

Credit Hours: 8

STS2325C Surgical Procedures I

This course introduces the student to the specific steps during basic, intermediate, and advanced surgical procedures. Topics covered will include anatomy, etiology and the disease processes necessitating surgical intervention in addition to the individual procedures. Key concepts include diagnostic examinations, wound healing, sutures, needles, and stapling devices, surgical procedures covering: general, obstetrics and gynecology, ophthalmic, otorhinolaryngologic, oral and maxillofacial, and genitourinary surgery. The student will gain a better understanding of relating the pathological disease to the course of surgical intervention.

Prerequisites: STS1302, HSC1531, BSC1085, BSC1086, BSC1085L, and BSC1086L

Credit Hours: 4

STS2326 Surgical Procedures II

This course will focus on the fundamental concepts of surgical technology. Topics covered will include floor plan design, the various support departments, equipment, and supplies used during surgery, instrumentation, patient positioning, proper techniques for setting up a surgical case, and circulating the sterile field. Key concepts include surgical asepsis, consent, and case selection, instrumentation, and room preparation, preparation of the sterile field, performing the surgical count, and monitoring the sterile field. Students perform “mock surgery” and will demonstrate surgical procedure set ups for Orthopedic, Neuro, Plastic, Vascular, and Cardio-thoracic surgery.

Prerequisites: STS2325C

Credit Hours: 4

STS2936 Exam Prep

Upon completion of this course, the student shall be ready to attempt the national CST exam. This course will provide the student with the necessary review in order to give the best possibility of successfully attempting the national certifying exam. Materials covered will include a comprehensive review of all body systems, instrumentation, procedural methods, supplies, medications, as well as test-taking techniques.

Prerequisites: STS2271

Credit Hours: 1

Inserts

Tuition and Fees

Effective Fall Term, September 2022

Tuition

Degree Programs

Tuition is charged per quarter based on a student's credit load defined below:

Student Status	Number of Credits	Tuition
Full-Time	12 or more Credits	\$6,080.00
Part-Time	6 to 11 Credits	\$4,000.00
Per Credit	Under 5 Credits	\$500.00

Multi-Quarter Diploma Programs

Tuition is charged per quarter based on a student's credit load defined below:

Student Status	Number of Credits	Tuition
Full-Time	12 or more Credits	\$3,000.00
Part-Time	6 to 11 Credits	\$1,950.00
Per Credit	Under 5 Credits	\$250.00

One Quarter Diploma Programs (EMT)

Tuition is \$1,950 for the full program.

Fees

Name	Occurrence	Amount	Additional Information
Registration	One-time	\$100.00	Hollywood Campus
Technology	One-Time	\$375.00	Hollywood Campus
HESI Exam	One-Time	\$85.00	Radiologic Technology Program
NBSTSA Exam	One-Time	\$250.00	Surgical Technology Program
VTNE Exam	One-Time	\$350.00	Veterinary Technology Program

Additional Expenses

- Textbooks: Students are required to purchase all textbooks on their own. The cost is estimated at \$1,850.00 but varies by program.
- Distance Education Courses: No additional fees are associated with fully distance education courses.
- GPS Enabled Device: Students are required to possess a GPS enabled device with internet access to complete academic and administrative requirements.
- Uniforms: Students are required to purchase school specific uniforms from a third-party vendor. The minimum cost is estimated at \$100.00 but varies based on the total amount of items purchased by the student.
- Clinical Clearance: Students are required to be medically cleared by a private physician and have proof of acceptable current health insurance coverage as part of the clinical clearance process. The clinical clearance process is performed through a third-party vendor at no expense to the student.
